
PREAMBLE

Instruction For Use of Documentation

The total required information provided to design and build an Aloft Hotel by Marriott is contained in the criteria documents identified below which relay standardized public space, guestrooms, guestroom corridors, back of house and building site + exterior. Eclectic is the decor package for the Public Space and Guestrooms.

Comprehensive Criteria Documents for The Aloft Hotel by Marriott are:

1. Design Standards
2. Design Guideline Drawings
3. Specifications as indicated below:
 - A. Building Product Manual (BPM)**
 - Volume 1 - Building Site + Exterior
 - Volume 2 - Public Space
 - Volume 3 - Guestrooms**
 - Volume 4 - Food Service & Guest Laundry Equipment
 - B. Interior Signage Specifications
 - C. Exterior Signage Specifications
 - E. Interior Decor Specifications Manual

Description Follows:

1. Design Standards provide a written macro view of the overall design elements required for Aloft Hotel by Marriott.
2. The Design Guideline Drawings - provide more specific design direction via drawings to supplement the Design Standards.
3. The Interior Décor Spec Manual lists items required that are generally referred to as Furniture, Fixture, & Equipment or FF&E items. These items and the accepted suppliers listed, have been contracted by Marriott and can be supplied through Marriott's procurement division.
4. The Building Product Manual (BPM) lists all the finishes required for the building and the building products that are typically installed and supplied by the General Contractor. This document must be used in conjunction with the drawings for the contractor supplied items as specific dimensions and criteria are referenced in both documents. Because of the high quality of design expected for Aloft by Marriott, Marriott has specified acceptable suppliers who have worked closely with Marriott on the initial Aloft Design.

All of these documents are integral elements of the complete design and construction information. The project architect is responsible for incorporating all components of the criteria documents in the development of any Aloft Hotels by Marriott Project.

Use of Drawings

Building Product Manual (BPM) mark numbers and Interior Décor Specification Manual x-ref numbers are shown on the Design Guideline Drawings as a base number only. Refer to the BPM and Interior Decor Specification Manual for mark numbers and x-ref numbers plus a suffix for product and FFE alternates and additional acceptable manufacturers.

* In the BPM multiple acceptable manufacturers are indicated by a suffix "XX", the abbreviation of the manufacturers name. (I.e. PL-101-MO = MOEN). If only one acceptable manufacturer is listed then there is no suffix after the base mark number.

* In the BPM alternate materials are indicated by a suffix of "AX" following the base mark number. (i.e. PL-101-A1 [when only one manufacturer is listed] or PL-101-MO-A1 [when additional manufacturers are included])

General Compliance Requirements

The Owner's / Franchisee's Consulting Design Professional shall be responsible for verifying and complying with all applicable laws, covenants, codes, ordinances, rules, regulations, restrictions, etc. The Design Professional shall pay close attention to the requirements of the federal accessibility law, Americans with Disability Act (ADA), local and state accessibility regulations, and the applicable fire, life safety requirements. It is also the responsibility of each hotel owner to ensure that all products have been adjusted in dimension, quantity and hand suit the specific site conditions.

GENERAL NOTES

1. All images, photographs, renderings of specified items contained in this specification package area for general design intent and reference only.
2. Refer to the preamble for terms, conditions, abbreviations, definitions, responsibilities, and general guidelines for all specified items.
3. Refer to drawings for exact locations and/or mounting heights of furniture, fixtures, and equipment. In the event of a discrepancy between drawings and specifications, please contact Marriott International immediately for written clarification.
4. Submittal of shop drawings & finish samples to Marriott International for review and written approval is required for any item supplied by a vendor other than the specified source.
5. Design Documentation firm to verify that all flammability requirements are met for property location. The requirements noted within this specification are general and local flammability may be more stringent.
6. Install all products and finishes per manufacturer's recommendations.
7. Final quantity of items to be based on final plans, room quantity, and final matrix.

Plumbing Fixture and Residential Appliances - General Notes

1. All plumbing fixtures and residential appliances to be of contract quality and suitable for commercial use.
2. Site measurements required.

ABBREVIATIONS

General Schedule Abbreviations:

ADA	Americans with Disabilities Act
AFF	Above Finish Floor

Cutsheets

DESCRIPTION

SNLED Base is a narrow LED striplight series. This high quality luminaire is dedicated to the latest solid state lighting and electronic driver technology for optimal performance and energy efficiency.

The small size of the SNLED makes it an ideal choice for size restricted architectural applications. The SNLED Series can be the illumination solution in commercial, industrial, retail and residential applications. Fixtures can be used in storage/utility areas, coves, display cases, shops, tasks and general area lighting.

SPECIFICATION FEATURES

Construction

Channel is die formed cold rolled steel with numerous KOs for ease of installation. Groove for Tong Hanger. End plate quickly converts to snap-in channel connector for continuous row alignment. Channel/wireway cover secured with sheet metal screws.

Controls

Equipped standard with a 0-10V continuous dimming driver that works with any standard 0-10V control/dimmer. Dimming range is 10% to 100%; varies by control device. Combine with energysaving products like occupancy sensors, day lighting controls, and lighting relay panels to maximize energy savings. For motion control, reference options for both end and middle of the row applications.

Electrical

Long-Life LED system coupled with electronic (120-277V) driver to deliver optimal lighting performance. LED's available in 3000K, 3500K, 4000K, or 5000K with a CRI ≥ 85. Other color temperatures are available. Projected life is 60,000+ hours at 70% lumen output based on TM21. This driver is 0-10V dimming standard.

Emergency Battery Pack Option

Optional 120v-277v integral emergency battery pack is available in 7-watts or 14-watts to meet critical life-safety lighting requirements. The 90-minute batteries provide constant power to the LED system, ensuring code-compliance. A test switch/indicator button can be tested safely from the ground using a laser pointer, while the patented EZ Key prevents accidental discharge of the battery during construction. See ordering information for details.

Installation

Fixture may be surface, pendant, or stem mounted. See accessories below (order separately).

Compliance

Components are UL recognized. Indoor luminaires are cULus listed for 40° C ambient environments, RoHS compliant, damp location listed, and comply with IESNA LM-79. LEDs comply with LM-80 standards. DesignLights Consortium® Qualified. Refer to www.designlights.org Qualified Products List under Family Models for details.

Warranty

Five-year warranty.

Revision Date:

SAMPLE NUMBER: 4SNLED-LD4-44SL-UNV-L840-U

NOTES: ⁽¹⁾ 2 ft. and 4 ft. only. ⁽²⁾ Nominal lumen values. ⁽³⁾ Two driver required. ⁽⁴⁾ 4 ft. and 8 ft. only. ⁽⁵⁾ Motion Sensor offers dimmability. ⁽⁶⁾ For a complete listing of Fifth Light Technology products and other solutions from Cooper Controls, visit www.coopercontrol.com. ⁽⁷⁾ With integral test switch/indicator/laser test. For approximate delivered lumens multiply the lumens per watt of the desired fixture by the wattage of the emergency battery pack (100 lm/W x 7=700 lumens). IES-format photometry for luminaire under emergency operation available. ⁽⁸⁾ 4 ft. only. ⁽⁹⁾ DesignLights Consortium™ Qualified and classified for DLC Standard (all lumen packages), refer to www.designlights.org for details. ⁽¹⁰⁾ 4800 lumen and above on 4 ft. and 9600 lumen and above on 8 ft. ⁽¹¹⁾ HCD driver option requires two drivers for 7200 - 11,200 lumens. Not available for 13,000 lumens and above. ⁽¹²⁾ Not currently listed on DLC QPL. ⁽¹³⁾ Used to transfer fixture to secondary power source for life-safety operation. When used with a dimming fixture, two devices are required to ensure control is disabled while operating under emergency power. ⁽¹⁴⁾ 8 ft. only.

Specifications & dimensions subject to change without notice. Consult your Eaton Representative for availability and ordering information.

DESCRIPTION

High efficacy low profile track fixture ideal for accent and display lighting applications. Featuring die cast construction with a simple low profile design. These lampholders are perfect for those applications where performance is required from a discreet source.

SPECIFICATION FEATURES

Quick Lock Adapter*

Attaches electrically and mechanically anywhere along the track. Includes discrete locking tab that locks the luminaire on the track and allows for easy removal and repositioning.

Heat Sink

Aluminum die-cast heat sink provides exceptional thermal management to yield 70% lumen maintenance after 50,000 hours of operation.

LED Light Engine

Chip on board LED provides a uniform source with high efficiency and no pixilation. Available in 90 CRI minimum, R9 greater than 50 and color accuracy within 3 SDCM provide color accuracy and uniformity.

Optics

Configurable optics allow for the reflectors to be changed in the field to adjust to the current lighting need. Available in spot, flood and narrow flood distributions.

Media

Precision designed trim ring contains unique teeth locking mechanism, and can accept up to 2 pieces of standard media. The 3" diameter fixture accepts PAR 20 standard media. The 4" diameter fixture accepts PAR 30 standard media.

Luminaire Arm

Arm allows the lamp housing tilt to adjust $\pm 180^\circ$ vertically and $\pm 350^\circ$ horizontally. This enables a clean look while providing full aiming capabilities.

Dimming

TRIAC, ELV or Phasecut

- Designed for continuous dimming capability to nominally 5% with many 120V Leading Edge (LE) and Trailing Edge (TE) Phase Control Dimmers. (Dimmers with low end trim adjustment offer greater assurance of achieving 5% level.)
- Consult dimmer manufacturer for compatibility and conditions of use.

Warranty

Five year limited warranty, consult website for details.
www.eaton.com/lighting/legal.

Drivers

3" fixtures (12W and 21W) contain integral 120V, 50/60 Hz constant current driver that provides noise free operation. 4" fixtures (35W) contain 120V 50/60Hz constant current driver that provides noise free operation.

Compliance

cULus listed / certified for use with Halo Single Circuit Power-Trac, LazerTrack, and Global [See Footnote #1 below Ordering Information.] TEK/HTEK track. NSF non-food zone compliant. EMI/RFI emissions per FCC 47CFR Part 15 Class B consumer limits. Contains no mercury or lead and RoHS compliant. Photometric testing in accordance with IES LM-79-08. Lumen maintenance projections in accordance with IES LM-80-08 and TM-21-11.

HALO LED ICAT HOUSING for NEW CONSTRUCTION

The H750ICAT is a dedicated LED new construction housing to be used with designated HALO LED modules. The H750ICAT is designed for insulated ceilings and can be in direct contact with ceiling insulation*. This AIR-TITE housing design prevents airflow between conditioned and unconditioned spaces and saves on both heating and air conditioning costs. The LED connector system provides high efficacy code compliance when used with designated HALO LED modules and trims.

H750ICAT-ML5606927-596WB ALR-02

ALOFT

Revision Date: 9/21/18

Kathleen Kenny, National Accounts, 678-447-5208, kathleenkenny@eaton.com

DESIGN FEATURES

Housings

Aluminum construction for greater heat dissipation. H750 ICAT housing is gasketed to prevent airflow from heated or air conditioned spaces.

Plaster Frame

Galvanized steel frame. Housing adjusts in plaster frame to accommodate up to 1" ceiling thickness. Regressed locking screw for securing hanger bars. Cutouts included for easily crimping hanger bars in position

Slide-N-Side™ Junction Box

- Positioned to accommodate straight conduit runs.
- Seven 1/2" trade size conduit knockouts with true pry-out slots.
- Slide-N-Side wire traps allow non metallic sheathed cable to be installed without tools and without removing knockouts.
- Allows wiring connections to be made outside the box.
- Simply insert the cable directly into the trap after connections are made.
- Accommodates the following standard non-metallic sheathed cable type:
 - U.S. #14/2, #14/3, #12/2, #12/3
 - Canada: #14/2, #14/3, #12/2

GOT NAIL! Pass -N-Thru™ Bar Hangers

Bar Hanger features include

- Pre-installed nail easily installs in regular lumber, engineered lumber and laminated beams.
- Safety and Guidance system prevents snagging, ensures smooth, straight nail penetration and allows bar hangers to be easily removed if necessary
- Automatic leveling flange aligns the housing and allows holding the housing in place with one hand while driving nails.
- Housing can be positioned at any point within 24" joist spans
- Score lines allow tool-free shortening for 12" joists and bar hangers do not need to be removed for shortening.
- Bar hangers may be repositioned 90° on plaster frame
- Integral T-bar clip snaps onto T-bars – no additional clips are required.

LED Module Connection

Halo LED modules simply install with a plug-in 120V-277V rated line voltage wiring connector (UL and CSA Listed Luminaire Disconnect). This non-screw-base connection preserves the high efficacy rating and prevents use of low efficacy incandescent sources (see LED Module specifications).

Caution

Connection is rated for 120V and 277V input. Installer must verify LED module voltage is compatible with the applicable voltage input. If uncertain, consult a qualified electrician.

Labels

- UL/cUL Listed 1598 Luminaire
- CE Marking - "Conformité Européenne" conformity with the Council of European Communities Directives, meeting internationally recognized compliance when used with ML56 Series LED modules
- UL/cUL Listed for Feed Through
- UL/cUL Listed for Damp Location
- UL/cUL Listed for Wet Location with select trims
- UL/cUL Listed for direct contact with insulation and combustible material*
- Rated for 20W maximum

Qualification

May be used with qualified Halo LED modules and designated trims for High Efficacy Luminaire Compliance:

- State of California Title 24
- International Energy Conservation Code (IECC)
- Washington State Energy Code
- New York State Energy Conservation Construction Code - AIR-TITE™ Compliant
- Certified under ASTM-E283 standard for air-tight construction

H750ICAT

6" New Construction IC AIR-TITE™ Housing For Halo LED Modules and Trims

- ML56 Series
- RL56 Series
- RA56 Series

High Efficacy LED Housing

FOR USE IN INSULATED CEILINGS FOR DIRECT CONTACT WITH INSULATION*

Qualified and compliant with select trims. Refer to ENERGY STAR® Qualified Products List and CEC (T24) Appliance Database for listings.

* Not to be used in direct contact with spray foam insulation.

DESCRIPTION

596 Series LED Trim – 5-Inch Aperture Shallow Baffle - is an integral element in the Halo ML56 LED Downlighting System. ML56 LED System is a series of modular LED Light Modules for use with dedicated 5" or 6" ML56 LED trims. The ML56 LED trims in 5" and 6" aperture sizes are designed to fit Halo, All-Pro and others 5" or 6" recessed housings. The ML56 system is suitable for new construction, remodel or retrofit installation.

SPECIFICATION FEATURES

596 Series LED trim is a 5-inch aperture shallow baffle for use in shallow recessed housings. 596 Series shallow baffle is offered in White (Matte White) baffle and flange. The shallow trim height provides capability for installation into both shallow and standard 5-inch aperture recessed housings (refer to ML56 LED Light Module specifications for details).

- For use with ML56 Series LED light modules
- Shallow baffle with self-flange
- Shallow height allows use in shallow or standard housings
- Wet location shower listed with ML56 LED Light Modules
- Torsion springs pull trim and light module tight to ceiling
- ML56 downlight trims and modules make any housing AIR-TITE™ (ASTM E283)
- For use with ML56 Series LED light modules

RECESSED LED Steplight Trimless & Trimmed for Drywall Installation

Non-Dim
Housing

Dim
Housing

*Ideal placement is 8" to 12"
from the bottom edge of
fixture opening to the floor.*

System

Versatile little steplight that has minimal intrusion into the architectural space. Units can be ordered in back-to-back configurations and with a full lensed trim, gasketed for Hospitals or Trimless. The Trimless design allows the wall finish to end right at the edge of the lighted opening.

TYPE:

JOB:

RECESSED LED Steplight
Trimless & Trimmed for Drywall Installation

Specifications

Small, recessed LED steplight for trimless finish. The design does not require a trim to finish the wall opening. A flange is provided around the perimeter of the fixture to allow for 5/8" gypsum board construction. The shallow fixture may be recessed into a standard 2" x 4" stud wall. By lining the "wall recess" with gypsum, the wall installation may also be modified to maintain a one hour fire rating. (SEE INSTRUCTIONS)

Fixture aperture allows the wall finish to end right at the edge of the lighted opening for a clean construction appearance. TGIC polyester powder coated housing is made of 22 gauge CRS. The 2 or 4 watt fixture has a formed diffuse silver reflector of high purity aluminum (99.9%) with a 97% reflectance. The indirect design provides a soft asymmetric wash of light on the floor. It utilizes the Osram HF² Narrow Stick LED modules that are 85+ CRI and rated 50,000 hour lamp life. Lexan lens is spring loaded within the fixture.

Tested to IES LM79 & LM80 standards. These extremely efficient fixtures have a Luminaire Efficacy Rating (LER) of 33 to 38 depending on the LED module.

c/CSA/us Damp Location Listed, IC Rated - Made in the USA

**RECESSED LED Steplight
Trimless & Trimmed for Drywall Installation**

Specifications

Small, recessed LED steplight for trimless finish. The design does not require a trim to finish the wall opening. A flange is provided around the perimeter of the fixture to allow for (2) 5/8" gypsum board construction. The shallow fixture may be recessed into a standard 2" x 4" stud wall. By lining the "wall recess" with two layers of gypsum, this fixture may be installed to maintain a two-hour fire rating. (SEE INSTRUCTIONS & CONFIRM w/ LOCAL INSPECTOR)

Fixture aperture allows the wall finish to end right at the edge of the lighted opening for a clean construction appearance. TGIC polyester powder coated housing is made of 22 gauge CRS. The 2 or 4 watt fixture has a formed diffuse silver reflector of high purity aluminum (99.9%) with a 97% reflectance. The indirect design provides a soft asymmetric wash of light on the floor. Full LED Nightlight — 7737

Specification:

- Fully dimmable nightlight with selectable guide light operating mode.
- NOTE - A neutral connection is required in the wall box where the dimmable nightlight is to be installed.

Description:

- The LED nightlight turns ON automatically when ambient light level in the room is low.
- The LED nightlight turns OFF automatically when the ambient light level in the room is high.
- The nightlight can be dimmed to suit the desired brightness.

Operation Instructions (see FIG. 1)

NIGHTLIGHT MODE (Default dimmable nightlight mode)

- The nightlight turns ON automatically when ambient light level in the room is low.
- The nightlight turns OFF automatically when the ambient light level in the room is high.
- Adjustable brightness level:
 - When the nightlight is ON, press and hold the light lens to dim the nightlight to the desired brightness.
 - Release when the desired brightness level is reached. Press and hold again to brighten.
 - The selected brightness level is the PRESET level and will be stored in the nightlight.
 - The nightlight will automatically turn on to this level every time the ambient light level is low.
- Press the light lens momentarily to turn the nightlight OFF. This will disable the nightlight and the nightlight will remain OFF regardless of changes in the ambient light level.
- Press the light lens momentarily to turn the nightlight ON. This will enable the nightlight.
 - The nightlight will turn ON momentarily, blink, and then turn OFF if the ambient light level is high.
 - The nightlight will turn ON and stay ON at the PRESET light level if the ambient light level is low.

GUIDE LIGHT MODE (selectable mode; allows the nightlight to remain lit regardless of light level)

- To switch to guide light mode, press and hold the light lens for 10 seconds when the nightlight is OFF. Release the light lens when the LED flashes. Follow the same step to change back to nightlight mode.
- Adjustable brightness level:
 - The light can be dimmed to one of the 3 levels. (High, Medium and Low).
 - Press the light lens momentarily to toggle the light brightness levels between ON - Medium - Low - OFF. The device stores the last selected light level as the PRESET level.
- The night light can be turned ON and OFF at the preset brightness level using an external switch. (Refer Figure 3.)
- In this mode, the ambient light level sensor is disabled.

INSTALLATION INSTRUCTIONS

WARNING:

- Turn OFF circuit breaker or remove fuse(s) and verify that power is off before wiring.
- Never wire any electrical device with power turned on. Wiring the device with the power on may cause permanent damage to the device and void the warranty.
- If you are unsure about any part of these instructions, or if the wiring does not match the descriptions given, you should call a qualified electrician.

CAUTION:

- Risk of fire:** This product must be installed in accordance with the applicable installations code by a person familiar with the construction and operation of the product and hazards involved.
- Must be installed and used in accordance with all applicable electrical codes.
- If a bare copper or green ground connection is not available in the wallbox, contact a qualified electrician for installation.
- Do not install without proper ground connections.
- Do not exceed maximum device ratings.
- Use only #14 or #12 copper wire with these devices.
- The device needs a neutral wire for the nightlight to operate.
- Refer to wiring diagram for more details.

Connect per FIG. 2 or FIG. 3.

- Connect the Ground (Green) wire to the green screw.
- Connect the HOT (Black) wire to the black screw or red wire to black screw if the nightlight is on a switched circuit.
- Connect the NEUTRAL (White) wire to the silver screw. This is required for the nightlight to work.

Mount and Test the Device

- Make sure that the word "TOP" is face up on the nightlight.
- Attach the device to the wall box with mounting screws.
- Restore power and the circuit breaker or fuse.
- Test if the nightlight turns ON momentarily by pressing the light lens. Nightlight will turn ON momentarily, flash and turn OFF if the ambient light level is above the threshold. Refer to the **Troubleshooting Section** if the device does not work properly.
- Attach the wall plate, test the device again. Installation is complete.

Troubleshooting

Nightlight turns ON when light lens is pressed manually, but does not remain ON.

Nightlight does not turn ON

Ambient light level is too high for the nightlight to remain ON. (Nightlight is functioning properly)

- The nightlight may be dimmed to a low value and hence not visible. Press and hold light lens release, press and hold again to dim UP the nightlight.
- Check connections to HOT and NEUTRAL terminals per instructions.
- Nightlight may be controlled by a external switch , which may be OFF.

FIG. 2:

FIG. 3:

Veilleuse Entièrement à Diode — 7737

Caractéristiques techniques :

- Veilleuse à gradation complète avec mode de fonctionnement en mire de guidage lumineuse sélectionnable.
- REMARQUE – un raccordement au neutre est nécessaire dans la boîte murale ou on désire installer la veilleuse.

Description :

- La veilleuse à diode s'allume automatiquement quand l'intensité de la lumière ambiante dans la pièce est faible.
- La veilleuse à diode s'éteint automatiquement quand l'intensité de la lumière ambiante dans la pièce est élevée.
- L'intensité lumineuse de la veilleuse peut être atténuée au niveau désiré.

Consignes d'utilisation (voir FIG. 1)

MODE VEILLEUSE DE NUIT (Mode de défaut, veilleuse de nuit à gradation)

- La veilleuse s'allume automatiquement quand l'intensité de la lumière ambiante dans la pièce est faible.
- La veilleuse s'éteint automatiquement quand l'intensité de la lumière ambiante dans la pièce est élevée.
- Niveau d'éclairage réglable :
 - Quand la veilleuse est allumée, appuyez sur la lentille de la lampe et maintenez-la enfoncée pour réduire l'intensité de la veilleuse au niveau désiré.
 - Relâchez-la quand le niveau désiré est atteint. Appuyez à nouveau et maintenez enfoncée pour accroître l'intensité lumineuse.
 - Le niveau d'éclairage choisi est le niveau PRÉRÉGLÉ qui sera sauvegardé dans la veilleuse.
 - La veilleuse s'allumera automatiquement à ce niveau d'éclairage à chaque fois que la lumière ambiante est faible.
- Appuyez momentanément sur la lentille de la veilleuse pour éteindre celle-ci. Ceci désactive la veilleuse et elle reste éteinte quels que soient les changements dans le niveau d'éclairage ambiant.

- Appuyez momentanément sur la lentille de la veilleuse pour allumer celle-ci. Ceci active la veilleuse.
 - La veilleuse s'allumera momentanément, clignotera puis s'éteindra si le niveau d'éclairage ambiant est élevé.
 - La veilleuse s'allumera et restera allumée au niveau d'éclairage PRÉRÉGLÉ si la lumière ambiante est faible.

MODE DE MIRE DE GUIDAGE (mode sélectionnable; permet à la veilleuse de rester allumée quel que soit le niveau d'éclairage)

- Pour passer en mode de mire de guidage lumineuse, appuyez sur la lentille de la veilleuse et maintenez-la enfoncée pendant 10 secondes quand la veilleuse est éteinte. Relâchez-la quand la diode clignote. Suivez la même méthode pour retourner au mode de veilleuse.
- Niveau d'éclairage réglable :
 - La lampe peut être atténuée à un de ces 3 niveaux : maxi, moyen, faible.
 - Appuyez momentanément sur la lentille de la veilleuse pour basculer le niveau entre maxi, moyen, faible et éteint. L'appareil sauvegarde le dernier niveau d'éclairage choisi tant que niveau PRÉRÉGLÉ.
- La veilleuse peut être allumée ou éteinte au niveau d'éclairage préréglé à l'aide d'un interrupteur externe. (Voir figure 3.)
- Dans ce mode, le capteur d'éclairage ambiant est désactivé.

INSTRUCTIONS D'INSTALLATION

AVERTISSEMENT :

- Coupez le courant au disjoncteur ou enlevez le ou les fusibles et contrôlez que le courant est coupé avant de câbler.
- Ne câblez jamais d'appareillage électrique sous tension. Cela risque de causer des dégâts permanents à l'appareil et d'annuler la garantie.
- Si vous n'êtes pas sûr de bien comprendre ces instructions même en partie ou si votre câblage ne correspond pas aux descriptions qui sont données, il faut faire appel à un électricien qualifié.

ATTENTION :

- **Risque d'incendie** : ce produit doit être installé selon les règlements d'installation en vigueur et par quelqu'un qui connaît l'agencement et le fonctionnement du produit et les dangers qu'il pose.
- Doit être installé et utilisé selon tous les codes électriques en vigueur.
- S'il ne se trouve pas de raccordement à un fil de terre en cuivre nu ou de couleur verte dans la boîte murale, il faut contacter un électricien qualifié pour l'installation.
- N'installez pas cet appareil sans effectuer correctement le raccordement à la terre.
- Ne dépassez pas les valeurs nominales maximales de cet appareil.
- N'utilisez que des fils en cuivre n° 14 ou n° 12 avec ces appareils.
- Cet appareil doit être raccordé au neutre pour que la veilleuse fonctionne.
- Reportez-vous au schéma de câblage pour de plus amples renseignements.

Raccordez selon la FIG. 2 ou la FIG. 3

- Raccordez le fil de terre (vert) sur la vis verte.
- Raccordez le fil de PHASE (noir) sur la vis noire ou, si la veilleuse est sur un circuit muni d'un interrupteur, le fil rouge sur la vis noire.
- Raccordez le fil de NEUTRE (blanc) sur la vis de couleur argent. Ceci est nécessaire pour que la veilleuse fonctionne.

Montage et essai de l'appareil

- Assurez-vous que le mot "TOP" qui se trouve sur la veilleuse est dirigé vers le haut.
- Fixez l'appareil à la boîte murale à l'aide des vis de montage.
- Remettez le courant au disjoncteur ou au fusible.
- Contrôlez que la veilleuse s'allume momentanément en appuyant sur sa lentille. La veilleuse s'allumera momentanément, clignotera puis s'éteindra si le niveau d'éclairage ambiant est supérieur au seuil. Reportez-vous au chapitre Dépannage si l'appareil ne fonctionne pas correctement.
- Fixez la plaque murale, essayez à nouveau l'appareil. L'installation est terminée.

Dépannage

La veilleuse s'allume quand on appuie manuellement sur sa lentille mais elle ne reste pas allumée.

La veilleuse ne s'allume pas

L'éclairage ambiant est trop élevé pour que la veilleuse reste allumée. (la veilleuse fonctionne normalement)

- Il se peut que la veilleuse ait été atténuée à un niveau très faible et qu'elle soit ainsi invisible. Appuyez sur la lentille de la veilleuse et maintenez-la enfoncée, relâchez-la puis appuyez à nouveau dessus et maintenez-la enfoncée pour ACCROÏTRE l'intensité lumineuse.
- Contrôlez que les raccordements sur les bornes de PHASE et de NEUTRE sont conformes aux consignes.
- Il se peut que la veilleuse soit commandée par un interrupteur externe, lequel est peut-être éteint.

Importado por (si se vende en México): Carr. Tlalnepantla - Cuautitlan Km 17.8 s/n • Col. Villa Jardín esp. Cerrada 8 de Mayo • Cuautitlan, Mexico CP 54800 • 52-55-5899-9190

Luz Nocturna LED — 7737

Especificaciones:

- Luz nocturna regulable con modo alterno de funcionamiento como luz guía seleccionable.
- NOTA: Se necesita una conexión a neutro en la caja de pared donde se va a instalar la luz nocturna regulable.

Descripción:

- La luz nocturna LED se enciende automáticamente cuando el nivel de luz ambiental en la habitación es bajo.
- La luz nocturna LED se apaga automáticamente cuando el nivel de luz ambiental en la habitación es alto.
- La luz nocturna puede regularse a la luminosidad deseada.

Instrucciones de funcionamiento (véase la FIG. 1)

MODO DE LUZ NOCTURNA (Modo predeterminado: luz nocturna regulable)

- La luz nocturna se enciende automáticamente cuando el nivel de luz ambiental en la habitación es bajo.
- La luz nocturna se apaga automáticamente cuando el nivel de luz ambiental en la habitación es alto.
- Nivel de luminosidad ajustable:
 - Cuando la luz nocturna está encendida, oprima y mantenga sujeto el lente de la luz para reducir la intensidad de la luz nocturna a la luminosidad deseada.
 - Suelte el lente cuando se alcance el nivel de luminosidad deseado. Oprima y mantenga sujeto el lente de nuevo para aumentar la luminosidad.
 - El nivel de luminosidad seleccionado es el nivel PREESTABLECIDO y éste se almacenará en la luz nocturna.
 - La luz nocturna se encenderá automáticamente a este nivel cada vez que el nivel de luz ambiental sea bajo.
- Oprima momentáneamente el lente de la luz para apagar la luz nocturna. Esto inhabilitará la luz nocturna la cual permanecerá apagada sin importar los cambios en el nivel de luz ambiental.
- Oprima momentáneamente el lente de la luz nocturna para encenderla. Esto habilitará la luz nocturna.
 - La luz nocturna se encenderá momentáneamente, parpadeará, y luego se apagará si el nivel de luz ambiental es alto.
 - La luz nocturna se encenderá y permanecerá encendida al nivel de luz PREESTABLECIDO si el nivel de luz ambiental es bajo.

MODO DE LUZ GUÍA (modo seleccionable; permite que la luz nocturna permanezca encendida sin importar el nivel de luz)

- Para cambiar al modo de luz guía, oprima y mantenga sujeto el lente de la luz durante 10 segundos cuando la luz nocturna esté apagada. Suelte el lente de la luz cuando el LED empiece a parpadear. Siga el mismo procedimiento para cambiar de vuelta al modo de luz nocturna.
- Nivel de luminosidad ajustable:
 - La luz puede regularse a uno de 3 niveles. (Alto, Mediano y Bajo).
 - Oprima momentáneamente el lente de la luz para permutar los niveles de luminosidad entre Encendido - Mediano - Bajo - Apagado. El dispositivo guarda el último nivel de luz seleccionado como el nivel PREESTABLECIDO.
- La luz nocturna puede encenderse y apagarse al nivel de luminosidad preestablecido utilizando un interruptor externo. (Consulte la figura 3.)
- En este modo, el sensor del nivel de luz ambiental está inhabilitado.

INSTRUCCIONES DE INSTALACIÓN

ADVERTENCIA:

- Antes de cablear, coloque el cortacircuito en la posición de apagado o quite el o los fusibles, y verifique que no haya suministro eléctrico.
- No conecte nunca un cable a un dispositivo eléctrico que esté conectado con corriente. Cablear el dispositivo con el suministro eléctrico encendido podría causar daño permanente al dispositivo y anular la garantía.
- Si usted no está seguro acerca de cualquiera de estas instrucciones, o si el cableado no coincide con las descripciones suministradas, usted debería llamar a un electricista calificado.

PRECAUCIÓN:

- **Riesgo de incendio:** Este producto debe instalarse según el código de instalación correspondiente por una persona familiarizada con la construcción, funcionamiento del producto y los peligros involucrados.
- Su instalación y uso debe ser conforme con todos los códigos eléctricos aplicables.
- Si no hay una conexión de cobre expuesto o de color verde a tierra en la caja de pared, póngase en contacto con un electricista calificado para instalarla.
- No instale sin las conexiones a tierra adecuadas.
- No exceda las capacidades máximas del dispositivo.
- Utilizar únicamente alambre de cobre de calibre 14 ó 12 con estos dispositivos.
- El dispositivo necesita un cable neutro para que la luz nocturna funcione.
- Consulte el diagrama de cableado para obtener más detalles.

Conecte los cables según la figura 2 ó 3.

- Conecte el alambre de tierra (verde) al tornillo verde.
- Conecte el alambre de FASE (negro) al tornillo negro o el alambre rojo al tornillo negro si la luz nocturna está en un circuito con interruptor.
- Conecte el alambre de NEUTRO (blanco) al tornillo plateado. Se necesita todo esto para que la luz nocturna funcione.

Monte y pruebe el dispositivo

- Asegúrese de que la palabra "TOP" (SUPERIOR) esté orientada hacia arriba en la luz nocturna.
- Fije el dispositivo a la caja de pared con los tornillos de montaje.
- Restablezca el servicio de corriente en el cortacircuito o en la caja de fusibles.
- Pruebe si la luz nocturna se enciende momentáneamente al oprimir el lente de la luz. La luz nocturna se encenderá momentáneamente, destellará y se apagará si el nivel de luz ambiental es superior al nivel de luz umbral. Consulte la Sección de localización de problemas, si el dispositivo no funciona apropiadamente.
- Fije la placa de pared, pruebe el dispositivo de nuevo. Se ha terminado la instalación.

Guía de localización de problemas

La luz nocturna se enciende cuando se oprime manualmente el lente de la luz pero no permanece encendida

La luz nocturna no se enciende

El nivel de luz ambiental es demasiado alto para que la luz nocturna permanezca encendida. (la luz nocturna está funcionando en forma adecuada).

- La luz nocturna pudiera estar regulada a un valor bajo y por lo tanto no ser visible. Oprima y mantenga sujeto el lente de la luz, suéltelo y luego oprima y manténgalo sujeto de nuevo para SUBIR la intensidad de la luz nocturna.
- Revise las conexiones a los terminales de FASE (VIVO) y NEUTRO según las instrucciones.
- La luz nocturna pudiera estar controlada por un interruptor externo que pudiera estar apagado.

Door Frames

Issue Date: 28 JUL 2017

Revision Date: 29 JAN 2018

Item Name	Door Frame
Description:	Steel Door Frame (interior doors)
Manufacturer:	Steelcraft
Frame Type:	F16 series standard double rabbet knock down frame
Material:	16 Gauge Steel, Heavy Duty
Finish:	Refer to guestroom plans and elevations
Hardware:	Refer to Door Schedule
Fire Rating:	Refer to Door Schedule
Quality Standards:	ANSI A250.8-2003 (SDI-100)
Lead Time:	To be verified
Warranty:	Warranty for 36 months from the date the final product is placed into operation.

DOOR HARDWARE
CUTSHEETS

introduction

Yale® 2700 series architectural door closers are ideal for commercial applications where ease of use, installation and aesthetics are required at an economical price.

The 2700 series features rugged construction, adjustments for backcheck, closing and latch speed, rack and pinion operation and a variety of arm options.

features

- Adjustable spring sizes 1 through 6
- Non-handed
- Aluminum
- Tri-packed: regular, parallel or top jamb mounting
- Adjustable backcheck valve
- Adjustable closing speed valve
- Adjustable latching speed valve
- Full plastic cover
- Spring power adjustment - adjust with adjustable wrench
- Hold-open and heavy-duty arms available
- Standard fasteners: (included with tri-packed, NHO only)
 - Self-drilling screws (6), Cover screws (2), Slide arm screws (2), Machine screws (6), Pinion screw (1), Allen wrench (1)
- Optional fasteners:
 - Sleeve nuts, Through-bolts and grommet nuts

certifications

- Certified for ANSI/BHMA A156.4 Grade 1
- UL and cUL listed. This includes compliance to UL10C.
- Meets requirements for Americans with Disabilities Act (ADA) and ANSI/BHMA A117.1
- 10-year limited warranty
- Meets requirements of the Buy American Act

door closing latching cycle

arms

Non-Hold Open

Self-closes door every time door is opened. Auxiliary stop (by others) required except when using the Holder/Stop arm.

Hold Open

Achieved by means of friction or ball and detent/ roller. Friction hold open has a range of 90° to 180° using template location and mechanical adjustment. Ball and detent or roller hold open is effective in a range of 85° to 110°.

Hold open arm door closers are not permitted to be used on fire door assemblies.

applications

regular arm

Non-hold open arm shown, hold open application available.

This is the only pull side application where a double lever arm is used. It is the most power-efficient application for a door closer. Sufficient frame, door and/or ceiling clearance must be considered. Since the arm assembly projects directly out from the frame, this application may present an aesthetics issue or be prone to vandalism.

top jamb

Non-hold open arm shown, hold open application available.

For efficiency reasons this application provides the best alternative to the regular arm application. There must be sufficient frame face and/or ceiling clearance for this application. It requires a top rail on the door of just 2-1/4" (57mm). This application provides the best door control for doors in exterior walls that swing out of a building. The entire door closer and arm assembly project from the frame, similar to the regular arm application, where matters of appearance and malicious abuse can be of concern. Consideration must be given to depth of reveal.

parallel arm

Non-hold open arm shown, hold open application available.

This application provides the most appealing design appearance for a surface-mounted door closer having a double lever arm. This also makes it beneficial in vandalism-prone areas. It is on the push side of the door and the arm assembly extends almost parallel to the door. In the closed position, there is very little or no hardware projecting beyond the frame face in most situations. Due to the geometry of the arm it is approximately 25% less power-efficient than a regular arm application. The entire closer and arm assembly are mounted below the frame stop. Top rail clearance dimensions will vary based on the type of cover used.

holder/stop arm

Hold open arm shown

Non-hold open arm shown without stop

This arm incorporates a stop at the arm's soffit plate to dead stop the door at a predetermined degree of door swing between 85° and 110°, in 5° increments. Prior to dead stop the door closer's backcheck feature slows the door speed to reduce the impact of the stop action.

The Holder/Stop arm is intended for use where an auxiliary door stop cannot be utilized and no more than moderate abuse is anticipated. Available with or without hold open. (Hold open strength is adjustable.)

The stop is removable to allow for additional applications where auxiliary door stops are installed.

model/part numbers

Complete Units	
Model Number	Description
2701	Non-Hold Open Tri-Packed, Adjustable Size 1-6
2711	Hold Open Tri-Packed, Adjustable Size 1-6
2721	Heavy-Duty Non-Hold Open Parallel Arm with Removable Stop, Adjustable Size 1-6
2721T	Heavy-Duty Hold Open Parallel Arm with Thumb-turn and Removable Stop, Adjustable Size 1-6

Note: for heavy-duty parallel rigid arm applications, specify 2721 or 2721T, stop is removable.

See page 6 for more how to order info.

Miscellaneous Parts*	
Part Number	Description

accessories

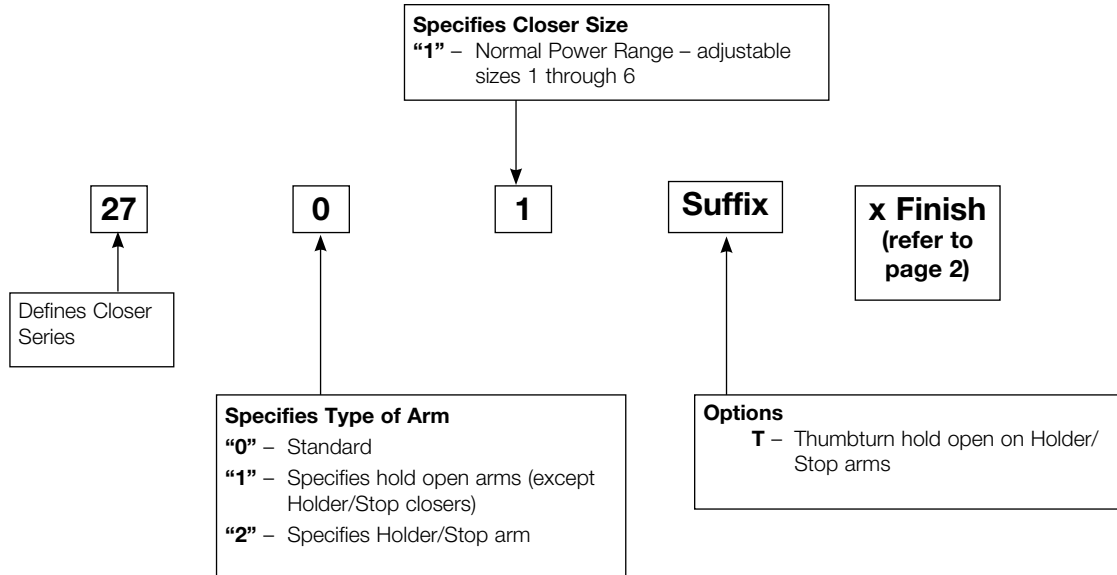

parallel rigid and holder/stop arms

BRACKETS FOR NON-HOLD OPEN ARMS & HOLD OPEN ARMS		
		<p>Flush Rabbeted Transom - #293L Angle Bracket: For use where flush transom conditions prevent mounting of the standard soffit plate. This bracket is used in combination with the standard soffit plate. Not for use with heavy-duty arms.</p>
CLOSER MOUNTING PLATES		
		<p>Narrow Top Rail - #3148 Drop Plate: For use where a narrow top rail prevents the closer from being mounted directly to the door surface. This drop plate can be used to mount a closer on a top rail as narrow as 2-7/16" (62mm) in height.</p>
		<p>Exposed Back/Narrow Top Rail - #3158 Molded Full Cover Drop Plate: For use on doors with glass lights where a closer with molded full cover is installed and the back of the closer is exposed. This covers the back of the installation and gives a pleasing appearance from the reverse side.</p>

Note: All measurements are Inches/mm.

how to order

Notes:

- For heavy-duty parallel rigid arm applications, specify 2721 or 2721T, stop is removable.
- Warranty becomes void if door closer is installed on the exterior side of a door in the exterior wall of a building.
- It is strongly recommended, and required on fire door assemblies, that doors having a door closer be hung on ball bearing or anti-friction hinges or pivots; unless an alternate method is identified in the door manufacturer's listing.
- Failure to use the correct type and size fasteners may void factory warranty.
- Fasteners for fire/smoke door assemblies must conform to NFPA 80. In some applications additional fasteners may be mandated by NFPA 80 that are not shipped with standard Yale® product, such as sleeve-nuts/ sex-nuts or through-bolts and grommet nuts.
- Contact factory if door weight exceeds 250 lbs.

Five Knuckle Standard Weight Series

Recommended for standard weight, medium frequency doors, or doors with closing devices.

- Use for common flush door/frame/wall applications
- For Beveled Edge, where doors are beveled on hinge side, specify TA4314 or TA4714
- For available finishes see page 29

ASSA ABLOY

The global leader in door opening solutions

VingCard Essence Electronic Lock

VingCard Essence revolutionizes the electronic lock industry by housing all lock components, including the reader and mobile access board, inside the door and therefore, reaching the maximum minimalistic expression, the true essence of an electronic lock.

VingCard Essence is always delivered as Mobile Access ready. With Mobile Access board included inside the reader, your property is ready for using the mobile phone as guest room key whenever required.

FEATURES

- : Solid Stainless Steel or brass handles with self-lubricating long life bearings.
- : 3-point steel latch construction with an antifriction mechanism.
- : Case hardened full 1-inch (ANSI) throw deadbolt.
- : Panic release function – the deadbolt and latch are automatically retracted by inside handle for easy egress in emergency situations.
- : ADA compliant (users with physical disabilities).
- : Future proof re-programmable FLASH lock memory.
- : Powered by three (3) AA batteries that provide up to 2 years normal life (depending on door traffic and online/mobile access functionality).
- : Compatible with Visionline Software platform.
- : 2000 event audit trail.
- : Optional high security mechanical override (key cylinder).
- : Mobile Access board included in reader.
- : RFID Specifications:
 - 13,56MHz technology
 - compatible with the following standards:
 - ISO 14.443 A (MIFARE including Desfire)
 - ISO 14.443 B
 - ISO 15.693

DIMENSIONS

TECHNICAL DATA

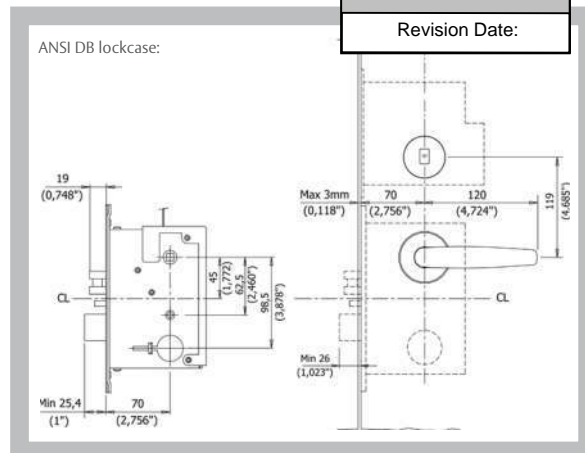

Power	4,5 V DC (3 x AA alkaline batteries).
Battery location	Inside of the door in electronics module.
Material	Handles: Stainless steel quality SUS304 RFID cover: Polycarbonate UL94V0 (Makrolon 6555).
Metal finishes	Satin Chrome (Stainless Steel with PVD), Polished Chrome (Stainless Steel with PVD), Satin Brass (Stainless Steel with PVD), Polished Brass (Stainless Steel with PVD), Light Bronze, Velour Nickel and US Antique Dark.
Standard plastic color	Black and white.
Handle options in standard range	Straight, Functional ANSI, Wing. Also compatible with 20 different Valli&Valli design handles.
Emergency opening options	Electronic emergency opening with service unit and optional mechanical cylinder.
User interface	3 colored light pipe shaped as ring around the reader (green, red, yellow).
Locking mechanism	Electro-mechanical locking mechanism located in the lockcase.
Door thickness	34 - 120 mm / 1,34 - 4,72 Inches.
System software compatibility	Visionline.
Online compatibility	Wireless (based on ZigBee protocol) in Visionline.
Storage temperature	0-70 °C / 32-158 °F: non-condensing environment.
Tested operating temperature	Tested from -25 °C to 70 °C (-13 °F to 158 °F), according to IEC 60068-2.
Certifications	European EMC, LVD and R&TTE Directives. Approved according to EN14846. Fire approved according to EN 1634-1. Fire approved according to UL (timber doors).
Supported RFID standards	ISO 14.443 A, ISO 14.443 B, ISO 15.693
Mobile Access support	Mobile Access board included in reader unit.

LOCKCASE DIMENSIONS

ANSI lock case variants	ANSI DA, ANSI DB (both available in the following versions:4-switch, Auto deadbolt (ADB) Australia version (AUS) and Japan (JPN) version).
ANSI lock case widths	25 mm / 0,98 inches, 28 mm / 1,10 inches, 32 mm / 1,26 inches.
ANSI backset	70 mm / 2,76 inches.
EURO lock case variants	EURO, EURO ADB, EURO MPA.
EURO lock case widths	20 mm / 0,79 inches, 22 mm / 0,87 inches, 24 mm / 0,94 inches.
EURO backsets	65 mm / 2,56 inches, 80 mm / 3,15 inches.

Saflok Quantum Pixel

dormakaba 

HW-003-SA

Revision Date:

Overview

Saflok Quantum Pixel is the newest addition to dormakaba's award-winning Quantum Series of RFID electronic locks. The Quantum Pixel provides an easy-to-use, secure, and flexible solution that is both visually attractive and high-performing. With its electronics concealed within the door, the Quantum Pixel's visible hardware is minimal resulting in a lock design that integrates seamlessly with any hotel decor.

Mobile Access

The Quantum Pixel is equipped with Bluetooth Low Energy Technology, meaning that the lock is able to operate using the dormakaba Mobile Access Solutions. Guests can safely use their mobile device to access any door in the hotel equipped with Quantum Pixel.

Applications

- Ideal for new construction projects or when doors are being replaced
- Suitable for small to very large scale hotels
- Access control for guest rooms
- Interior doors only

Security Features

- 1" solid deadbolt
- Staff monitoring – RFID keycard audits
- Tracking mortise for door ajar reporting
- Emergency access: emergency key and electronic override
- Tamper Resistant

Low Maintenance

- Batteries last up to 2 years
- Low battery indicator alerts staff
- Lock programming and audit records are not erased during battery replacement
- Service tray for easy battery access

Access Control Management Software

The Quantum Pixel lock is supported by dormakaba's robust access management software solution that features an array of access control workflows for both guest and staff access. Optionally, choose dormakaba's online access management solution for superior control and monitoring.

Mechanical Features**HW-003-SA**

Revision Date:

Description	Electronic mortise lockset with 1" (25.4mm) throw deadbolt and 5/8" (15.9mm) dead-locking latch bolt	
Reader cover	Polycarbonate. Color: black	
Handing	Factory-handed mortise (left, right, left reverse, right reverse)	
	ADA Compliant. Standard levers available	
Lever		
Deadbolt	1" (25.4mm) throw deadbolt and 5/8" (15.9mm) dead-locking latch bolt	
Door Thickness	1.38" (35.1 mm) to 3.0" (77 mm). No mortise offset, no rabbeted doors Wood or metal solid clad doors only (no hollow doors)	
Standard Finishes (levers and inside)	Bright chrome, bright brass, satin chrome, satin brass	
Locking Options	ANSI lock case with 1" lock front mortise	
Online Configurations	Messenger LENS Ready	DAJ mortise (ANSI lock case)
	Messenger LENS Online	Lock controller board with Messenger LENS capability (wood doors only) DAJ mortise (ANSI lock case)

Mobile Access Option (BLE)

BLE ready	Upgradeable to BLE with BLE module
BLE enabled	BLE module included, no further upgrades needed

Batteries

Alkaline - Four AA battery pack	Battery life is up to 2 years Low battery indicator: alerts staff that batteries need to be changed soon
------------------------------------	---

Lock Operation

Date/Time Stamp	Real-time; date and hours/minutes
Interrogation	Obtain key usage reports from the lock by using a handheld unit at the door, or increase efficiency by performing a remote Interrogation using Messenger LENS (optional)
Preregistered Keycards	Keys can be made up to ten days in advance without canceling current or arriving guests
Keycard Expiration	Configurable expiration dates; can be automatically set for check out date or manually applied when making key during check in process.
Passage Mode	Set by authorized keycard or Messenger LENS system. Can also be configured to perform an automated/pre-defined passage mode time.
Lockout Mode	Set by authorized keycard or Messenger LENS system
RFID Credentials Specifications	Two credential format options available: Mifare Classic or Mifare Plus - Mifare Classic (4byte NUID): Guest Keycards (Mini), Staff (4K & 1K) - Mifare Plus: Guest Keycards (Mifare Ultralight C, 7 Byte UID), Staff Keycards (Mifare Plus S 2K, 4 Byte NUID, Mifare Plus S 4K, 4 Byte NUID)
Feedback	Light indicators in reader
Diagnostics	Light indicators and handheld display
Audit Trail	Up to 4,000 events
Disability Feature	RCU readers required to interface with automatic power operated doors for special openings
Privacy Override	Emergency keycards

Certifications & Testing

Accessibility Standard	ADA compliant levers (Code of Federal Regulations 28 CFR Part 36 – 1994 "ADA Standards for Accessible Design")
BHMA/ANSI	Grade One performance tests for ANSI/BHMA A156.13 - 2017 "American National Standard for Mortise Locks and Latches," and ANSI/BMHA A156.25 - 2013 "American National Standard for Electrified Locking Devices." (Only locks tested and approved by non-biased third-party test lab are allowed in the "BHMA Certified Products Directory" found at www.buildershardware.com)
Fire Rating	U.L. Listing: GYQS.R11247 "Electrically Controlled Single-point Locks and Latches." Evaluated in accordance with UL 10B and UL 10C. Listed for up to 3 hours on metal doors and up to 45 min on wood doors
Electronics	FCC Part 15 Class A and CE directive 2014/53/EU compliant
Environmental Operating Conditions	Indoor side: 32°F to 151°F (0°C to 66°C) 0% to 85% non-condensing humidity at 86°F (30°C) IP rating: IP54

Warranty

Standard Warranty	Two years

Rockwood 627 - 190° Door Viewer w/Heavy Duty Privacy Cover

Available Finishes:

- CRM

WEIGHT:
0.1 lbs.

ANSI A156.16:
L03221, L03171

Specifications:

MATERIAL:

Brass

FEATURES:

- For doors 1 ³/₈" to 2 ¹/₈"
- Heavy duty privacy cover to prevent visual intrusion from outside of the room

OTHER:

Installation - drill ⁹/₁₆" hole. UL fire rated for 1 ¹/₂" hours.

Kerf-In Weatherstrip (Cont.)

PK52

AVAILABLE FINISHES: **BL, W**

ANSI: **ROG154**

AVAILABLE LENGTHS: **18', 20', 300'**

- Minimum space between the door face and the stop is $\frac{1}{16}$ "; maximum space is $\frac{3}{8}$ "

P50

AVAILABLE FINISHES: **BL, W**

AVAILABLE LENGTHS: **17', 25', 250'**

- Minimum space between the door face and the stop is $\frac{1}{16}$ "; maximum space is $\frac{3}{16}$ "
- Thermoplastic elastomer formulation will not transmigrate; remains flexible to -60° F

MAG349

AVAILABLE FINISHES: **D, W**

AVAILABLE LENGTHS: **37", 85", 96", 121"**

- Minimum space between the door face and the stop is $\frac{3}{8}$ "; maximum space is $\frac{7}{16}$ "
- Magnetic kerf-in weatherstrip features a magnetic strip encased by a UV-stable TPE cover
- Use for steel-faced door and wood frame applications
- Can be trimmed in the field and corner-mitered

Magnetic Kerf-In Weatherstrip

2815_M

AVAILABLE FINISHES: **C, D, G**

REPLACEMENT INSERT: **2815MAG**

Adhesive Perimeter Gasketing

For more information on these perimeter gasketing products, please see the Adhesive Gasketing section.

S773

AVAILABLE FINISHES: **BL, D, GR, W**

AVAILABLE LENGTHS: **17', 18', 20', 21', 25', 30', 250', 500'**

ANSI: **ROE154, ROE155**

- Triple-fin design blocks light and sound from infiltrating a room
- Product designed as hospitality gasketing (see more hospitality products in the Hospitality Products section)
- Seal begins compressing at $\frac{3}{8}$ "; compresses to seal up to a $\frac{1}{16}$ " gap

S88

AVAILABLE FINISHES: **BL, C, D, GR, TAN, W**

AVAILABLE LENGTHS: **17', 18', 20', 21', 25', 30', 204', 510'**

ANSI: **ROE154, ROE155**

- Seal begins compressing at $\frac{1}{4}$ "; compresses to seal up to a $\frac{1}{16}$ " gap
- Available with perforations for Behavioral Health applications. Substitute "P" in place of "S" to order this option.

S44

AVAILABLE FINISHES: **BL, C, D, GR, W**

AVAILABLE LENGTHS: **17', 18', 20', 21', 25', 30', 204', 510'**

ANSI: **ROE154, ROE155**

- Designed for tighter frames.
- Demonstrates extremely low closing force.
- Seal begins compressing at $\frac{5}{16}$ "; compresses to seal up to a $\frac{1}{16}$ " gap
- Available with perforations for Behavioral Health applications. Substitute "P" in place of "S" to order this option.

NOTE: Products shown in this section may not be drawn to scale.

AVAILABLE FINISHES FOR PRODUCTS SHOWN ON THIS PAGE (see General Information section for finish chart)

PDB411_E_

Door Bottoms

Example: PDB411 | A | E | 36
Profile# Finish EPDM Length

TYPE: Automatic Door Bottoms
MATERIAL: 6063-T6 Aluminum Alloy and Temper Retainer
FINISH: A (Mill Finish)
LENGTHS: 24" to 48"
WIDTH: 9/16" (14.287 mm)
HEIGHT: 1 3/8" (34.925 mm)
WEIGHT: Estimated per foot: 0.52 lbs

*Patent pending

Product Test Ratings:

See Product Testing
section for more
information.

ANSI NUMBER: R3Y346
LEAD TIME: 4 working days (or less)
AVAILABLE: PDB411_E is shipped from all ASSA ABLOY, Pemko locations
WARRANTY: 5 Years from purchase date
CROSS REFERENCE: none

INSTRUCTIONS, CAD DRAWINGS, PROFILE DRAWINGS and CUT SHEET
Available upon request and on website

PRODUCT TESTING:

- **Air Infiltration Tested** – Tested to ASTM E-283-04 (2012) for low air leakage allowance; allows no more than 0.3 cfm per square foot at 1.57 psf.
- **Sound Tested** – Tested to ASTM E90 – 2009 in a single or in multiple sound seal configurations for sound attenuation in an opening
- **Smoke Tested** – Tested to UL 1784 and meets the requirements of NFPA 105-2013 for smoke leakage in an opening; allows no more than 3.0 cfm per square foot at 0.10" water column (about 75 Pa).
- **Fire Rated** – Tested to UL10B Standard Fire Tests and UL10C Positive Pressure Fire Tests of Door Assemblies
- **BHMA Certified** – Tested for performance with regards to the requirements in:
 - ANSI/BHMA A156.22 – Door Gasketing and Edge Seal Systems

MATERIAL SAFETY / FIRE HAZARDS

Per OSHA Regulations (Standards – 29 CFR) this item is considered an “article” as described in section 1910.1200 paragraph (c), meaning that it is a manufactured item other than a fluid and is not a hazard. To help our customers we are providing additional information in this section to cover relevant topics found on Safety Data Sheets (SDS) but not found elsewhere in this document.

FIRE HAZARD:

Aluminum alloy is a non-combustible material. Solid aluminum does not present a fire hazard.

FIRST AID MEASURES

Under normal conditions this item presents no small parts and so this item cannot be inhaled or swallowed and has no adverse reaction when coming in contact with skin. Observe good industrial hygiene after installation.

Note to physician: treat symptomatically and supportively

FIREFIGHTING MEASURES

As in any fire, prevent human exposure to fire, smoke, fumes, or products of combustion. Evacuate non-essential personnel from the fire area. Firefighters should wear face mask with self-contained breathing apparatus (SCBA) and impervious protective clothing. In case of aluminum fire, use class D dry powder to extinguish. DO NOT USE water or halogenated extinguishing media.

- Hazardous combustion products: none.

SPILL PROCEDURES

Sweep up any off-cuts from product and store in a suitable container for disposal

HANDLING, STORAGE, AND DISPOSAL

There are no specific handling instructions. Always store at room temperature and keep away from heat sources. When disposing, if possible, recycle the item and its packaging. Otherwise disposal should be in accordance with local, state, or federal legislation. Bury in an authorized landfill site or incinerate under approved controlled conditions.

EFFECTS OF EXPOSURE

There are no effects under normal conditions of use. Observe good industrial hygiene.

TOXICITY

There is no toxicity hazard under normal conditions of use

HEALTH HAZARD

This product may contain hazardous ingredients; harmful effects are unlikely under normal conditions.

CARE AND MAINTENANCE

CLEANING

Pemko's aluminum products and solid gasket products can be cleaned with a mild soap with warm water. A clean non-abrasive cloth should be used to clean the surface of these products. For removing grease, sealant, or other minimal adhesives a mild solvent such as mineral spirits may be used; then clean with mild soap mixed with warm water. To dry, either allow to air dry or wipe dry with a chamois, squeegee, or lint-free cloth.

For sponge gasket and weatherstrip products, wipe with a damp cloth. Do not use mineral spirits or other chemical as this may cause the plastic to "melt" or deteriorate. To dry, either allow to air dry or wipe dry with a chamois, squeegee, or lint-free cloth.

The use of strong solvents or cleaner concentrations may cause damage to the finish surface and isn't recommended.

MAINTENANCE

Pemko products are generally low-maintenance and require nothing more than general cleaning. Should anything outside of "general cleaning" arise, please consult Pemko Customer Service.

If you have any questions, or if you have a situation outside this scope, please contact Pemko Customer Service.

Secret Gate Latch No. 602

HW-009

Revision Date:

- Material:** Cast brass
- Finishes:** US4, US10, US10B, US26D

2610F

Wall Mounted Track and Hardware
 for a 1" to 1 3/4" Thick Door to 125 lbs. or 200 lbs. w/1125 Hanger

2610F Wall Mounted Set Features

- A unique surface mounted hardware set for open pocket doors. Used where normal pocket doors cannot be installed, or where costs to install them would be prohibitive.
- Ideal for bathrooms, laundry rooms, closets, storage rooms, etc. where space required for a swinging door is wasted space.
- The Johnson 2610F is extremely easy to install, requiring no close fitting, and can be readily adapted to fit a variety of installations.
- With hardware capable of supporting doors up to 125 lbs. or 200 lbs with the 1125 ball bearing hanger, you are not limited to standard hollow core doors, giving you a wide range of enclosures.

TOP-HUNG HARDWARE

Allows doors to hang naturally, reducing possible warpage problems.

HEAVY DUTY EXTRUDED ALUMINUM TRACK

Features Johnson's famous concave, one point contact hanger channel for a smooth glide. Attractive line design hides fingerprints, helps hold paint. The fascia also serves as a flat surface for a valence application. Available from 4' to 16' in length.

TRICYCLE HANGERS

Tri-design insures all wheels carry weight equally. Smooth rolling, balanced wheels ride with minimum friction on convex track rails. A 'flip-of-a-clip' separates hangers from doors for easy door removal. The 1125 ball bearing hanger is available to increase your maximum door weight to 200 lbs. All steel hardware parts are zinc plated for corrosion resistance and quality appearance.

TESTED QUALITY

Johnson Hardware systems are regularly tested to ANSI standards.

Compatible with optional 1060 Soft Close Assembly

See online at: www.johnsonhardware.com/2610f.htm

OPTIONAL 1125 HANGER
 For doors up to 200 lbs. Ball bearing wheels provide smooth, quiet, easy operation of heavy doors.

2610F Installation Instructions

- Prepare opening to dimensions shown (or if existing opening, size door to fit).
- Mount track to wall. Drill holes in upper flange of track at stud locations, or where a solid anchor is assured. Horizontal location of track is not critical and is governed by design of trim. TRACK MUST BE PERFECTLY LEVEL, however, or door will not stay in position. Fasten at least 1/2" (12.5mm) above header.
- Dismantle #12 Guide and fasten base to jamb at floor.
- Insert hanger wheels into track. Alternate 2 wheel side of hanger so that 3 wheels are on each track leg for even weight distribution. Measure 2" (50mm) in from each edge. Fasten hanger plates on center with #12 X 1-1/4" (32mm) pan head screws. Make sure both nylon lock tabs are on the non-fascia side.

ALTERNATE WHEEL POSITIONS IN TRACK FOR EVEN WEIGHT DISTRIBUTION

- Hold door in opening and slip pivot pin into slot in door plate. When both pivots are seated, lock in place with locking tab. Reinsert front part of #12 Guide into base and move in until a slight clearance is obtained. Fasten Guide together with two screws.
- Position door over opening until desired closure is obtained and back edge of door is still in #12 Guide. Fasten one 1155 STOP to limit door travel. Open door until door is flush with jamb face and fasten other 1155 STOP to limit opening travel of door.

- (A) GAP BETWEEN 1-3/4" (45mm) DOOR AND CASING IS 1/4" (6.4mm)
- (B) GAP BETWEEN 1-3/8" (35mm) DOOR AND CASING IS 7/16" (11mm)

- Drill door 36" (914mm) from floor to fit pulls, and install.
- Trim around opening as desired.
- Attach 3/8" X 1-1/4" (9.5mm X 32mm) stop (not included) at edge of header with #6 X 1-1/4" (32mm) flat head screws.
- If required for alignment, adjust hangers with wrench.
- Snap on 2680 Endcaps.

Certification Compliance

ANSI/BHMA	Meets ANSI A156.2 Series 4000 – Grade 2
UL	UL listed to U.S.A. and Canadian safety standards Listed for 3 Hour Doors
Positive Pressure	Meets UL 10C and UBC 7-2 (1997)
ADA	All levers conform to ADA requirement for barrier-free accessibility
California Code	Levers conform to California Administrative Code Title 19 and 24
Hurricane Code	All individual components of a total door opening are required to comply with each code. Refer to the SARGENT Website (www.sargentlock.com) for specific code compliance listings for both the lock hardware and other door components

Any retrofit or other field modification to a fire rated opening can potentially impact the fire rating of the opening, and Sargent Manufacturing Company makes no representations or warranties concerning what such impact may be in any specific situation. When retrofitting any portion of an existing fire rated opening, or specifying and installing a new fire-rated opening, please consult with a code specialist or local code official (Authority Having Jurisdiction) to ensure compliance with all applicable codes and ratings.

2-3/4" Curved Lip Strike Standard

Furnished standard with 1-1/4" (32mm) curved lip from center of strike screw holes to end of lip.

To order strike separately, specify 600 strike x finish x lip length. Finishes: 3, 4, 10, 10B, 32D.

Lip lengths –
1" (25mm), 1-1/4" (32mm),
1-1/2" (38mm), 1-3/4" (44mm) and
2" (51mm)

Finishes	Descriptions	ANSI
3	Polished brass, clear coat	605
4	Satin brass, clear coat	606
10	Satin bronze, clear coat	612
10B	Oxidized bronze-oil rubbed	613
26	Polished chrome	625
26D	Satin chrome	626

No split finish

2-1/4" Full Lip Strike (14- Option)

Lip length 1-3/16" only
To order strike separately, specify 505 strike x finish x lip length. Finishes: 3, 4, 10, 10B, 32D.

Packaging

65G05 KL	4 lbs.	1/box
65G05 KL	41 lbs.	10 boxes/case

Latch Assemblies

05-2184	2-3/8" (60mm), 20 option (deadlocking latch)
05-2185	2-3/8" (60mm), 20 option (latch)
05-2182	2-3/4" (70mm), standard (deadlocking latch)
05-2183	2-3/4" (70mm), standard (latch)

4-7/8" Curved Lip Strike (28- Option)

Conforms to ANSI standard.
Curved lip regularly furnished.

To order strike separately, specify 808 strike x finish x lip length. Finishes: 3, 4, 10, 10B, 32D.

Lip lengths –
7/8" (22mm), 1-1/8" (29mm),
1-1/4" (32mm), 1-3/8" (35mm),
1-5/8" (41mm), 1-7/8" (48mm),
2-1/8" (54mm), 2-3/8" (60mm),
2-5/8" (67mm), 2-7/8" (73mm)

Functions

6500 Cylindrical Lever Lock

IMPORTANT INFORMATION

Note:

Picture for visual reference only: actual product may vary from that shown in photo.

Be sure to order hardware before beginning fabrication or installation work.

Always use the instructions inside the packaging provided by the manufacturer, as the manufacturer reserves the right to make technical changes or modify information without prior notice.

All technical drawings and documents contain examples for the assembly of different suppliers' hardware. The customer cannot make any claims based on the use of these documents. No responsibility is assumed for design details relating to a construction or project.

At all times, execution and installation must be undertaken by qualified persons.

Never exceed the maximum weight or the maximum dimensions recommended by the manufacturer.

Always be sure to install the product correctly using the appropriate fixation for your material.

Use a dry cloth to remove fragments, dust, and residue (wood and/or aluminum sawdust) from rails before the installation of the hangers.

Never use any spray lubricant on these products.

Country of Origin: Made in China • Fabricado en China • Fabriqué en Chine

CAUTION: Do not install into a countertop or similar work surface. For use in indoor wall surfaces only.

MISE EN GARDE : Ne pas installer sur un plan de travail ou une surface similaire. À utiliser uniquement sur les surfaces murales intérieures.

PRECAUCIÓN: No instalar en un exhibidor o en una superficie de trabajo similar. Solo debe utilizarse en superficies de pared.

INSTALLATION INSTRUCTIONS
Please read these instructions completely before you begin. **adorne®** outlets are designed for installation in standard electrical boxes. However, some of the installation methods vary slightly from traditional methods. If you do not understand these instructions or are unsure of your abilities, seek the assistance of a qualified electrician.

INSTRUCTIONS D'INSTALLATION
Veuillez lire toutes ces instructions avant de commencer. Les dispositifs **adorne®** sont conçus pour être installés dans des boîtiers électriques classiques. Toutefois, certaines méthodes d'installation peuvent différer légèrement des méthodes traditionnelles. Si vous ne comprenez pas ces instructions ou êtes incertains de vos aptitudes, n'hésitez pas à demander de l'aide auprès d'un électricien qualifié.

INSTRUCCIONES DE INSTALACIÓN
Lea completamente estas instrucciones antes de comenzar. Los dispositivos **adorne®** están diseñados para la instalación en cajas eléctricas estándares. Sin embargo, algunos de los métodos de instalación pueden variar ligeramente de los métodos tradicionales. Si no entiende estas instrucciones o no está seguro de sus aptitudes, busque la ayuda de un electricista calificado.

Use only with Legrand adorne system.

À n'utiliser qu'avec le système Legrand adorne.

Utilizar únicamente con el sistema adorne de Legrand.

P122R – 1 Gang	P122B – 1 Gang	S232W – 2 Gang
S235RAC – 2 Gang	S122RS – 1 Gang	
P235RAC – 2 Gang		

1

⚠ WARNING

To prevent severe shock or electrocution, always disconnect power at the service panel before beginning work.

⚠ AVERTISSEMENT

Pour éviter tout risque de chocs électriques ou d'électrocutions, toujours débrancher la source d'alimentation électrique depuis le coffret de distribution électrique avant de commencer le travail.

⚠ ADVERTENCIA

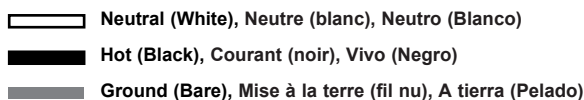

Para evitar electrocuciones o descargas eléctricas graves, desconecte siempre la alimentación en el panel de servicio antes de comenzar a trabajar.

When replacing existing outlets, label wires before disconnecting. Disconnect old outlet.

Lors du remplacement de dispositifs existants, étiqueter les câbles avant de les débrancher. Débrancher le dispositif usagé.

Al reemplazar los dispositivos existentes, marque los cables antes de la desconexión. Desconecte el dispositivo anterior.

2

If necessary, cut wires and strip insulation using stripping guide on back of outlet.

Si nécessaire, couper les fils et retirer la gaine d'isolation en utilisant un guide de dénudage à l'arrière du dispositif.

Si es necesario, corte los cables y pele el aislamiento con la guía pelacables en la parte posterior del tomacorriente.

3

Outlet comes with a 6" pigtail ground wire. Connect this to frame ground and bare ground wire in box using provided wire nut. Fold ground wires into back of box leaving end of pigtail hanging out of the box. Position frame against wall. Use pop out outlet frame only.

Le dispositif est fourni avec un fil de terre à amorce de 15 cm. Connecter au fil de terre et au fil de mise à la terre nu dans la boîte en utilisant le capuchon de connexion fourni. Plier les fils de terre vers l'arrière de la boîte en laissant l'extrémité de l'amorce sortir de la boîte. Positionner la structure contre le mur. Utilisez uniquement un châssis de prise déposable.

El tomacorriente viene con un cable de conexión a tierra con empalme de 15 cm (6 pulg.). Conéctelo al cable de conexión a tierra del bastidor y el de conexión a tierra pelado en la caja utilizando la tuerca para cables provista. Pliegue los cables de conexión a tierra en la parte trasera de la caja dejando el extremo del empalme colgando hacia afuera de la caja. Posicione el bastidor contra la pared. Solo utilice el marco del tomacorriente emergente.

**TIPS**

- Pre-fold wires into wall box to make it easier to fit them in the box when outlet is connected.
- Use caution to avoid marring wall surface with the metal frame.

CONSEILS

- Plier d'abord les fils dans la boîte murale pour faciliter leur insertion lorsque le dispositif est branché.
- Prendre soin de ne pas érafler la surface murale avec le boîtier métallique.

CONSEJOS

- Pliegue de antemano los cables en la caja de la pared para que sea más fácil introducirlos en la caja cuando el tomacorriente esté conectado.
- Tenga cuidado para evitar dañar la superficie de la pared con el bastidor de metal.

⚠ WARNING

Failure to connect the ground wire will result in an unsafe installation that could lead to personal injury.

⚠ AVERTISSEMENT

Ne pas raccorder le fil de mise à la terre peut rendre une installation non sécuritaire pouvant occasionner des blessures.

⚠ ADVERTENCIA

Si no conecta el cable de tierra, se producirá una instalación insegura y podrían ocasionar lesiones personales.

- 4** Align frame and device as shown.
Aligner la structure et le dispositif comme illustré.
Alinee el bastidor y el dispositivo como se muestra en la figura.

- 5** Connect new outlet as shown. Insert wires into terminals and tighten screws securely.
Raccorder le nouveau dispositif comme indiqué. Insérez les fils dans les bornes et serrez fermement les vis.
Conecte el nuevo dispositivo, como se muestra. Inserte los cables en los terminales y ajuste bien los tornillos.

If you have two wires plus a ground wire
Si vous disposez de deux fils et d'un fil de mise à la terre Único tomacorriente en el circuito

If you have four wires plus a ground wire
Si vous disposez de quatre fils et d'un fil de mise à la terre Varios tomacorrientes en circuito

⚠ WARNING: Do not pair different size wires in the same terminal. If you have different size wires, use a wire nut to add a 6 inch pigtail of the same gauge wire to the smaller gauge wire.

⚠ ATTENTION : ne pas coupler de fils de diamètre différent dans la même borne de connexion. En cas de fils de diamètre différent, utiliser un connecteur pour ajouter une amorce de 15 cm de même calibre au plus petit fil.

⚠ ADVERTENCIA: No empalme cables de distinto tamaño al mismo terminal. Si tiene cables de distinto tamaño, utilice un empalme para cables para agregar una coleta de 15 cm del mismo calibre a un cable de menor calibre.

Same size.
Même diamètre.
Mismo tamaño.

Different size with pigtail.
Diamètre différent avec amorce.
Distinto tamaño con coleta.

Different size.
Diamètre différent.
Distinto tamaño.

- 6** Carefully fold wires into box, and screw device and frame into wall box.
Plier soigneusement les fils dans la boîte, puis visser le dispositif et la structure dans la boîte murale.
Pliegue los cables en la caja con cuidado, y atornille el dispositivo y el bastidor en la pared.

For 1-Gang Wall Plate installations, proceed to Step 10.

Pour une installation simple, passer à l'étape 10.

Para instalaciones de placa de pared de un solo juego, continúe con el Paso 10.

FOR 2-GANG INSTALLATIONS • POUR UNE INSTALLATION DOUBLE • PARA INSTALACIONES

7 Use ARPTR152 for two-gang installations. This part comes with a pop out outlet, a 2-gang frame, and an adapter plate for use with standard adorne® devices.

Utiliser le dispositif ARPTR152 pour une installation double. Cette partie est fournie avec un bloc de prise éjectable Pop-Out, une structure double et une plaque d'adaptation à utiliser avec les dispositifs adorne® standard.

Utilice ARPTR152 para instalaciones de dos juegos. Esta parte viene con un tomacorriente emergente, un bastidor de 2 juegos y una placa de adaptador para utilizar con los dispositivos adorne® estándares.

8 ARPTR152 can be configured with two pop out outlets using only the 2-gang frame. Follow installation steps 1-6 to install both devices.

L'ARPTR152 peut être configuré avec deux blocs de prise Pop-Out en utilisant uniquement la structure double. Suivre les étapes 1 à 6 pour installer les deux dispositifs.

ARPTR152 puede configurarse con dos tomacorrientes emergentes utilizando solo el bastidor de 2 juegos. Siga los pasos de instalación 1 a 6 para instalar ambos dispositivos.

9

ARPTR152 can also be configured for use with a standard adorne® device using the included adapter. Connect all ground wires, and mount the adapter using supplied screws. Refer to specific instructions included in adorne devices to complete the installation.

L'ARPTR152 peut également être configuré pour être utilisé avec un dispositif adorne® standard en employant la plaque d'adaptation incluse. Raccorder tous les fils de terre et monter la plaque d'adaptation en utilisant les vis fournies. Se reporter aux instructions spécifiques incluses avec les dispositifs adorne pour effectuer l'installation.

ARPTR152 también puede configurarse para utilizar con un dispositivo adorne® estándar utilizando el adaptador incluido. Conecte todos los cables de conexión a tierra y monte el adaptador utilizando los tornillos suministrados. Consulte las instrucciones específicas incluidas en los dispositivos adorne para completar la instalación.

10

Snap any adorne® wall plate to frame. There are three click-stops to adjust the fit of the wall plate to the wall.

Enclencher la plaque murale adorne® sur la structure. Il existe trois crans pour régler la position de la plaque murale sur le mur.

Encastre todas las placas de pared adorne® al bastidor. Hay tres toques de profundidad con clics para que pueda ajustar la placa de pared con la pared.

NOTE:
To remove wall plate, insert a small flat screwdriver into notches on wall plate and twist gently to pry from frame.

REMARQUE:
Pour retirer la plaque murale, insérer un petit tournevis plat dans les encoches de la plaque murale et tourner avec précaution pour la retirer de la structure.

NOTA:
Si necesita quitar la placa de pared, inserte un destornillador plano pequeño en las muescas de la placa de pared y gírelo suavemente para hacer palanca contra el bastidor.

11

To hide this outlet when not in use, press.
Press again to release.

Pour renfoncer ce bloc de prise lorsqu'il n'est pas utilisé, appuyer dessus. Appuyer de nouveau pour le faire sortir.

Para ocultar el tomacorriente mientras no está en uso, presiónelo. Vuelva a presionarlo para liberarlo.

Item Name	Grout, Wall Tile
Description:	Pre-blended polymer-modified grout
Manufacturer:	Mapei
Product Type:	Keracolor U (Unsanded Grout)
Sealer:	Penetrating Plus Stone, Tile & Grout Sealer
Color:	38 - Avalanche
Grout Joint Width:	1/16" Grout Joint Width
Lead Time:	Confirm stock with local distributor
Warranty:	Ten year commercial system limited warranty--to be free from manufacturing defects and will not fail under normal usage. Mortar and grout must be specified as a system for the 10 year warranty to be applicable.
Eco-Feature(s) *as per manufacturer:	N/A

Kerapoxy CQ®

Premium Epoxy Grout and Mortar with Color-Coated Quartz

DESCRIPTION

Kerapoxy CQ is an improved, two-component, 100%-solids epoxy grout and mortar that is nonsagging/nonslumping in joints up to 3/8" (10 mm) in width, water-cleanable and easy to apply. *Kerapoxy CQ* uses a proprietary aggregate to achieve its durable color, making it excellent for countertops, high-traffic areas, and areas needing stain and chemical resistance. Easy to maintain, *Kerapoxy CQ* will clean to the original color and contains BioBlock® technology to help protect against mold and mildew.

FEATURES AND BENEFITS

- Superior workability and water cleanability for ease of application
- Nonsagging and nonslumping in joints, for use in both floor and wall applications
- Color consistency and durability
- For grout joints from 1/16" to 3/8" (1,5 to 10 mm)
- No sealer required
- High stain resistance*

* *With immediate cleaning and proper maintenance, Kerapoxy CQ grout is highly resistant to staining when exposed to most common household goods and cleaning agents. Long-term exposure to any material can increase the potential for staining grout.*

INDUSTRY STANDARDS AND APPROVALS

- ANSI: Meets A118.3 requirements
- ISO 13007: Classification R2/RG

LEED v4 Points Contribution

LEED Points

Health Product Declaration (HPD)* Up to 2 points

* *Using this product may help contribute to LEED certification of projects in the category shown above. Points are awarded based on contributions of all project materials.*

Additional Green Certifications

- Living Building Challenge (LBC) Red List Free: This product has been verified per the most current Red List on the LBC website.

WHERE TO USE

For use as a grout

- For grouting most ceramic, porcelain and quarry tiles; acid-resistant floor brick; pavers; and natural-stone tile***
- For grouting interior residential and commercial floor/wall applications
- For grouting exterior residential and commercial floor applications (contact MAPEI's Technical Services Department)
- For industrial, commercial and institutional installations with high-strength, chemical-resistant and nonsagging grout requirements, see "Chemical Resistance" chart in this document. For extreme industrial or commercial applications such as dairies, breweries and high-volume food kitchens, *Kerapoxy IEG CQ* is recommended.
- For heavy traffic areas such as subway stations, shopping malls and airport terminal buildings
- For areas requiring stain-resistant grout such as countertops and vanities

For use as a mortar

- For setting most ceramic, porcelain and quarry tiles, acid-resistant floor brick, pavers and natural-stone tile***
- For the installation of moisture-sensitive natural stone and their agglomerates. When setting light-colored marble, which can be stained by epoxy, use white *Granirapid*[®], white *Ultraflex™ RS* or white *Ultracontact™ RS* or white *Ultraflex LFT™ Rapid****
- For interior/exterior residential and commercial wall, floor and countertop installations
- For installations in areas subject to high water use or submerged conditions (such as gang showers, pools, spas and fountains)
- For industrial, commercial and institutional installations requiring Chemical Resistance, contact MAPEI's Technical Services Department.

*** *Marble, granite and slate are products of nature made from a vast combination of minerals and chemicals that may cause the material to behave or react in a manner beyond our control. Likewise, we do not have control over any of the materials or processes used in the manufacturing of agglomerates. Therefore, determine the suitability of all the materials before proceeding with the installation. To ensure desired results, a mockup installation is required before the actual installation.*

LIMITATIONSFor use as a grout

- Joint width should be between 1/16" and 3/8" (1,5 and 10 mm).
- Do not use for grouting white or translucent marble.
- Do not use in areas subject to excessive heat. Once cured, *Kerapoxy CQ* will resist temperatures up to 212°F (100°C).
- When used as a grout on exterior installations, color variations may occur over time, especially with lighter shades due to ultraviolet rays or environmental contaminants.

Note: Some types of glazed ceramic tiles, marble and granite as well as marble agglomerates can be permanently stained, scratched, dulled or damaged when grouted with pigmented, sanded and epoxy grout formulas. Take all the necessary precautions to ensure that the marble, granite or tiles are compatible with colored grouts. To determine the suitability of the product with colored and/or sanded grouts, check the tile or marble manufacturer's literature and test grout on a separate sample area before grouting.

For use as a mortar

- Do not install over substrates containing asbestos.
- Do not exceed 1/4" (6 mm) in epoxy mortar thickness under the tile.
- Do not apply over particleboard, presswood, oriented strand board (OSB), Masonite, chipboard, Luan,

gypsum floor-patching compounds or similar dimensionally unstable substrates.

- Do not use for setting white or translucent marble.
- Do not install over peel-and-stick crack-isolation membranes or cutback adhesive residue.

SUITABLE SUBSTRATESFor use as a mortar

- Fully cured concrete (at least 28 days old)
- Cement block and brick masonry
- Cement mortars and leveling coats
- Exterior-grade plywood (interior residential floor and countertop applications in dry areas only)
- Cement backer units (CBUs)
- Existing ceramic tile
- Cement and epoxy terrazzo

Consult MAPEI's Technical Services Department for installation recommendations regarding substrates and conditions not listed.

SURFACE PREPARATION

The temperature of the substrate or tilework must be between 60°F and 90°F (16°C and 32°C) while grouting for best results. For proper curing, maintain this temperature range for 72 hours after application.

For use as a grout

- The application of a grout release over certain types of porcelain or textured surface tiles or stone may be advantageous where a fine surface porosity might trap fine cement particles or color pigments. Seek the advice of the tile or stone manufacturer and site-test (mock up) on separate samples before grouting.
- Before grouting, make sure that the tiles or stones are firmly set and that the adhesive or mortar is completely dry.
- Remove all spacers, pegs, ropes and strings.
- Grout joints must be clean and free of standing water, dust, dirt and foreign matter. Remove excess adhesive or mortar from the joint area so that 2/3 of the tile depth is left available for grouting.
- Clean the tile or stone surface to remove dust, dirt, mortar, adhesive and other contaminants that may cause grout discoloration.

For use as a mortar

- All substrates should be structurally sound, stable, dry, clean and free of any substance or condition that may reduce or prevent proper adhesion.

See MAPEI's "Surface Preparation Requirements" document in the Reference & Installation Guides section of the Tile & Stone Installations Systems page on MAPEI's Website.

MIXING

Choose all appropriate safety equipment before use. Refer to the Safety Data Sheet for details.

1. Parts A and B are packaged to exact quantity ratios for proper curing.
2. Pour out all material from the Part B container into Part A. To improve flowability, use a margin trowel to thoroughly scrape all material from the Part B container. Always mix complete units. Do not add other materials to this mixture.
3. Use a slow-speed mixer (at about 300 rpm), or manually mix smaller kits with a margin trowel.
4. Avoid prolonged mixing, which will trap air and shorten the pot life.
5. Mix thoroughly until a homogenous, consistent color is obtained. Scrape the edges of the mixing container at least once during mixing.
6. Wash tools immediately with water before the epoxy hardens. *Kerapoxy CQ* is extremely difficult to remove once cured.
7. Do not place the lid on the container after the material has been mixed.

PRODUCT APPLICATION

Read all installation instructions thoroughly before installation.

For use as a grout

1. Remove mixed product from the container and place it in small piles. (If grouting a wall, place the product on kraft paper laid on the floor.) *Kerapoxy CQ* is a thermosetting product, so that it sets up faster in a container or in a large mass.
2. Use a hard-rubber float with a sharp edge to force the grout into the joints in a continuous manner, leaving it flush with the tile edge.
3. Be certain that all joints are well-compacted and free of voids/gaps. Fill the joints with the maximum amount of grout possible.
4. Thoroughly remove excess *Kerapoxy CQ* from the face of the tile before it loses its plasticity or begins to set. This is most easily accomplished by holding the rubber float at a 90-degree angle to the tile surface and dragging the float across the tile surface diagonally to the grout lines, leaving as little epoxy grout on the tile surface as possible.
5. Clean tiles immediately after applying each unit of *Kerapoxy CQ*. Grout and clean in small areas. Do not attempt to use more than one *Kerapoxy CQ* unit before cleaning tiles. Do not allow *Kerapoxy CQ* to harden on the tile surface. On large projects, working in teams of 2 to 3 people will simplify the installation.
- 6a. For horizontal surfaces:
 - Apply a liberal amount of cold water to the freshly grouted area. Scrub the tile surface diagonally to the joint line using a nonwoven, nylon, white scouring pad (use a more aggressive pad if the tile has an abrasive surface). Apply enough pressure on the pad to loosen any film without removing grout from the joints. Rinse pads frequently while cleaning. Be careful not to get any water in the ungrouted joints.
 - To remove the loosened epoxy residue and water, drag a clean sponge diagonally across the tile surface. Use one side of the sponge for each pass over the tile, rinsing the sponge following the second pass and regularly changing water in the buckets to avoid residue buildup.
 - Do not allow excess water to remain on the tile surface, which would allow a film to form on the surface that would be difficult to remove once hardened.
 - In certain applications, a short-nap terry-cloth towel may be substituted for the sponge, which may work more effectively for removing the loosened epoxy residue and water. Using the "towel drag" method, hold the towel by two corners and drag it diagonally across the grout joints. Rinse the towel often and keep changing water in the buckets to avoid residue buildup.
 - Do not step on freshly cleaned tiles, as this could permanently damage the grout.
- 6b. For vertical surfaces:
 - Mist the surface using a spray bottle in small workable areas. Use a non-abrasive nylon scrubpad and apply enough pressure on the pad to loosen any film without removing grout from the joints. Rinse pads frequently while cleaning. Be careful not to get any water into the ungrouted joints.
 - To touch up grout joint imperfections during initial rinsing, the grout joint can be smoothed with a sharp-edged cellulosic sponge.
7. Perform a final wash within 15 to 20 minutes for best results. To aid in the cleaning process, 1 U.S. oz. (29,6 mL) of a clear dishwashing soap may be added (if needed) to a 3-gallon (11,4-L) pail of clean water. Use a clean, white scrubpad to loosen any remaining residue left on the tile from the first wash. Then follow the same cleaning process as referenced in the section above.
8. Check the installation the following day to make sure it is completely clean. If a tacky residue is found within 24 hours of installation, follow the above instructions for the cleaning removal process.
9. Use only fresh material to fill any voids discovered while cleaning.
10. Check the installation the same day before leaving the jobsite to make sure it is completely clean. If the tile surface has any shiny or tacky residue, remove it with the solution of liquid detergent and water mentioned in

Step 7. For more severe cases of epoxy grout haze, use MAPEI's *UltraCare*™ Epoxy Grout Haze Remover.

For use as a mortar

1. Remove the mixed product from the container and place it in piles on the floor. *Kerapoxy CQ* is a thermosetting product, so it sets faster in a container or a large mass.
2. Choose a notched trowel (see the "Approximate Coverage" chart) with sufficient depth to achieve more than 80% mortar contact to both the tile and substrate for interior applications, and more than 95% contact for exterior installations, commercial floor installations and wet applications. All edges of the tile or stone must be supported by the mortar. It may be necessary to back-butter tiles in order to reach these requirements. (Refer to ANSI A108.5 specifications and TCNA guidelines.)
3. With pressure, apply a coat by using the trowel's flat side to key mortar into the substrate.
4. Apply additional mortar, combing it in a single direction with the trowel's notched side.
5. Spread only as much mortar as can be tiled before the product hardens and loses its ability to transfer to the tile. Open time can vary with jobsite conditions.
6. Place the tiles firmly into the wet mortar. Push the tiles back and forth in a direction perpendicular to trowel lines, to collapse the mortar ridges and to help achieve maximum coverage. Ensure proper contact between the mortar, tile and substrate by periodically lifting a few tiles to check for acceptable coverage (see TCNA adhesive placement guidelines).
7. Remove excess mortar from the joint areas so that at least 2/3 of the tile depth is available for grouting (see ANSI A108.10 guidelines).
8. Provide for expansion and control joints as specified per TCNA Detail EJ171 or TTMAC Specification Guide 09 30 00, Detail 301MJ.
9. Clean tools immediately with fresh water.
10. Check the installation the same day before leaving the jobsite to make sure it is completely clean. If the tile surface has any shiny or tacky residue, remove it with a solution of 1 U.S. oz. (29,6 mL) of a clear dishwashing soap added (if needed) to a 3-gallon (11,4-L) pail of clean water.

PROTECTION

- Protect grout installations for at least 7 days, and wait at least 3 days before checking hardness.
- The optimum curing temperature is 73°F (23°C). Cooler temperatures may require extended protection times.
- Do not disturb grout or walk over installed tiles for at least 24 hours after setting. Do not allow heavy traffic over installed tiles for at least 48 hours after setting.

- Because propane gas heaters will yellow epoxy, refrain from using such heaters or properly vent all exhaust.
- *Kerapoxy CQ* should be cured for at least 10 to 14 days at 73°F (23°C) before water immersion or exposure to chemicals. Longer times will be needed for colder temperatures.
- Do not allow any activity in the area that will cause dirt or debris to become embedded in the grout joints as they are curing.

MAINTENANCE

- *Kerapoxy CQ* should be cured for at least 3 days before routine cleaning.
- When cleaning *Kerapoxy CQ* as grout, keep steam-cleaning wands 6" to 12" (15 to 30 cm) above the tile surface.
- MAPEI grout products are produced to the highest standards of quality. To maintain a clean tile surface, use a neutral-pH cleaner for maintaining the floor, followed by a clean-water rinse.
- Do not use harsh chemicals to maintain the tile surface. Before proceeding with cleaning, consult the cleaner's manufacturer for compatibility, use and application instructions. Remove or rinse fatty acid residue from the grout surface to avoid potential grout deterioration caused by prolonged exposure.

CHEMICAL RESISTANCE (tested according to ISO 13007)

Resistance to chemicals depends on the concentration, temperature and duration of exposure. For long-term durability and improved grout appearance, clean up spills immediately after they occur.

Laboratory tests reveal variable resistance to certain chemicals. The following table may be considered as a general guide for *Kerapoxy CQ* applications at 73°F (23°C).

For recommendations regarding chemicals not listed or concentrations exceeding the levels stated, contact MAPEI's Technical Services Department.

Legend

- ++ Excellent resistance
- + Good resistance; long exposure could cause some deterioration; clean surface rapidly with water
- Poor or no resistance

Shelf Life and Product Characteristics (before mixing)

Shelf life	2 years when stored in original, unopened packaging at 73°F (23°C)
Physical state	Resin (Part A) and hardener (Part B)
Colors	Available in MAPEI's palette of 40 colors, organized into 5 color collections. Refer to MAPEI's grout/caulk color chart. Sample color chips are available upon request.
VOCs (Rule #1168 of California's SCAQMD)	8 g per L

Protect containers from freezing in transit and storage. Provide for heated storage on site and deliver all materials at least 24 hours before work begins.

Application Properties at 73°F (23°C) and 50% relative humidity

Pot life ^{††}	45 to 60 minutes
Full cure ^{††}	14 days
Application temperature range	60°F to 90°F (16°C to 32°C)

^{††} Pot life and curing time will vary depending on ambient temperature, substrate temperature and humidity.

• For use as a mortar

Trowel Size	Coverage per 1 U.S. qt. (946 mL)	Coverage per 1 U.S. gal. (3,79 L)	Coverage per 2 U.S. gals. (7,57 L)
1/4" x 1/4" x 1/4" (6 x 6 x 6 mm), square-notch	4.5 sq. ft. (0,42 m ²)	18 sq. ft. (1,67 m ²)	36 sq. ft. (3,34 m ²)
5/32" x 5/32" (4 x 4 mm), V-notch	10 sq. ft. (0,93 m ²)	40 sq. ft. (3,72 m ²)	80 sq. ft. (7,43 m ²)

* Trowel dimensions are width/depth/space. Coverage shown is for estimating purposes only. Actual jobsite coverage may vary according to actual tile size and thickness, exact joint width, job conditions and grouting methods.

** When grouting abrasive or slip-resistant floor tiles, anticipated coverage can be dramatically decreased. Alternatives to the traditional grouting technique, such as a grout bag or commercial sealant gun, may be of assistance. Consult MAPEI's Technical Services Department for approximate coverage not shown in the above table or use the grout calculator at www.mapei.com.

Keracolor® U Unsanded Grout

Premium Unsanded Grout with Polymer

GR-002

Revision Date: 09/21/2018

DESCRIPTION

Keracolor U Unsanded Grout is a premium-grade, preblended, polymer-modified unsanded Portland-cement tile grout that requires only the addition of water for mixing. It will grout joints from 1/16" to 1/8" (1,5 to 3 mm).

FEATURES AND BENEFITS

- For interior/exterior floors and walls
- Contains BioBlock® technology for mold and mildew resistance

INDUSTRY STANDARDS AND APPROVALS

- ISO 13007: Classification CG2WA
- ANSI: Meets or exceeds ANSI A118.6 industry standards

LEED v3 Points Contribution LEED Points

MR Credit 5, Regional Materials* Up to 2 points

IEQ Credit 4.1, Low-Emitting Materials –
Adhesives & Sealants 1 point

IEQ Credit 4.3, Low-Emitting Materials –
Flooring Systems 1 point

** Using this MAPEI product may help contribute to LEED certification of projects in the categories shown above. Points are awarded based on contributions of all project materials.*

WHERE TO USE

- For grouting interior/exterior residential and commercial floor and wall surfaces in dry or wet conditions

- For grouting dimensional stone, slate, granite, stone agglomerates and most types of ceramic, ceramic mosaic, quarry, brick paver, porcelain, glass and clay tiles
- For joint widths from 1/16" to 1/8" (1,5 to 3 mm)
- For application in submerged conditions (swimming pools, spas, water features and fountains), once fully cured (after 21 days)

LIMITATIONS

- Do not install over substrates containing asbestos.
- Do not use to grout joints greater than 1/8" (3 mm) wide. Instead, use *Keracolor S Sanded Grout*, *Ultracolor® Plus FA* or an appropriate MAPEI epoxy grout (see the respective Technical Data Sheet [TDS] for details).
- Do not use when a highly chemical-, impact- and stain-resistant grout is required or in heavy industrial tile installations. Instead, use an appropriate MAPEI epoxy grout (see the respective TDS for details).
- When grouting in temperatures above 80°F (26°C), see the Technical Bulletins at www.mapei.com or consult MAPEI's Technical Services Department.

Consult MAPEI's Technical Services Department for recommendations regarding installation over substrates and conditions not listed.

SURFACE PREPARATION

- Certain tiles with high absorption, surface porosity or rough surfaces may require sealing before grouting to prevent permanent staining.
- The application of a grout release over certain types of porcelain or textured surface tiles or stone may be advantageous where a fine surface porosity

might trap fine cement particles or color pigments. Seek the advice of the tile or stone manufacturer and site-test (mock up) on separate samples before grouting.

- Caution: Some types of glazed ceramic tiles, marble, granite and marble agglomerates can be permanently stained, scratched, dulled or damaged when grouted with pigmented grout or sanded grout formulas. Generally, white grout is best suited for grouting white or light-colored marble or granite. Take all the necessary precautions to ensure that the marble, granite or tiles are compatible with colored grouts. Check the tile or marble manufacturer's literature and test grout on a separate sample area before grouting to determine the suitability of the product with colored and/or sanded grouts.
- Before grouting, make sure the tiles or stones are firmly set and the adhesive or mortar is completely dry.
- Remove all spacers, pegs, ropes and strings.
- Grout joints must be clean and free of standing water, dust, dirt and foreign matter. Remove excess adhesive or mortar from the joint area so that 2/3 of the depth of the tile is left available for grouting.
- Clean the tile or stone surface thoroughly to remove dust, dirt and other contaminants that may cause grout discoloration.

See MAPEI's "Surface Preparation Requirements" document in the Reference & Installation Guides section of the Tile & Stone Installations Systems page on MAPEI's Website.

MIXING

Choose all appropriate safety equipment before use. Refer to the Safety Data Sheet for details.

1. For best results, have the same person mix all of the grout. Consistent mixing techniques will promote more uniform results.
2. Before mixing the grout with water, dry-blend the product so that the finished grout does not show color variations, which may arise due to pigment settling during shipment. If two or more bags are to be used, dry-blend all of the contents together.
3. Mix *Keracolor U Unsanded Grout* with cool, clean water only or an approved MAPEI additive. Mix by using the following water-to-grout proportions:

<u>Water</u>	<u>Keracolor U Unsanded Grout powder</u>
4.8 to 5.4 U.S. oz. (142 to 160 mL).....	1 lb. (0,45 kg)
24 to 27 U.S. oz. (710 to 798 mL).....	5 lbs. (2,27 kg)
48 to 54 U.S. oz. (1,42 to 1,60 L).....	10 lbs. (4,54 kg)
3.75 to 4.22 U.S. qts. (3,55 to 3,99 L).....	25 lbs. (11,3 kg)

4. Pour the required amount of clean, cool water into a clean mixing container. Gradually add the proportionate amount of *Keracolor U Unsanded Grout* while slowly mixing. To avoid shade variation in the finished grout joints, always add the powder to the water while being consistent in the mixing process and with the quantity of water used from batch to batch.
5. Mix thoroughly with a low-speed mixer (at about 350 rpm) for about 3 to 5 minutes, or until obtaining a smooth, creamy, homogenous paste consistency and a uniform shading of the colored grout.
6. Avoid prolonged mixing, which could trap air and shorten the pot life.
7. Allow the grout to sit ("slake") in the container for about 5 minutes.
8. Remix for about 1 to 2 minutes without adding more liquid or powder.
9. Wash hands and mixing tools with water immediately after mixing.

PRODUCT APPLICATION

Read all installation instructions thoroughly before installation.

1. Use only at temperatures between 50°F and 100°F (10°C and 38°C).
2. Using consistent application and cleaning procedures will produce consistent results.
3. To aid in spreading the grout, slightly moisten the tile or stone surface with a damp sponge just before application. Do not flood the tiles or allow water to stand in the ungrouted joint areas.
4. Force *Keracolor U Unsanded Grout* into the joints with a rubber grout float. Make sure all joints are well-compacted and free of voids and gaps.
5. Remove excess grout from the tile surface, moving the grout float diagonally to the joints while the *Keracolor U Unsanded Grout* is still fresh.
6. The grout surface should be flush with the tile edge.
7. Some stiffening may occur before all material is used (usually within about 1 hour at room temperature). If this occurs, simply remix but do not add any liquid.
8. Provide for expansion and control joints as specified per TCNA Handbook method EJ171 or TTMAC Specification Guide 09300, Detail 301EJ.
9. Allow the *Keracolor U Unsanded Grout* to firm up in the joints sufficiently to avoid damaging the grout surface, usually in 15 to 30 minutes depending upon the temperature, humidity and absorption rate of the tile or stone.
10. Use two buckets of cleaning water: one for rinsing the majority of the grout residue from the grout sponge, and one for moistening the sponge in clean water.

11. Dip the sponge in a bucket of water and wring out the excess, so that the sponge does not drip water. Using very little pressure, pull the sponge diagonally across the grout joints to remove the excess grout from the tile surface. Also use the sponge to smooth the surface of the grout joint. Turn the sponge over and make another pass in an adjacent area. After using both sides, rinse the sponge in one bucket and wring out the excess water. Dip the sponge in the second bucket of water, wringing out the excess and continuing the process.
12. Change the water in the buckets frequently to help limit the amount of haze that forms on the tile or stone surface.
13. To prevent efflorescence, discoloration and soft/powdery joints, avoid cleaning with excessive water.
14. To control color variations and minimize efflorescence, buff the grouted surface with cheesecloth or a clean, dry cotton cloth when a haze is visible on the tile surface, usually one to two hours after grouting. This should remove any remaining surface water or grout residue.
15. Clean hands and tools with clean, soapy water while the grout is fresh.
16. Never use acid for cleaning marble, glazed tile or pigmented grout surfaces. If a persistent haze remains after normal cleaning, see the Technical Bulletins at www.mapei.com or consult MAPEI's Technical Services Department.

PROTECTION

- Provide for dry, heated storage on site and deliver materials at least 24 hours before tilework begins.
- For residential showers and tub surrounds, restrict use for 24 to 48 hours after grouting. For steam showers, restrict use for 14 days after grouting.
- For at least 21 days after grouting, protect the installation from freezing and water immersion (see the TDS of the adhesive or setting system for details).
- Floors: Keep the grout installation free from heavy traffic for at least 72 hours after grouting.
- Walls: Protect the grout installation from impact, vibration and hammering on adjacent and opposite walls for 14 days after tile installation (see the TDS of the adhesive or setting system for details).
- Because temperature and humidity (during and after installation of tile) affect the final curing time of all cement-based materials, allow for extended periods of cure and protection when temperatures drop below 60°F (16°C) and/or when the relative humidity is higher than 70%.

MAINTENANCE

- Sealing is not required. However, a high-performance penetrating grout sealer may still be applied from MAPEI's *UltraCare*™ family of sealers, which includes Penetrating Plus Stone, Tile & Grout Sealer; and

Penetrating Plus SB Stone & Porcelain Tile Sealer. Follow the directions provided in the *UltraCare* Maintenance Guide.

- Grout must be fully cured for 21 days before regular cleaning.
- MAPEI grout products are produced to the highest standard of quality. To maintain a clean tile surface, use a neutral-pH cleaner for maintaining the floor, followed by a clean-water rinse.
- Do not use harsh chemical cleaners to maintain the tile surface. Before proceeding with cleaning, consult the cleaner's manufacturer for compatibility, use and application instructions. Remove or rinse fatty acid residue from the grout surface to avoid potential grout deterioration caused by prolonged exposure.

ISO 13007 Classification

Classification Code	Test Characteristics	Classification Requirement
CG2 (cementitious grout, improved)	Shrinkage	≤ 0.30% shrinkage in 28 days
W (reduced water absorption)	Water absorption	≤ 5 g after 4 hours
A (high abrasion resistance)	Abrasion resistance	≤ 1,000 mm ³

ANSI Specification

Test Method	Specification Standard	Test Results
ANSI A118.6 – flexural strength	400 psi (2,76 MPa) at 7 days	400 to 1,000 psi (2,76 to 6,90 MPa) at 7 days
ANSI A118.6 – compressive strength	3,000 psi (20,7 MPa) at 28 days	3,000 to 5,000 psi (20,7 to 34,5 MPa) at 28 days
ANSI A118.6 – shrinkage	< 0.03% (1 day) < 0.10% (7 days)	< 0.03% (1 day) < 0.10% (7 days)
ANSI A118.6 – water absorption	< 18% (50% relative humidity to immersion) < 20% (immersion to dry)	< 18% (50% relative humidity to immersion) < 20% (immersion to dry)

Shelf Life and Product Characteristics (before mixing)

Shelf life	2 years when stored in original, unopened packaging at 73°F (23°C)
Physical state	Powder
Colors	Available in MAPEI's palette of 40 colors, organized into 5 color collections. Refer to MAPEI's grout/caulk color chart. Sample grout color chips are available upon request.

Application Properties* at 73°F (23°C) and 50% relative humidity

Pot life	About 2 hours
Application temperature range	50°F and 100°F (10°C and 38°C)
Full cure	21 days
VOCs (Rule #1168 of California's SCAQMD)	0 g per L

Packaging

Size

Paint

Issue Date: 28 JUL 2017

Revision Date: 14 FEB 2019

Item Name	Door & Trim Paint
Description:	Paint at guestroom entry door (both sides & frame) and Guestroom Bathroom Sliding Door
Manufacturer:	Benjamin Moore
Color:	Raccoon Fur (2126-20)
Product Type:	Paint: Aura Waterborne Interior Paint (2 coats)
Finish:	Semi-Gloss
Lead Time:	Varies per paint supplier
Warranty:	Limited Lifetime

SPECIAL INSTRUCTIONS

- To be applied over PT-008 primer
- Primer, undercoat, block filler, finish coat(s) are to be compatible and of the same manufacturer. All primers and undercoats are to be tinted to 50% lighter than the selected and approved finish coat color. All finish coats are to be tinted 25% darker than the primer coat until approved finish coat color is achieved. When the color schedule calls for the use of DEEP TONES (interior and/or exterior), it is the responsibility of the painting contractor to utilize the appropriate Deep Base Primers as manufactured by the painting company for use on the substrate for which they are intended.

AURA®

WATERBORNE INTERIOR PAINT

SATIN FINISH 526

Features

- Extreme hide, never more than two coats in any color
- Color Lock® Technology, no color rub-off
- Easy clean up
- Excellent touch up
- Provides a mildew resistant coating
- Stains wash off easily
- Self priming
- Easy application

General Description

Aura® Satin Finish is part of an innovative paint and colorant system integrating the best technologies to deliver superior durability for any color along with the promise of long lasting beauty. In addition to using 100% acrylic latex, proprietary resins have been incorporated to give the product its extraordinary performance properties.

Recommended For

New or previously painted wallboard, plaster, masonry and wood; primed or previously painted metal; new or coated acoustic ceilings. It is ideal for surfaces where maximum durability is required and lasting color is desired

Limitations

- Do not apply when air and surface temperatures are below 50° F (10° C)
- Only Genex® Waterborne Colorants can be added to Aura® Paint

Product Information

Colors:—Standard:

No ready-mixed colors are available.

—Tint Bases:

1X, 2X, 3X, & 4X Tint Bases only with Genex® Waterborne Colorant.

—Special Colors:

Contact your Benjamin Moore & Co. representative.

Certification:

VOC compliant in all regulated areas

Master Painters Institute MPI #43, 43 X-Green

Class A (0-25) over non-combustible surfaces in accordance with ASTM E-84

Based on independent, third-party testing, the Green Promise® designation certifies that this product meets or exceeds each standard shown in the following chart.

48 Grams / Liter .40 LBS / Gallon

[∅]Reported values are for Pastel Base. Contact Benjamin Moore & Co. for values of other bases or colors.

Aura® Waterborne Interior Paint Satin Finish 526**Surface Preparation**

Surfaces to be painted must be clean, dry, and free of dirt, dust, grease, oil, soap, wax, scaling paint, water soluble materials and mildew. Remove any peeling or scaling paint, and sand these areas to feather edges smooth with adjacent surfaces. Glossy areas should be dulled. Drywall surfaces must be free of sanding dust. Spot prime with Aura® Satin Finish Paint before and after filling nail holes, cracks, and other surface imperfections.

New plaster or masonry surfaces must be allowed to cure (30 days) before applying base coat. Cured plaster should be hard, have a slight sheen and maximum pH of 10; soft, porous or powdery plaster indicates improper cure. Never sand a plaster surface; knife off any protrusions and prime plaster before and after applying patching compound. Poured or pre-cast concrete with a very smooth surface should be etched or abraded to promote adhesion, after removing all form release agents and curing compounds. Remove any powder or loose particles.

Difficult Substrates: Benjamin Moore & Co. offers a variety of specialty primers for use over difficult substrates such as plaster, bleeding woods, grease stains, crayon markings, hard glossy surfaces, galvanized metal or other substrates where paint adhesion or stain suppression is a particular problem. Your Benjamin Moore® retailer can recommend the right problem-solving primer for your special needs.

WARNING! If you scrape, sand, or remove old paint, you may release lead dust. **LEAD IS TOXIC. EXPOSURE TO LEAD DUST CAN CAUSE SERIOUS ILLNESS, SUCH AS BRAIN DAMAGE, ESPECIALLY IN CHILDREN. PREGNANT WOMEN SHOULD ALSO AVOID EXPOSURE.** Wear a NIOSH approved respirator to control lead exposure. Clean up carefully with a HEPA vacuum and a wet mop. Carefully clean up with a HEPA vacuum and a wet mop. Before you start, find out how to protect yourself and your family by contacting the National Lead Information Hotline at 1-800-424-LEAD or log on to www.epa.gov/lead.

Primer/Finish Systems

Aura® Satin Finish is self priming on most surfaces. Aura® will act as its own primer, providing the optimal foundation for the subsequent finish coat. On bare substrates two coats are required; previously painted surfaces can be finished with 1 or 2 coats. **Special Note:** For certain deep colors, Aura® Color Foundation must be used to achieve maximum hide and the desired topcoat color. Consult your retailer.

Wood and engineered wood products:

Primer: For non-bleeding woods, use Fresh Start® All-Purpose 100% Acrylic Primer (N023) or 100% Acrylic Superior Primer (046). For bleeding woods such as cedar and redwood, use Fresh Start® All-Purpose Alkyd Primer (024)

Finish: 1 or 2 coats Aura® Satin Finish.

Plaster/Wallboard:

Primer/Finish: 1 or 2 coats of Aura® Satin Finish.

Rough or Pitted Masonry:

Primer: Super Spec® Latex Block Filler (160) or Super Spec® Masonry Interior/Exterior Hi-Build Block Filler (206)

Finish: 1 or 2 coats of Aura® Satin Finish.

Smooth Poured or Precast Concrete:

Primer/Finish: 1 or 2 coats of Aura® Satin Finish.

Ferrous Metal (steel & iron):

Primer: Super Spec HP® Acrylic Metal Primer (P04) or Super Spec HP® Alkyd Metal Primer (P06).

Finish: 1 or 2 coats of Aura® Satin Finish.

Non-Ferrous Metal (galvanized & aluminum):

All new metal surfaces must be thoroughly cleaned with (P83) Oil & Grease Emulsifier to remove contaminants. New shiny non-ferrous metal surfaces that will be subject to abrasion should be dulled with very fine sandpaper or a synthetic steel wool pad to promote adhesion

Primer: Not required on properly prepared surfaces

Finish: 1 or 2 coats of Aura® Satin Finish.

Repaint, All Substrates: Prime bare areas with the primer / finish recommended for the substrate above.

Application

Mixing of Paint: Stir thoroughly before and during use.

Use the same brushing techniques as you would for any low-VOC compliant interior coating. Benjamin Moore recommends an extra firm nylon polyester brush for best results.

Aura® offers excellent flow and leveling. Do not over brush in the attempt to smooth out brush marks.

We recommend the Benjamin Moore® Aura® shed-resistant, 3/8" nap roller cover for best results. Aura® dries faster than other acrylic paints, so avoid lap marks by maintaining a wet edge. Roll out vertical sections in 3' to 4' widths.

If your edge begins to dry or you see that you missed a spot and the paint is already setting up, allow it to dry completely before touching up that area.

This product can also be sprayed; refer to the chart below for spray recommendations.

Thinning/Cleanup

Conditioning with Benjamin Moore® 518 Extender may be necessary under certain conditions to adjust open time or spray characteristics. The chart below is for general guidance.		
	Mild conditions	Severe conditions
	Humid (RH> 50%) with no direct sunlight & with little to no wind	Dry (RH<50%), in direct sunlight, or windy conditions
Brush: Nylon / Polyester	No thinning necessary	Add 518 Extender or water: Max of 8 fl. oz. to a gallon of paint Never add other paints or solvents.
Roller: 3/8" AURA Roller Cover		
Spray: Airless Pressure: 1500-2500 psi Tip: 0.011-0.015		
.012 -.014 Fine Finish tips produce excellent spray results in the 500-1000 psi range.		

Cleanup: Wash painting tools in warm soapy water immediately after use. Spray equipment should be given a final rinse with mineral spirits to prevent rusting.

USE COMPLETELY OR DISPOSE OF PROPERLY. Dry, empty containers may be recycled in a can recycling program. **Local disposal requirements vary; consult your sanitation department or state-designated environmental agency on disposal options.**

Environmental, Health & Safety Information

Use only with adequate ventilation. Do not breathe spray mist or sanding dust. Ensure fresh air entry during application and drying. Avoid contact with eyes and prolonged or repeated contact with skin. Avoid exposure to dust and spray mist by wearing a NIOSH approved respirator during application, sanding and clean up. Follow respirator manufacturer's directions for respirator use. Close container after each use. Wash thoroughly after handling.

WARNING: This product contains a chemical known to the state of California to cause cancer and birth defects, or other reproductive harm.

FIRST AID: In case of eye contact, flush immediately with plenty of water for at least 15 minutes; for skin, wash thoroughly with soap and water. If symptoms persist, seek medical attention. If you experience difficulty breathing, leave the area to obtain fresh air. If continued difficulty is experienced, get medical attention immediately.

IN CASE OF SPILL – Absorb with inert material and dispose of as specified under **Thinning/Cleanup**.

**KEEP OUT OF REACH OF CHILDREN
PROTECT FROM FREEZING**

**Refer to Material Safety Data Sheet for
additional health and safety information.**

Before you start, find out how to protect yourself and your family by contacting the National Lead Information Hotline at 1-800-424-LEAD or log on to www.epa.gov/lead

Primer/Finish Systems

Aura® Semi-gloss Finish is self priming on most surfaces. Aura® will act as its own primer, providing the optimal foundation for the subsequent finish coat. On bare substrates two coats are required; previously painted surfaces can be finished with 1 or 2 coats. **Special Note:** For certain deep colors, Aura® Color Foundation must be used to achieve maximum hide and the desired topcoat color. Consult your retailer.

Wood and Engineered Wood Products:

Primer: Fresh Start® Multi-Purpose Latex Primer (023) or Fresh Start® High-Hiding All Purpose Primer (046)

Finish: 1 or 2 coats Aura® Semi-gloss Finish (528)

Bleeding woods such as cedar and redwood:

Primer: Fresh Start® High-Hiding All Purpose Primer (046) or Fresh Start® Multi-Purpose Oil Based Primer (024)

Plaster/Wallboard:

Primer/Finish: 1 or 2 coats of Aura® Semi-gloss Finish (528)

Rough or Pitted Masonry:

Primer: Ultra Spec® Masonry Interior/Exterior Hi-Build Block Filler (571)

Finish: 1 or 2 coats of Aura® Semi-gloss Finish (528)

Smooth Poured or Precast Concrete:

Primer/Finish: 1 or 2 coats of Aura® Semi-gloss Finish (528)

Ferrous Metal (Steel & Iron):

Primer: Ultra Spec® HP Acrylic Metal Primer (HP04) or Super Spec HP® Alkyd Metal Primer (P06)

Finish: 1 or 2 coats of Aura® Semi-gloss Finish (528)

Non-Ferrous Metal (Galvanized & Aluminum):

All new metal surfaces must be thoroughly cleaned with Oil & Grease Emulsifier Corotech® V600 to remove contaminants. New shiny non-ferrous metal surfaces that will be subject to abrasion should be dulled with very fine sandpaper or a synthetic steel wool pad to promote adhesion.

Primer: Not required on properly prepared surfaces.

Finish: 1 or 2 coats of Aura® Semi-gloss Finish (528)

Repaint, All Substrates: Prime bare areas with the primer / finish recommended for the substrate above.

Application

Mixing of Paint: Stir thoroughly before and during use.

Use the same brushing techniques as you would for any low-VOC interior coating. Benjamin Moore recommends an extra firm nylon polyester brush for best results.

Aura® offers excellent flow and leveling. Do not over brush in the attempt to smooth out brush marks.

We recommend the Benjamin Moore® Aura® shed-resistant, 3/8" nap roller cover for best results. Aura® dries faster than other acrylic paints, so avoid lap marks by maintaining a wet edge. Roll out vertical sections in 3' to 4' widths.

If your edge begins to dry or you see that you missed a spot and the paint is already setting up, allow it to dry completely before touching up that area.

This product can also be sprayed; refer to the chart below for spray recommendations.

Thinning/Clean Up

Conditioning with Benjamin Moore® 518 Extender may be necessary under certain conditions to adjust open time or spray characteristics. The chart below is for general guidance.		
	Mild conditions	Severe conditions
	Humid (RH> 50%) with no direct sunlight & with little to no wind	Dry (RH<50%), in direct sunlight, or windy conditions
Brush: Nylon / Polyester	No thinning necessary	Add 518 Extender or water: Max of 8 fl. oz. to a gallon of paint Never add other paints or solvents.
Roller: 3/8" Aura® Roller Cover		
Spray: Airless Pressure: 1000 - 2000 psi Tip: 0.013-0.017		

Clean up: Wash painting tools in warm soapy water immediately after use. Spray equipment should be given a final rinse with mineral spirits to prevent rusting or follow state/local guidelines on solvent use.

USE COMPLETELY OR DISPOSE OF PROPERLY. Dry, empty containers may be recycled in a can recycling program. **Local disposal requirements vary; consult your sanitation department or state-designated environmental agency on disposal options.**

Environmental Health & Safety Information

Use only with adequate ventilation. Do not breathe spray mist or sanding dust. Ensure fresh air entry during application and drying. Avoid contact with eyes and prolonged or repeated contact with skin. May cause allergic skin reaction. Avoid exposure to dust and spray mist by wearing a NIOSH approved respirator during application, sanding and clean up. Follow respirator manufacturer's directions for respirator use. Close container after each use. Wash thoroughly after handling.

WARNING: This product contains a chemical known to the state of California to cause cancer and birth defects, or other reproductive harm.

FIRST AID: In case of eye contact, flush immediately with plenty of water for at least 15 minutes; for skin, wash thoroughly with soap and water. If symptoms persist, seek medical attention. If you experience difficulty breathing, leave the area to obtain fresh air. If continued difficulty is experienced, get medical attention immediately.

IN CASE OF SPILL – Absorb with inert material and dispose of as specified under **Thinning/Clean up.**

**KEEP OUT OF REACH OF CHILDREN
PROTECT FROM FREEZING**

**Refer to Safety Data Sheet for
additional health and safety information**

Benjamin Moore®

FRESH START®

ALL PURPOSE INTERIOR/EXTERIOR
100% ACRYLIC PRIMER 023

Features

- Provides a total latex system, offering excellent resistance to blistering on new construction.
- Easy to apply.
- Excellent hiding and leveling properties.
- Excellent adhesion.
- Quick dry.
- Spatter resistant.
- Minimal odor.

Recommended For

Interior: Use on new or previously painted wood, plywood, drywall, ceiling tile, Formica®, Masonite®, ceramic tile and cured plaster. Fresh Start® All-Purpose 100% Acrylic Primer is an excellent sealer and primer for use under new wall coverings and can also be used as a primer coat over existing wall coverings.

Exterior: Use on new or previously painted wood, fiber cement board, hardboard siding, aluminum, galvanized metal, brick, cured masonry and previously coated ferrous metal surfaces.

General Description

A premium quality, 100% acrylic interior and exterior primer formulated for sealing and suppressing most bleeding type stains including crayon, graffiti, grease marks, water stains, cedar and redwood bleed, asphalt, creosote, rust and smoke. In cases of severe bleeding, a solvent based primer should be used to prevent stains from reappearing. Fresh Start® All-Purpose 100% Acrylic Primer combines any of the qualities desired in a primer: high hiding, excellent adhesion, blister resistance, quick dry, spatter proof and minimal odor with excellent flow and leveling.

Limitations

- Not recommended for sealing knots or over pine sap.
- On hard, non-porous surfaces, such as glazed ceramics and metal, maximum adhesion and hardness may take 3-4 days to develop.
- Do not apply when air and surface temperatures are below 50° F (10° C).

Product Information

Colors — Standard:

White
White may be tinted to light pastels with up to 2.0 fl. oz. of Benjamin Moore® Color Preview® or Gennex® colorants per gallon.
For best hiding results, tint to the approximate shade of the finish coat.

— Tint Bases:

Deep Color Base
(When tinted in accordance with Benjamin Moore & Co. prescriptions, the Deep Color Base will provide a hiding base coat suitable for use under deep and intense colors.)

— Special Colors:

Contact your Benjamin Moore & Co. representative.

Certification:

VOC compliant in all regulated areas

Master Painters Institute MPI # 6, 17, 39, 137

Class A (0-25) over non-combustible surfaces when tested in accordance with ASTM E-84

Qualifies for
LEED®
Credit

Technical Assistance:

Available through your local authorized independent Benjamin Moore & Co. retailer. For the location of the retailer nearest you, call 1-800-826-2623, see www.benjaminmoore.com, or consult your local Yellow Pages.

Technical Data[◇]

Pastel Base

Vehicle Type	100% Acrylic Later
Pigment Type	Titanium Dioxide
Volume Solids	29.4%
Coverage per Gallon at Recommended Film Thickness	400 – 450 Sq. Ft.
Recommended Film Thickness	– Wet 3.8 mils – Dry 1.1 mils
Depending on surface texture and porosity. Be sure to estimate the right amount of paint for the job. This will ensure color uniformity and minimize the disposal of excess paint.	
Dry Time @ 77° F (25° C) @ 50% RH	– To Touch 1 Hour – To Recoat 3 Hours
High humidity and cool temperatures will result in longer dry, recoat and service times.	
Dries By	Evaporation, Coalescent
Viscosity	99 ± 3 KU
Flash Point	None
Gloss / Sheen	Flat (5-10 @ 85°)
Surface Temperature at Application	– Min. 50° F – Max 90° F
Thin With	Do Not Thin
Clean Up Thinner	Clean Water
Weight Per Gallon	10.7 lbs
Storage Temperature	– Min. 40° F – Max 90° F

Volatile Organic Compounds (VOC)

White 50 Grams/Liter	.42 Lbs./Gallon
Deep Base 40 Grams/Liter	.34 Lbs./Gallon

[◇] Reported values are for White. Contact Benjamin Moore & Co. for values of other bases or colors.

Fresh Start® All Purpose Interior/Exterior 100% Acrylic Primer 023**Surface Preparation**

Surfaces to be painted must be clean, dry, and free of dirt, dust, grease, oil, soap, wax, scaling paint, water soluble materials, and mildew. Remove any peeling or scaling paint and sand these areas to feather edges smooth with adjacent surfaces. Glossy areas should be dulled. Drywall surfaces must be free of sanding dust.

New plaster or masonry surfaces must be allowed to cure before applying base coat. Cured plaster should be hard, have a slight sheen and maximum PH of 10; soft, porous or powdery plaster indicates improper cure. Never sand a plaster surface; knife off any protrusions and prime plaster before and after applying patching compound. Poured or pre-cast concrete with a very smooth surface should be etched or abraded to promote adhesion, after removing all form release agents and curing compounds. Remove any powder or loose particles before priming. Wood substrates must be thoroughly dry. Caution: Smooth planed clapboards or siding must be sanded thoroughly to break the "mill glaze" allowing proper penetration and adhesion.

Difficult Substrates: If the surfaces to be painted exhibit severe tannin or smoke staining, an alkyd based Benjamin Moore & Co. primer may be your best choice for conquering these severe conditions. Consult your Benjamin Moore & Co. retailer for further guidance.

WARNING! If you scrape, sand or remove old paint, you may release lead dust. **LEAD IS TOXIC. EXPOSURE TO LEAD DUST CAN CAUSE SERIOUS ILLNESS, SUCH AS BRAIN DAMAGE, ESPECIALLY IN CHILDREN. PREGNANT WOMEN SHOULD ALSO AVOID EXPOSURE.** Wear a NIOSH-approved respirator to control lead exposure. Carefully clean up with a HEPA vacuum and a wet mop. Before you start, find out how to protect yourself and your family by contacting the National Lead Information Hotline at 1-800-424-LEAD or log on to www.epa.gov/lead.

Primer/Finish Systems

Fresh Start® All-Purpose 100% Acrylic Primer is the preferred primer in most situations. New surfaces should be fully primed, and previously painted surfaces may be primed or spot primed as necessary. For best hiding results use Fresh Start® All-Purpose 100% Acrylic Primer tinted to the approximate finish coat color.

Special Note: Certain custom colors require a Deep Color Base Primer tinted to a special prescription formula to achieve the desired color. Consult your retailer.

Wood, and engineered wood products:

Primer: Fresh Start® All-Purpose 100% Acrylic Primer (023)

For bleeding woods such as cedar and redwood, use Fresh Start® All-Purpose 100% Acrylic Primer (023) or Fresh Start® All-Purpose Alkyd Primer (024)

Finish: 1 or 2 coats of the appropriate Benjamin Moore® finish coat

Drywall:

Primer: Fresh Start® All-Purpose 100% Acrylic Primer (023)

Finish: 1 or 2 coats of the appropriate Benjamin Moore® finish coat

Plaster:

Primer: Fresh Start® All-Purpose 100% Acrylic Primer (023)

Finish: 1 or 2 coats of the appropriate Benjamin Moore® finish coat

Rough or Pitted Masonry:

Primer: Super Spec® Latex Block Filler (160) or Super Spec® Masonry Interior/Exterior Hi-Build Block Filler (206)

Finish: 1 or 2 coats of the appropriate Benjamin Moore® finish coat

Smooth Poured or Pre-cast Concrete:

Primer: Super Spec® Masonry 100% Acrylic Masonry Sealer (N/066) or Fresh Start® All-Purpose 100% Acrylic Primer (023)

Finish: 1 or 2 coats of the appropriate Benjamin Moore® finish coat

Ferrous Metal (Steel and Iron):

Primer: Super Spec HP® Acrylic Metal Primer (P04) or Super Spec HP® Alkyd Metal Primer (P06)

Finish: 1 or 2 coats of the appropriate Benjamin Moore® finish coat

Repaint, All Substrates: Prime bare areas with the primer recommended for the substrate above.

Application

Stir thoroughly before and during use. Apply one or two coats.

Paint Application: For best results, use a premium Benjamin Moore® custom-blended nylon/polyester brush, premium Benjamin Moore® roller, or a similar product. Apply paint generously from unpainted area into wet area.

This product can also be sprayed.

Spray, Airless: Fluid Pressure: 1500 – 2500

Tip: .013 - .017

Thinning/Cleanup

Thinning is unnecessary, but if required to obtain desired application properties, a small amount of clean water may be added. Never add other paints or solvents.

Clean Up: Clean equipment with mineral spirit. Spray equipment should be given a final rinse with mineral spirits to prevent rusting.

USE COMPLETELY OR DISPOSE OF PROPERLY. Dry, empty containers may be recycled in a can recycling program. Local disposal requirements vary; consult your sanitation department or state-designated environmental agency on disposal options.

Environmental, Health & Safety Information.

Use only with adequate ventilation. Do not breathe spray mist or sanding dust. Ensure fresh air entry during application and drying. Avoid contact with eyes and prolonged or repeated contact with skin. Avoid exposure to dust and spray mist by wearing a NIOSH approved respirator during application, sanding and clean up. Follow respirator manufacturer's directions for respirator use. Close container after each use. Wash thoroughly after handling.

WARNING: This product contains a chemical known to the state of California to cause cancer and birth defects, or other reproductive harm.

FIRST AID: In case of eye contact, flush with water for 15 minutes; for skin, wash with soap and water. If you experience difficulty in breathing, leave the area to obtain fresh air. If continued difficulty is experienced, get medical attention immediately.

IN CASE OF SPILL — Absorb with inert material and dispose of as specified under Thinning/Cleanup.

PRO INDUSTRIAL™ ACRYLIC COATING

**OUTSTANDING AESTHETICS.
RELIABLE PERFORMANCE.
PRO INDUSTRIAL DELIVERS.**

Balancing the durability of an industrial coating with the aesthetics of an architectural paint, Pro Industrial Acrylic Coating is an excellent option for protecting many commercial and light industrial spaces. Water based and meeting many of the most stringent regulatory and accreditation program requirements, Pro Industrial Acrylic Coating combines reliable performance with ease of application to help make maintaining heavy use environments less challenging.

KEY BENEFITS:

- ✓ Abrasion resistance for optimal performance in heavy-use spaces
- ✓ Chemical resistant
- ✓ Flows and levels to a smooth finish
- ✓ Fast dry for quicker return to service
- ✓ Withstands the repetitive cleaning of public spaces
- ✓ Flash-rust resistant
- ✓ Multiple sheens available

KEY USES:

- ✓ Gymnasiums and locker rooms
- ✓ Hospital and school corridors
- ✓ Commercial buildings
- ✓ Transit stations
- ✓ Auditoriums

PRO INDUSTRIAL™ ACRYLIC COATING

This 100% acrylic water based coating offers the performance and adhesion necessary in moderate commercial and light industrial spaces in an easy-to-apply, single-component product. Available in eggshell, semi-gloss, gloss and matte finishes, Pro Industrial Acrylic Coating provides the appearance of a typical architectural coating with the durability of an industrial coating.

Designed for both interior and exterior use, Pro Industrial Acrylic Coating is engineered to provide long-lasting protection. It is especially well suited for high-traffic areas like hallways and corridors, as well as for wall surfaces that must stand up to constant cleaning, such as those in kitchens and restrooms. Pro Industrial Acrylic Coating is suitable for use in USDA-inspected facilities, and offers excellent resistance to chemicals.

With application to most properly prepared substrates, this coating extends the service life by combining durability with color and gloss retention. Minimize repaints and save on long-term maintenance costs by choosing Pro Industrial Acrylic Coating.

PRODUCT CERTIFIED FOR
LOW CHEMICAL EMISSIONS

Item Name	Wall Tile (2 of 3)
Description:	Shower Textured Wall Tile
Manufacturer:	Ceramic Technics
Product:	Woodbridge 3D Nilo
Color:	Ice White
Dimensions:	10" x 10"
Material:	Porcelain
Thickness:	7/8", varies over total tile
Finish:	Matte
Recommended Grout:	Refer to GR-002
Lead Time:	6-8 Weeks
Warranty:	Manufacturer will replace any uninstalled material found to be defective provided that the buyer has given written notice within 12 months of the original purchase date. Refer to manufacturer's website for additional details on limitations/exclusions, etc.
Eco-Feature(s) *as per manufacturer:	N/A

SPECIAL INSTRUCTIONS

1. The complete shower wall tile design is made up of (3) wall tiles. Tiles TW-001.1-A1 and TW-001.2-A1 are used on the back wall of the shower. TW-001.3-A1 is used on the side walls (shower head wall and control wall). Refer to drawings for wall tile elevations.
2. Requires TS-002 trim to finish exposed edge of tile. Refer to drawings for location of trim.

Information & Specifications
CSI Division 06 61 13

SPECIFICATIONS

Description :	Multi-Piece Sealed Surface Panel System
Standard :	MINCOR™
Series :	Reflections
Color (Specify) :	#2250 Solid White
Finish :	Linen
Construction :	Cast Marble

DIMENSIONS

End Panels :	X 2 : 40"
Back Panels :	X 2 : 31" *
Height :	98"
Thickness :	5/16"

SOFFIT DIMENSIONS

Inside of Soffit Panel :	X 1 : 62" x 16" x 1/4"
Bottom of Soffit Panel :	X 1 : 62" x 6" x 1/4"

SPECIFIED SHOWER PAN

TD-3660-OS/SF : 36" x 60" Trench Drain Pan, available with Left and Right Drain location

NOTES

1. Drawing shows maximum panel dimensions. Cutting must be done on site to fit project requirements.
2. Panels received will be oversized. Trimming to fit site dimensions is necessary. Always trim end panels on the inside, where they meet the back wall.
- * 3. Back panel is 2 Vertical peices; Trim 2 back panels to fit, but DO NOT trim straight factory finished edges where the panels will be seamed together. Back wall will be seamed Vertically with no seam cover.
- ** 4. Soffit has a TS-TR Traditional Non-Patterned Panels installed on the inside and on the bottom of the soffit.
5. Extremely sanitary, impervious to mold, mildew, & bacteria.
6. 10-year limited warranty against manufacturing defects.
7. MINCOR™ - Class A fire rated per ASTM e84 : Fire rated material available.
8. Made in the U.S.A.
9. Copyright © 2000 - 2018 Mincey Marble Inc.
10. Silicone color is to match the surround color.

*Lines on Panels on Back and Sides are not Intended to Align

*Back Walls are 3-Dimensional Relief, Side Walls are Flat

Maintenance

Schluter® wall and countertop profiles require no special maintenance or care and are resistant to mold and fungi. Clean profiles using common household cleaning agents.

Stainless steel surfaces exposed to the

environment or aggressive substances should be cleaned periodically using a mild household cleaner. Regular cleaning maintains the neat appearance of stainless steel and reduces the risk of corrosion. All cleaning agents must be free of hydro-chloric, hydrofluoric acid, and chlorides. Stainless steel surfaces develop a sheen when treated with a chrome-polishing agent.

Oxidation films on **solid brass** or **aluminum** may be removed with a common polishing agent, but will form again.

In the case of **chrome-plated brass**, **anodized aluminum**, **color-coated aluminum**, and **textured color-coated aluminum** do not use abrasive cleaning agents.

Finish:	Polished chrome
Quality Standards:	ASME A112.18.1/CSA B125.1 EPA WaterSense®
Lead Time:	Standard lead time is a minimum of 8 weeks from receipt of Purchase Order and Deposit. Lead time is typical and should be verified by the manufacturer.
Warranty:	5 year hospitality commercial warranty
Eco-Feature(s) *as per manufacturer:	WaterSense®-labeled 1.75-gpm showerheads use up to 30 percent less water than standard 2.5-gpm showerheads while still meeting strict performance guidelines. This product can help a building earn Water Efficiency points in the LEED® Green Building Rating System. This product meets water savings requirements for California Energy Commission (CEC), CALGreen, and Colorado SB 14-103.

NOTICE: Countertop manufacturer or cutter must use the current product template available at www.kohler.com, or by calling 1-800-4KOHLER. Kohler Co. is not responsible for cutout errors when the incorrect cutout template is used.

ADA compliant when installed to the specific requirements of these regulations.

Technical Information

All product dimensions are nominal.

- Bowl configuration: Single
- Installation: Under-mount
- Bowl area (Only) Diameter: 13-3/4" (349 mm)
Water depth: 3-1/8" (79 mm)
- Drain hole: 1-3/4" (44 mm)
- Template: 1109224-7, required, not included

Features

- One-piece, self-contained ceramic disc valve allows both volume and temperature control.
- High-temperature limit stop for added safety.
- Single-hole mounting.
- Flexible connections for easy installation.
- Lever handle.
- 5.1" (130 mm) spout length.
- 1.2 gal/min (4.5 l/min) maximum flow rate [max at 60 psi (4.14 bar)].

Material

- Brass construction.

Specifications

FAUCET DESCRIPTION

- Metal construction with various finishes identified by suffix
- Includes showerhead, arm, flange and diverter spout

OPERATION

- Handle operates counterclockwise through a 270° arc with off at 6 o'clock and maximum hot at the 9 o'clock position. Shut off in clockwise direction
- Adjustable temperature limit stop to control maximum hot water temperature
- Pressure balancing mechanism maintains selected discharge temperature to ± 3°

FLOW

- Showerhead is limited to 2.5 gpm (9.5 L/min) at 80 psi
- EP suffix models are limited to 1.75 gpm (6.6 L/min) at 80 psi
- NH suffix models contain no showerhead

CARTRIDGE

- 1222 cartridge design
- Nonmetallic/nonferrous and stainless steel materials
- Accommodates back to back installations

STANDARDS

- Third party certified to meet ASME A112.18.1/CSA B125.1 and all applicable requirements referenced therein
- EP suffix models are third party certified to WaterSense®

- **ADA**  for lever handle

WARRANTY

- Lifetime limited warranty against leaks, drips and finish defects to the original consumer purchaser
- 5 year warranty if used in commercial installations

ALIGN™ POSI-TEMP® Single-Handle Tub/Shower Trim Kit

- Models:** T2191 series - valve trim only
 T2192 series - shower trim only
 T2193 series - tub/shower trim

Valves: 62300 series
 2500 series

Aloft Glass Shower Door

PL-700-CO
Revision Date:

Door Jamb and Sweeps

Dimensions: V.I.F.

Hardware: Polished Chrome Finish

*All Glass to be 3/8" (10mm) Clear Tempered SGCC Certified

*Required blocking behind walls; blocking above ceiling recommended due to strike jamb application being needed.

*Glass door to open out only. The door jamb application is necessary to ensure the glass door doesn't swing into the shower opening.

*Size of fixed glass determined by size of opening

*U-Channel across the top of the opening extends across the top of the door. Snap cover will be inserted into the U-Channel between the fixed panel and the door. Door to be 2" below U-Channel header.

Features

- Mixing valve cycles from "cold" to "hot".
- Rite-Temp® pressure-balancing diaphragm design valve.
- Rite-Temp® pressure-balancing technology maintains water temperature within +/- 3 degrees Fahrenheit.
- Provides anti-scald protection and temperature regulation.
- Integral screwdriver stops allow you to turn off the water supply at the valve.
- High-temperature safety stop ensures water temperature stays below 120 degrees Fahrenheit.
- Universal NPT and direct sweat connections need no additional parts for installation.
- Requires valve trim (sold separately).
- Deep rough-in kit varies with trim.

Material

- Brass construction.

Installation

- Back-to-back installation is ideal for unique or high-volume jobs.
- Mounting tabs located on rough-in for secure installation option.

Contemporary design combines with **PATENTED** BridgeBind™ Technology resulting in a Grab Bar with:

- Structural Stainless Steel
- Beauty-Functionality-Durability
- No lines for dirt to collect - maintenance free
- Unparalleled strength

BridgeBind™ Technology is the result of drilling a hole completely through stainless steel tubing, inserting a solid stainless steel pin, and HeliArc welding the pin to the far point of the tube; solidifying the pin and tube into one piece. Creating the ultimate structural bond.

MECHANICAL DATA
Width: See product part number for width. Complete length of Grab Bar is usable surface. Diameter: 1.25" (3.2cm)
PRODUCT COMPOSITION
Entire product is 18/8 (304) stainless steel. Solid caps and pins are HeliArc welded to 18 gauge tube.
MODALITY
Use: Wall Installation. Load Capability: 800 lbs (362.9kg)
INSTALLATION
WingIts® MODERN Elegance™ Structural Stainless Steel Grab Bars are designed to hold live loads and must be installed into adequate structural blocking or with WingIts® Grab Bar Fasteners (GBWME40).
CERTIFICATIONS
WingIts® MODERN Elegance™ Structural Stainless Steel Grab Bars meet or exceed the applicable requirements of all building codes, ADA criteria, and 2010 ADAAG and 2009 ANSI standards.
RECOMMENDED INTEGRATION
For hollow wall construction, it is recommended that WingIts® Grab Bar Fasteners (GBWME40) are used with this product. See Fastener instructions for applications.

Contemporary design combines with **PATENTED** BridgeBind™ Technology resulting in a Grab Bar with:

- Structural Stainless Steel
- Beauty-Functionality-Durability
- No lines for dirt to collect - maintenance free
- Unparalleled strength

BridgeBind™ Technology is the result of drilling a hole completely through stainless steel tubing, inserting a solid stainless steel pin, and HeliArc welding the pin to the far point of the tube; solidifying the pin and tube into one piece. Creating the ultimate structural bond.

MECHANICAL DATA
Width: See product part number for width. Complete length of Grab Bar is usable surface. Diameter: 1.25" (3.2cm)
PRODUCT COMPOSITION
Entire product is 18/8 (304) stainless steel. Solid caps and pins are HeliArc welded to 18 gauge tube.
MODALITY
Use: Wall Installation. Load Capability: 800 lbs (362.9kg)
INSTALLATION
WingIts® MODERN Elegance™ Structural Stainless Steel Grab Bars are designed to hold live loads and must be installed into adequate structural blocking or with WingIts® Grab Bar Fasteners (GBWME40).
CERTIFICATIONS
WingIts® MODERN Elegance™ Structural Stainless Steel Grab Bars meet or exceed the applicable requirements of all building codes, ADA criteria, and 2010 ADAAG and 2009 ANSI standards.
RECOMMENDED INTEGRATION
For hollow wall construction, it is recommended that WingIts® Grab Bar Fasteners (GBWME40) are used with this product. See Fastener instructions for applications.

SOLID PHENOLIC FOLDING SHOWER/DRESSING AREA SEAT

TA-700-BO

Revision Date:

B-5193

*Consult local building codes

MATERIALS:

Seat — One-piece, 5/16" (8mm) thick, solidly fused plastic laminate with matte-finish melamine surfaces, ivory-colored face sheets, and black phenolic-resin core that are integrally bonded — cannot delaminate. Integral slots for water drainage. Secured to frame with stainless steel carriage bolts and acorn nuts.

Frame — 18-8, type-304, stainless steel with satin finish. 16-gauge (1.6mm), 1-1/4" (30mm) square tubing and 18-gauge (1.2mm), 1" (25mm) diameter seamless tubing.

Mounting Flanges (2) — 18-8, type-304, 3/16" (5mm) thick stainless steel with satin finish. 3" (75mm) diameter with three mounting screw holes.

Baseplate — 18-8, type-304, heavy-gauge stainless steel.

Spring — 17-7, type-301, 24-gauge (0.6mm) stainless steel. Spot-welded to baseplate.

Guide Bracket — 18-8, type-304, 16-gauge (1.6mm) stainless steel with satin finish.

continued . . .

OPERATION:

Shower seat can be folded up against the wall when not in use. The spring at the top of baseplate locks seat into upright position until released by pulling the top of seat away from wall. Support system with guide bracket allows varying mounting heights and leaves floor clear for easier cleaning. Nonporous solid phenolic seat has slots to permit water to drain, does not splinter or require oiling, and will not support growth of bacteria. Slotless round-head carriage bolts and acorn nuts provide additional safety to user. Bobrick shower seats, when properly installed, have sufficient strength to support 500 lbs., (227 kg) complying with accessible design guidelines (including ADAAG in the U.S.A.).

INSTALLATION:

Secure unit to wall at points indicated by an S, with the two mounting flanges located at top and the baseplate and guide bracket below. The bottom of support bracket must be positioned between the baseplate and guide bracket before they are secured to wall or partition. Mounting height of shower seat must comply with local building codes.

For stud walls, provide concealed backing to comply with local building codes and secure with #14 x 2-1/2" (6.3 x 65mm) stainless steel sheet-metal screws furnished by manufacturer.

For prefabricated shower stalls, provided adequate backing by the shower stall manufacturer. Secure with #14 x 2-1/2" (6.3 x 65mm) stainless steel mounting screws furnished by manufacturer. Bobrick offers a mounting kit for installing shower seats. For additional mounting kits please order 252-30. One mounting kit is required for each flange.

For masonry walls, provide fiber plugs or expansion shields for use with furnished sheet-metal screws, or provide 1/4" (6mm) toggle bolts or expansion bolts.

INSTALL SAFETY PLATE TO WALL:

Safety Plate is to be mounted on wall near Shower Seat in order to properly advise users of the Seat's weight restrictions. Correct installation of the Safety Plate will ensure that the Shower Seat meets A.N.S.I. Standards.

Permanently affix Safety Plate to wall on either side of the Shower Seat at a minimum height of 30" (760mm). If mounted above Seat, the Plate must be high enough so that it is not covered when Seat is on the up position. Mounting screws (4) are recommended, but double-sided tape on rear of Plate may be used for very smooth, non-porous surfaces.

SAFETY WARNING: Shower seats are no stronger than the anchors and walls to which they are attached and must be firmly secured in order to support the loads for which they are intended. Consult and comply with local building codes. To avoid potential injury, the building owner or maintenance personnel should remove the shower seat from service if the shower seat is not adequately secured to the wall. Unit shall support static loads of up to 500 lbs (227 kg) when properly installed and used. To avoid potential seat malfunction, DO NOT use seat if weight exceeds 500 lbs (227 kg).

SPECIFICATION:

Folding shower seat shall have a frame constructed of type-304, satin-finish stainless steel that consists of 16-gauge (1.6mm), 1-1/4" (30mm) square tubing and 18-gauge (1.2mm), 1" (25mm) diameter seamless tubing. Seat shall be one-piece, 5/16" (8mm) thick, solidly fused plastic laminate with matte-finish melamine surfaces, ivory-colored face sheets, and black phenolic-resin core; secured to frame with stainless steel carriage bolts and acorn nuts. Shower seat shall be equipped with two 3" (75mm) diameter mounting flanges constructed of type-304, 3/16" (5mm) thick, satin-finish stainless steel; a guide bracket constructed of type-304, 16-gauge (1.6mm), satin-finish stainless steel; and a spring constructed of type-301, 24-gauge (0.6mm) stainless steel that is spot-welded to a baseplate of type-304, heavy-gauge stainless steel. Seat shall be able to lock in upright position when not in use. Shower seat shall comply with accessible design guidelines (including ADAAG in the U.S.A.).

Folding Shower Seat shall be Model B-5193 of Bobrick Washroom Equipment, Inc., Clifton Park, New York; Jackson, Tennessee; Los Angeles, California; Bobrick Washroom Equipment Company, Scarborough, Ontario; Bobrick Washroom Equipment Pty. Ltd., Australia; and Bobrick Washroom Equipment Limited, United Kingdom.
