## **PREAMBLE**

---

### **Instruction For Use of Documentation**

The total required information provided to design and build an Aloft Hotel by Marriott is contained in the criteria documents identified below which relay standardized public space, guestrooms, guestroom corridors, back of house and building site + exterior. Eclectic is the decor package for the Public Space and Guestrooms.

### **Comprehensive Criteria Documents for The Aloft Hotel by Marriott are:**

1. Design Standards
2. Design Guideline Drawings
3. Specifications as indicated below:
  - A. Building Product Manual (BPM)**
    - Volume 1 - Building Site + Exterior
    - Volume 2 - Public Space**
    - Volume 3 - Guestrooms
    - Volume 4 - Food Service & Guest
  - B. Interior Signage Specifications
  - C. Exterior Signage Specifications
  - E. Interior Decor Specifications Manual

1. Design Standards provide a written macro view of the overall design elements required for Aloft Hotel by Marriott.
2. The Design Guideline Drawings - provide more specific design direction via drawings to supplement the Design
3. The Interior Décor Spec Manual lists items required that are generally referred to as Furniture, Fixture, & Equipment or FF&E items. These items and the accepted suppliers listed, have been contracted by Marriott and can be supplied through Marriott's procurement division.
4. The Building Product Manual (BPM) lists all the finishes required for the building and the building products that are typically installed and supplied by the General Contractor. This document must be used in conjunction with the drawings for the contractor supplied items as specific dimensions and criteria are referenced in both documents. Because of the high quality of design expected for Aloft by Marriott, Marriott has specified acceptable suppliers who have worked closely with Marriott on the initial Aloft Design.

All of these documents are integral elements of the complete design and construction information. The project architect is responsible for incorporating all components of the criteria documents in the development of any Aloft Hotels by Marriott Project.

### **Use of Drawings**

When finishes and Products that vary between the Décor packages will appear in the Design Guideline Drawings with base number only. These finishes and products when listed in the Interior Decor Specification Manual (finishes and FF&E items that can be purchased through Marriott Procurement) will appear with the base number plus a suffix specific to the particular décor package. Those finishes and products listed in the Building Product Manual that vary between Décor packages will appear with the base number plus a prefix indicating the specific Décor Package .

### **General Compliance Requirements**

The Owner's / Franchisee's Consulting Design Professional shall be responsible for verifying and complying with all applicable laws, covenants, codes, ordinances, rules, regulations, restrictions, etc. The Design Professional shall pay close attention to the requirements of the federal accessibility law, Americans with Disability Act (ADA), local and state accessibility regulations, and the applicable fire, life safety requirements. It is also the responsibility of each hotel owner to ensure that all products have been adjusted in dimension, quantity and hand suit the specific site conditions.

---

## ABBREVIATIONS

---

### General Schedule Abbreviations:

ADA	Americans with Disabilities Act
AFF	Above Finish Floor
ASTM	American Society of Testing Materials
AWI	American Woodworking Institute
CEF	Corridors, Elevators, and Foyers
CF/CI	Contractor Furnished/ Contractor Installed
COM	Customer's Own Material
GC	General Contractor
GR	Guest Room
GRB	Guest Room Bath
LY	Lineal Yard
MF/MI	Manufacturer Furnished/ Manufacturer Installed
N/A	Not Applicable
NFPA	National Fire Protection Association
NY	Narrow Yards
OF/CI	Owner Furnished/ Contractor Installed
OF/MI	Owner Furnished/ Manufacturer Installed
OF/OI	Owner Furnished/ Owner Installed
RFP	Request for Proposal
SF	Square Feet
SY	Square Yard
UL	Underwriters Laboratory

## Marriott: Building Product Manual (BPM) Number Nomenclature

*(items are numbered with the item prefix and then consecutive numbers starting with 001 - "Mark Number" unless indicated otherwise)*

### *Public Space*

The contents hereof are to be returned immediately upon termination of any relationship or agreement giving the user authorization to possess or use such information or materials. Marriott reserves the right to take all actions and seek all available remedies, whether legal and/or equitable, for any unauthorized or illegal use of the Design Guidelines or any of its content.

These documents are intended to serve as a starting point for complete design to be performed by licensed professionals. They have been prepared with the sole purpose of conveying the brand benchmark for this particular product only. The architect, engineer, designer or any other design professional of record is responsible for compliance with any and all laws or regulations of any type or description governing the proposed construction.

These design guidelines may be altered, amended or supplemented by Marriott in its sole discretion from time to time. It is your responsibility to familiarize yourself with the contents of the Design Guidelines and to keep yourself apprised of any and all updates to it on <https://lobo.marriott.com>

In the event of any inconsistency or conflict between a provision in these Design Guidelines and any federal, provincial, state or local statute, regulation, order or other law, such law will supersede the conflicting or inconsistent provision(s) of these Design Guidelines in all properties subject to that law. All owners/developers should seek independent legal counsel for advice concerning application of and compliance with any applicable law.

## Architectural Lighting - Box Light

Issue Date: 28 JUL 2017

Revision Date: 29 JAN 2018

Item Name	Recessed Fixture
Type:	Linear Box
Description:	Linear 2x4 fixture, architectural center, linear lens
Manufacturer:	Eaton/Corelite
Model #:	BRG-WS-2L35-LD2-UNV-24-T1-STD
Dimensions:	2' x 4'
Finish:	White
Lens/Shade:	Acrylic prismatic frosted
Mount:	Recessed ACT
On Dimming System:	No
Dimming Type:	0 -10V
Lamp Type:	LED
Lamp Kelvin:	3500K
Lamp CRI:	85
Delivered Lumens (LED) or Mean Lumens (Non-LED):	4148
Fixture Input (Max. Watts):	38.5
Voltage:	120 - 277
Lead Time:	In stock or 4 weeks
Warranty:	Five year warranty

## Architectural Lighting - Exit Lighting

Issue Date: 28 JUL 2017

Revision Date: 29 JAN 2018

Item Name	Exit Fixture
Type:	Exit
Description:	Exit, multi mount
Manufacturer:	Eaton/Surelites
Model #:	EUX7RSD
Dimensions:	13-3/4" W x 7-3/8" Hx 2-7/16" D
Lettering:	Red
Mount:	Multi-Mount
On Dimming System:	No
Lamp Type:	LED
Voltage:	120/277 UNV
Lead Time:	In Stock or 4 weeks
Warranty:	Fixture: 5 year Battery: 7 year pro-rata

## Architectural Lighting Cutsheets

## DESCRIPTION

The Bridge™ LED recessed offers a traditional yet modern design with the latest in solid-state lighting technology. High performing WaveStream™ optics allow for maximum energy savings and optimal illumination in a ultra-minimalistic shallow recessed fixture. Two WaveStream optic options are available; a fully uniform pattern and a square pattern that provides a unique translucent appearance without sacrificing performance. Additional shielding options are also available including rectangular perf, round perf, and nano-prism inlays. Available in 2x2, 2x4, 1x4 sizes along with several popular metric sizes, the Bridge is highly configurable with well-thought-out options and a number of architectural styles for application versatility.

## SPECIFICATION FEATURES

### Construction

Shallow 3-7/8" deep housing is a 22 gauge steel reflector with injection molded high-reflectance polycarbonate end plates securely attached with integral snaps and screws for strength, rigidity and the elimination of gaps. WaveStream light engine with extruded aluminum heatsinks span across the bottom of the luminaire. Drivers can be accessed via plenum. Large access plate for supply connection. Fixture weight: 20.0 lbs.

### Optics

Optical grade acrylic embedded with patented WaveStream Accu-Aim™ optics for optimal distribution, excellent uniformity, and high performance. Center light engine becomes virtually clear in the off-state.

### Shielding

Perf pattern and nano-prismatic inlays are available as additional aesthetic options. Perf inlay available in round or rectangular pattern. Nano-prism inlay is a high light transmission material offering additional brightness mitigation.

### Finish

Fixture housing and back reflector are high reflectance white using electrostatically applied polyester powder coat paint for durability and luminous uniformity.

### Electrical

Long-life LED system coupled with electrical driver to deliver optimal performance. Projected life is 100,000 at 75% lumen output. LEDs are available in 3000K, 3500K or 4000K with a typical CRI ≤ 85.

Standard drivers are 0-10 volt continuous dimming that work with any 0-10V control/dimmer. Or, specify Digital Addressable Lighting Interface (DALI) drivers; for use with Fifth Light controls. See ordering information for details.

### Mounting

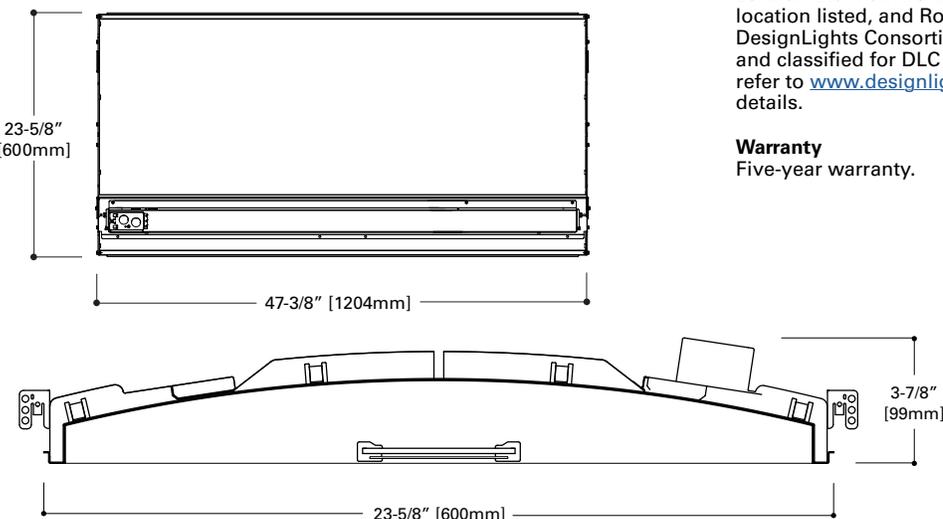

Universal flange design works with most lay-in ceiling types. Integral pry-out tabs secure luminaire to ceiling grid from above. Fixture offers tie-in locations for tie-wire on all corners. Consult local code for appropriate tie-wire recommendations. See Technical Notes section for drywall frame kit and surface mount kit options.

### Compliance

Components are UL recognized and luminaires are cULus listed for 25°C ambient environments, damp location listed, and RoHS compliant. DesignLights Consortium™ Qualified and classified for DLC Standard, refer to [www.designlights.org](http://www.designlights.org) for details.

### Warranty

Five-year warranty.

**TECHNICAL NOTES**

- Dimming wires come standard in all LED fixtures but can be capped in the field for standard switched operation.
- Integral 347V electronic driver with STD 0-10V option only. Factory supplied remote transformer for all other driver/dimming options.
- "T1" ceiling type is compatible with Metalux DF Series Drywall Frame Kits and Metalux Universal Surface Mount Kits, ordered separately from Metalux. For 2x2 drywall frame kit, order part **#DF-24-W**. For 2x2 surface mount kit, order part **#SK-24-WS**. Refer to the surface mount kit specification sheet for more information.
- Must be used in conjunction with a DALI control system. For a complete listing of Fifth Light Technology products and other solutions from Cooper Controls, visit [www.eaton.com/lightingsystems](http://www.eaton.com/lightingsystems).
- 2x4: STP driver not available in Light Levels 1.
- 2x4: Two HCD drivers required for Light Levels 4 and 5.
- 2x4: Two STP drivers required for Light Level 5.
- 2x4: Two 5LTHD drivers required for Light Levels 4 and 5.
- 2x4: Two 347V 0-10V drivers required for Light Level 5.
- SV sensor works only with 0-10V drivers and is factory prewired to the driver for stand-alone control. Order **#SHH-01** for Programming Remote and **#ISHH-02** for Personal Control Remote.
- SW sensor works only with STD and HCD 0-10V drivers. Designed for use with the WaveLinX Wireless Connected Lighting system. For complete WaveLinX wireless solutions, visit [www.eaton.com/wavelinx](http://www.eaton.com/wavelinx).
- LWI sensor requires the use of the SR driver. Must be used in conjunction with a LumaWatt Pro control system. For complete LumaWatt Pro wireless solutions, visit [www.eaton.com/lumawattpro](http://www.eaton.com/lumawattpro).
- Integral emergency battery pack is 14W maximum, 90 minute output. A test switch/indicator button can be tested safely from the ground using a laser pointer, while the patented EZ Key prevents accidental discharge of the battery during construction. For approximate delivered lumens multiply the lumens per watt of the desired fixture by the wattage of the emergency battery pack (100 lm/W x 14=1400 lumens). Emergency battery pack not available with two driver configurations.
- Used to transfer fixture to secondary power source for life-safety operation. When used with a dimming fixture, two devices are required to ensure control is disabled while operating under emergency power. Product height with transfer device is 5" (126mm).
- Chicago plenum not available with GTD.

**INTEGRATED SENSOR**

<b>ALB-01</b>
Revision Date:

The Bridge with Integrated Sensor technology provides automatic energy savings without sacrificing performance. Traditionally, these types of energy savings required coordination between the luminaire and a lighting control system. The Bridge delivers superior lighting with integrated PIR occupancy and daylighting controls.

Capture the benefits of traditional lighting controls, without complicated coverage planning or special wiring. Ideal for new construction or retrofit, the Bridge delivers automatic ON to an energy saving light level, while ensuring lighting is turned OFF when the space is unoccupied.

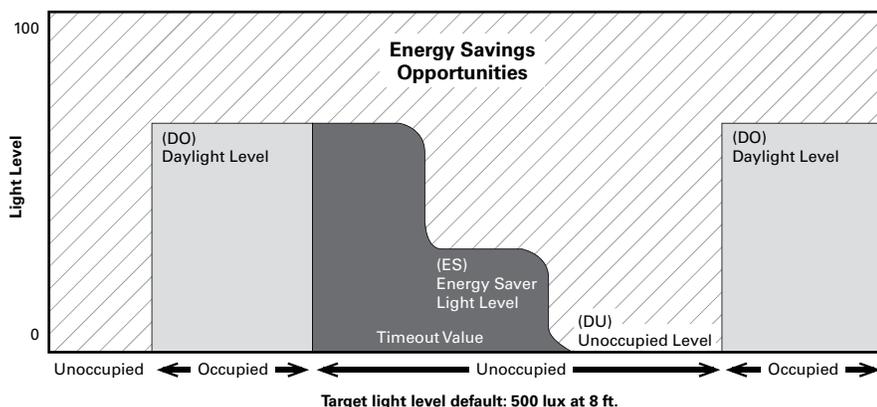

The integral daylight sensor reduces the need for special daylight zone planning. The luminaire will automatically adjust the light level based on reflected light beneath the sensor in a closed loop method.

Occupied daylight light levels and unoccupied light levels can be adjusted using the integrated sensor programming remote (Catalog Number: ISHH-01). The integrated sensor personal remote (Catalog Number: ISHH-02) provides code compliant manual raise, lower, ON, OFF control.

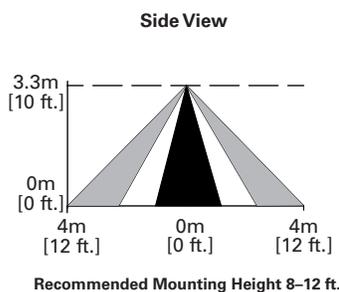

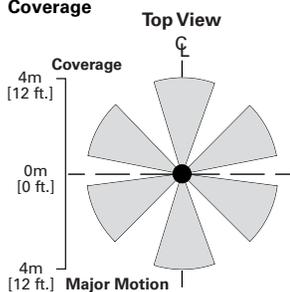

The Bridge with Integrated Sensor is easy to install with no special wiring and ensures energy savings out-of-the-box with default control settings.

**How it works:**

- As the user enters the space controlled by the integral sensor, the lighting turns ON to the daylight level (default 500 lux).
- Lighting will remain at the daylight level until the space is unoccupied. This will start the occupancy timeout period (default 20 minutes).
- If the space remains unoccupied for half of the timeout period, the lighting will automatically reduce to the Energy Saver light level. This adjustable light level is typically half of the occupied daylight level.
- At the end of the timeout period the lighting will go to the unoccupied light level. This adjustable light level uses the OFF default setting.

**Coverage**

Recommended Mounting Height 8-12 ft.

**Optional Remote Controls**

**ISHH-01 Programming Remote**

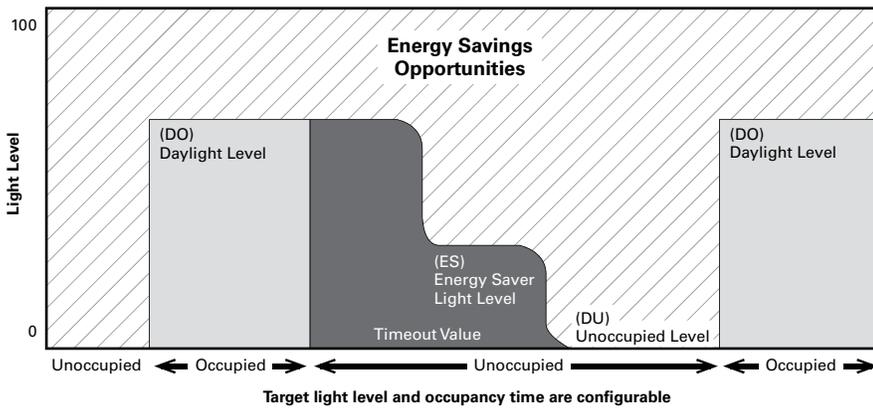

**ISHH-02 Personal Control Remote**

LumaWatt Pro with Enlighted is an integrated system of luminaires, digital sensors, and application-based software for any size project. The strengths of LumaWatt Pro with Enlighted are based on the independent, secure operation of individual sensors in every lighting fixture, combined with wireless communication to the powerful Energy Manager. The system aggregates input from the project to provide visibility to entire aspects of environmental data from the project, putting the input into easy-to-read dashboards of analytic detail. The dashboards enable you to take additional action with the system to improve energy savings, master the use of the space, interact with heating, ventilation, and air-conditioning (HVAC) systems, and report on system modes to reduce maintenance. By collecting granular, real-time data from our state-of-the-art integrated sensors to provide advanced, smart building solutions, you are in control.

**How it works:**

- Luminaires are factory wired to sensors, which provide control based on digital occupancy and daylight dimming as independent, fault-proof, resilient networks of powerful end-points.
- Sensors communicate to each other, and gateways using easy wireless installation with secure set up.
- Gateways communicate using industry-standard wired technology to the Energy Manager, for powerful, familiar dashboards of useful information tailored for easy use on a connected computer.
- Energy Managers connect to cloud-based applications, maximizing the dense, data-rich sensing within the footprint of the luminaire for management of the building environment.

**TECHNICAL NOTES**

- Dimming wires come standard in all LED fixtures but can be capped in the field for standard switched operation.
- Integral 347V electronic driver with STD 0-10V option only. Factory supplied remote transformer for all other driver/dimming options.
- "T1" ceiling type is compatible with Metalux DF Series Drywall Frame Kits and Metalux Universal Surface Mount Kits, ordered separately from Metalux. For 2x2 drywall frame kit, order part **#DF-24-W**. For 2x2 surface mount kit, order part **#SK-24-WS**. Refer to the surface mount kit specification sheet for more information.
- Must be used in conjunction with a DALI control system. For a complete listing of Fifth Light Technology products and other solutions from Cooper Controls, visit [www.eaton.com/lightingsystems](http://www.eaton.com/lightingsystems).
- 2x4: STP driver not available in Light Levels 1.
- 2x4: Two HCD drivers required for Light Levels 4 and 5.
- 2x4: Two STP drivers required for Light Level 5.
- 2x4: Two 5LTHD drivers required for Light Levels 4 and 5.
- 2x4: Two 347V 0-10V drivers required for Light Level 5.
- SV sensor works only with 0-10V drivers and is factory prewired to the driver for stand-alone control. Order **#SHH-01** for Programming Remote and **#ISHH-02** for Personal Control Remote.
- SW sensor works only with STD and HCD 0-10V drivers. Designed for use with the WaveLinX Wireless Connected Lighting system. For complete WaveLinX wireless solutions, visit [www.eaton.com/wavelinx](http://www.eaton.com/wavelinx).
- LWI sensor requires the use of the SR driver. Must be used in conjunction with a LumaWatt Pro control system. For complete LumaWatt Pro wireless solutions, visit [www.eaton.com/lumawattpro](http://www.eaton.com/lumawattpro).
- Integral emergency battery pack is 14W maximum, 90 minute output. A test switch/indicator button can be tested safely from the ground using a laser pointer, while the patented EZ Key prevents accidental discharge of the battery during construction. For approximate delivered lumens multiply the lumens per watt of the desired fixture by the wattage of the emergency battery pack (100 lm/W x 14=1400 lumens). Emergency battery pack not available with two driver configurations.
- Used to transfer fixture to secondary power source for life-safety operation. When used with a dimming fixture, two devices are required to ensure control is disabled while operating under emergency power. Product height with transfer device is 5" (126mm).
- Chicago plenum not available with GTD.

**INTEGRATED SENSOR**

**ALB-02**  
Revision Date:

The Bridge with Integrated Sensor technology provides automatic energy savings without sacrificing performance. Traditionally, these types of energy savings required coordination between the luminaire and a lighting control system. The Bridge delivers superior lighting with integrated PIR occupancy and daylighting controls.

Capture the benefits of traditional lighting controls, without complicated coverage planning or special wiring. Ideal for new construction or retrofit, the Bridge delivers automatic ON to an energy saving light level, while ensuring lighting is turned OFF when the space is unoccupied.

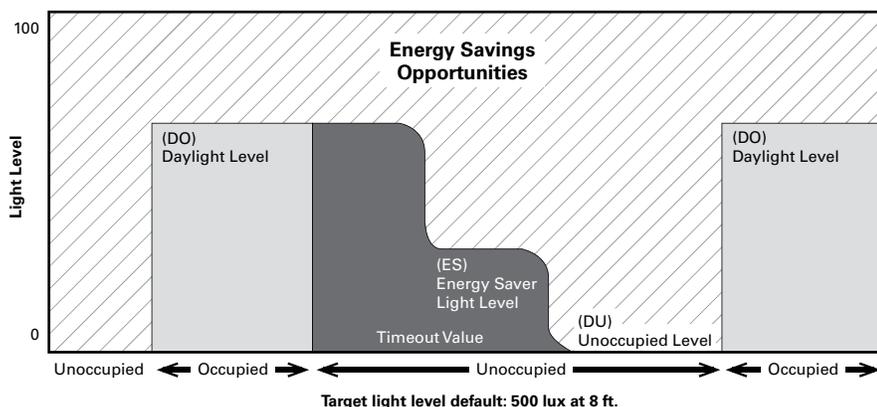

The integral daylight sensor reduces the need for special daylight zone planning. The luminaire will automatically adjust the light level based on reflected light beneath the sensor in a closed loop method.

Occupied daylight light levels and unoccupied light levels can be adjusted using the integrated sensor programming remote (Catalog Number: ISHH-01). The integrated sensor personal remote (Catalog Number: ISHH-02) provides code compliant manual raise, lower, ON, OFF control.

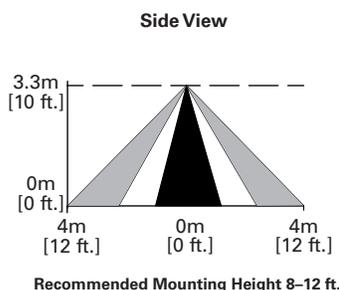

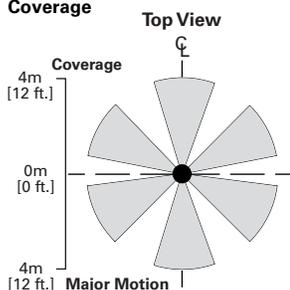

The Bridge with Integrated Sensor is easy to install with no special wiring and ensures energy savings out-of-the-box with default control settings.

**How it works:**

- As the user enters the space controlled by the integral sensor, the lighting turns ON to the daylight level (default 500 lux).
- Lighting will remain at the daylight level until the space is unoccupied. This will start the occupancy timeout period (default 20 minutes).
- If the space remains unoccupied for half of the timeout period, the lighting will automatically reduce to the Energy Saver light level. This adjustable light level is typically half of the occupied daylight level.
- At the end of the timeout period the lighting will go to the unoccupied light level. This adjustable light level uses the OFF default setting.

**Coverage**

Recommended Mounting Height 8-12 ft.

**Optional Remote Controls**

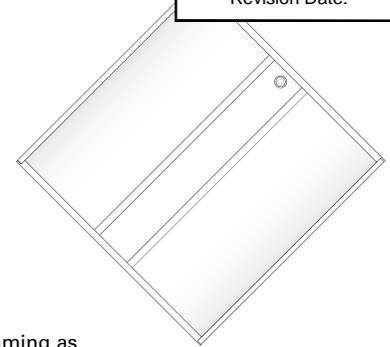

**ISHH-01 Programming Remote**

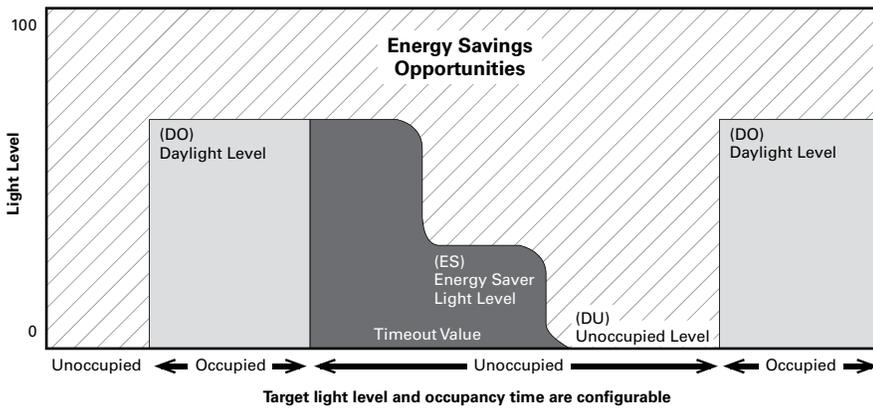

**ISHH-02 Personal Control Remote**

LumaWatt Pro with Enlighted is an integrated system of luminaires, digital sensors, and application-based software for any size project. The strengths of LumaWatt Pro with Enlighted are based on the independent, secure operation of individual sensors in every lighting fixture, combined with wireless communication to the powerful Energy Manager. The system aggregates input from the project to provide visibility to entire aspects of environmental data from the project, putting the input into easy-to-read dashboards of analytic detail. The dashboards enable you to take additional action with the system to improve energy savings, master the use of the space, interact with heating, ventilation, and air-conditioning (HVAC) systems, and report on system modes to reduce maintenance. By collecting granular, real-time data from our state-of-the-art integrated sensors to provide advanced, smart building solutions, you are in control.

**How it works:**

- Luminaires are factory wired to sensors, which provide control based on digital occupancy and daylight dimming as independent, fault-proof, resilient networks of powerful end-points.
- Sensors communicate to each other, and gateways using easy wireless installation with secure set up.
- Gateways communicate using industry-standard wired technology to the Energy Manager, for powerful, familiar dashboards of useful information tailored for easy use on a connected computer.
- Energy Managers connect to cloud-based applications, maximizing the dense, data-rich sensing within the footprint of the luminaire for management of the building environment.

General information

ControlKeeper M lighting panels are compatible with Greengate Digital Switches (GDS). Greengate Digital Switches are networkable, intelligent, low-voltage switches. Greengate Digital Switches are proprietary to Cooper Controls. Digital switches from other manufacturers are not compatible with the system. GDS Stations are available in large button and small button configurations which offer 1 to 6 buttons per station.

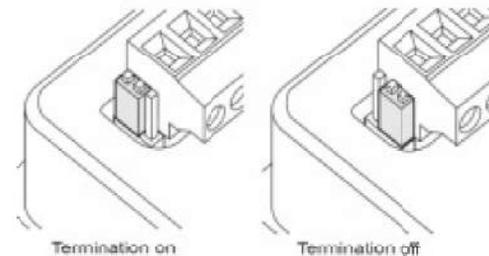

Each ControlKeeper M panel has a connection terminal block which allows one GDS switch network to connect directly to the motherboard. Each GDS switch network is capable of powering and supporting up to 32 GDS stations over a 1000 foot (300 meter) distance.

The GDS network is a daisy chain configuration with two distinct ends. The two end devices will be terminated using onboard termination jumpers. Prior to wiring, map out the proposed wiring route to ensure correct installation.

Locate the two end devices on the Greengate Digital Switch network. These two devices should have their termination jumpers in the 'Terminated' position. The remaining devices on the GDS network should have their termination jumpers in the OFF position. Termination jumpers are located on the back of the GDS switch directly next to the GDS network terminal block. On the ControlKeeper M, the termination jumper is below the GDS network wiring terminal block.

Title: General/Network Detail

Product: Greengate Digital Switch

Eaton

Peachtree City, GA 30269

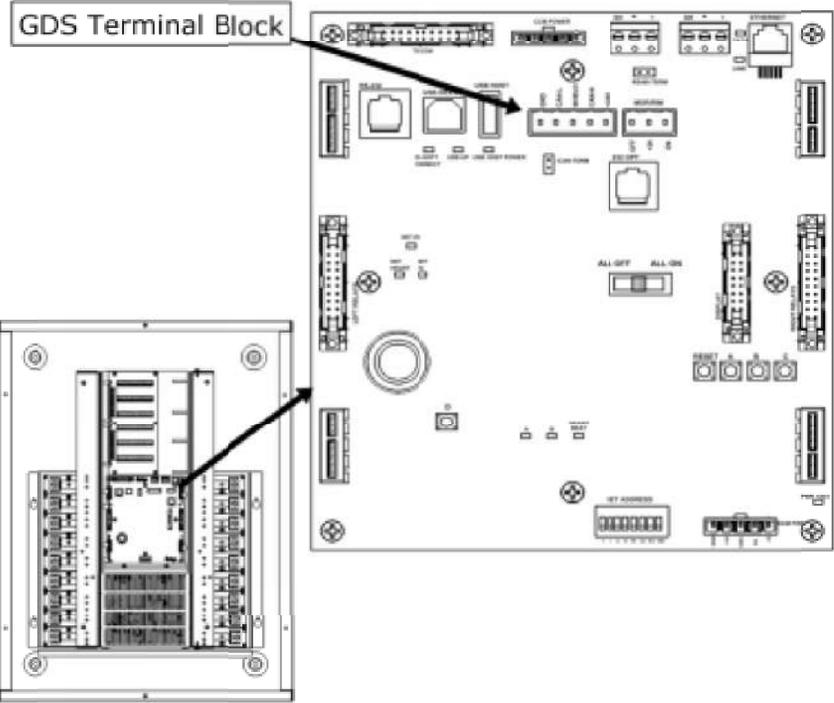

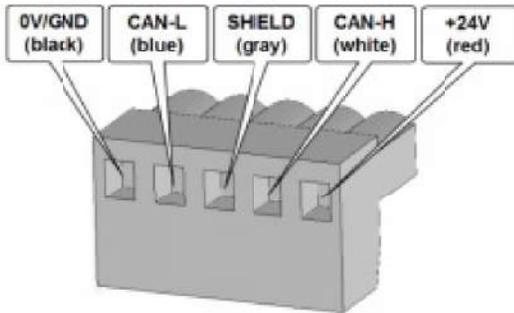

Date:

Project:

The ControlKeeper M can be wired into the GDS daisy chain anywhere within the network. All GDS wiring should be done using Cooper LCCNP (non plenum), Cooper LCCP (plenum), Belden 1502R (non-plenum) or 1502P (plenum) cable. For best network performance, one of the suggested cables should be used. If the specified cable is not used and communications problems occur that require troubleshooting assistance, additional charges will apply.

All stations and the CKM terminal block follow the same wiring scheme:

- +24V = Red Wire
- CAN-H = White Wire
- Shield = Shield Wire
- CAN-L = Blue Wire
- GND/0V = Black Wire

CHKD:	SCALE: NTS	DWG #:	10013
APPR:	SHEET:		
	SIZE: A		

**Emergency Note:**

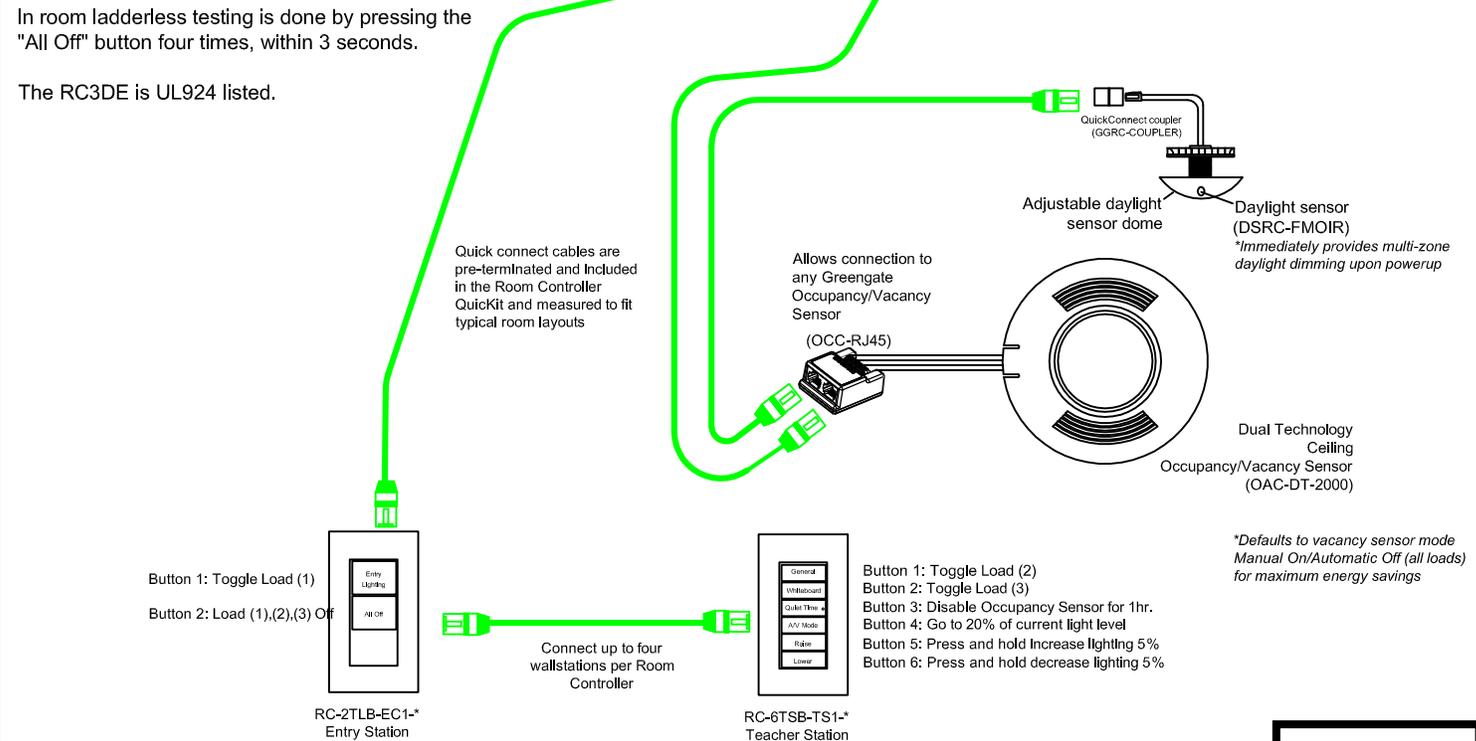

Emergency load tracks with normal lighting YELLOW load for On/OFF. If dimming it will be adjusted with the dimming zone it is connected to. Upon loss of normal power to the RC3DE, the emergency load will be forced On and full bright to 100%.

In room ladderless testing is done by pressing the "All Off" button four times, within 3 seconds.

The RC3DE is UL924 listed.

**0-10V Dimming Zone Note:**

The 0-10V dimming zones within the Room Controller can be wired and controlled independent of the connected loads. This allows a each load to have a dedicated 0-10V dimming zone or a single load to have up to three 0-10V dimming zones.

**Room Controller and Smart Devices use Click & Go technology:**

The RC3DE will automatically recognize any smart device connected with the quick connect cable (provided) and start working immediately upon power up with no programming required. The RC3DE defaults to Manual On/Automatic Off vacancy sensor mode for maximum energy savings. Entry wallstations will provide On/Off control of the Yellow load. Teacher stations provide On/Off control of the Red and Purple loads as well as manual Raise/Lower of all dimmers.

The daylight sensor will automatically on power up provide multi-zone daylight dimming in the space. (remote adjustments can be made later)

\*Refer to Room Controller website for more information on other integral no programming required benefits like Demand Response, Solatube Control, Egress Control, BMS Output, Alert Mode, Emergency Lighting Control, and Slider Stations.

 Three Relay + Three Dimmers Wiring Diagram + One Emergency Relay

Drawing Name: RC3DE-Classroom.dwg	Drawing Date: 1/10/2013
--------------------------------------	----------------------------

Mount wallstations to a single gang wallbox with a minimum internal depth of 2 in. (51mm). Up to four wallstations may be connected to the Room Controller to meet your application.

### Office Wallstation Operations

Program No.	Button Text	Control Type	Function (Unless daylight is disabled, dimmer level will be controlled by the daylight sensor only unless target level is indicated)
9	Half Lights	Preset	Load 1 (yellow) ON, Load 2 (red) OFF All dimmers 50% <sup>†</sup> Solatube Open (RC3DE only)
10	Full Lights	Preset	Load 1 (yellow) ON, Load 2 (red) ON All dimmers 100% <sup>†</sup>
11	Undercabinet	Toggle	Load 3 (purple) ON and OFF
6	Raise	Raise	Raise all dimmers* <sup>†</sup>
7	Lower	Lower	Lower all dimmers*
16	All ON	Preset	Load 1 (yellow) ON, Load 2 (red) ON, Load 3 (purple) ON All dimmers 100% <sup>†</sup>
8	All OFF	Preset	Load 1 (yellow) OFF, Load 2 (red) OFF, Load 3 (purple) OFF Solatube Close (RC3DE only)
Slider		Slider	Raise and Lower all dimmers <sup>†</sup>

### Classroom Wallstation Operations

Program No.	Button Text	Control Type	Function (Unless daylight is disabled, dimmer level will be controlled by the daylight sensor only unless target level is indicated)
1	Entry Row 1 Uplights	Toggle	Load 1 (yellow) ON and OFF Solatube Open (RC3DE only)
2	General Row 2 Downlights	Toggle	Load 2 (red) ON and OFF
3	Whiteboard Row 3 Accent	Toggle	Load 3 (purple) ON and OFF
4	AV Mode	Toggle	Toggles between A/V mode and normal mode. In A/V mode relays will stay in their previous configuration. Dimmers will be reduced to maintain light levels at 20%. <sup>†</sup>
5	Quiet Time	Toggle	Disables occupancy sensors for 60 minutes. Toggle allows for re-enabling of normal mode prior to the timer expiring.
6	Raise	Raise	Raise all dimmers* <sup>†</sup>
7	Lower	Lower	Lower all dimmers*
8	All OFF		Load 1 (yellow) OFF, Load 2 (red) OFF, Load 3 (purple) OFF Solatube Close (RC3DE only)
Slider		Slider	Raise and Lower all dimmers <sup>†</sup>

#### Wallstation Operation

The Room Controller wallstations are pre-labeled and preconfigured for their intended function. They work as soon as they are connected to the Room Controller. Below is a description of the functions of each wallstation button for Office, Classroom and Conference Room configurations. Each button is assigned to a specific program number for how that button should operate. Program numbers may be used for several buttons that accomplish the same goal but may have different engraving. These charts may be used during the checkout process to verify that wallstations are operating properly.

Room Controller -  
Wallstations

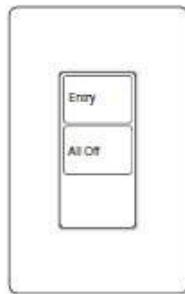

Drawing Name:  
RC-Wallstation2.dwg

Drawing Date:  
1/10/2013

The daylight sensor can be mounted to a ceiling tile or fixture using the threaded post and locking washer over materials up to a 0.75" thickness. The accessory mounting bracket (DSCM-MT) allows the daylight sensor to be mounted to a hard wall.

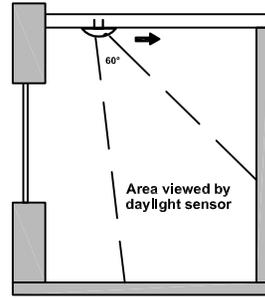

1. Ensure the daylight sensor is not obstructed and is not looking directly at electric lighting.
2. For skylights that contain motor controls, ensure the daylight sensor is mounted below the daylight blocking mechanism.
3. Remember to adjust the sensor head to point the arrow and lens in the correct position.

Mount the daylight sensor one to two times the window height from the window wall. Position the sensor so its lens and arrow is pointed toward the window.

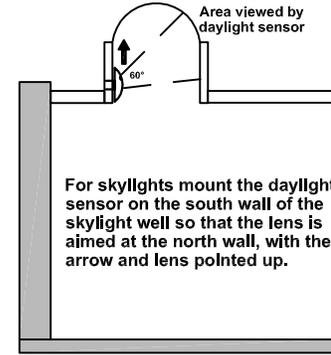

**Ceiling Location**

For narrower spaces mount the daylight sensor near the window with the sensor lens and arrow facing away from the window and pointing into the space.

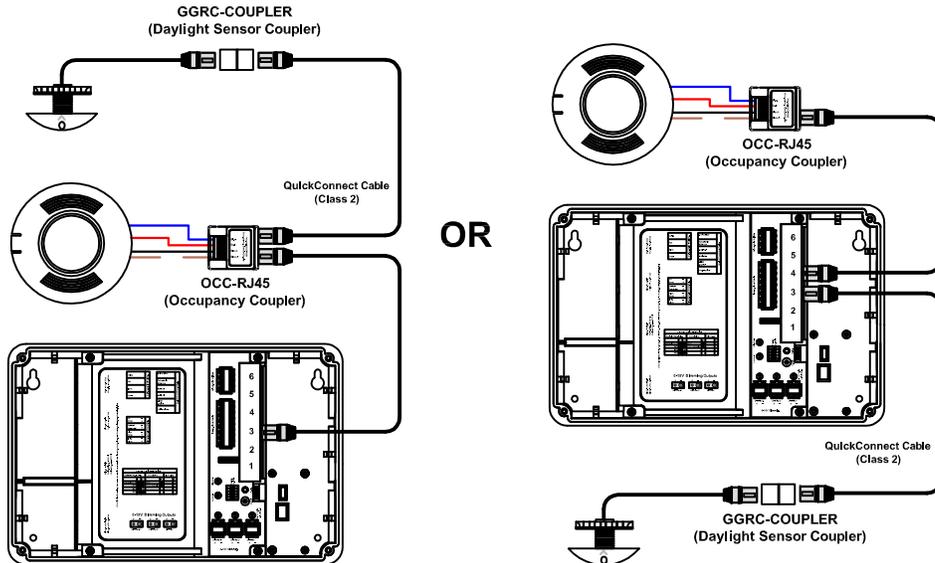

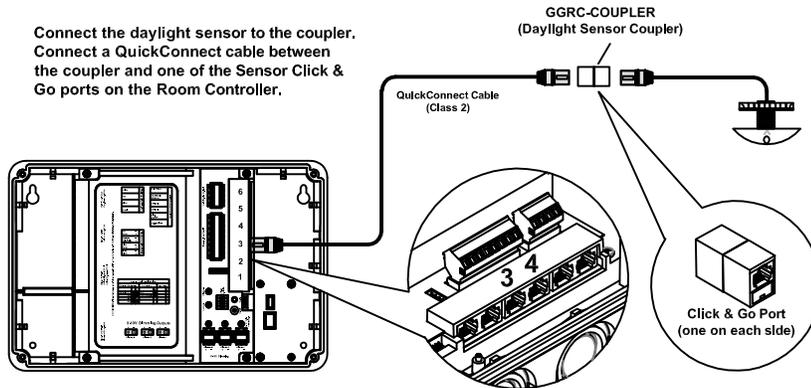

**Narrow Location**

**Skylight Location**

Connect the daylight sensor to the coupler. Connect a QuickConnect cable between the coupler and one of the Sensor Click & Go ports on the Room Controller.

### Room Controller and the Daylight Sensor

One DSRC-FMOIR daylight sensor may be connected to the Room Controller. The daylight sensor connects using the provided GGRC-Coupler daylight sensor coupler and QuickConnect Cable.

Once the daylight sensor mounting area is prepared, attach the GGRC-Coupler to the sensor leads matching the wire colors to the label on the occupancy coupler as shown. Connect the Occupancy Coupler to one of the two sensor ports on the Room Controller. Use the shortest lengths of QuickConnect cable from your QuickConnect cable from your QuickKit that will reach the desired location.

# Multi-Load Decorator Dimmer Wallstation

For use with all standard incandescent and LE/TE LED Loads, see next spec sheet for 0-10V loads. Load type is indicated on fixtures spec sheet and Marriott Lighting Matrix.

Catalog# WBSD-DEC-C1	Prepared by Kathleen Kenny
Project	Date
Comments	Type

## Overview

The Multi-load Decorator Dimmer provides full-range classic linear-slide dimming for 300W dimmable LED and CFL as well as 600W Incandescent, Halogen, Dimmable Fluorescent, Electronic Low-Voltage & Magnetic Low-Voltage light sources. Preset units feature a preset "ON/OFF" switch that automatically returns controlled light(s) to a preset level without disturbing the brightness level. The device is designed for both Single-Pole (one location) and 3-Way (multi-location) applications, and features an adjustable Rapid-Start setting which provides additional power for a brief time period to ensure lamp start-up at low dim settings.

## Features

- Preset feature allows user to return to previous light level when turning lights ON
- Integrated full-slide control for easy, precise operation
- Can be wired as Single-Pole or 3-Way
- Device can be wired into either 3-Way location (load side or line side)
- Neutral is not required for installation of device
- Adjustable low-level trim setting for optimal lamp compatibility
- Face plate is removable to allow for color changes
- Each package includes 3 colors
- Radio Frequency Interface filtering is standard on all models
- Electrostatic discharge protection
- Compatible with any decorator wallplate
- Compatible with most dimmable LED and CFL lamps
- Adjustable rapid start feature ensures lamp start-up even at low dim levels

Powering Business Worldwide

## Specifications

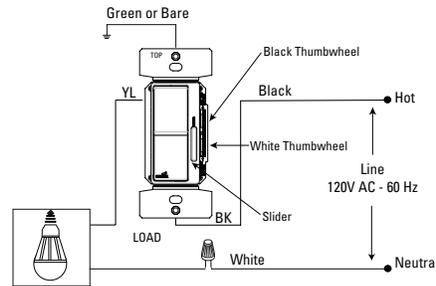

<b>Switch Type</b>	Single-pole and 3-way
<b>Environment</b>	<b>Flammability:</b> Meets UL 94 requirements; V2 rated
	<b>Temperature Rating:</b> -20°C to 70°C (-4°F to 158°F)
<b>Electrical</b>	<b>Rating:</b> 120V/AC, 60 Hz
	<b>Light Intensity Control:</b> Full-range, continuously variable dimming
	<b>Dimming Performance:</b> Solid State Dimming
	<b>Surge Protection:</b> Meets ANSI/IEEE Std. C62.41-1980, tested to withstand voltage surges up to 6000V and current surges of up to 200A without damage
	<b>Radio Frequency Interference:</b> Designed to reduce interference with radio, audio and video equipment
	<b>Power-failure Memory:</b> Light returns to same level prior to power interruption
	<b>Lamp Ratings:</b> 300W Dimmable LED/CFL 600W Incandescent, Halogen, Dimmable Fluorescent, Electronic Low-Voltage, Magnetic Low-Voltage
<b>Mechanical</b>	<b>Wiring Types:</b> Single-Pole and 3-Way
	<b>Voltage Ratings:</b> Permanently marked on device
<b>Standards</b>	cULus Listed to UL1472, file no.E472273 NOM Certified

# 0-10V Decorator Dimmer Wallstation

For use with all 0-10V fixtures in Meeting Room

Catalog#	WBSD-010DEC-C1	Prepared by	Kathleen Kenny
Project		Date	
Comments		Type	

## Overview

The 0-10V Decorator Dimmer provides full-range classic linear-slide dimming for 0-10 Volt compatible dimmable light sources. These units are ideal for light commercial applications and are compatible with decorator style devices and wallplates. Units feature a preset "ON/OFF" switch that automatically returns controlled light(s) to a preset level without disturbing the brightness level. The device is designed for both Single-pole (one location) and 3-way (multi-location) applications.

## Features

- Preset feature allows user to return to previous light level when turning lights ON
- Integrated full-slide control for easy, precise operation
- Can be wired as Single-pole or 3-way
- Neutral is not required for installation of device
- Adjustable high-level trim setting for optimal lamp compatibility
- Each package includes faceplate kit with 3 colors

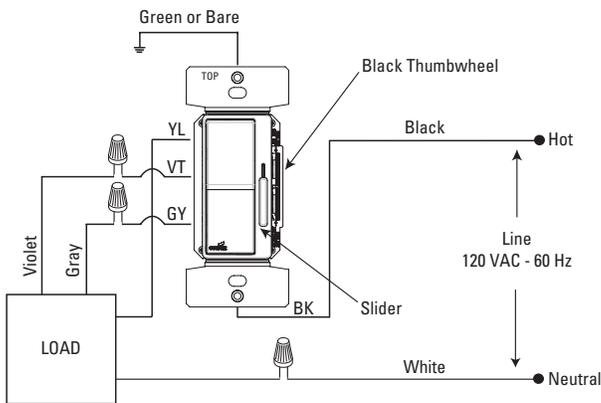

Powering Business Worldwide

## Specifications

<b>Switch Type</b>	Single-pole and 3-way
<b>Dimming Control</b>	0-10 VDC: 200mA Sink Sink Dimming
<b>Electrical Ratings</b>	<b>120 VAC:</b> Max. Load: 10 amps, 1200W, 60 Hz <b>277 VAC:</b> Max Load: 6 amps, 1660W, 60 Hz
<b>Light Intensity Control</b>	Full-range, continuously variable dimming Adjustable High-level trim setting
<b>Power Failure Memory</b>	Light returns to same level prior to power interruption
<b>Wiring Type</b>	Back & side wiring terminals; 12-14 AWG (Copper wire) 0-10V wire leads; 16 AWG
<b>Flammability</b>	Meets UL 94 requirements, V2 rated
<b>Temperature</b>	-4°F to 158°F (-20°C to 70°C)

## DESCRIPTION

SNLED Lensed is a narrow LED lensed striplight series. This high quality luminaire is dedicated to the latest solid state lighting and electronic driver technology for optimal performance and energy efficiency. This Lensed product is available with three different lens types.

The small size of the SNLED makes it an ideal choice for size restricted architectural applications. The SNLED Series can be the illumination solution in commercial, industrial, retail and residential applications. Fixtures can be used in storage/utility areas, coves, display cases, shops, task and general area lighting.

## SPECIFICATION FEATURES

### Construction

Channel is die formed cold rolled steel with numerous KOs for ease of installation. Groove for Tong Hanger. End plate quickly converts to snap-in channel connector for continuous row alignment. Channel/wireway cover secured with sheet metal screws.

### Controls

Equipped standard with a 0-10V continuous dimming driver that works with any standard 0-10V control/dimmer. Dimming range is 10% to 100%; varies by control device. Combine with energy-saving products like occupancy sensors, day lighting controls, and lighting relay panels to maximize energy savings. For motion control, reference options for both end and middle of the row applications.

### Electrical

Long-Life LED system coupled with electronic (120-277V) driver to deliver optimal lighting performance. LED's available in 3000K, 3500K, 4000K, or 5000K with a CRI ≥ 85. Other color temperatures are available. Projected life is 60,000 + hours at 70% lumen output based on TM21. This driver is 0-10V dimming standard.

### Emergency Battery Pack Option

Optional 120v-277v integral emergency battery pack is

available in 7-watts or 14-watts to meet critical life-safety lighting requirements. The 90-minute batteries provide constant power to the LED system, ensuring code-compliance. A test switch/indicator button can be tested safely from the ground using a laser pointer, while the patented EZ Key prevents accidental discharge of the battery during construction. See ordering information for details.

### Finish

Multistage iron phosphate pretreatment ensures maximum bonding and rust inhibitor. High reflective paint after fabrication, baked white enamel finish is standard.

### Channel/Wireway Cover

Die formed heavy gauge steel. Tight fit for ease of maintenance.

### Shielding

Offers three different lensed optical distributions. (LC) Clear with linear optical ribs. (LN) Semi-frost for narrow distribution. (LW) Full frost for wide distribution.

### Installation

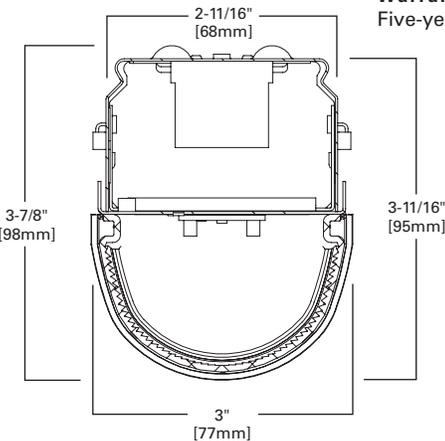

Fixture may be surface, pendant, or stem mounted. See accessories below in ordering information.

### Compliance

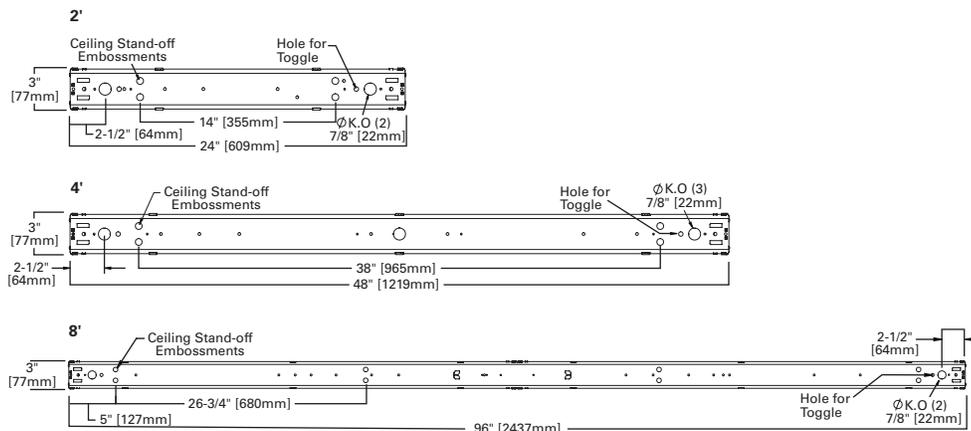

Components are UL recognized. Indoor luminaires are cULus listed for 40° C ambient environments, RoHS compliant, damp location listed, and comply with IESNA LM-79. LEDs comply with LM-80 standards. DesignLights Consortium® Qualified. Refer to www.designlights.org Qualified Products List under Family Models for details.

### Warranty

Five-year warranty.

Revision Date:

NOTES: <sup>(1)</sup> 4 ft. only. <sup>(2)</sup> Nominal lumen values. <sup>(3)</sup> Two drivers required. <sup>(4)</sup> 4 ft. and 8 ft. only. <sup>(5)</sup> Motion Sensor offers dimmability. <sup>(6)</sup> For a complete listing of Fifth Light products, visit [www.eaton.com/lightingsystems](http://www.eaton.com/lightingsystems) <sup>(7)</sup> With integral test switch/indicator/laser test. For approximate delivered lumens multiply the lumens per watt of the desired fixture by the wattage of the emergency battery pack (100 lm/W x 7=700 lumens). IES-format photometry for luminaire under emergency operation available. <sup>(8)</sup> 2 ft. and 4 ft. only. <sup>(9)</sup> DesignLights Consortium™ Qualified and classified for DLC Standard (all lumen packages), refer to [www.designlights.org](http://www.designlights.org) for details. <sup>(10)</sup> 4100 lumen and above on 4 ft. and 8200 lumen and above on 8 ft. <sup>(11)</sup> HCD driver option requires two drivers for 6700 - 10,500 lumens. Not available for 13,000 lumens and above. <sup>(12)</sup> Not currently listed on DLC QPL. <sup>(13)</sup> Used to transfer fixture to secondary power source for life-safety operation. When used with a dimming fixture, two devices are required to ensure control is disabled while operating under emergency power. <sup>(14)</sup> 8 ft. only.

Specifications & dimensions subject to change without notice. Consult your Eaton Representative for availability and ordering information.

## DESCRIPTION

SNLED Lensed is a narrow LED lensed striplight series. This high quality luminaire is dedicated to the latest solid state lighting and electronic driver technology for optimal performance and energy efficiency. This Lensed product is available with three different lens types.

The small size of the SNLED makes it an ideal choice for size restricted architectural applications. The SNLED Series can be the illumination solution in commercial, industrial, retail and residential applications. Fixtures can be used in storage/utility areas, coves, display cases, shops, task and general area lighting.

## SPECIFICATION FEATURES

### Construction

Channel is die formed cold rolled steel with numerous KOs for ease of installation. Groove for Tong Hanger. End plate quickly converts to snap-in channel connector for continuous row alignment. Channel/wireway cover secured with sheet metal screws.

### Controls

Equipped standard with a 0-10V continuous dimming driver that works with any standard 0-10V control/dimmer. Combine with energy saving products like occupancy sensors, day lighting controls, and lighting relay panels to maximize energy savings. For motion control, reference options for both end and middle of the row applications. Standard dimming is 0-10V to 10% with 1%, step and Fifth Light DALI dimming options available.

### Electrical

Long-Life LED system coupled with electrical driver to deliver optimal performance. LED's available in 3000K, 3500K, 4000K or 5000K with a minimum of 80 CRI. Projected life at 70% lumen maintenance is nearly 170,000 hours with TM21 rating up to L82 >60,000 hours. Electronic drivers are cULus recognized and available for 120-277V, 347V and 480V applications.

### Emergency Battery Pack Option

Optional 120v-277v integral emergency battery pack is

available in 7-watts or 14-watts to meet critical life-safety lighting requirements. The 90-minute batteries provide constant power to the LED system, ensuring code-compliance. A test switch/indicator button can be tested safely from the ground using a laser pointer, while the patented EZ Key prevents accidental discharge of the battery during construction. See ordering information for details.

### Finish

Multistage iron phosphate pretreatment ensures maximum bonding and rust inhibitor. High reflective paint after fabrication, baked white enamel finish is standard.

### Channel/Wireway Cover

Die formed heavy gauge steel. Tight fit for ease of maintenance.

### Shielding

Offers three different lensed optical distributions. (LC) Clear with linear optical ribs. (LN) Semi-frost for narrow distribution. (LW) Full frost for wide distribution.

### Installation

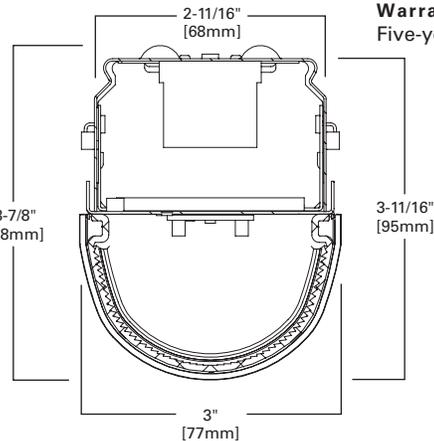

Fixture may be surface, pendant, or stem mounted. See accessories below in ordering information.

### Compliance

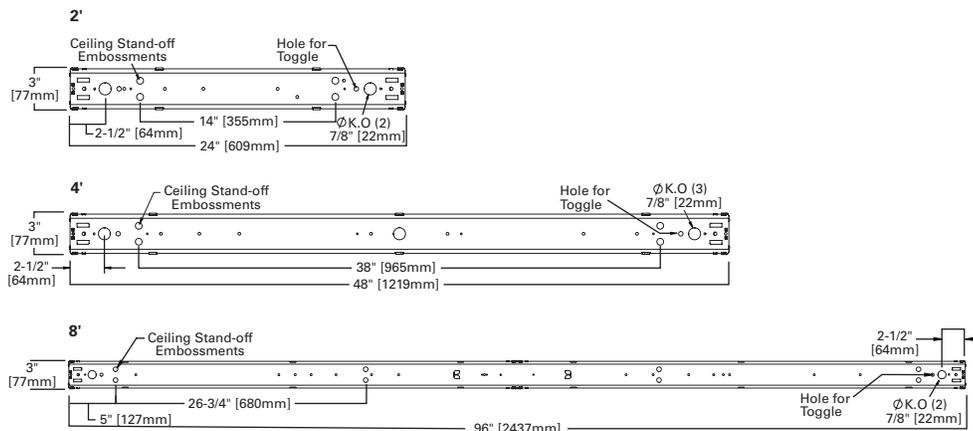

Components are UL recognized. Indoor luminaires are cULus listed for 40° C ambient environments, RoHS compliant, damp location listed, and comply with IESNA LM-79. LEDs comply with LM-80 standards. Drivers are NEMA 410 compliant. DesignLights Consortium® Qualified and classified for both DLC Standard and DLC Premium, refer to [www.designlights.org](http://www.designlights.org) for details.

### Warranty

Five-year warranty.

**ACCESSORIES**

(Order Separately)

AYC=Chain/Set=36" Chain Hanger  
(Use 1 set per fixture)

SCF=Fixed Stem Set (Specify Length)

SCS=Swivel Stem Set (Specify Length)

SCA=Adjustable 48" Stem Set

EYE CHAIN SET/3FT=Eye Bolt Chain  
(Use 1 set per fixture)

WG/SNF-2FT=2' Wire Guard

WG/SNF-4FT=4' Wire Guard

A1B/Spacer-U=Spacer 1-1/2" to 2-1/2" from ceiling  
(Use 2 per fixture)

TOGGLE=Single Toggle No. 2 (Specify Length)

Y-TOGGLE=Y Toggle No. 2 (Specify Length)

**NOTES:** <sup>(1)</sup> Nominal lumen values. See table for value and fixture length. <sup>(2)</sup> Two drivers required. <sup>(3)</sup> 4 ft. and 8 ft. only. <sup>(4)</sup> Motion Sensor offers dimmability. <sup>(5)</sup> Available for 41 watts and above. Two drivers required for 85 watts and above. For a complete listing of Fifth Light products, visit [www.eaton.com/lightingsystems](http://www.eaton.com/lightingsystems) <sup>(6)</sup> With integral test switch/indicator/laser test. For approximate delivered lumens multiply the lumens per watt of the desired fixture by the wattage of the emergency battery pack (100 lm/W x 7=700 lumens). IES-format photometry for luminaire under emergency operation available. <sup>(7)</sup> Available for 41 Watts and above. Two drivers required for 69 watts and above. <sup>(8)</sup> Requires two drivers for 61 watts and above. <sup>(9)</sup> Used to transfer fixture to secondary power source for life-safety operation. When used with a dimming fixture, two devices are required to ensure control is disabled while operating under emergency power. <sup>(10)</sup> Most common C&P shown. Must specify location for cord. All "end" locations will be on the end with sensor installed. <sup>(11)</sup> Consult tech support on numerous options for this feature. <sup>(12)</sup> DesignLights Consortium® Qualified and classified for both DLC Standard and DLC Premium, refer to [www.designlights.org](http://www.designlights.org) for details.

## DESCRIPTION

SNLED Lensed is a narrow LED lensed striplight series. This high quality luminaire is dedicated to the latest solid state lighting and electronic driver technology for optimal performance and energy efficiency. This Lensed product is available with three different lens types.

The small size of the SNLED makes it an ideal choice for size restricted architectural applications. The SNLED Series can be the illumination solution in commercial, industrial, retail and residential applications. Fixtures can be used in storage/utility areas, coves, display cases, shops, task and general area lighting.

## SPECIFICATION FEATURES

### Construction

Channel is die formed cold rolled steel with numerous KOs for ease of installation. Groove for Tong Hanger. End plate quickly converts to snap-in channel connector for continuous row alignment. Channel/wireway cover secured with sheet metal screws.

### Controls

Equipped standard with a 0-10V continuous dimming driver that works with any standard 0-10V control/dimmer. Dimming range is 10% to 100%; varies by control device. Combine with energy-saving products like occupancy sensors, day lighting controls, and lighting relay panels to maximize energy savings. For motion control, reference options for both end and middle of the row applications.

### Electrical

Long-Life LED system coupled with electronic (120-277V) driver to deliver optimal lighting performance. LED's available in 3000K, 3500K, 4000K, or 5000K with a CRI ≥ 85. Other color temperatures are available. Projected life is 60,000 + hours at 70% lumen output based on TM21. This driver is 0-10V dimming standard.

### Emergency Battery Pack Option

Optional 120v-277v integral emergency battery pack is

available in 7-watts or 14-watts to meet critical life-safety lighting requirements. The 90-minute batteries provide constant power to the LED system, ensuring code-compliance. A test switch/indicator button can be tested safely from the ground using a laser pointer, while the patented EZ Key prevents accidental discharge of the battery during construction. See ordering information for details.

### Finish

Multistage iron phosphate pretreatment ensures maximum bonding and rust inhibitor. High reflective paint after fabrication, baked white enamel finish is standard.

### Channel/Wireway Cover

Die formed heavy gauge steel. Tight fit for ease of maintenance.

### Shielding

Offers three different lensed optical distributions. (LC) Clear with linear optical ribs. (LN) Semi-frost for narrow distribution. (LW) Full frost for wide distribution.

### Installation

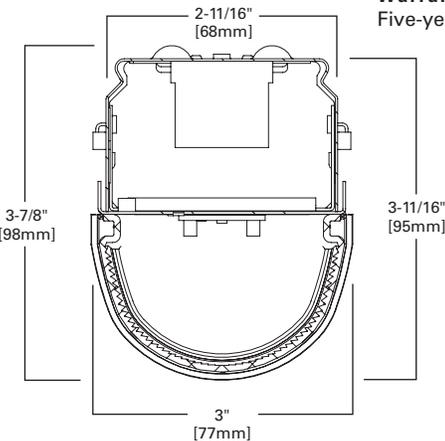

Fixture may be surface, pendant, or stem mounted. See accessories below in ordering information.

### Compliance

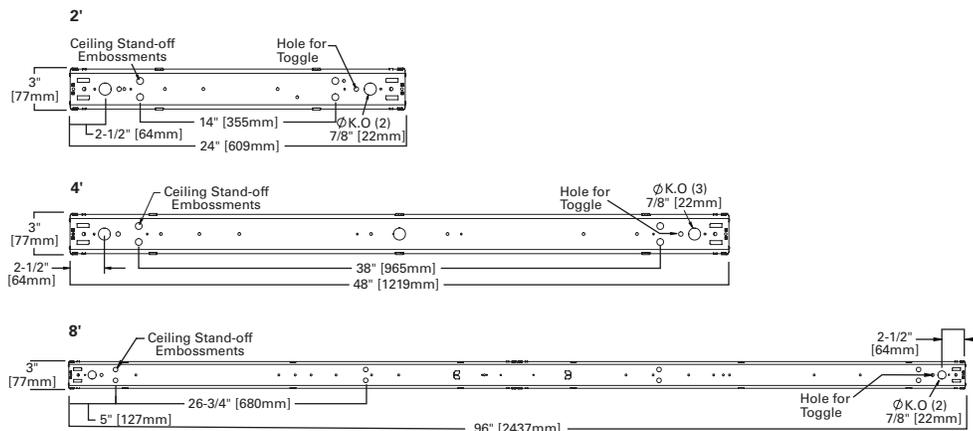

Components are UL recognized. Indoor luminaires are cULus listed for 40° C ambient environments, RoHS compliant, damp location listed, and comply with IESNA LM-79. LEDs comply with LM-80 standards. DesignLights Consortium® Qualified. Refer to www.designlights.org Qualified Products List under Family Models for details.

### Warranty

Five-year warranty.

NOTES: <sup>(1)</sup> 4 ft. only. <sup>(2)</sup> Nominal lumen values. <sup>(3)</sup> Two drivers required. <sup>(4)</sup> 4 ft. and 8 ft. only. <sup>(5)</sup> Motion Sensor offers dimmability. <sup>(6)</sup> For a complete listing of Fifth Light products, visit [www.eaton.com/lightingsystems](http://www.eaton.com/lightingsystems) <sup>(7)</sup> With integral test switch/indicator/laser test. For approximate delivered lumens multiply the lumens per watt of the desired fixture by the wattage of the emergency battery pack (100 lm/W x 7=700 lumens). IES-format photometry for luminaire under emergency operation available. <sup>(8)</sup> 2 ft. and 4 ft. only. <sup>(9)</sup> DesignLights Consortium™ Qualified and classified for DLC Standard (all lumen packages), refer to [www.designlights.org](http://www.designlights.org) for details. <sup>(10)</sup> 4100 lumen and above on 4 ft. and 8200 lumen and above on 8 ft. <sup>(11)</sup> HCD driver option requires two drivers for 6700 - 10,500 lumens. Not available for 13,000 lumens and above. <sup>(12)</sup> Not currently listed on DLC QPL. <sup>(13)</sup> Used to transfer fixture to secondary power source for life-safety operation. When used with a dimming fixture, two devices are required to ensure control is disabled while operating under emergency power. <sup>(14)</sup> 8 ft. only.

Specifications & dimensions subject to change without notice. Consult your Eaton Representative for availability and ordering information.

# Metalux AP Series

## DESCRIPTION

The SLSTP is a low profile, high quality luminaire offering the latest solid state lighting and electronic driver technology that optimizes performance and energy efficiency. With the SLSTP's low profile design, this series is an ideal solution for restricted spaces and meets traditional requirements for single or continuous row applications.

The SLSTP is an excellent solution for commercial, industrial, retail or residential applications. Ideal for new construction or simple fluorescent retrofit replacement.

## SPECIFICATION FEATURES

### Construction

Fixture channel, cover and end plates are formed from cold rolled steel and offers all of the features needed for installation including multiple KO, a round J-box cover, wiring connectors and decorative end caps. The SLSTP is post painted for ease of handling. Decorative end caps snap-on for an improved aesthetic finish. The SLSTP is suitable for either single or continuous row applications.

### Controls

Combine with energy saving products like occupancy sensors, daylighting controls, and lighting relay panels to maximize energy savings. Standard 0-10V continuous dimming driver works with any standard 0-10V control/dimmer. Dimming range is 10% to 100% and varies by control device. 120V drivers work with standard 120V phase cut dimmers.

See dimming compatibility chart posted on website. Optional simple occupancy sensors enable code compliance all in a simple package.

### Electrical

Long-Life LED system with an energy-efficient electronic driver comes in UNV (120-277V) or 120V versions. Both drivers offer smooth dimming with a number of residential and commercial dimmers. LED's CCT are 3500K and 4000K with a CRI ≥ 80. Projected life is 50,000 hours at 70% lumen output.

### Finish

Post painted with high reflective paint – standard.

### Shielding

SLSTP offers a frost lens with decorative end caps for single and end of the row applications.

### Installation

Fixture may be surface, suspended, or wall mounted. Multiple 7/8" K.O. on back and one on each end. See accessories below for ordering information.

### Compliance

cULus listed for damp location rated. LED's comply with IESNA LM-79 and LM-80 standards. Under 4", ADA Compliant. DesignLights Consortium® Qualified and classified for DLC Standard, refer to www.designlights.org for details. RoHS compliant. Suitable for use in clothes closets when installed in accordance with the NEC 410.16 spacing requirements.

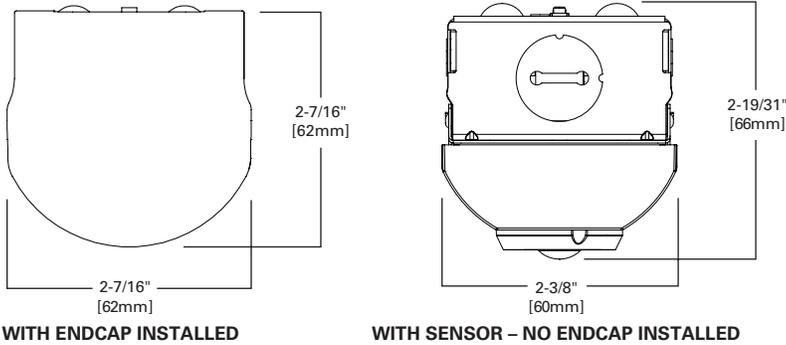

### Warranty

Five-year warranty.

# Metalux AP Series

## DESCRIPTION

The SLSTP is a low profile, high quality luminaire offering the latest solid state lighting and electronic driver technology that optimizes performance and energy efficiency. With the SLSTP's low profile design, this series is an ideal solution for restricted spaces and meets traditional requirements for single or continuous row applications.

The SLSTP is an excellent solution for commercial, industrial, retail or residential applications. Ideal for new construction or simple fluorescent retrofit replacement.

## SPECIFICATION FEATURES

### Construction

Fixture channel, cover and end plates are formed from cold rolled steel and offers all of the features needed for installation including multiple KO, a round J-box cover, wiring connectors and decorative end caps. The SLSTP is post painted for ease of handling. Decorative end caps snap-on for an improved aesthetic finish. The SLSTP is suitable for either single or continuous row applications.

### Controls

Combine with energy saving products like occupancy sensors, daylighting controls, and lighting relay panels to maximize energy savings. Standard 0-10V continuous dimming driver works with any standard 0-10V control/dimmer. Dimming range is 10% to 100% and varies by control device. 120V drivers work with standard 120V phase cut dimmers.

See dimming compatibility chart posted on website. Optional simple occupancy sensors enable code compliance all in a simple package.

### Electrical

Long-Life LED system with an energy-efficient electronic driver comes in UNV (120-277V) or 120V versions. Both drivers offer smooth dimming with a number of residential and commercial dimmers. LED's CCT are 3500K and 4000K with a CRI ≥ 80. Projected life is 50,000 hours at 70% lumen output.

### Finish

Post painted with high reflective paint – standard.

### Shielding

SLSTP offers a frost lens with decorative end caps for single and end of the row applications.

### Installation

Fixture may be surface, suspended, or wall mounted. Multiple 7/8" K.O. on back and one on each end. See accessories below for ordering information.

### Compliance

cULus listed for damp location rated. LED's comply with IESNA LM-79 and LM-80 standards. Under 4", ADA Compliant. DesignLights Consortium® Qualified and classified for DLC Standard, refer to [www.designlights.org](http://www.designlights.org) for details. RoHS compliant. Suitable for use in clothes closets when installed in accordance with the NEC 410.16 spacing requirements.

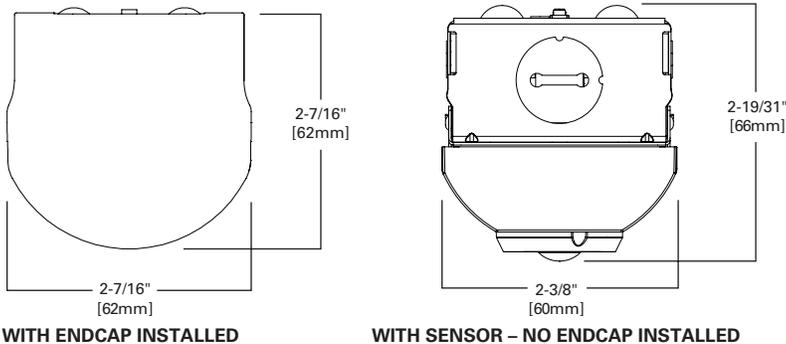

### Warranty

Five-year warranty.

# Metalux AP Series

## DESCRIPTION

The SLSTP is a low profile, high quality luminaire offering the latest solid state lighting and electronic driver technology that optimizes performance and energy efficiency. With the SLSTP's low profile design, this series is an ideal solution for restricted spaces and meets traditional requirements for single or continuous row applications.

The SLSTP is an excellent solution for commercial, industrial, retail or residential applications. Ideal for new construction or simple fluorescent retrofit replacement.

## SPECIFICATION FEATURES

### Construction

Fixture channel, cover and end plates are formed from cold rolled steel and offers all of the features needed for installation including multiple KO, a round J-box cover, wiring connectors and decorative end caps. The SLSTP is post painted for ease of handling. Decorative end caps snap-on for an improved aesthetic finish. The SLSTP is suitable for either single or continuous row applications.

### Controls

Combine with energy saving products like occupancy sensors, daylighting controls, and lighting relay panels to maximize energy savings. Standard 0-10V continuous dimming driver works with any standard 0-10V control/dimmer. Dimming range is 10% to 100% and varies by control device. 120V drivers work with standard 120V phase cut dimmers.

See dimming compatibility chart posted on website. Optional simple occupancy sensors enable code compliance all in a simple package.

### Electrical

Long-Life LED system with an energy-efficient electronic driver comes in UNV (120-277V) or 120V versions. Both drivers offer smooth dimming with a number of residential and commercial dimmers. LED's CCT are 3500K and 4000K with a CRI ≥ 80. Projected life is 50,000 hours at 70% lumen output.

### Finish

Post painted with high reflective paint – standard.

### Shielding

SLSTP offers a frost lens with decorative end caps for single and end of the row applications.

### Installation

Fixture may be surface, suspended, or wall mounted. Multiple 7/8" K.O. on back and one on each end. See accessories below for ordering information.

### Compliance

cULus listed for damp location rated. LED's comply with IESNA LM-79 and LM-80 standards. Under 4", ADA Compliant. DesignLights Consortium® Qualified and classified for DLC Standard, refer to [www.designlights.org](http://www.designlights.org) for details. RoHS compliant. Suitable for use in clothes closets when installed in accordance with the NEC 410.16 spacing requirements.

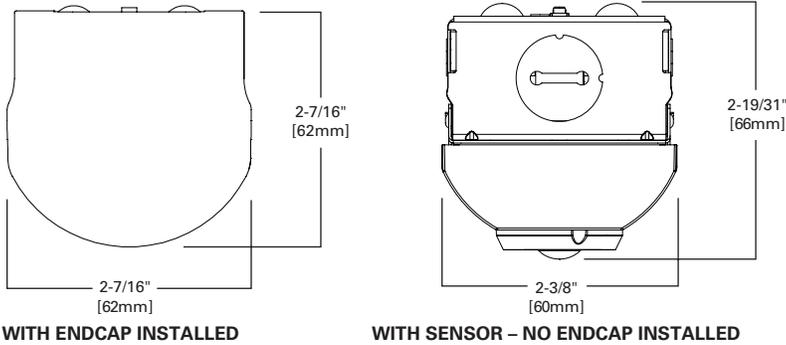

### Warranty

Five-year warranty.

## DESCRIPTION

Ideal for task, accent, office, cove, and utility, under and above cabinet lighting display, the Halo Undercabinet low-profile design delivers maximum energy savings and life with easy installation. The integrated driver design allows 120V direct to the fixture for easy installation. Fixtures are available in 9", 18", 24", 36" and 48" lengths, the Halo system can be configured to fit almost anywhere. Each unit has an integrated on-off switch. Smooth dimming down to 5% using a standard dimmer\*. Combination of direct wire to the fixture and connector cables provide for installation flexibility. Minimum Color Rendering Index (CRI) of 90 in 2700K, 3000K and 4000K color temperatures.

## SPECIFICATION FEATURES

### Even Light Distribution

Specialized optical system consisting of tightly clustered proximity phosphor LEDs, advanced optical chamber coatings and lens materials resulting in soft illumination with very high efficiency. These fixtures are ideal for task lighting over glossy surfaces with no distracting shadow patterns.

### Wiring Flexibility

Use any combination of three different wiring methods: Bring flexible conduit or Romex directly to either end of any size fixture. Conduit connector and romex strain relief hardware is included with each fixture. Utilize the available plug in connectors (sold separately) to link additional fixtures to the circuit or continue with flex conduit or romex (See instructions sheets for more detail).

### Durable Low Profile Housing

Heavy gauge aluminum housing and color matched end caps with a 3/4" overall height.

### Two Fastener Mounting

Each unit is secured directly to the mounting surface with just two fasteners keeping installation costs low. Can be mounted in horizontal and vertical orientations.

### Continuous Runs

Link any combination of fixtures up to 450 W total load using available connectors.

### Optional Accessories

Optional splice box has a connection port on each side to allow for runs in either or both directions. Includes Romex/ 1/2" conduit connector. Various connector cable options provide flexibility of mounting location.

### Finish Options

Fixtures and accessories are available in both White (P) and Matte Black (MB) finishes.

### Electronic Driver

Electronic driver provides full light output, flicker free and noise free operation.

### Labels

- cULus listed
- Can be used to meet IECC, ASHRAE commercial and residential standards
- ENERGY STAR® qualified
- FCC

## DESCRIPTION

SWLED is a versatile LED surface or wall mount luminaire which can be used in a broad range of commercial and industrial applications. This series provides customers with a high quality luminaire utilizing the latest LED, solid state lighting and electronic driver technology for optimal performance and maximized energy efficiency. Offered with three different lens distributions and three different lens options which provides uniform light distribution that is an ideal choice for general purpose lighting where customers want to move away from traditional fluorescent solutions.

## SPECIFICATION FEATURES

### Construction

Housing consists of die formed cold rolled steel with decorative white opaque injection molded end plates. Reflector/channel wireway cover secured by fasteners for easy wireway access. Channel back has numerous KO's for easy installation.

### Controls

The SWLED is Powered by Fifth Light, with a standard 0-10V continuous dimming driver that works with any 0-10V control/dimmer. Combine with energy saving products like occupancy sensors, daylighting controls and lighting relay panels to maximize energy savings. In addition, the SWLED can include a factory-installed integrated sensor system for occupancy and daylight dimming control and manual control from an optional handheld remote. Or, specify the Digital Addressable Lighting Interface (DALI) drivers (consult factory for 1% dimming), for use with Fifth Light controls. See ordering information for details on all three options.

### Electrical

Long-Life LED system coupled with electrical driver to deliver optimal performance. LED's available in 3500K, 4000K or 5000K with a typical CRI 85. Projected life is 60,000 hours at 70% lumen output. Electronic drivers are available for 120-277V applications. A 0-10V dimming driver is standard.

### Emergency Battery Pack Option

Optional 120v-277v integral emergency battery pack is available in 7-watts or 14-watts to meet critical life-safety lighting requirements. The 90-minute batteries provide constant power to the LED system, ensuring code-compliance. A test switch/indicator button can be tested safely from the ground using a laser pointer, while the patented EZ Key prevents accidental discharge of the battery during construction. See ordering information for details.

### Finish

Highly reflective post painted finish (PAF) standard offering customers the optimal finish and handling. Additionally, each housing is treated in a multistage iron phosphate pretreatment, insuring maximum bonding and rust inhibitor.

### Shielding

Specially designed LED lens blends and linear optics allows us to offer three different lens versions

Catalog #	4SWLED-LD4-48HL	Type	ALJ-08

- LC (clear), LN (Semi-Frost with narrow distribution) and LW (full frost with wide distribution). This lenses provide different lighting distribution allowing customers to choice between smooth even illumination. Lens is securely held in place by removable injection molded white end caps that can be easily removed for installation and maintenance.

### Installation

Fixture may be surface (wall or ceiling) and suspended mounted. See accessories below for ordering information.

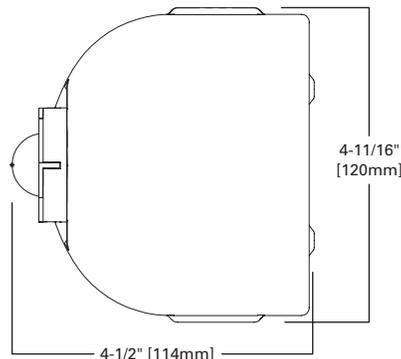

### Compliance

Modules are UL recognized components and indoor luminaires are cULus listed for up to 40°C ambient environments, RoHS compliant, and LED modules comply with IESNA LM-79 and LM-80 standards. DesignLights Consortium™ Qualified and classified for DLC Standard, refer to [www.designlights.org](http://www.designlights.org) for details.

**INTEGRATED SENSOR**

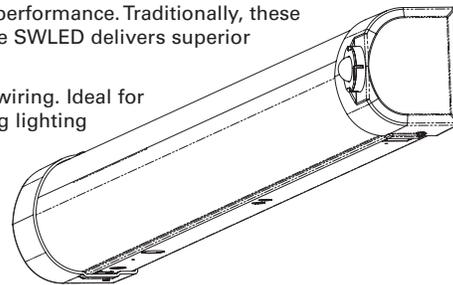

The SWLED with Integrated Sensor technology provides automatic energy savings without sacrificing performance. Traditionally, these types of energy savings required coordination between the luminaire and a lighting control system. The SWLED delivers superior lighting with integrated occupancy and daylighting controls.

Capture the benefits of traditional lighting controls, without complicated coverage planning or special wiring. Ideal for new construction or retrofit, the SWLED delivers automatic ON to an energy saving light level, ensuring lighting is turned OFF when the space is unoccupied.

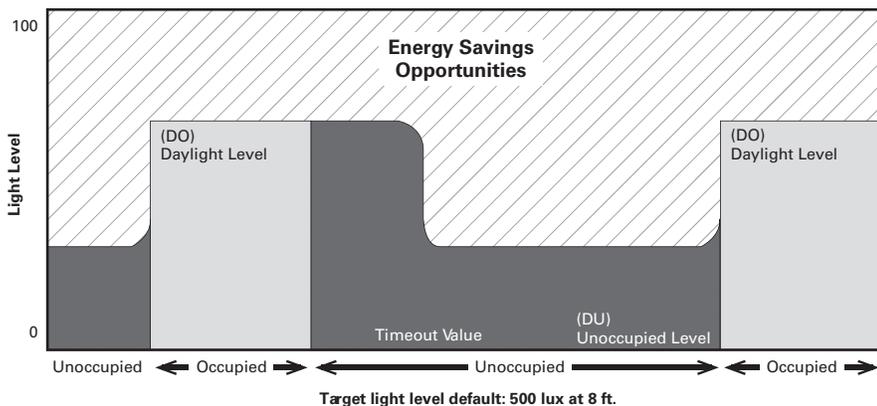

The integral daylight sensor reduces the need for special daylight zone planning. Each luminaire will automatically adjust the light level based on reflected light beneath the sensor in a closed loop method.

Occupied daylight light levels and unoccupied light levels can be adjusted using the integrated sensor programming remote (Catalog Number: ISHH-01). The integrated sensor personal remote (Catalog Number: ISHH-02) provides code compliant manual raise, lower, ON, OFF control.

The SWLED with Integrated Sensor is easy to install with no special wiring and ensures energy savings out-of-the-box with default control settings.

**How it works:**

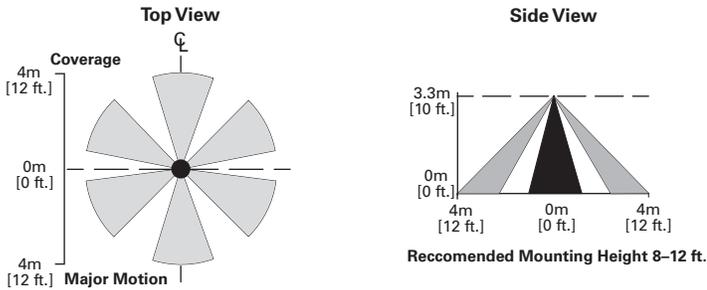

- As the user enters the space controlled by the integral sensor, the lighting turns ON to the default daylight level.
- Lighting will remain at that the daylight level until the space is unoccupied. This will start the occupancy timeout period (default 20 minutes).
- If the space remains unoccupied for half of the timeout period, the lighting will automatically reduce to the Energy Saver light level. This adjustable light level is typically half of the occupied daylight level.
- At the end of the timeout period the lighting will go to the unoccupied light level. This adjustable light level uses the OFF default setting.

## DESCRIPTION

SNLED Lensed is a narrow LED lensed striplight series. This high quality luminaire is dedicated to the latest solid state lighting and electronic driver technology for optimal performance and energy efficiency. This Lensed product is available with three different lens types.

The small size of the SNLED makes it an ideal choice for size restricted architectural applications. The SNLED Series can be the illumination solution in commercial, industrial, retail and residential applications. Fixtures can be used in storage/utility areas, coves, display cases, shops, task and general area lighting.

## SPECIFICATION FEATURES

### Construction

Channel is die formed cold rolled steel with numerous KOs for ease of installation. Groove for Tong Hanger. End plate quickly converts to snap-in channel connector for continuous row alignment. Channel/wireway cover secured with sheet metal screws.

### Controls

Equipped standard with a 0-10V continuous dimming driver that works with any standard 0-10V control/dimmer. Dimming range is 10% to 100%; varies by control device. Combine with energy-saving products like occupancy sensors, day lighting controls, and lighting relay panels to maximize energy savings. For motion control, reference options for both end and middle of the row applications.

### Electrical

Long-Life LED system coupled with electronic (120-277V) driver to deliver optimal lighting performance. LED's available in 3000K, 3500K, 4000K, or 5000K with a CRI ≥ 85. Other color temperatures are available. Projected life is 60,000 + hours at 70% lumen output based on TM21. This driver is 0-10V dimming standard.

### Emergency Battery Pack Option

Optional 120v-277v integral emergency battery pack is

available in 7-watts or 14-watts to meet critical life-safety lighting requirements. The 90-minute batteries provide constant power to the LED system, ensuring code-compliance. A test switch/indicator button can be tested safely from the ground using a laser pointer, while the patented EZ Key prevents accidental discharge of the battery during construction. See ordering information for details.

### Finish

Multistage iron phosphate pretreatment ensures maximum bonding and rust inhibitor. High reflective paint after fabrication, baked white enamel finish is standard.

### Channel/Wireway Cover

Die formed heavy gauge steel. Tight fit for ease of maintenance.

### Shielding

Offers three different lensed optical distributions. (LC) Clear with linear optical ribs. (LN) Semi-frost for narrow distribution. (LW) Full frost for wide distribution.

### Installation

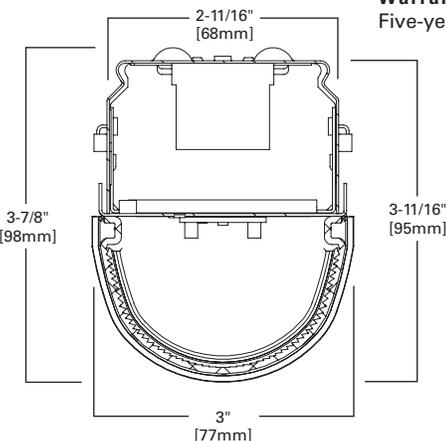

Fixture may be surface, pendant, or stem mounted. See accessories below in ordering information.

### Compliance

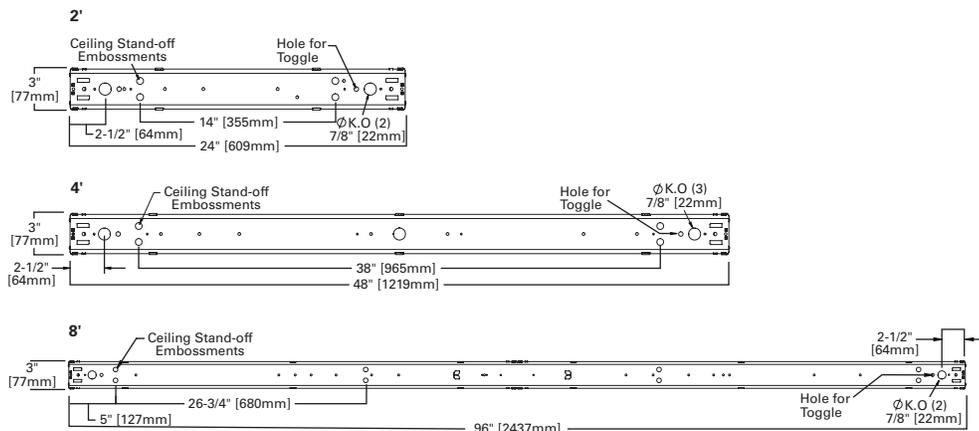

Components are UL recognized. Indoor luminaires are cULus listed for 40° C ambient environments, RoHS compliant, damp location listed, and comply with IESNA LM-79. LEDs comply with LM-80 standards. DesignLights Consortium® Qualified. Refer to www.designlights.org Qualified Products List under Family Models for details.

### Warranty

Five-year warranty.

NOTES: (1) 4 ft. only. (2) Nominal lumen values. (3) Two drivers required. (4) 4 ft. and 8 ft. only. (5) Motion Sensor offers dimmability. (6) For a complete listing of Fifth Light products, visit [www.eaton.com/lightingsystems](http://www.eaton.com/lightingsystems) (7) With integral test switch/indicator/laser test. For approximate delivered lumens multiply the lumens per watt of the desired fixture by the wattage of the emergency battery pack (100 lm/W x 7=700 lumens). IES-format photometry for luminaire under emergency operation available. (8) 2 ft. and 4 ft. only. (9) DesignLights Consortium™ Qualified and classified for DLC Standard (all lumen packages), refer to [www.designlights.org](http://www.designlights.org) for details. (10) 4100 lumen and above on 4 ft. and 8200 lumen and above on 8 ft. (11) HCD driver option requires two drivers for 6700 - 10,500 lumens. Not available for 13,000 lumens and above. (12) Not currently listed on DLC QPL. (13) Used to transfer fixture to secondary power source for life-safety operation. When used with a dimming fixture, two devices are required to ensure control is disabled while operating under emergency power. (14) 8 ft. only.

Specifications & dimensions subject to change without notice. Consult your Eaton Representative for availability and ordering information.

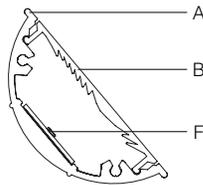

SHIPPING DATA

Length.	Wt.
2 ft.	4.3 lbs.
4 ft.	8.2 lbs.
8 ft.	15.1 lbs.

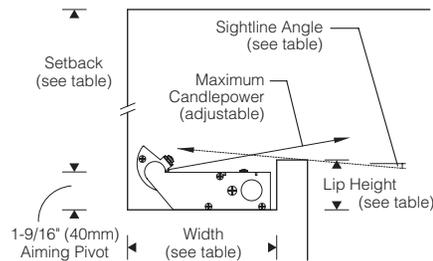

**Style S315** 1:4 Scale

**Optical Assembly** 1:2 Scale

**Cove** 1:8 Scale

**Cove Dimensions**

(maximum candlepower aimed 15° above horizontal)

Sightline	0° (horiz. cutoff)	5°	10°
Width (inside)	6-1/4" (159mm)	7-1/2" (190mm)	7-1/2" (190mm)
Lip (inside)	2-5/8" (67mm)	1-5/8" (41mm)	1-1/2" (38mm)
Setback	12" (305mm) min. recommended for 175mA, 18" (457mm) for 350mA; 24" (610mm) for 700mA.		

**Note:** Finish interior of cove matte white for best results.

**Specifications**

- A** Serviceable extruded aluminum heat sink/housing
- B** Extruded acrylic beam shaping lens
- C** Stainless steel end plates with interlocking tabs
- D** Rotation locking tab with locking set screw
- E** Aluminum side arm with adjustable mounting tab (fasteners by others)
- F** Constant current LED board
- G** Conduit entry (one each end, conduit and connections by others)
- H** Driver/housing joiner screw (one per fixture)
- I** Extruded aluminum driver housing and drivers
- J** Supply conduit and connectors by others

**Housing and Optic Assembly:**

Extruded aluminum heat sink/optic housing. Exterior heat sink anodized for maximum emissivity. Stainless steel end plates. Extruded acrylic refractive semi-diffuse asymmetric beam shaping lens. Extruded aluminum driver housing and removable cover.

**Finish:**

Optic assembly – bright anodized aluminum. Side arms and driver compartment – mill finish aluminum or painted semigloss white for natatorium option. Painted surfaces receive a 6-stage pretreatment process prior to electrostatically applied baked powder enamel. All hardware – stainless steel.

**Mounting:**

Lay-in installation, side arms with mounting tabs can be base or wall mounted (fasteners by others). Luminaires can be mounted individually or joined together to form a continuous row. Optical assembly aiming is adjustable and is fixed in position by rotation locking screws at each side arm. When mounted in a continuous row, assemblies lock together allowing all in the row to be aimed together.

Fixture weight: 1.7 lb/ft (2.5 kg/m).

**Electrical:**

Use 90°C wire for supply connections. Integral electronic Class II drivers. For complete driver specifications, see website, reference document [MA-1303](#). Driver/wireway compartment includes one conduit entry at each end. Channel cover is removable for access to driver and wiring. Luminaires may be butted end-to-end (connectors by others) for through wiring. Optional #12 AWG prewired modular through wiring with quick connectors. Optional , compatible dimming controls (by others). See website for dimming compatibility and specifications.

**Standard:**

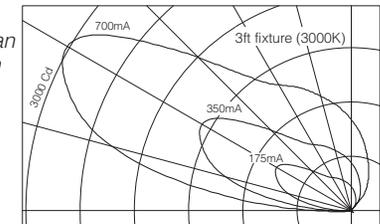

UL listed or CSA certified for damp locations. For natatorium use, specify **OP** or **PK** option. 5 year warranty, maximum ambient temperature 45°C (113°F).

**Features**

- Proprietary refractive lens technology
- Asymmetric distribution – uniform surface illumination
- Wide lateral distribution – no socket shadows
- Fully adjustable and lockable optic assembly
- Integral driver with optional pre-wired harness
- Low profile – allows smaller cove height

**Performance**

Precisely extruded acrylic lens produces an asymmetric distribution ideal for illuminating ceilings evenly.

L85(10k) > 60,000 hrs @ 25°C per TM-21

**Adjustable Mounting Feet**

The optical assembly is adjustable and lockable, in addition, the S315 is provided with mounting feet that can raise the optical assembly to achieve lower aiming angles.

**Standard (low) position** allows peak candlepower to be aimed as low as **15° above horizontal.**

**Middle position** allows peak candlepower to be aimed as low as **10° above horizontal.**

**High position** allows peak candlepower to be aimed as low as **5° above horizontal.**

## DESCRIPTION

- Extruded aluminum housing
- Die-cast aluminum end caps
- Integrated visor option
- Die-formed 94% reflective anodized aluminum reflector
- Electrostatically applied polyester powder coat paint finish
- Hinging doorframe

Catalog #		Type	ALK-01
Project		Revision Date:	
Comments		Date	
Prepared by			

## SPECIFICATION FEATURES

### Construction

Housing is 6063 aluminum extrusions with die-cast aluminum end caps without exposed fasteners. Hinging doorframe for easy access to gasketed lamp compartment, and stainless steel hardware. Optional integrated extruded aluminum cutoff visor.

### Reflector

Die-formed 94% reflective anodized aluminum.

### Lens

Indoor: Clear acrylic lens/door assembly is standard. Aluminum doorframe with no lens, prismatic glass lens, or clear glass lens is optional.

### Electrical

Use 90-degree supply wire. Tungsten - DC Bayonet, Metal Halide - G12 and Fluorescent - GX24q. Ballast is integral to luminaire and includes quick-disconnect to provide a safe, reliable means of disconnecting power to the fixture during service and maintenance.

### Mounting

Standard canopy mounts over recessed junction box (by others). Support structure by others.

### Finish

Luminaire housing is finished using electrostatically applied polyester powder coat paint. Consult factory for custom colors.

### Labels

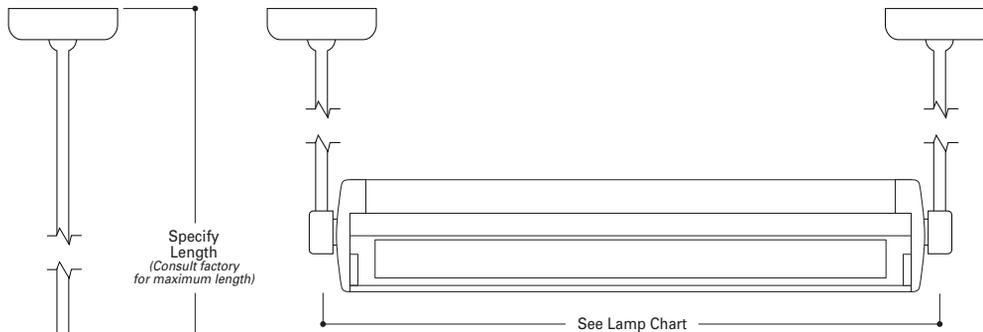

UL and CUL listed for damp locations.

## DESCRIPTION

The ASYX 2.0 second generation of asymmetric lighting is designed for general ambient illumination and accenting architectural features. The luminaire allows for both forward and wide distributions as well four different color temperatures to accommodate any space. The ASYX 2.0 utilizes the patented and highly efficient AccuLED Optics™ system for industry leading performance. IP66 rated and optional natorium finish.

<b>Catalog #</b>		<b>Type</b>	ALK-04
<b>Project</b>		<b>Revision Date:</b>	
<b>Comments</b>		<b>Date</b>	
<b>Prepared by</b>			

## SPECIFICATION FEATURES

### Construction

Heavy-wall die cast aluminum end caps with extruded aluminum housing. Housing fins allow for air flow and thermal management. Fixture is rated to 40°C. Weight: 18 lbs

### Electrical

Standard drivers feature electronic universal voltage (120-277V/ 50-60 Hz), greater than 0.9 power factor, less than 20% harmonic distortion, and ambient temperature range of 40°C (104°F) to minimum starting temp of -30°C (-22°F). 0-10V dimming standard with DALI option available. Max amp draw @ 120V is 1.5 Amps.

### LED Optics

ASYX 2.0 luminaire utilizes patented, high efficiency AccuLED Optics with specific optical distributions. Each lens is injection molded for precision, arranged and sealed onto a board substrate. LEDs are industry leading high output with standard product at 93% lumen maintenance at 60,000 hours. Offered

in 80+ CRI for 2700K, 3000K, and 3500K CCT, and 70+ CRI for 4000K CCT. The ASYX 2.0 also offers +/- 90°, or 180° rotated optics to adjust distribution for any location. The HSS option provides maximum backlight control.

### Mounting

Die cast adjustable knuckle, bolts to housing. Fixture mounts to recessed junction box (by others) using wall plate, or surface mount box with conduit entry option. See installation instructions for mounting conditions to ensure adequate support. Fixture has continuous adjustability, 20° up to 20° down with locking mechanism, as well as upward facing or downward facing.

### Finish

Fixture housing is coated using electrostatically charged polyester powder coat paint for superior protection against fade and wear. Mounting plate and all accessories to match specified color of luminaire housing. Standard colors include white, silver, black, bronze, and custom RAL

color match available.

### Compliance

Components are UL recognized and luminaires are cULus listed for 40°C ambient environments, wet location listed, and RoHS compliant. IP66 Rated.

### Environment

Suited for indoor, outdoor (wet location listed, IP66 rated). See details below. Natatorium fixtures are also suitable for applications in salt water environments.

### Natorium

Construction consists of specialized protective coating on all metal components, stainless steel hardware, and sealed LEDs. 80% lumen maintenance at 60,000 hours. Salt Fog testing per ASTM B117-73.

### Control

Standard offering is 0-10V dimming down to 10%. A Fifthlight DALI adapter is available for DALI compatibility. An integrated sensor is available with the standard driver for standalone occupancy detection and daylight sensing.

### Life and Warranty

Standard five-year limited warranty on all parts.

OPTIC ORIENTATION

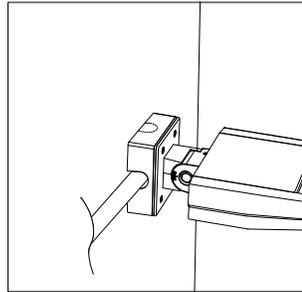

**MOUNTING AND AIMING**

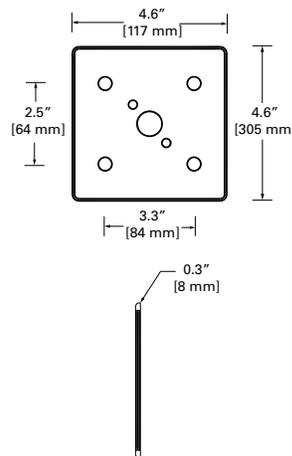

**R** - Recessed junction box option: 8.4" x 5" wall plate mounts to standard junction box.

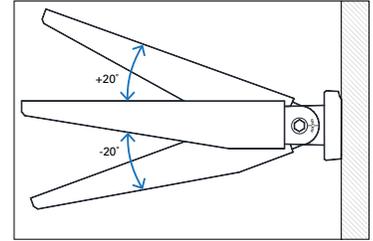

**C** - Conduit Entry option: Surface metal box fits over standard junction box with conduit entry option on all sides.

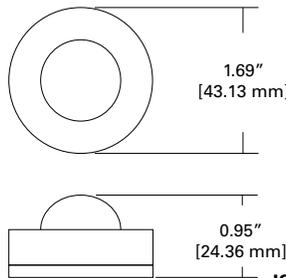

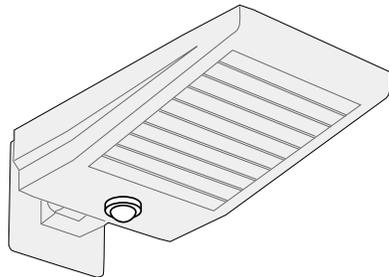

Mounting Plate

The ASYX 2.0 features +/-20° adjustable aiming as standard

**CONTROL**

**SVPD2** - The integral sensor option requires no additional wiring or special installation. The sensor provides standalone occupancy detection using a passive infrared sensor and provides daylight sensing using a closed-loop harvesting system. Depending on the "Environment" specified for Asyx, the following settings will be default:

- Indoor - Turns on/off with occupancy, daylight harvests down to 10% output
- Outdoor - Turns on/off with occupancy, turns off with sufficient daylight
- Natatorium - Full output with occupancy, 50% after occupancy timeout period, daylight harvests down to 10% output

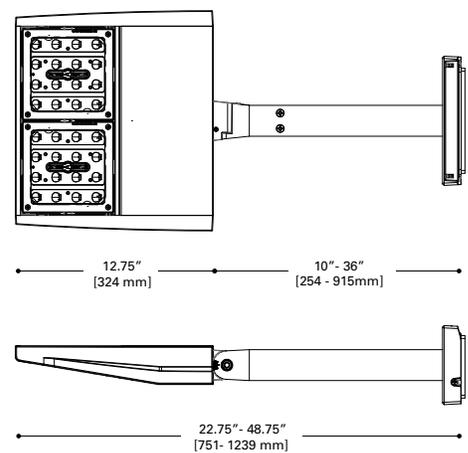

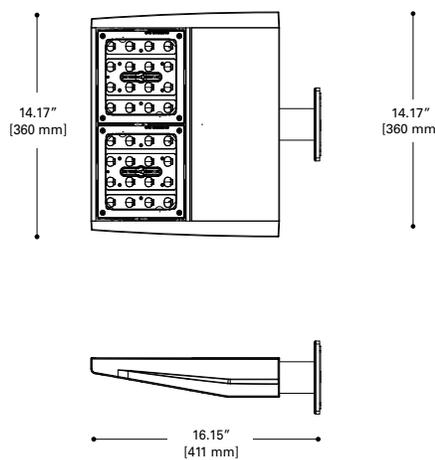

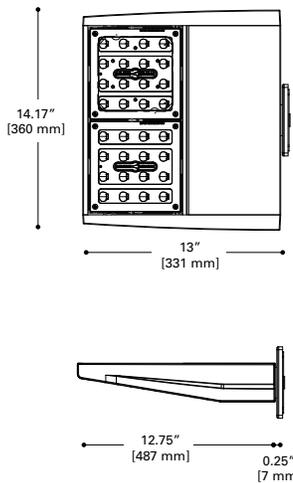

**ISHH-01-A** - Programming Remote for field adjustment of Integrated Sensor  
**ISHH-02-A** - Programming Remote for temporary control of Integrated Sensor

**OPTIONS**

**FM** - Optional flush mount option for minimized affect. FM option is not adjustable.

**RM** - Optional rigid knuckle mount for downward facing, fixed applications. Available in standard optic orientation only.

Extension Arm Length:  
Specify to the inch between min and max length

**TECHNICAL NOTES**

1. Integral Sensor cannot be selected in "D", downlight orientation. Integral sensor available in single circuit option only and is not available with DALI option. Integral sensor optimum coverage height: 8ft for SL/S1/S2 and 40ft for S3/S4/L3/L4/L5/L6. Integral sensor color is white for "White" finish selection and brown for "silver, bronze, or black" finish selections.
2. Not available with "C" surface mount junction box option.
3. See "Control" section for explanation.
4. RM and FM options are not available with Extension Stem Lengths.

## Installations

Kirkwood High School – Walker Natatorium - St Louis, MO

ASYX-DP-L6-NT-U-F-L40-2-UNV-W-C-XX-STD-R90/ 4000K, 29,800 lumens, & 319W (per fixture head)

The Walker Natatorium, part of Kirkwood High School, is the 1st complete ASYX 2.0 natatorium installation. Featuring dual pendants with side aim/rotated optics option, the performance of the fixtures is well received. (See page 7 for spacing layout)

Bridgeton Recreation Center - St. Louis, MO

ASYX-SP(and DP)-L6-NT-U-F-L40-2-UNV-W-C-XX-STD-R90/ 4000K, 29,800 lumens, & 319W (per fixture head)

The Bridgeton Recreation Center uses both single pendants, and dual pendants with side aim/rotated optics. The outcome speaks for itself. (See page 7 for spacing layout)

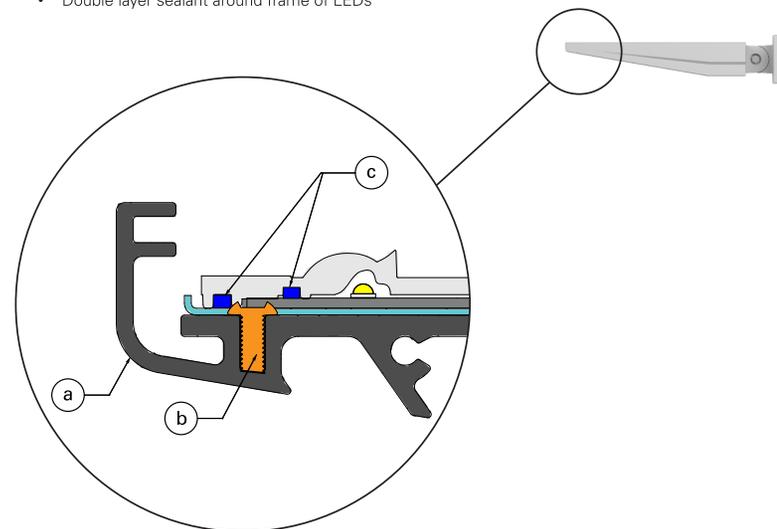

Photography by: Amy Hughes, Lighting Designer, McClure Engineering

## Materials

The natatorium, or indoor pool environment, exposes fixtures to chemicals that can affect the integrity and performance of the fixtures that live in these spaces. To protect the fixtures, the following processes are used for the ASYX 2.0 natatorium option:

- a) Specialized coating process
  - 4 Stage protection process for housings:w
    - Impurities are removed from metal surfaces
    - Metals are dipped twice in solvent baths
    - Special coating is applied to metals
    - Coated metals are cured in temperature regulated industrial oven

(Electrostatic powder coat paint is applied after 4 stage process)
- b) Exposed fasteners
  - Stainless steel is used
- c) Sealed LED light engine
  - Double layer sealant around frame of LEDs

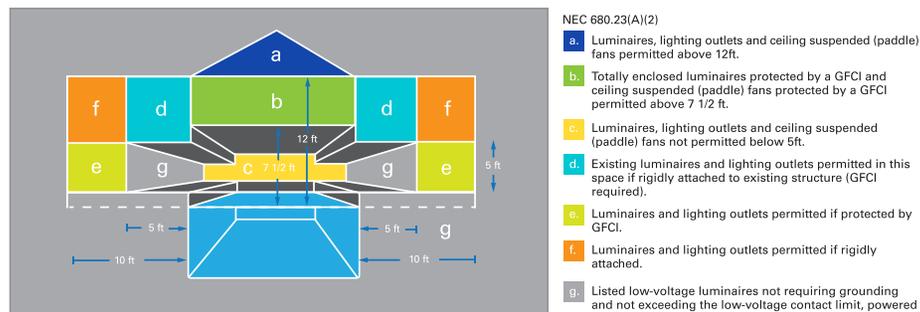

Additionally, Eaton conducted three levels of reliability testing

- Salt Fog Testing per ASTM B117-73
- Accelerated Life Testing
  - L80@60,000 hours
- In Situ Testing
  - Continuous reliability testing of installed fixtures

## Design Guide

- The following diagram shows the spacial distances allowed in natatorium spaces in regards to luminaire layouts and electrical device placement and limitations per the 2014 NEC Handbook, NEC 680 code section:

Ref: 2014 NEC Handbook

- The following table shows the Illuminance Criteria for Sports and Recreational spaces specific to swimming pools:

Sports and Recreational Illuminance Recommendations		Horizontal Illuminance (fc) Visual Ages			Uniformity Max: Min ratios
		<25	25 - 65	>65	
<b>Swimming and Water Sports</b>					
Class I	Competition Play - Professional (5000+ spectators)				
	@ water surface	75	75	75	1.7 : 1
	@ pool deck	50	50	50	2.5 : 1
Class II	Competition Play - Collegiate (5000 or less spectators)				
	@ water surface	50	50	50	2.5 : 1
	@ pool deck	20	20	20	4 : 1
Class III	Competition Play for some spectator facilities				
	@ water surface	30	30	30	3 : 1
	@ pool deck	10	10	10	4 : 1
Class IV	Competition or Recreational Play only (no spectator provision)				
	@ water surface	30	30	30	4 : 1
	@ pool deck	10	10	10	4 : 1

Ref: Illuminating Engineering Society The Lighting Handbook 10th Edition

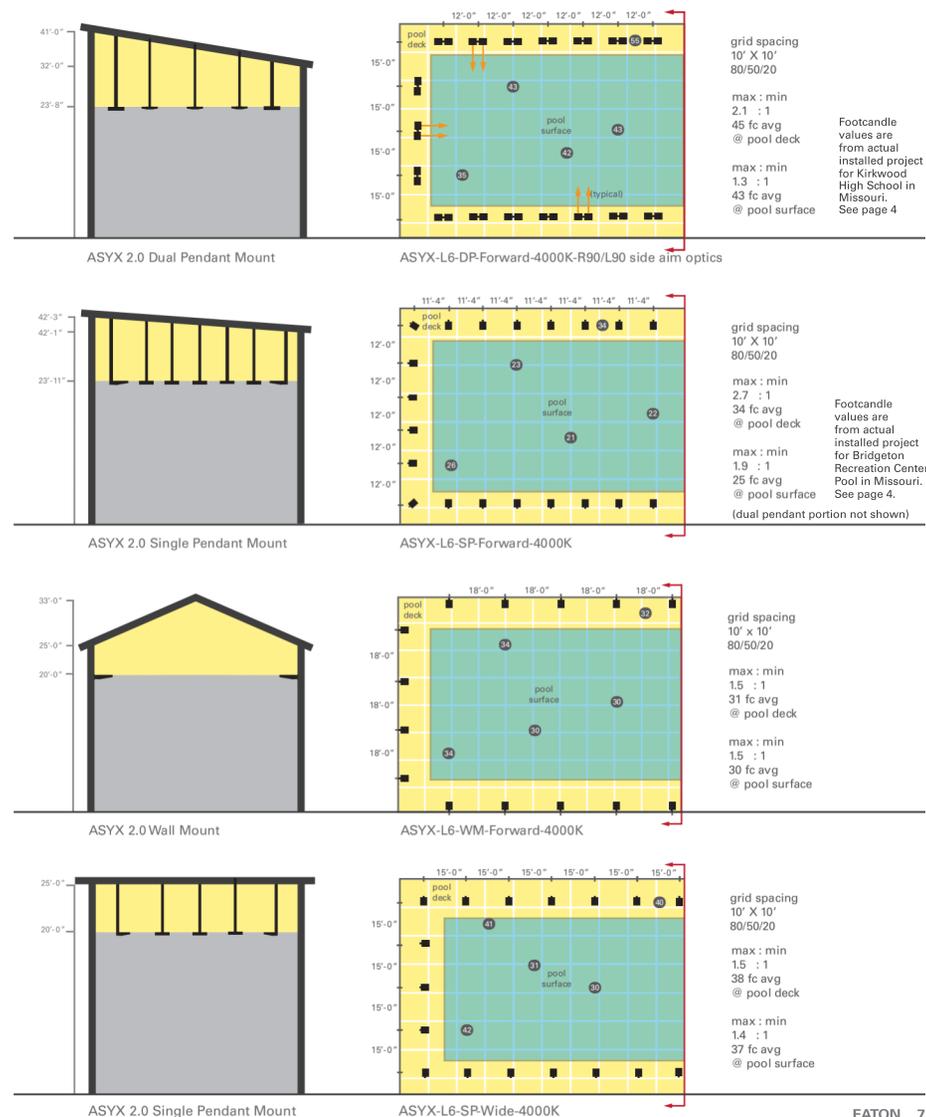

- When designing lighting systems for swimming pools consider the following parameters to influence a better design:

<b>Veiling reflections</b>	Are luminous reflections from specular or semi-matte surfaces that physically change the contrast of the visual task. Two factors that influence this are specularity of the material of the target and geometry between the observer and the target.
<b>Daylight</b>	Clerestories contribute to overall lighting systems direct and indirect sources.
<b>Finishes</b>	On walls and pool decks - matte finishes prevent glare and help reduce veiling reflections. Lighter colors aide in higher exitance values.
<b>Ceiling Uniformity</b>	Max to min ratios closest to 1:1 help prevent high contrasts and boost ceiling uniformity.
<b>Materials</b>	Ceiling materials, reflective surfaces, and smooth or unsmooth surfaces, directly affect illuminance on to task surfaces. The smoother and less reflective a surface or space is, the more efficient the lighting system becomes.

## Spacing Criteria

### The Asyx 2.0

The following is a general spacing criteria guide to help evaluate various footcandle levels based on different ceiling types, heights, mounts, and distribution types. All values in the grid diagram are in footcandles and are normalized using the same light level and color temperature. For reference only.

## DESCRIPTION

Miniature size, decorator finishes, push-in connectors, economy, all combine to make single-circuit Miniature Trac perfect for residential or commercial use. Polarized connectors and end caps are molded polycarbonate. Halo Miniature Track accepts both Halo and Lazer-by-Halo lampholders.

Catalog #	L651MB, L652MB, L901	Type
Project	Aloft	ALK-05-A,B,C
Comments		Revision Date:
Prepared by	Kathleen Kenny	

## SPECIFICATION FEATURES

### A. Structural

- Extruded aluminum .060" [1.5mm] nominal wall thickness

### B. Line Conductor

- Solid copper bus bars [cross section equivalent to #12 AWG wire].

### C. Insulating Liner

- Extruded polyvinyl insulator.

### D. Ground Conductor

- Exclusive independent grounding bus conductor. Maintains an independent positive ground #12 AWG path between lampholder, Trac channel and building's ground system.

### E. Neutral Conductor

- Cross section equivalent of #12 AWG wire.

### F. Polarity Indicator (Neutral)

- Visual polarity groove indicates proper electrical installation of lampholder adapter.

### Listings

- cULus listed for use with Halo and Lazer-by-Halo lampholders.

### Mounting

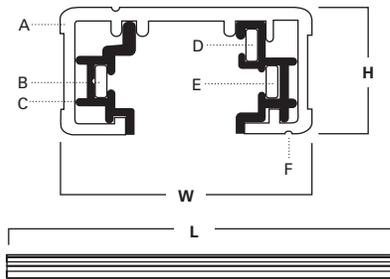

- Track system is recommended for ceiling mount only. For alternate mounting methods consult factory.

**L983**

### L992 - Pendant Kit Assembly

Order 2 kits for 2' Trac; 2 kits for 4' Trac; 3 kits for 8' Trac; and 4 kits for 12' Trac. Includes one 18" threaded steel stem, canopy and mounting hardware.

### L48 48" Steel Stem

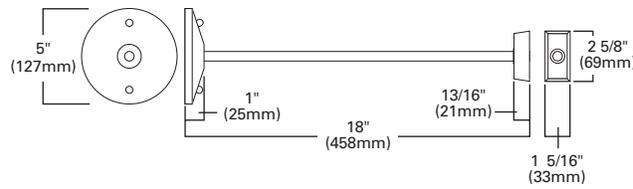

For additional length with L992. Can be field cut.

**Color codes:** P (White), MB (Black)

#### ORDERING INFORMATION

**SAMPLE NUMBER:** L992P

Connector	Finish
L992= Pendant Kit Assembly	P=White MB=Black

**L992**

### L994 - Pendant Adapter

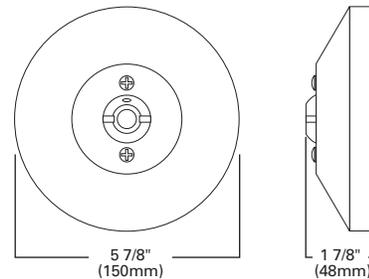

For installing pendant mounted Power-Trac on sloped ceiling. For use with L992.

**Color codes:** P (White), MB (Black)

#### ORDERING INFORMATION

**SAMPLE NUMBER:** L994P

Connector	Finish
L994= Pendant Adapter	P=White MB=Black

**L994**

### DE600 - Dead End

**Color codes:** P (White), MB (Black)

#### ORDERING INFORMATION

**SAMPLE NUMBER:** DE600P

Connector	Finish
DE600= Dead End	P=White MB=Black

**DE600**

## DESCRIPTION

High efficacy low profile track fixture ideal for accent and display lighting applications. Featuring die cast construction with a simple low profile design. These lampholders are perfect for those applications where performance is required from a discreet source.

Catalog #	L80808NF9030MB, LZR2	Type	ALK-06
Project	Aloft	Revision Date:	
Comments		Date	
Prepared by	Kathleen Kenny		

## SPECIFICATION FEATURES

### Quick Lock Adapter\*

Attaches electrically and mechanically anywhere along the track. Includes discrete locking tab that locks the luminaire on the track and allows for easy removal and repositioning.

### Heat Sink

Aluminum die-cast heat sink provides exceptional thermal management to yield 70% lumen maintenance after 50,000 hours of operation.

### LED Light Engine

Chip on board LED provides a uniform source with high efficiency and no pixilation. Available in 90 CRI minimum, R9 greater than 50 and color accuracy within 3 SDCM provide color accuracy and uniformity.

### Optics

Configurable optics allow for the reflectors to be changed in the field to adjust to the current lighting need. Available in spot, flood and narrow flood distributions.

### Media

Precision designed trim ring contains unique teeth locking mechanism, and can accept up to 2 pieces of standard media. The 3" diameter fixture accepts PAR 20 standard media. The 4" diameter fixture accepts PAR 30 standard media.

### Luminaire Arm

Arm allows the lamp housing tilt to adjust  $\pm 180^\circ$  vertically and  $\pm 350^\circ$  horizontally. This enables a clean look while providing full aiming capabilities.

### Dimming

TRIAC, ELV or Phasecut

- Designed for continuous dimming capability to nominally 5% with many 120V Leading Edge (LE) and Trailing Edge (TE) Phase Control Dimmers. (Dimmers with low end trim adjustment offer greater assurance of achieving 5% level.)
- Consult dimmer manufacturer for compatibility and conditions of use.

### Warranty

Five year limited warranty, consult website for details.  
[www.eaton.com/lighting/legal](http://www.eaton.com/lighting/legal).

### Drivers

3" fixtures (12W and 21W) contain integral 120V, 50/60 Hz constant current driver that provides noise free operation. 4" fixtures (35W) contain 120V 50/60Hz constant current driver that provides noise free operation.

### Compliance

cULus listed / certified for use with Halo Single Circuit Power-Trac, LazerTrack, and Global [See Footnote #1 below Ordering Information.] TEK/HTEK track. NSF non-food zone compliant. EMI/RFI emissions per FCC 47CFR Part 15 Class B consumer limits. Contains no mercury or lead and RoHS compliant. Photometric testing in accordance with IES LM-79-08. Lumen maintenance projections in accordance with IES LM-80-08 and TM-21-11.

## L808

Notes and Definitions:

Beam spread is to 50% center beam candlepower (CBCP.)  
 D=Distance in feet to floor or wall.  
 FC=Footcandles on floor or wall at center beam aiming location.  
 L =Effective Visual Beam length in feet (50% of maximum footcandle level.)  
 W=Effective Visual Beam width in feet (50% of maximum footcandle level.)  
 CB=Distance in feet across or down to center beam location.

# CHOPPER - FAST JACK FIXTURE HEAD

ALK-09

Revision Date:

DESIGNED BY GREGORY KAY | MADE IN USA

REV 12.05.17

Compatible System Connectors

**FJ-CHO-3-PN**  
Polished Nickel

**FJ-CHO-1-SN**  
Satin Nickel with LED MR16

**FJ-CHO-1-SN-S6-SN**  
Satin Nickel with  
Satin Nickel S6 Shade

Polished Nickel S7 Shade

**FJ-CHO-1-BZ-LH16-BZ**  
Antique Bronze with Antique  
Bronze Louver Lens Holder

### Description:

Combining simple shapes with beveled edges, the Chopper functions with an MR16 halogen or MR16 12VAC **LED** lamp with S7 shade or no shade. The fixture rotates 360°, tilts 270°; accommodates shades and optical accessories with louver lens holder.

### System Compatibility:

Monorail (M) or Monorail 2 Circuit (M2). Use Fast Jack (FJ) version for FJ canopies

### Height:

1" (2.5cm), 3" (7.6cm) 6" (15.2cm), 12" (30.5cm) or 18" (45.7cm)

### Finish:

Satin Nickel, Polished Nickel or Antique Bronze

### Lamp Specifications:

Maximum 75 watt MR16 lamp GU 5.3 base - 12 or 24 volt

**LED MR16-12VAC** compatible with no shade or S7 Mesh Shade (sold separately)

### Optional Shade Accessories (sold separately):

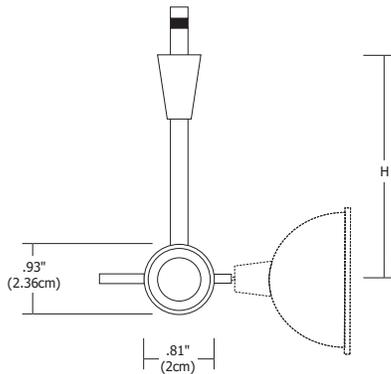

S6 - Solid Back Shade or S7 - Mesh Back Shade

### Optical Accessories (sold separately):

Hexcell Louver, LH16 - Louver Lens Holder, Glass Lenses or Snoot

### Weight:

.35 - .45 lb (.16 - .20 kg)

PROJECT	FIXTURE TYPE	DATE
---------	--------------	------

**Description**

Recessed 4" aperture ultra-shallow new construction housing for use with LED integrated trims. Suitable for 2x4 residential framing or shallow plenum commercial construction, type IC rated and can be used in direct contact with insulation. Airtight rating reduces airflow between living spaces and unconditioned areas providing additional energy savings. Use with Halo LT4, RL4, RA4, SMD4, SLD4 LED integrated trims and the ML4 LED modular recessed lighting system.

Prepared by	Kathleen Kenny, National Accounts, 678-447-5208, kathleenkenny@eaton.c		

**Specification Features**

**Housing**

- Single wall deep drawn aluminum housing painted matte black for a visually dark interior
- Adjusts vertically to accommodate 1/2" to 1-1/4" thick ceilings and locks in position with (3) setscrews
- V notches on plaster lip facilitate use of guide strings or laser lines for precise positioning
- Integral gasket provides for airtight compliance
- Shipped with overspray protector installed
- Housing can be removed from below the ceiling for service or splice inspection

**Plaster Frame**

- Compact galvanized steel plaster frame with integral bar hanger receivers
- Regressed screw provide positive horizontal bar hanger locking from below the ceiling
- Crimp points also provide for horizontal bar hanger locking

**Bar Hangers**

- Captive preinstalled Got-Nail™ bar hangers support housing at any point along span
- Pass-N-Thru™ feature adjust from 8" to 24" wide without removal
- Score lines allow "tool-less" shortening for 12" joists
- Captive nail penetrates standard and engineered lumber
- Safety and guidance system prevents snagging, ensures smooth straight nail penetration and allows bar hangers to be easily removed and repositioned
- Leveling flange aligns plaster frame with structure
- Integral clip attaches directly to tee-bar

**Junction Box**

- Compact galvanized steel junction box with 15in<sup>3</sup> internal volume
- Listed for (10) #12 AWG 90° C splice conductors
- (5) 1/2" conduit pry-outs positioned to allow straight conduit runs
- (3) Slide-N-Side™ non-metallic (NM) wire traps allows wiring outside the box
- Accepts 14-2, 14-3, 12-2, 12-3 U.S. and 14-2, 14-3, 12-2 Canadian NM cable
- (3) 4-port push wire nuts with clear caps for quick and reliable mains voltage connections

**Connector**

- Two-conductor wire mount connector is rated for 120/277V and mates with Halo LT4, RL4, RA4, SLD, SMD and ML4 family of LED integrated trims.
- **CAUTION:** verify LED module input voltage is compatible with the input voltage of the housing. If uncertain, consult a qualified electrician

**Code Compliance**

- Type IC inherently protected, suitable for direct contact to air permeable insulation and cULus listed for damp locations
- Not for use in direct contact with spray foam insulation, consult NEMA LSD57-2013
- Wet location listed in covered ceilings and IP66 certified with select trims
- Airtight per ASTM-E283
- Can be used for State of California Title 24 high efficacy luminaire compliance
- Suitable for use in clothes closets when installed in accordance with the NEC 410.16 spacing requirements
- Contains no mercury or lead and RoHS compliant

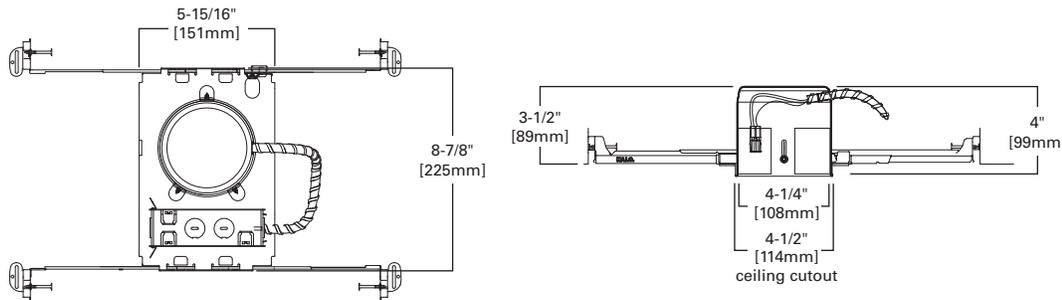

**Warranty**

- Five year limited warranty, consult website for details [www.eaton.com/lighting/legal](http://www.eaton.com/lighting/legal)

**H245ICAT**  
**4" Ultra-Shallow Recessed New Construction Housing**  
**For Integrated LED Trims and Modules**  
**15W Maximum**

**Dimensions**

**Ordering Information**

A complete luminaire consists of a housing, LED module and trim, order separately.

Housing	Trims
H245ICAT= 4" ultra-shallow new construction housing for LED integrated trims or modules	LT4 RA4 RL4 ML4 SMD4 SLD4

**Description**

Recessed LED module with interchangeable 2-inch round or square lens pinhole apertures are available in various finishes to suit any décor. Use with 4-inch nominal recessed housings suitable for residential and shallow plenum commercial construction or can be used to retrofit existing installations. Field interchangeable primary optics provide various distribution patterns and spacing to mounting height ratios. Use for general and task lighting in low to medium height ceilings where energy savings, long life and optical control are required.

Catalog #	H245ICAT-ML4D09NFL9	Type	ALR-01
Project	CFRST	Revision Date:	
Comments		Date	
Prepared by	Kathleen Kenny, National		

**Specification Features**

**Module**

- Field interchangeable and upgradable LED module consists of LED array, primary optic and driver.
- Integral die cast aluminum heat sink provides passive thermal cooling achieving L70 at 50,000 hours in IC and non-IC applications.

- Available in narrow flood, flood and wide flood distributions, ordered separately, ships with narrow flood installed.
- Also available in asymmetric distribution providing vertical illumination

**Retention**

- Heat treated compression springs hold module securely in the housing, can be removed thru the aperture for service or replacement

**LED Array**

- Proximity phosphors over chip on board LEDs provide a uniform source with high efficiency and no pixilation.
- Available in 90 CRI minimum, R9 greater than 50 and color accuracy within 3 SDCM provide color accuracy and uniformity.
- Compatible with Zhaga book 12 standards for interchangeability and can be replaced in the field

**Gaskets**

- Closed cell gaskets achieve restrictive airflow requirements without additional caulking

**Primary Optic**

- Precision molded TIR optic organizes source flux into useful beams without stray lumens in the field.
- Two-piece construction with matte black mounting ring and polarized turn and lock mounting aligns optic to source and minimizes backlight in the housing.
- Exceeds ENERGY STAR® color angular uniformity requirements, color deviation is typically less than 0.002 u' v'.

**Trims**

- Die formed steel trims are available in 2-inch round or square pinhole apertures and can be interchanged in the field.
- Available in a broad range of painted or plated finishes, can be painted in the field to match any décor.
- Magnetic attachment holds trim tightly to ceiling and eliminates light leaks.

**Shielding**

- Diffuse clear lens provides light control and source shielding.

**Driver**

- Integral UNV 120 - 277V 50/60 Hz constant current driver provides noise free operation.
- Continuous, flicker-free dimming from 100% to 5% with select leading or trailing edge 120V phase cut dimmers.
- Inline electrical quick connect and E26 adapter (provided) provides mains connection.
- Driver can be replaced in the field.

**Compliance**

- cULus listed / certified for use with Halo housings, classified for use with other's housings, see instruction sheet for conditions of acceptability.
- Wet location listed in covered ceilings and IP65 certified.
- Airtight per ASTM-E283.
- Suitable for use in clothes closets when installed in accordance with the NEC 410.16 spacing requirements
- EMI/RFI emissions per FCC 47CFR Part 15 B.
- Contains no mercury or lead and RoHS compliant.
- Photometric testing in accordance with IES LM-79-08.
- Lumen maintenance projections in accordance with IES LM-80-08 and TM-21-11.
- Can be used for State of California Title 24 high efficacy luminaire compliance, reference the California Energy Commission Title 20 Appliance Efficiency Database for current listings.
- ENERGY STAR® listed, reference qualified product listings.
- Meets State of California voluntary lamp standards.
- Zhaga book 12 compatible.

**Warranty**

Five year limited warranty, consult website for details.

**Description**

Recessed 4" aperture ultra-shallow new construction housing for use with LED integrated trims. Suitable for 2x4 residential framing or shallow plenum commercial construction, type IC rated and can be used in direct contact with insulation. Airtight rating reduces airflow between living spaces and unconditioned areas providing additional energy savings. Use with Halo LT4, RL4, RA4, SMD4, SLD4 LED integrated trims and the ML4 LED modular recessed lighting system.

**Specification Features**

**Housing**

- Single wall deep drawn aluminum housing painted matte black for a visually dark interior
- Adjusts vertically to accommodate 1/2" to 1-1/4" thick ceilings and locks in position with (3) setscrews
- V notches on plaster lip facilitate use of guide strings or laser lines for precise positioning
- Integral gasket provides for airtight compliance
- Shipped with overspray protector installed
- Housing can be removed from below the ceiling for service or splice inspection

**Plaster Frame**

- Compact galvanized steel plaster frame with integral bar hanger receivers
- Regressed screw provide positive horizontal bar hanger locking from below the ceiling
- Crimp points also provide for horizontal bar hanger locking

**Bar Hangers**

- Captive preinstalled Got-Nail™ bar hangers support housing at any point along span
- Pass-N-Thru™ feature adjust from 8" to 24" wide without removal
- Score lines allow "tool-less" shortening for 12" joists
- Captive nail penetrates standard and engineered lumber
- Safety and guidance system prevents snagging, ensures smooth straight nail penetration and allows bar hangers to be easily removed and repositioned
- Leveling flange aligns plaster frame with structure
- Integral clip attaches directly to tee-bar

**Junction Box**

- Compact galvanized steel junction box with 15in<sup>3</sup> internal volume
- Listed for (10) #12 AWG 90° C splice conductors
- (5) 1/2" conduit pry-outs positioned to allow straight conduit runs
- (3) Slide-N-Side™ non-metallic (NM) wire traps allows wiring outside the box
- Accepts 14-2, 14-3, 12-2, 12-3 U.S. and 14-2, 14-3, 12-2 Canadian NM cable
- (3) 4-port push wire nuts with clear caps for quick and reliable mains voltage connections

**Connector**

- Two-conductor wire mount connector is rated for 120/277V and mates with Halo LT4, RL4, RA4, SLD, SMD and ML4 family of LED integrated trims.
- **CAUTION:** verify LED module input voltage is compatible with the input voltage of the housing. If uncertain, consult a qualified electrician

**Code Compliance**

- Type IC inherently protected, suitable for direct contact to air permeable insulation and cULus listed for damp locations
- Not for use in direct contact with spray foam insulation, consult NEMA LSD57-2013
- Wet location listed in covered ceilings and IP66 certified with select trims
- Airtight per ASTM-E283
- Can be used for State of California Title 24 high efficacy luminaire compliance
- Suitable for use in clothes closets when installed in accordance with the NEC 410.16 spacing requirements
- Contains no mercury or lead and RoHS compliant

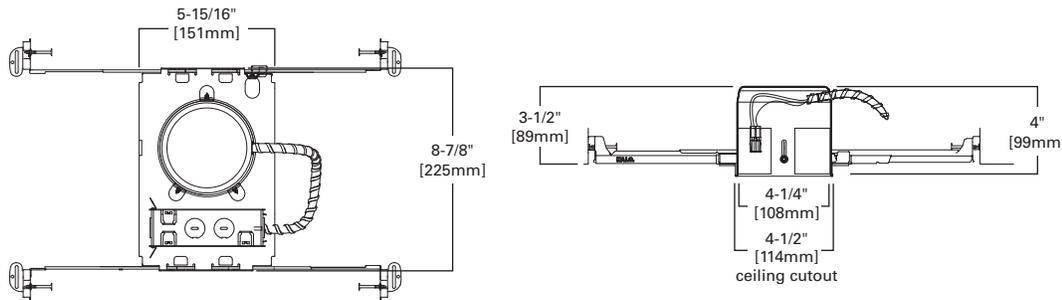

**Warranty**

- Five year limited warranty, consult website for details [www.eaton.com/lighting/legal](http://www.eaton.com/lighting/legal)

**H245ICAT**  
**4" Ultra-Shallow Recessed New Construction Housing**  
**For Integrated LED Trims and Modules**  
**15W Maximum**

**Dimensions**

**Ordering Information**

A complete luminaire consists of a housing, LED module and trim, order separately.

Housing	Trims
H245ICAT= 4" ultra-shallow new construction housing for LED integrated trims or modules	LT4 RA4 RL4 ML4 SMD4 SLD4

**HALO LED ICAT HOUSING for NEW CONSTRUCTION**

The H750ICAT is a dedicated LED new construction housing to be used with designated HALO LED modules. The H750ICAT is designed for insulated ceilings and can be in direct contact with ceiling insulation\*. This AIR-TITE housing design prevents airflow between conditioned and unconditioned spaces and saves on both heating and air conditioning costs. The LED connector system provides high efficacy code compliance when used with designated HALO LED modules and trims.

Catalog #	H750ICAT-ML5606927-	Type	ALR-04
Project	Aloft	Revision Date:	
Comments		Date	
Prepared by	Kathleen Kenny,		

**DESIGN FEATURES**

**Housings**

Aluminum construction for greater heat dissipation. H750 ICAT housing is gasketed to prevent airflow from heated or air conditioned spaces.

**Plaster Frame**

Galvanized steel frame. Housing adjusts in plaster frame to accommodate up to 1" ceiling thickness. Regressed locking screw for securing hanger bars. Cutouts included for easily crimping hanger bars in position

**Slide-N-Side™ Junction Box**

- Positioned to accommodate straight conduit runs.
- Seven 1/2" trade size conduit knockouts with true pry-out slots.
- Slide-N-Side wire traps allow non metallic sheathed cable to be installed without tools and without removing knockouts.
- Allows wiring connections to be made outside the box.
- Simply insert the cable directly into the trap after connections are made.
- Accommodates the following standard non-metallic sheathed cable type:
  - U.S. #14/2, #14/3, #12/2, #12/3
  - Canada: #14/2, #14/3, #12/2

**GOT NAIL! Pass -N-Thru™ Bar Hangers**

Bar Hanger features include

- Pre-installed nail easily installs in regular lumber, engineered lumber and laminated beams.
- Safety and Guidance system prevents snagging, ensures smooth, straight nail penetration and allows bar hangers to be easily removed if necessary
- Automatic leveling flange aligns the housing and allows holding the housing in place with one hand while driving nails.
- Housing can be positioned at any point within 24" joist spans
- Score lines allow tool-free shortening for 12" joists and bar hangers do not need to be removed for shortening.
- Bar hangers may be repositioned 90° on plaster frame
- Integral T-bar clip snaps onto T-bars – no additional clips are required.

**LED Module Connection**

Halo LED modules simply install with a plug-in 120V-277V rated line voltage wiring connector (UL and CSA Listed Luminaire Disconnect). This non-screw-base connection preserves the high efficacy rating and prevents use of low efficacy incandescent sources (see LED Module specifications).

**Caution**

Connection is rated for 120V and 277V input. Installer must verify LED module voltage is compatible with the applicable voltage input. If uncertain, consult a qualified electrician.

**Labels**

- UL/cUL Listed 1598 Luminaire
- CE Marking - "Conformité Européenne" conformity with the Council of European Communities Directives, meeting internationally recognized compliance when used with ML56 Series LED modules
- UL/cUL Listed for Feed Through
- UL/cUL Listed for Damp Location
- UL/cUL Listed for Wet Location with select trims
- UL/cUL Listed for direct contact with insulation and combustible material\*
- Rated for 20W maximum

**Qualification**

May be used with qualified Halo LED modules and designated trims for High Efficacy Luminaire Compliance:

- State of California Title 24
- International Energy Conservation Code (IECC)
- Washington State Energy Code
- New York State Energy Conservation Construction Code - AIR-TITE™ Compliant
- Certified under ASTM-E283 standard for air-tight construction

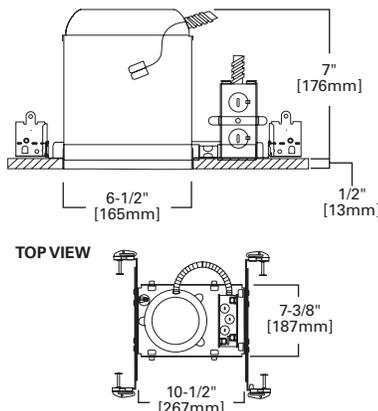

**H750ICAT**

**6" New Construction IC AIR-TITE™ Housing For Halo LED Modules and Trims**

- ML56 Series
- RL56 Series
- RA56 Series

**High Efficacy LED Housing**

**FOR USE IN INSULATED CEILINGS FOR DIRECT CONTACT WITH INSULATION\***

Qualified and compliant with select trims. Refer to ENERGY STAR® Qualified Products List and CEC (T24) Appliance Database for listings.

\* Not to be used in direct contact with spray foam insulation.

For double wall washing or replacement.</p> <p><b>TRM690WH</b>= 6" LED Oversize Trim Ring for use with 59" series trims, White 6.9" I.D., 9.5" O.D. Ring slips over LED trim. Inset design allows 6" trim to fit into oversize ring for an even trim surface</p> <p><b>EBA560PK</b>= Replacement screwbase adapter to LED disconnect with cap</p> <p><b>ML56-1200 Series Beam Forming Optic Media</b>  <b>BFR56NFL</b>=Beam forming reflector kit, narrow flood, 25° nominal  <b>BFR56MH</b>=Media holder, accepts one 3.45" lens. Requires BFR56NFL &amp; L345SF, order separately.  <b>L345SF</b>=3.45" diameter soft focus lens. Requires BFR56NFL and BFR56MH, order separately.</p>

## Description

The Halo ML56 LED Downlighting System is a series of modular LED Light Modules for use with designated 5" or 6" ML56 LED trims in new construction, remodel and retrofit installation. Compatible with Halo 5" H550 and 6" H750, H2750 Series LED housings. And in retrofit of existing housings the ML56 Series fits 5" or 6" Halo, All-Pro, and others. ML56 system offers shallow trims for installation in Halo, All-Pro and others shallow housings. ML56 Light Modules are offered in 600 Series, 900 Series, and 1200 Series, 80CRI or 90CRI, and four color temperatures 2700K, 3000K, 3500K, 4000K. ML56 Light Modules are universal voltage 120V – 277V and dimmable at 120V. The ML56 lens provides uniform diffuse illumination standard.

Catalog #	H750ICAT-ML5606927-592SC	Type	ALR-04
Project	Aloft	Revision Date:

## Specification Features

### Mechanical

#### Light Module

- Module includes LED package, LED driver, heat sink, and lens
- Durable die-cast aluminum construction.
- Heat sink designed to conduct heat away from the LED keeping the junction temperatures below specified maximums, including insulated ceiling environments

#### Lens

- Impact-resistant polycarbonate
- Convex form for lamp-like appearance
- High lumen transmission
- Diffusing for even illumination

#### Mounting

- Light Modules attach to reflector and baffle trims via locking tabs, and attach to eyeballs via keyed twist-to-lock mating bosses
- The complete light module and trim assembly installs into housings with precision formed torsion springs located on the trim
- Friction Blade mounting is an alternate option using the accessory 6" Friction Blade Kit model ML56CLIP (order separately). Friction blades provide alternative to torsion springs for retrofit in 6" housings without torsion mounting tabs. The stainless steel friction blades allow the ML56 to be installed in a wider range of housings, and allow rotation in the housing aperture (360 degrees).

#### Housing Compatibility

A complete ML56 system includes a LED Light Module, LED trim, and a compatible housing (new construction, remodel, or existing retrofit). Housing compatibility in the ML56 System is determined by the ML56 trim dimensions. ML56 trims are available in 5" and 6" aperture (5" = 59x series and 6" = 69x series trims). Refer to Housing – Trim Section in this document.

#### LED

- 900 Series = 900 design lumens typical.
- Delivered lumens vary depending upon 5" or 6", color temperature, and trim finish.
- Color Temperature options: 2700K, 3000K, 3500K, 4000K

- CRI: 80
- L70 at 50,000 hours, projected in accordance with IES TM-21
- LED is a chip on board design consisting of a multiple LED package to create one virtual light source for a productive "cone of light"

#### Color Specification & Quality Standards

- A tight chromaticity specification ensures LED color uniformity, sustainable Color Rendering Index (CRI) and Correlated Color Temperature (CCT) over the useful life of the LED
- LED color uniformity of 3 SDCM exceeds ENERGY STAR® color standards per ANSI C78.377- 2008.
- Every Halo LED Light Module is quality tested and performance measured, and then serialized in a permanent record to register lumens, wattage, CRI and CCT.
- Halo LED serialized testing and measurement process ensures color and lumen consistency on a per-unit basis, and validates long-term product consistency over time
- Halo ML56 LED Light Modules include lumen, CRI, and CCT designations in the model number
- Example: **ML5609830**  
**56** = 5" / 6" aperture series  
**09** = 900 lumen series  
**8** = >80 CRI  
**30** = 3000K nominal CCT

#### Electrical Power Connections

- LED connector is a non-screw base luminaire disconnect offering easy installation with the matching Halo 5" H550 series and 6" H750 and H2750 series housings (housing selected depends upon LED trim 5" or 6").
- LED Connector is a non-screw base, and where required to qualify as a high-efficacy luminaire.
- The included E26 medium screw-base Edison adapter provides easy retrofit of incandescent housings (see Housing Section).

#### Ground Connection

Separate grounding cable included on the module for attachment to the housing during installation.

#### LED Driver

- Driver is universal voltage 120V-277V, and may be controlled from a switch in this range of main inputs (switchable at 120V, 220V, 230V, 240V, and 277V)
- Driver is dimmable at 120V operation when connected to a compatible dimmer.
- Driver is a high efficiency, electronic power supply providing DC power to the LED.
- Driver meets FCC EMI/RFI Consumer Level limits on 120V main inputs, and is compliant for use in residential and commercial installations.
- Driver features high power factor, low THD, and has integral thermal protection in the event of over temperature or internal failure.
- Driver is replaceable, if replacement should be required.

#### Dimming

Designed for dimming capability to nominal 5% in normal operation with standard 120V Leading Edge (LE) and Trailing Edge (TE) phase control dimmers. (Consult dimmer manufacturer for dimmer compatibility and details. Note, some dimmers require a neutral in the wallbox.)

#### Warranty

Cooper Lighting provides a (5) five year limited warranty on the Halo ML56 LED Light Module.

#### LED Module in New or Retrofit Existing Construction – Housings other than Halo or All-Pro

- If used in recessed housings other than Halo or All-Pro the Cooper Lighting 5-year limited warranty applies to the LED Light Module and Trim only.
- As with any electrical installation, a qualified electrician must ensure compatibility of use with a particular housing; this includes all applicable national and local electrical and building codes. Installer is responsible to properly and securely retain the LED Module and LED Trim in the housing at time of installation.

## ML56 LED System

### 900 Series / 80 CRI

**ML5609827**

**ML5609830**

**ML5609835**

**ML5609840**

**5-Inch and 6-Inch**

**Light Module for**

**New Construction,**

**Remodel and Retrofit**

**For use with 59x and 69x Series Trims**

**FOR USE IN INSULATED CEILING AND NON-INSULATED CEILING RATED HOUSINGS**

**HIGH EFFICACY LED WITH INTEGRAL DRIVER - DIMMABLE**

#### Energy Data

##### ML56 900/80 Series

(Values at non-dimming line voltage)

Minimum Starting Temp: -30°C (-22°F)

EMI/RFI: FCC Title 47 CFR, Part 15, (Consumer)

Sound Rating: Class A

Input Voltage: UNV 120V-277V

Power Factor: >0.95 @ 120V and >0.9 @ 277V

Input Frequency: 50/60Hz

THD: <20%

Max. Rated Wattage: 14W

Input Power: 13.4W

Input Current at 120V: 0.15A

Input Current at 277V: 0.08A

Driver Compliance: UL8750, Class II rated

Maximum IC (Insulated Ceiling) Ambient Continuous Operating Temperature: 25°C (77°F)

Maximum Non-IC Ambient Continuous Operating Temperature: 40°C (104°F)

**ML5609827**

5" or 6" LED 900 Series

**ML5609830**

5" or 6" LED 900 Series

**ML5609835**

5" or 6" LED 900 Series

**ML5609840**

5" or 6" LED 900 Series

**Compliance**

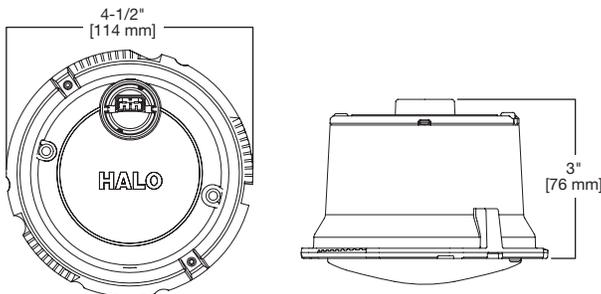

- cULus listed 1598 Luminaire (Halo and All-Pro housings)
- UL Classified when used in retrofit (refer to housing section)
- cULus listed for damp locations
- cULus Wet location listed with baffle and reflector trims only
- Airtight certified per ASTM E283 (not exceeding 2.0 CFM under 57 Pascals pressure difference)
- IP66 ingress protection rated with baffle and reflector trims only
- RoHS compliant
- May be used in IC (insulated ceiling) housings in direct contact with insulation\* and combustible material
- Can be used as a California Title 24 compliant Non-Residential LED Luminaire
- Can be used for International Energy Conservation Code (IECC) high efficiency luminaire compliance.
- Can be used for Washington State Energy Code compliance
- ENERGY STAR® certified luminaire - consult ENERGY STAR® Certified product list
- EMI/RFI per FCC 47CFR Part 15 Class B Consumer limits (commercial and residential compliant)
- Photometric testing in accordance with IES LM-79
- Lumen maintenance projections in accordance with IES LM-80 and TM-21
- CE Mark - "Conformité Européene" conformity with the Council of European Communities Directives, meeting internationally recognized compliance when used with Halo H550, H750, and H2750 Series LED housings only

\* Not for use with housings in direct contact with spray foam insulation.

Refer to ENERGY STAR® Certified Products List.  
Can be used to comply with California Title 24 Non-Residential Lighting Controls requirements as a LED Luminaire

**Dimensions**

## Ordering Information

Sample Number: **ML5609830 593WB**

Order LED Module and trim separately.

A complete system also includes a compatible housing (new construction, remodel, or existing retrofit). Housing aperture size in the ML56 System is determined by the ML56 trim dimensions. ML56 trims are available in 5" and 6" aperture (5" = 59xx series and 6" = 69xx series trims). Refer to Housing Section in this document.

### ML56 LED Light Modules 900 Series / 80 CRI

**ML5609827**= 5"/6" LED light module, 900 lumen, 80CRI, 2700K  
**ML5609830**= 5"/6" LED light module, 900 lumen, 80CRI, 3000K  
**ML5609835**= 5"/6" LED light module, 900 lumen, 80CRI, 3500K  
**ML5609840**= 5"/6" LED light module, 900 lumen, 80CRI, 4000K

### ML56 LED 5" and 6" Trims

#### 590 Series - 5" LED Trims

**591WB**=5" LED trim, polymer "dead-front", shallow white baffle & flange – shallow and standard housings (For use with 600 Series LED light modules only)  
**592SC**=5" LED trim, specular reflector & white flange  
**592H**=5" LED trim, haze reflector & white flange  
**592W**=5" LED trim, white reflector & flange  
**593WB**=5" LED trim, white micro-step baffle & flange  
**593BB**=5" LED trim, black micro-step baffle & white flange  
**593SNB**=5" LED trim, satin nickel micro-step baffle & flange  
**593TBZB**=5" LED trim, tuscan bronze micro-step baffle & flange  
**594WB**=5" LED directional trim, white eyeball, baffle & flange – shallow and standard housings  
**594SNB**=5" LED directional trim, satin nickel eyeball, baffle & flange – shallow and standard housings  
**594TBZB**=5" LED directional trim, tuscan bronze eyeball, baffle & flange – shallow and standard housings  
**595WW**=5" LED trim, wall wash - specular reflector, repositionable specular kick reflector, white flange  
**596WB**=5" LED trim, white shallow baffle & flange – shallow and standard housings

#### 690 Series - 6" LED Trims

**691WB**=6" LED trim, polymer "dead-front", white shallow baffle & flange – shallow and standard housings (For use with 600 Series LED light modules only)  
**692SC**=6" LED trim, specular reflector & white flange  
**692H**=6" LED trim, haze reflector & white flange  
**692W**=6" LED trim, white reflector & flange  
**693WB**=6" LED trim, white micro-step baffle & flange  
**693BB**=6" LED trim, black micro-step baffle & white flange  
**693SNB**=6" LED trim, satin nickel micro-step baffle & flange  
**693TBZB**=6" LED trim, tuscan bronze micro-step baffle & flange  
**694WB**=6" LED directional trim, white eyeball, baffle & flange – shallow and standard housings  
**694SNB**=6" LED directional trim, satin nickel eyeball, baffle & flange – shallow and standard housings  
**694TBZB**=6" LED directional trim, tuscan bronze eyeball, baffle & flange – shallow and standard housings  
**695WW**=6" LED trim, wall wash - specular reflector, repositionable specular kick reflector, white flange  
**696WB**=6" LED trim, white shallow baffle & flange – for use with shallow and standard housings

### ML56 System Accessories

**ML56CLIP**=Friction clip mounting kit - for retrofitting non-torsion spring housings, 6" clips\*  
**WW595SC**=5" Wall wash insert - kick reflector for 595WW (1-included with trim) double or corner wall wash\*\*  
**WW695SC**=6" Wall wash insert - kick reflector for 695WW (1-included with trim) double or corner wall wash\*\*  
**TRM590WH**=5" LED oversize trim ring for use with 59" series trims, white 6.3" I.D., 7.5" O.D. Ring slips over LED trim. Inset design allows 5" trim to fit into oversize ring for an even trim surface  
**TRM690WH**=6" LED oversize trim ring for use with 69" series trims, white 6.9" I.D., 9.5" O.D. Ring slips over LED trim. Inset design allows 6" trim to fit into oversize ring for an even trim surface

\*ML56CLIP is compatible with 6" baffle and reflector trims only (691, 692, 693, 695, 696 series).  
 For eyeball trim (694 series) use ML7RAB retrofit adpater band.

\*\*Wall Wash Trims 595WW and 695WW Feature an exclusive Repositionable Kick Reflector for fine-tuning adjustment of the wall wash effect. The WW595SC and WW695SC are Repositionable Kick Reflectors sold separately for addition to the Wall Wash Trim when a double or corner wall wash is needed, or for replacement of original kick reflector included with the trim.

## Lighting Facts

### ML5609827

PRODUCT SPECIFICATIONS	
Lumens (Light Output)	<b>934</b>
Watts	<b>13.4</b>
Lumens Per Watt (Efficacy)	<b>69.7</b>
Color Accuracy (CRI)	<b>81</b>
Light Color (CCT) Correlated Color Temperature (CCT)	<b>2700K</b>
MODEL# ML5609827	

### ML5609830

PRODUCT SPECIFICATIONS	
Lumens (Light Output)	<b>1009</b>
Watts	<b>13.4</b>
Lumens Per Watt (Efficacy)	<b>75.3</b>
Color Accuracy (CRI)	<b>82</b>
Light Color (CCT) Correlated Color Temperature (CCT)	<b>3000K</b>
MODEL# ML5609830	

### ML5609835

PRODUCT SPECIFICATIONS	
Lumens (Light Output)	<b>1024</b>
Watts	<b>13.4</b>
Lumens Per Watt (Efficacy)	<b>76.4</b>

PRODUCT SPECIFICATIONS	
Lumens (Light Output)	<b>1045</b>
Watts	<b>13.4</b>
Lumens Per Watt (Efficacy)	<b>78.0</b>
Color Accuracy (CRI)	<b>82</b>
Light Color (CCT) Correlated Color Temperature (CCT)	<b>4000K</b>
MODEL# ML5609840	

## Housing – Trim Compatibility

Housing aperture size in the ML56 System is determined by the ML56 trim dimensions. ML56 trims are available in 5" and 6" aperture (5" = 59xx series and 6" = 69xx series trims). Refer to ML56 TRIMS in this document. (Note "X" in the trim model number denotes finish code.)

## Housing – Compatibility

The ML56 LED light module - trim combination is cULus Listed or UL Classified for use with any 5" or 6" diameter recessed housing constructed of steel or aluminum with an internal volume that exceeds 115 in<sup>3</sup> in addition to those noted below.

## Halo and All-Pro UL Listed Compatibility

6" Trims: 691X, 692X, 693X, 694X, 695X, 696X

(Note shallow housings for use with 691X, 694X, 696X trims only)

## HALO - LED Housings with LED Luminaire Connector - High-Efficacy Compliant

Brand	Housing Type	Catalog Number	Description
Halo	Standard Housings	H750ICAT	6" LED, Insulated Ceiling, Air-Tite, New Construction Housing
		H750RICAT	6" LED, Insulated Ceiling, Air-Tite, Remodel Housing
		H750T	6" LED, Non-IC, Air-Tite, New Construction Housing
		H750TCP	6" LED, Non-IC, New Construction/Remodel Chicago Plenum Housing
		H750TD010	6" LED, Non-IC, Air-Tite, New Construction Housing
		H750RTD010	6" LED, Non-IC, Air-Tite, Remodel Housing
		H750TCPD010	6" LED, Non-IC, New Construction/Remodel Chicago Plenum Housing
		H750RINTD010	6" LED, Non-IC, Air-Tite, Remodel Housing (International CE Mark and UL/cUL Listed)
		Halo	Shallow Housings

## HALO and All-Pro - Incandescent E26 Screwbase Housings

Brand	Housing Type	Catalog Number	Description		
Halo	Standard Housings	H7ICAT	6" Insulated Ceiling, Air-Tite New Construction Housing		
		H7RICAT	6" Insulated Ceiling, Air-Tite Remodel Housing		
		H7ICT	6" Insulated Ceiling, New Construction Housing		
		H7RICT	6" Insulated Ceiling, Remodel Housing		
		H7ICATNB	6" Insulated Ceiling, Air-Tite New Construction Housing, No Socket Bracket		
		H7ICTNB	6" Insulated Ceiling, New Construction Housing, No Socket Bracket		
		H7T	6" Non-IC, New Construction Housing		
		H7RT	6" Non-IC, Remodel Housing		
		H7TNB	6" Non-IC, New Construction Housing, No Socket Bracket		
		H7TCP	6" Non-IC, Chicago Plenum, New Construction/Remodel Housing		
		H7UICAT	6" Insulated Ceiling, Universal New Construction Housing		
		H7UICAT	6" Insulated Ceiling, Universal, Air-Tite, New Construction Housing		
		All-Pro	Standard Housings	E1700AT	6" Insulated Ceiling, Air-Tite New Construction Housing
				E1700RAT	6" Insulated Ceiling, Air-Tite Remodel Housing
E1700	6" Insulated Ceiling, New Construction Housing				
E1700R	6" Insulated Ceiling, Remodel Housing				
E1700ATNB	6" Insulated Ceiling, Air-Tite New Construction Housing, No Socket Bracket				
E1700NB	6" Insulated Ceiling, New Construction Housing, No Socket Bracket				
E1700U	6" Insulated Ceiling, Universal New Construction Housing				
E1700UAT	6" Insulated Ceiling, Universal, Air-Tite, New Construction Housing				
ET700	6" Non-IC, New Construction Housing				
ET700R	6" Non-IC, Remodel Housing				
Halo	Shallow Housings			H27ICAT	6" Shallow, Insulated Ceiling, Air-Tite New Construction (use with 691X, 694X, 696X trims only)
		H27RICAT	6" Shallow, Insulated Ceiling, Air-Tite Remodel Housing (use with 691X, 694X, 696X trims only)		
		H27ICT	6" Shallow, Insulated Ceiling, New Construction Housing (use with 691X, 694X, 696X trims only)		
		H27RICT	6" Shallow, Insulated Ceiling, Remodel Housing (use with 691X, 694X, 696X trims only)		
		H27T	6" Shallow, Non-IC, New Construction Housing (use with 691X, 694X, 696X trims only)		
		H27RT	6" Shallow, Non-IC, Remodel Housing (use with 691X, 694X, 696X trims only)		
All-Pro	Shallow Housings	E12700AT	6" Shallow, Insulated Ceiling, Air-Tite New Construction (use with 691X, 694X, 696X trims only)		
		E12700	6" Shallow, Insulated Ceiling, New Construction Housing (use with 691X, 694X, 696X trims only)		
		E12700R	6" Shallow, Insulated Ceiling, Air-Tite Remodel Housing (use with 691X, 694X, 696X trims only)		
		ET2700	6" Shallow, Non-IC, New Construction Housing (use with 691X, 694X, 696X trims only)		
		ET2700R	6" Shallow, Non-IC, Remodel Housing (use with 691X, 694X, 696X trims only)		

## Halo LED Retrofit Enclosures

Brand	Type	Catalog Number	Description
Halo	Retrofit	ML7BXRFK	6" Retrofit Enclosure, Non-IC, BX Whip
		ML7E26RFK	6" Retrofit Enclosure, Non-IC, E26 Screw base Interface

## Housing Compatibility - Continued

5" Trims: 591X, 592X, 593X, 594X, 595X, 596X

(Note shallow housings for use with 591X, 594X, 596X trims only)

### HALO - LED Housings with LED Luminaire Connector - High-Efficacy Compliant

Brand	Housing Type	Catalog Number	Description
Halo	Standard Housings	H550ICAT	5" LED, Insulated Ceiling, Air-Tite, New Construction Housing
		H550RICAT	5" LED, Insulated Ceiling, Air-Tite, Remodel Housing

### HALO and All-Pro - Incandescent E26 Screwbase Housings

Brand	Housing Type	Catalog Number	Description
Halo	Standard Housings	H5ICAT	5" Insulated Ceiling, Air-Tite New Construction Housing
		H5RICAT	5" Insulated Ceiling, Air-Tite Remodel Housing

## DESCRIPTION

4 inch LED recessed medium or wide beam wall wash specially designed for LED technology. Two-stage reflector system combined with gradient kicker, produces high levels of uniform vertical illumination on the wall with minimal source brightness. Lumen packages include 900, 1300, 1800 and 2800 lumens with color temperatures of 2700K, 3000K, 3500K, 4000K. Available with dim-to-warm technology – similar to halogen at full power, the 3000K LED warms smoothly as dimmed to 1850K creating a rich warm glow within the space.

## SPECIFICATION FEATURES

### Lower Wall Wash Reflector

Lower Wall Wash Reflector Spun .050" thick aluminum lower reflector with gradient kicker in combination with a lensed upper optical chamber provides superior lumen output, high level vertical illumination with minimal source brightness. Available in all Portfolio Alzak® finishes.

### Trim Retention

Lower reflector is retained with two torsion springs holding the flange tightly to the finished ceiling surface.

### Plaster Frame / Collar

New Construction Housing: Die cast aluminum 1-1/2" deep collar accommodates ceiling materials up to 2".

### Universal Mounting Bracket

Accepts 1/2" EMT, C channel and bar hangers and adjusts 5" vertically from above and below the ceiling.

### Junction Box

(4) 1/2" and (2) 3/4" trade size pry outs positioned to allow straight

conduit runs. Listed for (8) #12 AWG (four in, four out) 90°C conductors and feed thru branch wiring.

### Thermal

Extruded aluminum heat sink conducts heat away from the LED module for optimal performance and long life.

### LED

LED system contains a plurality of high brightness white LED's combined with a high reflectance upper reflector and convex transitional lens producing even distribution with no pixilation. Rated for 50,000 hours at 70% lumen maintenance. Auto resetting, thermally protected, LED's are turned off when safe operating temperatures are exceeded. Color variation within 3-step MacAdam ellipses. Flexible disconnect allows for tool-less replacement of LED engine from below ceiling. Available in 80 or 90 CRI.

D2W™ – dim-to-warm shifts CCT from 3000K to 1850K as fixture dims mimicking halogen sources.

Catalog #	LD4A096DE010-ERM4A9030HWF-HB26	Type	ALR-05
Project	ALOFT	Revision Date:

### Driver

Combination 120-277V 0-10V or 120V trailing edge phase cut driver provides flicker free dimming from 100% to 10%. Optional 1% 0-10V, Fifth Light, DMX or Lutron® Ecosystem. Driver can be serviced from above or through the aperture.

### Code Compliance

Thermally protected and cULus listed for protected damp locations. Optional City of Chicago environmental air (CCEA) marking for plenum applications. EMI/RFI emissions per FCC 47CFR Part 18 Class B consumer limits. Non-IC rated - Insulation must be kept 3" from top and sides of housing. RoHS Compliant. Photometric testing completed in accordance with IES LM 79 standards. LED life testing completed in accordance with LM 80 standards.

### Warranty

5-year warranty.

## DESCRIPTION

Boca 696 is a compact 6-1/4" diameter by 9-1/4" deep in-ground LED luminaire. The adjustable lamp assembly provides +/- 22° vertical tilt and 360° horizontal rotation for precision uplighting, wall washing or general illumination in constricted areas. Designed for recessed mounting in concrete, brick, stone or dirt, it is suitable for drive-over applications. Fixture is also suitable for recessed mounting in indoor or outdoor wood flooring. A surface mount trim option is also available. Various lenses, louvers and color or dichroic filters can be combined – up to three at once – to create multiple lighting effects.

## SPECIFICATION FEATURES

### Construction

Recessed housing is constructed from corrosion-resistant, glass reinforced polyester BMC molding compound and includes two 1/2-14 NPSM conduit fittings for through wiring. Recessed housing and trim ring are sealed with a high temperature silicone molded gasket to prevent water intrusion. The painted trim ring is precision machined from corrosion resistant 6061-T6 aluminum. The trim ring is also available in machined C360 brass, C932 bronze, C10 copper or 303/304 stainless steel, brass, bronze or machined copper.

### Finish

The painted trim is double protected by a ROHS compliant chemical film undercoating and polyester powder coat finish. A variety of standard colors are available or RAL and custom color matches are available upon request. Trims constructed from brass, bronze, copper and

stainless steel are left unpainted to reveal the natural beauty of the material. Brass, bronze and copper will patina naturally over time.

### Lens

Minimum 1/4" thick tempered glass lens, factory sealed with high temperature adhesive to prevent water intrusion. Suitable for drive-over applications up to 5000 pounds.

### Hardware

Stainless steel hardware is standard to provide maximum corrosion-resistance.

### Electrical

When ordered as a line voltage fixture, an integral 12V magnetic transformer is included for connection to 120V, 230V, 240V, or 277V line voltage (specify). When ordered as a low voltage fixture, a remote 12V transformer is required (not included). Dimming only available for 120V option. See technical notes for compatible dimmer switches.

### LED Modules

LED modules are included and are available in four color temperatures (2700,3000,4000,5700) or Amber (585-595nm) and three distributions (spot, narrow, and flood). Both color temperature and distribution must be specified when ordering. Module has a L70 / 60,000 hour rating.

### Warranty

Lumière warrants its fixtures against defects in materials & workmanship for three (3) years. Auxiliary equipment such as transformers carry the original manufacturer's warranty.

### Recessed Housing

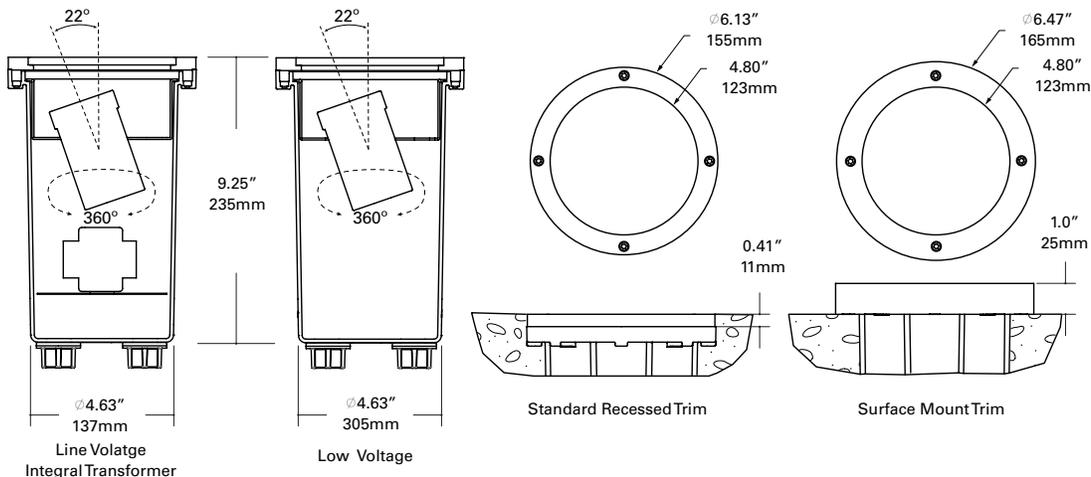

Recessed housing is available to ship in advance of complete fixture for rough-in purposes. Specify option -LBB and order separately the accompanying recessed housing from below.

**TECHNICAL INFORMATION**

- When selecting integral transformer option, dimming is only possible at 120V using a magnetic dimmer switch. There are two compatible magnetic dimming switches: Lutron Ariadni AVLV-600P and Lutron Diva DVLV-600P
- When selecting low voltage option dimming is dependant on remote transformer compatibility with LED module.
- IMPORTANT:** For the low voltage option - when sizing the transformer use 9 watts for 6LED or 15 watts for 10LED option fixture. Nominal power draw after start up is 6 watts or 10 watts accordingly. The LED module is designed to operate between 10 and 13 volts. Any less or more voltage can cause premature failures.
- IMPORTANT:** Apply gray duct sealing compound (not included) to completely seal the wires inside the bottom male conduit nipple. Completely seal the bottom of the fixture. The gray duct sealing compound by itself cannot seal the hubs. We recommend using re-enterable potting seal material such as 3M High Gel 4442 re-enterable encapsulant (not Included) to completely seal the bottom of the fixture and the conduit lines.
- Suitable for installation in combustible materials such as wood decking.

**Description**

Recessed 4" aperture ultra-shallow new construction housing for use with LED integrated trims. Suitable for 2x4 residential framing or shallow plenum commercial construction, type IC rated and can be used in direct contact with insulation. Airtight rating reduces airflow between living spaces and unconditioned areas providing additional energy savings. Use with Halo LT4, RL4, RA4, SMD4, SLD4 LED integrated trims and the ML4 LED modular recessed lighting system.

**Specification Features**

**Housing**

- Single wall deep drawn aluminum housing painted matte black for a visually dark interior
- Adjusts vertically to accommodate 1/2" to 1-1/4" thick ceilings and locks in position with (3) setscrews
- V notches on plaster lip facilitate use of guide strings or laser lines for precise positioning
- Integral gasket provides for airtight compliance
- Shipped with overspray protector installed
- Housing can be removed from below the ceiling for service or splice inspection

**Plaster Frame**

- Compact galvanized steel plaster frame with integral bar hanger receivers
- Regressed screw provide positive horizontal bar hanger locking from below the ceiling
- Crimp points also provide for horizontal bar hanger locking

**Bar Hangers**

- Captive preinstalled Got-Nail™ bar hangers support housing at any point along span
- Pass-N-Thru™ feature adjust from 8" to 24" wide without removal
- Score lines allow "tool-less" shortening for 12" joists
- Captive nail penetrates standard and engineered lumber
- Safety and guidance system prevents snagging, ensures smooth straight nail penetration and allows bar hangers to be easily removed and repositioned
- Leveling flange aligns plaster frame with structure
- Integral clip attaches directly to tee-bar

**Junction Box**

- Compact galvanized steel junction box with 15in³ internal volume
- Listed for (10) #12 AWG 90° C splice conductors
- (5) 1/2" conduit pry-outs positioned to allow straight conduit runs
- (3) Slide-N-Side™ non-metallic (NM) wire traps allows wiring outside the box
- Accepts 14-2, 14-3, 12-2, 12-3 U.S. and 14-2, 14-3, 12-2 Canadian NM cable
- (3) 4-port push wire nuts with clear caps for quick and reliable mains voltage connections

**Connector**

- Two-conductor wire mount connector is rated for 120/277V and mates with Halo LT4, RL4, RA4, SLD, SMD and ML4 family of LED integrated trims.
- **CAUTION:** verify LED module input voltage is compatible with the input voltage of the housing. If uncertain, consult a qualified electrician

**Code Compliance**

- Type IC inherently protected, suitable for direct contact to air permeable insulation and cULus listed for damp locations
- Not for use in direct contact with spray foam insulation, consult NEMA LSD57-2013
- Wet location listed in covered ceilings and IP66 certified with select trims
- Airtight per ASTM-E283
- Can be used for State of California Title 24 high efficacy luminaire compliance
- Suitable for use in clothes closets when installed in accordance with the NEC 410.16 spacing requirements
- Contains no mercury or lead and RoHS compliant

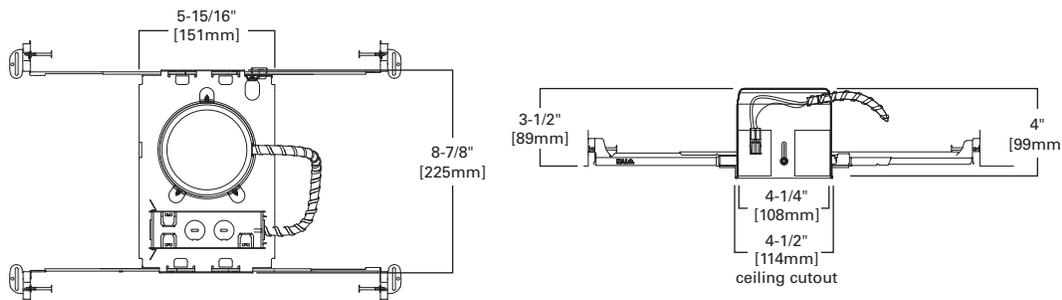

**Warranty**

- Five year limited warranty, consult website for details [www.eaton.com/lighting/legal](http://www.eaton.com/lighting/legal)

Housing	Trims
H245ICAT= 4" ultra-shallow new construction housing for LED integrated trims or modules	LT4 RA4 RL4 ML4 SMD4 SLD4

**Description**

Recessed LED module with interchangeable 2-inch round or square lens pinhole apertures are available in various finishes to suit any décor. Use with 4-inch nominal recessed housings suitable for residential and shallow plenum commercial construction or can be used to retrofit existing installations. Field interchangeable primary optics provide various distribution patterns and spacing to mounting height ratios. Use for general and task lighting in low to medium height ceilings where energy savings, long life and optical control are required.

<b>Catalog #</b>	H2451CAT-ML4D09NFL930E-TL43R-3G-MWWB	<b>Type</b>	ALR-08
<b>Project</b>	Aloft	<b>Revision Date:</b>	
<b>Comments</b>		<b>Date</b>	
<b>Prepared by</b>	Kathleen Kenny, National Accounts, 678-447-5208, kathleenkenny@eaton.com		

**Specification Features**

**Module**

- Field interchangeable and upgradable LED module consists of LED array, primary optic and driver.
- Integral die cast aluminum heat sink provides passive thermal cooling achieving L70 at 50,000 hours in IC and non-IC applications.

- Available in narrow flood, flood and wide flood distributions, ordered separately, ships with narrow flood installed.
- Also available in asymmetric distribution providing vertical illumination

**Retention**

- Heat treated compression springs hold module securely in the housing, can be removed thru the aperture for service or replacement

**LED Array**

- Proximity phosphors over chip on board LEDs provide a uniform source with high efficiency and no pixilation.
- Available in 90 CRI minimum, R9 greater than 50 and color accuracy within 3 SDCM provide color accuracy and uniformity.
- Compatible with Zhaga book 12 standards for interchangeability and can be replaced in the field

**Gaskets**

- Closed cell gaskets achieve restrictive airflow requirements without additional caulking

**Primary Optic**

- Precision molded TIR optic organizes source flux into useful beams without stray lumens in the field.
- Two-piece construction with matte black mounting ring and polarized turn and lock mounting aligns optic to source and minimizes backlight in the housing.
- Exceeds ENERGY STAR® color angular uniformity requirements, color deviation is typically less than 0.002 u' v'.

**Trims**

- Die formed steel trims are available in 2-inch round or square pinhole apertures and can be interchanged in the field.
- Available in a broad range of painted or plated finishes, can be painted in the field to match any décor.
- Magnetic attachment holds trim tightly to ceiling and eliminates light leaks.

**Shielding**

- Diffuse clear lens provides light control and source shielding.

**Driver**

- Integral UNV 120 - 277V 50/60 Hz constant current driver provides noise free operation.
- Continuous, flicker-free dimming from 100% to 5% with select leading or trailing edge 120V phase cut dimmers.
- Inline electrical quick connect and E26 adapter (provided) provides mains connection.
- Driver can be replaced in the field.

**Compliance**

- cULus listed / certified for use with Halo housings, classified for use with other's housings, see instruction sheet for conditions of acceptability.
- Wet location listed in covered ceilings and IP65 certified.
- Airtight per ASTM-E283.
- Suitable for use in clothes closets when installed in accordance with the NEC 410.16 spacing requirements
- EMI/RFI emissions per FCC 47CFR Part 15 B.
- Contains no mercury or lead and RoHS compliant.
- Photometric testing in accordance with IES LM-79-08.
- Lumen maintenance projections in accordance with IES LM-80-08 and TM-21-11.
- Can be used for State of California Title 24 high efficacy luminaire compliance, reference the California Energy Commission Title 20 Appliance Efficiency Database for current listings.
- ENERGY STAR® listed, reference qualified product listings.
- Meets State of California voluntary lamp standards.
- Zhaga book 12 compatible.

**HALO LED ICAT HOUSING for NEW CONSTRUCTION**

The H750ICAT is a dedicated LED new construction housing to be used with designated HALO LED modules. The H750ICAT is designed for insulated ceilings and can be in direct contact with ceiling insulation\*. This AIR-TITE housing design prevents airflow between conditioned and unconditioned spaces and saves on both heating and air conditioning costs. The LED connector system provides high efficacy code compliance when used with designated HALO LED modules and trims.

Catalog #	H750ICAT-ML5606927-596WB	Type	ALR-10
Project	ALOFT	Revision Date:	
Comments		Date	
Prepared by	Kathleen Kenny, National Accounts, 678-447-5208, kathleenkenny@eaton.com		

**DESIGN FEATURES**

**Housings**

Aluminum construction for greater heat dissipation. H750 ICAT housing is gasketed to prevent airflow from heated or air conditioned spaces.

**Plaster Frame**

Galvanized steel frame. Housing adjusts in plaster frame to accommodate up to 1" ceiling thickness. Regressed locking screw for securing hanger bars. Cutouts included for easily crimping hanger bars in position

**Slide-N-Side™ Junction Box**

- Positioned to accommodate straight conduit runs.
- Seven 1/2" trade size conduit knockouts with true pry-out slots.
- Slide-N-Side wire traps allow non metallic sheathed cable to be installed without tools and without removing knockouts.
- Allows wiring connections to be made outside the box.
- Simply insert the cable directly into the trap after connections are made.
- Accommodates the following standard non-metallic sheathed cable type:
  - U.S. #14/2, #14/3, #12/2, #12/3
  - Canada: #14/2, #14/3, #12/2

**GOT NAIL! Pass -N-Thru™ Bar Hangers**

Bar Hanger features include

- Pre-installed nail easily installs in regular lumber, engineered lumber and laminated beams.
- Safety and Guidance system prevents snagging, ensures smooth, straight nail penetration and allows bar hangers to be easily removed if necessary
- Automatic leveling flange aligns the housing and allows holding the housing in place with one hand while driving nails.
- Housing can be positioned at any point within 24" joist spans
- Score lines allow tool-free shortening for 12" joists and bar hangers do not need to be removed for shortening.
- Bar hangers may be repositioned 90° on plaster frame
- Integral T-bar clip snaps onto T-bars – no additional clips are required.

**LED Module Connection**

Halo LED modules simply install with a plug-in 120V-277V rated line voltage wiring connector (UL and CSA Listed Luminaire Disconnect). This non-screw-base connection preserves the high efficacy rating and prevents use of low efficacy incandescent sources (see LED Module specifications).

**Caution**

Connection is rated for 120V and 277V input. Installer must verify LED module voltage is compatible with the applicable voltage input. If uncertain, consult a qualified electrician.

**Labels**

- UL/cUL Listed 1598 Luminaire
- CE Marking - "Conformité Européenne" conformity with the Council of European Communities Directives, meeting internationally recognized compliance when used with ML56 Series LED modules
- UL/cUL Listed for Feed Through
- UL/cUL Listed for Damp Location
- UL/cUL Listed for Wet Location with select trims
- UL/cUL Listed for direct contact with insulation and combustible material\*
- Rated for 20W maximum

**Qualification**

May be used with qualified Halo LED modules and designated trims for High Efficacy Luminaire Compliance:

- State of California Title 24
- International Energy Conservation Code (IECC)
- Washington State Energy Code
- New York State Energy Conservation Construction Code - AIR-TITE™ Compliant
- Certified under ASTM-E283 standard for air-tight construction

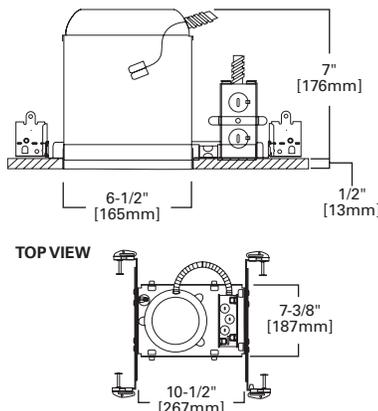

**H750ICAT**

**6" New Construction IC AIR-TITE™ Housing For Halo LED Modules and Trims**

- ML56 Series
- RL56 Series
- RA56 Series

High Efficacy LED Housing

**FOR USE IN INSULATED CEILINGS FOR DIRECT CONTACT WITH INSULATION\***

Qualified and compliant with select trims. Refer to ENERGY STAR® Qualified Products List and CEC (T24) Appliance Database for listings.

\* Not to be used in direct contact with spray foam insulation.

## DESCRIPTION

596 Series LED Trim – 5-Inch Aperture Shallow Baffle - is an integral element in the Halo ML56 LED Downlighting System. ML56 LED System is a series of modular LED Light Modules for use with dedicated 5" or 6" ML56 LED trims. The ML56 LED trims in 5" and 6" aperture sizes are designed to fit Halo, All-Pro and others 5" or 6" recessed housings. The ML56 system is suitable for new construction, remodel or retrofit installation.

Catalog #	H750ICAT-ML5606927-	Type	ALR-10
Project	ALOFT	Revision Date:	
Comments		Date	
Prepared by	Kathleen Kenny, National		

## SPECIFICATION FEATURES

596 Series LED trim is a 5-inch aperture shallow baffle for use in shallow recessed housings. 596 Series shallow baffle is offered in White (Matte White) baffle and flange. The shallow trim height provides capability for installation into both shallow and standard 5-inch aperture recessed housings (refer to ML56 LED Light Module specifications for details).

- For use with ML56 Series LED light modules
- Shallow baffle with self-flange
- Shallow height allows use in shallow or standard housings
- Wet location shower listed with ML56 LED Light Modules
- Torsion springs pull trim and light module tight to ceiling
- ML56 downlight trims and modules make any housing AIR-TITE™ (ASTM E283)
- For use with ML56 Series LED light modules

### Compatible with ML56 LED System of LED Downlight Light Modules

#### 600 Series - 80CRI, 600lm

##### 5" / 6" LED Retrofit Downlight Engine

ML5606827 - 2700K  
ML5606830 - 3000K  
ML5606835 - 3500K  
ML5606840 - 4000K

#### 600 Series - 90CRI, 600lm

##### 5" / 6" LED Retrofit Downlight Engine

ML5606927 - 2700K  
ML5606930 - 3000K  
ML5606935 - 3500K  
ML5606940 - 4000K

#### 900 Series - 80CRI, 900lm

##### 5" / 6" LED Retrofit Downlight Engine

ML5609827 - 2700K  
ML5609830 - 3000K  
ML5609835 - 3500K  
ML5609840 - 4000K

#### 900 Series - 90CRI, 900lm

##### 5" / 6" LED Retrofit Downlight Engine

ML5609927 - 2700K  
ML5609930 - 3000K  
ML5609935 - 3500K  
ML5609940 - 4000K

#### 1200 Series - 80CRI, 1200lm

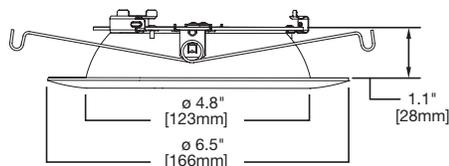

##### 5" / 6" LED Retrofit Downlight Engine

ML5612827 - 2700K  
ML5612830 - 3000K  
ML5612835 - 3500K  
ML5612840 - 4000K

#### 1200 Series - 90CRI, 1200lm

##### 5" / 6" LED Retrofit Downlight Engine

ML5612927 - 2700K

## ORDERING INFORMATION

SAMPLE NUMBER: 596WB

Trim	Finish	Accessory
596= 5" Shallow Baffle	WB=White Baffle, White Flange	TRM590WH= 5" LED Oversize Trim Ring for use with 59* series trims, White 6.3" I.D., 7.5" O.D. Ring slips over LED trim. Inset design allows 5" trim to fit into oversize ring for an even trim surface

**DESCRIPTION**

The EUX series exits are designed for architectural excellence and minimal presence. The ordering and installation processes are greatly simplified as all housing and lens alternatives are included. Fixture options include housing color, red or green letters and Eagle Eye self-diagnostics. Long life LED electronics coupled with nickel cadmium battery technology greatly reduces maintenance.

# Sure-Lites

<b>Catalog #</b>	EUX7(R/G)SD	<b>Type</b>	ALX-01
<b>Project</b>	Aloft	Revision Date:	
<b>Comments</b>		<b>Date</b>	
<b>Prepared by</b>	Kathleen Kenny		

**SPECIFICATION FEATURES**

**Electronics**

- Dual Voltage Input, 120/277 VAC, 60 Hz
- EZ key external battery disconnect
- 10°C to 40°C (50°F to 104°F) operating range
- Eagle Eye Self-Diagnostic System option
- Long life LED light source
- Fully recharged in 24 hours
- Solid-state Voltage Limited Charger
- Solid-state Switching
- Brownout Circuit
- Low-Voltage Disconnect
- Overload/Short Circuit Protection
- Test Switch/Power Indicator Light
- Photocell Test Switch (requires accessory laser for activation)

**Battery**

- Sealed nickel cadmium
- Maintenance free
- 24 hour full recharge time

**Housing Construction**

- All aluminum housing
- All mounting options are standard: surface, recessed, end, ceiling and wall
- Available in brushed aluminum, white or black
- Halo Got Nail hangar bars included for recessed applications
- Convenient 1/2" knockouts on top and end of fixture

**Trim/Lens**

- High impact acrylic panel
- Available with red or green letters
- Single and double sided lenses included

- Clear, mirror insert and white insert options included
- Field installed and NFPA 101 compliant chevron directional indicators included
- No Tools required for "snap in" installation
- Pre-specified chevron lens kits available for an enhanced aesthetic.

**Code Compliance**

- UL 924 listed
- Life Safety NFPA 101
- NEC/OSHA

**Warranty**

- Fixture: 5-year
- Battery: 7-year pro-rata

## TECHNICAL DATA

**Lamps**

Optimized for energy efficiency and aesthetic appearance, the EUX series Exit uses super bright, long life LED lamps to illuminate the exit lens.

**Housing**

Die cast and extruded aluminum housing that mounts in any application. Available in white, black or brushed aluminum finishes. Housing has conduit knockouts on top and side for easy AC wiring connections. Fully adjustable Halo Got Nail hangar bars make recessed installation easy. EUX is fully compatible with grid or hard ceilings as well as 2 x 4 wall constructions.

**Trim/Lens**

The EUX lens kit is truly universal and includes the materials needed to field construct all options. The high-impact, clear acrylic lens panel comes with three pieces to allow configuration of single or double sided options on the job site. In addition to the clear option, both mirror and white inserts are standard, along with NFPA 101 compliant chevrons. The lens installation requires no tools and snaps easily into place.

Pre-specified chevron lens kits (arrow right/left, double arrow) are also available as an option. This kit also includes white and mirror inserts, is fully NFPA compliant and requires no tools for installation.

**EZ Key Power Disconnect (self-powered only)**

The Patented EZ key is an external battery disconnect that allows the product to be shipped with the battery connected internally. This prevents battery drain during the construction cycle to insure that the battery isn't damaged and is fully charged for inspection. EZ Key also saves the labor of internally connecting the battery after construction is complete.

**Solid-State Charger (self-powered only)**

Supplied with a 120/277 VAC, voltage regulated solid-state charger. Immediately upon

restoration of AC current after a power failure, the charger provides a high charge rate. Solid-state circuitry recharges the battery following a power failure in accordance with UL 924.

**Brownout Circuit (self-powered only)**

The brownout circuit on Sure-Lites' exits monitors the flow of AC current to the exit and activates the emergency lighting system when a predetermined reduction of AC power occurs. This dip in voltage will cause most ballasted fixtures to extinguish causing loss of normal lighting even though a total power failure has not occurred.

**Solid-State Transfer (self-powered only)**

The EUX Series exit incorporates solid state switching which eliminates corroded and pitted contacts or mechanical failures associated with relays. The switching circuit is designed to detect a loss of AC voltage and automatically energizes the LED lamps. Upon restoration of AC power, the emergency circuit will switch off and the charger will automatically fully recharge the battery within 24 hours.

**Test Switch/Power Indicator Light (self-powered only)**

Conveniently located combination Test Switch/Power Indicator Light allows for manual verification of proper operation of the transfer circuit and emergency lamps.

**Photocell Test Switch**

Allows verification of proper operation of the transfer circuit and emergency lamps with a laser pointer (laser is sold as an accessory). The emergency lamps will test for 30 seconds when activated.

**Eagle Eye™ Self-Diagnostics**

The Eagle Eye self-diagnostic software will automatically perform all tests required by UL924, and NFPA101. The system indicates the status of the emergency light at all times using the LED indicator. A 90 minute battery power

(emergency mode) simulation test occurs once every 12 months. A 30 second battery power simulation test will occur every 30 days. The Solid-State microprocessor based system has the ability to accurately detect and warn of system failures, plus it incorporates all of the standard electronic features that sets Sure-Lites apart from its competition. Eagle Eye self diagnostic software automatically performs all testing required by the NFPA 101 Life Safety Code and systematically calibrates itself in the field, reducing installation labor and eliminating manual calibration errors.

**Sealed Nickel Cadmium Battery (self-powered only)**

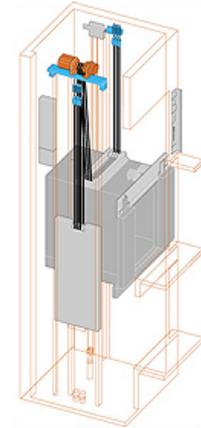

Sure-Lites sealed nickel cadmium batteries are maintenance-free with a life expectancy of 7 years. The sealed rechargeable nickel cadmium battery offers high discharge rates and stable performance over a wide range of temperatures.

**Warranty**

All Sure-Lites' products are backed by a firm five-year warranty against defects in material and workmanship. Maintenance-free, longlife, sealed nickel cadmium batteries carry a seven-year pro-rata warranty.

Elevators

Item Name	Hydraulic or Machine Roomless Elevator - Passenger
Product:	2500 lbs
Manufacturer:	See manufacturer list below for approved manufacturers
Interior Cab Dimensions:	Passenger Cab: 6'-8" W x 4'-3" D x 9'-0" H
Doors:	Stainless Steel
Door Frames:	Stainless steel only at main level. Upper floors to be painted to match guestroom door frames.
Control Panel:	Halo Lit buttons. White light
Ceiling:	Refer to spec ELE-001.2 for specification details.
Handrail:	Refer to spec ELE-001.2 for specification details.
Walls:	Refer to spec ELE-001.2 for specification details.
Base:	Refer to spec ELE-001.2 for specification details.
Signage:	Provide engraved sign "Do Not use Elevator in case of Fire - Use Stairs" within cab and beside elevator entrance on each floor. Provide engraved sign "Elevator not to be used by construction personnel" and "Elevator permit on file with manager" in cab.
Note:	Emergency light and telephone to be provided
Note:	Provide stainless steel license holder in each elevator cab to suit certificate issued. Design holder with non-visible tamper-proof fastenings.
Note:	Provide pads and hooks - for side and rear walls
Note:	Provide reinforced structure at ceiling in conformance with ASME A-17.1.
Lead Time:	Varies. Verify with selected manufacturer
Warranty:	Varies. Verify with selected manufacturer

**Interior Insulation Finishing System  
Cutsheets**

**Dryvit Interior Architectural Coatings Specification**

- D. Finish: An acrylic based coating, available in a variety of textures and colors, which is applied to the prepared wall surface.
- E. Reinforced Base Coat: The layer consisting of fiberglass reinforcing mesh fully embedded in the base coat material applied to the outside surface of the sheathing.
- F. Reinforcing Mesh: Glass fiber mesh used to reinforce the base coat and to provide impact resistance.
- G. Substrate: The material to which the Dryvit coatings are applied.

**1.04 DESCRIPTION**

- A. General: Dryvit Interior Architectural Coatings consist of base coat and reinforcing mesh (where specified), acrylic primer and finish, applied to various interior wall and ceiling surfaces.
- B. Design Requirements
1. Acceptable surfaces for Dryvit Interior Architectural Coatings include:
    - a. Concrete and Masonry.
    - b. Gypsum Wallboard meeting ASTM C 1396.
    - c. Fiberglass faced gypsum meeting ASTM C 1177.
    - d. Fiber reinforced cement or calcium silicate boards.
  2. Vapor Retarders: Use, type and location of vapor retarders within a wall assembly is the responsibility of the project designer and shall be noted on the project drawings and specifications.
- C. Performance Requirements: As a minimum the Dryvit materials shall be tested in the following areas;

TEST	TEST METHOD	CRITERIA	RESULTS
<b>Abrasion Resistance</b>	ASTM D 968	No deleterious effects after 500 liters (528 quarts)	No deleterious effects after 1000 liters (1056 quarts)
<b>Accelerated Weathering</b>	ASTM G 155 Cycle 1	No deleterious effects after 2000 hours	No deleterious effects after 5000 hours
	ASTM G 154 Cycle 1 (QUV)		No deleterious effects after 5000 hours
<b>Freeze-Thaw</b>	ASTM E 2485 (formerly EIMA 101.01)	No deleterious effects after 60 cycles	Passed - No deleterious effects after 90 cycles
	ASTM C 67 modified	No deleterious effects after 60 cycles	Passed - No deleterious effects after 60 cycles
	ASTM E 2485/ICC-ES Proc. ICC ES (AC235)	No deleterious effects after 10 cycles	Passed - No deleterious effects after 10 cycles
<b>Mildew Resistance</b>	ASTM D 3273	No growth during 28 day exposure period	No growth during 60 day exposure period
<b>Water Resistance</b>	ASTM D 2247	No deleterious effects after 14 days exposure	No deleterious effects after 42 days exposure
<b>Taber Abrasion</b>	ASTM D 4060	N/A	Passed 1000 cycles
<b>Salt Spray Resistance</b>	ASTM B 117	No deleterious effects after 300 hours exposure	No deleterious effects after 1000 hours exposure
<b>Water Vapor Transmission</b>	ASTM E 96 Procedure B	Vapor permeable	EPS 5 perm-inch Base Coat* 40 Perms Finish** 40 Perms
<b>Tensile Bond</b>	ASTM C 297/E 2134	Minimum 104 kPa (15 psi) – substrate or insulation failure	Minimum 213.6 kPa (31 psi)
<b>Surface Burning Characteristics</b>	ASTM E 84	All components shall have a: Flame Spread $\leq$ 25 Smoke Developed $<$ 450	Passed
<b>Reinforcing Mesh Alkali Resistance of Reinforcing Mesh</b>	ASTM E 2098 (formerly EIMA 105.01)	$>$ 21dN/cm (120 pli) retained tensile strength after exposure	Passed
<b>EPS (Physical Properties) Density</b>	ASTM C 303, D 1622	15.2-20.0 kg/m <sup>3</sup> (0.95-1.25 lb/ft <sup>3</sup> )	Pass
<b>Thermal Resistance</b>	ASTM C 177, C 518	4.0 @ 4.4 °C (40 °F) 3.6 @ 23.9 °C (75 °F)	Pass Pass
<b>Water Absorption</b>	ASTM C 272	2.5 % max. by volume	Pass
<b>Oxygen Index</b>	ASTM D 2863	24% min. by volume	Pass
<b>Compressive Strength</b>	ASTM D 1621 Proc. A	69 kPa (10 psi) min.	Pass
<b>Flexural Strength</b>	ASTM C 203	172 kPa (25 psi) min.	Pass
<b>Flame Spread</b>	ASTM E 84	25 max.	Pass
<b>Smoke Developed</b>		450 max.	Pass

\* Base Coat perm value based on Dryvit Genesis<sup>®</sup>

\*\* Finish perm value based on Dryvit Quarzputz<sup>®</sup>

**Dryvit Interior Architectural Coatings Specification****1.05 SUBMITTALS**

- A. Product Data – The contractor shall submit to the owner/architect manufacturer's product data sheets describing products, which will be used on this project.
- B. Samples – The contractor shall submit to the owner/architect two samples of each finish, texture, and color to be used on the project. The same tools and techniques proposed for the actual installation shall be used to prepare the samples. Samples shall be of sufficient size to accurately represent each color and texture to be utilized on the project.

**1.06 QUALITY ASSURANCE****A. Qualifications**

- 1. Manufacturer: Shall be Dryvit Systems, Inc. All materials shall be manufactured or sold by Dryvit and shall be purchased from Dryvit or its authorized distributor.
  - a. Materials shall be manufactured at a facility covered by a current ISO 9001:2008 and ISO 14001:2004 certification. Certification of the facility shall be done by a registrar accredited by the American National Standards Institute, Registrar Accreditation Board (ANSI-RAB).
- 2. Contractor\*: Shall be knowledgeable in the proper installation of the Dryvit materials and shall be experienced and competent in the installation of the Dryvit Finish System for Interiors. Additionally the contractor shall possess a current trained contractor certificate from Dryvit for any of its Exterior Insulation and Finish Systems.

**1.07 DELIVERY, STORAGE, AND HANDLING**

- A. All Dryvit materials shall be delivered to the job site in the original, unopened packages with labels intact.
- B. Upon arrival, materials shall be inspected for physical damage, freezing, or overheating. Questionable materials shall not be used.
- C. Materials shall be stored at the job site in a cool, dry location, out of direct sunlight, protected from weather and other damage. Minimum storage temperature shall be 7 °C (45 °F) for Color Prime™, 10 °C (50 °F) for Ameristone, and 4 °C (40 °F) for all other products.

**1.08 PROJECT CONDITIONS****A. Environmental Requirements**

- 1. At the time of application, the air and wall surface temperatures shall be minimum 7 °C (45 °F) for Color Prime, 10 °C (50 °F) for Ameristone, and 4 °C (40 °F) for all other products. These temperatures shall be maintained, with adequate air circulation, for a minimum of 24 hours thereafter, or until the products are dry.

- B. Existing Conditions – The contractor shall have access to electric power, clean water, and a clean work area at the location where the Dryvit materials are to be applied.

**1.09 SEQUENCING AND SCHEDULING**

- A. Installation of the Dryvit Interior Architectural Coatings shall be coordinated with other construction trades.
- B. Sufficient manpower and equipment shall be employed to ensure a continuous operation, free of cold joints, scaffold lines, texture variations, etc.

**1.10 LIMITED MATERIALS WARRANTY**

- A. Dryvit Systems, Inc. shall provide a written limited materials warranty against defective material upon written request. Dryvit shall have no liability for the application of the materials. Dryvit shall make no other warranties, expressed or implied. Dryvit is not liable for incidental or consequential damages.

**1.11 DESIGN RESPONSIBILITY**

- A. It is the responsibility of both the specifier and the purchaser to determine, if a product is suitable for their intended use. The designer selected by the purchaser shall be responsible for all decisions pertaining to design, detail, structural capability, attachment, details, shop drawings, and the like. Dryvit has prepared guidelines in the form of specifications and product sheets to facilitate the design process only. Dryvit is not liable for any errors or omissions in design, detail, structural capability, attachment details, shop drawings, or the like, whether based upon the information prepared by Dryvit or otherwise, or for any changes which purchases, specifiers, designers, or their appointed representatives may make to Dryvit's published comments.

**1.12 MAINTENANCE**

- A. Maintenance and repair shall follow the procedures noted in Dryvit Outsulation® System Application Instructions, DS204.
- B. All Dryvit products are designed to minimize maintenance. However, as with all building products, depending on location, some cleaning may be required. See Dryvit publication DS152 on Cleaning and Recoating.

**PART II - PRODUCT****2.01 MANUFACTURER**

- A. All components of the Dryvit Interior Architectural Coatings shall be obtained from Dryvit or its authorized distributors.

**Dryvit Interior Architectural Coatings Specification****2.02 MATERIALS**

- A. Portland Cement: Shall be Type I, I-II or II, meeting ASTM C 150, white or gray in color, fresh and free of lumps.  
 B. Water: Shall be clean and free of foreign matter.

**2.03 COMPONENTS**

- A. Base Coat:
1. Cementitious: A liquid polymer-based material, which is field mixed in a 1:1 ratio by weight with Portland Cement.
    - a. Shall be Genesis or Primus®.
  2. Noncementitious: A factory mixed, fully formulated, water based product.
    - a. Shall be NCB™.
  3. Ready mixed: A dry blend cementitious, co-polymer based product, field mixed with water.
    - a. Shall be Primus® DM, Genesis® DM, Genesis® DMS.
- B. Reinforcing Mesh: When specified, shall be a balanced open weave, glass fiber fabric treated for compatibility with other System materials.
1. Shall be Dryvit Standard Mesh weighing 146 g/m<sup>2</sup> (4.3 oz/yd<sup>2</sup>).
    - a. It shall be colored blue for product identification bearing the Dryvit logo.
- C. Primer (when specified):
1. Shall be: Color Prime™ a pigmented, acrylic based primer used to improve adhesion and uniformity of finish color.
- D. Dryvit Finish: Shall be the type, color and texture as selected by the owner/architect and shall be one or more of the following:
1. Standard DPR (Dirt Pickup Resistance): Water based, acrylic coatings with integral color and texture and formulated with DPR chemistry:
    - a. Quarzputz DPR: Open-texture pattern.
    - b. Sandblast® DPR: Medium texture.
    - c. Freestyle® DPR: Fine texture.
    - d. Sandpebble® DPR: Pebble texture.
    - e. Sandpebble® Fine DPR: Fine pebble texture.
    - f. Sandblast® NTX (available only from Dryvit's California plant)
    - g. Sandpebble® Fine NTX (available only from Dryvit's California and Oklahoma plants)
  2. E Finishes™: Water-based, lightweight acrylic coatings with integral color and texture and formulated with DPR chemistry:
    - a. Quarzputz® E
    - b. Sandpebble® E
    - c. Sandpebble® Fine E
    - d. Mojave E™
  3. Specialty Finishes
    - a. Ameristone™: Multi colored quartz aggregate.
    - b. Stone Mist®: Ceramically colored quartz aggregate.
    - c. Custom Brick™: Acrylic polymer finish used in conjunction with a proprietary template system to create the look of stone, brick, slate or tile.
    - d. Lymestone™: A premixed, 100% acrylic-based finish designed to replicate the appearance of limestone blocks.
    - e. TerraNeo®: 100% acrylic-based finish with large mica chips and multi-colored quartz aggregates.
    - f. Reflectit: 100% acrylic coating providing a pearlescent appearance.
  4. Medallion Series PMR™ (Proven Mildew Resistance) Finishes: Water based, acrylic finishes with integral color and texture:
    - a. Quarzputz® PMR
    - b. Sandblast® PMR
    - c. Freestyle® PMR
    - d. Sandpebble® PMR
    - e. Sandpebble® Fine PMR
  5. Coatings, Primers and Sealers:
    - a. Demandit®
    - b. Tuscan Glaze™
    - c. Revyvit®
    - d. Color Prime
    - e. Prymit®
    - f. SealClear™

**Dryvit Interior Architectural Coatings Specification****PART III - EXECUTION****3.01 EXAMINATION**

- A. Prior to installation of the Dryvit Interior Architectural Coatings, the contractor shall ensure that the substrate is of a type listed in section 1.04.B.1.
- B. The contractor shall notify the general contractor and/or architect and/or owner of all discrepancies. Work shall not proceed until discrepancies have been corrected.

**3.02 SURFACE PREPARATION**

- A. The substrate shall be prepared so as to be free of foreign materials such as oil, dust, dirt, form-release agents, efflorescence, loose paint, wax, water repellents, moisture, frost and any other materials that inhibit adhesion.
- B. Concrete and masonry
  - 1. Shall be dry and cured a minimum of 28 days.
  - 2. All rough surfaces shall be skimmed with Dryvit Genesis or Genesis DM mixture to provide a smooth, flat and level base.
- C. Gypsum Wallboard – Standard System
  - 1. All joints shall be taped and skimmed, fastener heads spotted with joint compound and sanded smooth.
- D. Gypsum Wallboard – High Impact
  - 1. Surface shall be cleaned to remove all dust, dirt, or other contaminants that may impair the adhesion of a surface coating.
- E. Plaster
  - 1. Plaster shall be finished smooth and allowed to cure a minimum of 28 days prior to application of finish.
  - 2. Surface shall be cleaned to remove all dust, dirt, or other contaminants that may impair the adhesion of a surface coating.
- F. DensGlass Gold, DensShield, e<sup>2</sup>XP™, Eterspan, Harditex, Hardiflex, Durock or other cement based sheathing boards.
  - 1. Surface shall be cleaned to remove all dust, dirt, or other contaminants that may impair the adhesion of a surface coating.

**3.03 INSTALLATION**

- A. The Dryvit materials shall be mixed and applied in accordance with Dryvit's published product data sheets for the individual products specified.
- B. Concrete and masonry
  - 1. Apply a continuous layer of Genesis or Genesis DM mixture over the entire wall surface to fill voids and provide a smooth level base for finish application.
  - 2. Allow the Genesis or Genesis DM mixture to cure a minimum of 24 hours until completely dry. Cool, humid conditions may require longer cure times.
  - 3. Using a brush, roller, or airless spray equipment, apply a coat of Color Prime over the dry Genesis, and allow to dry.
  - 4. Apply the specified finish in accordance with Dryvit's printed installation instructions.
- C. Gypsum Wallboard – Standard System
  - 1. Using a brush, roller, or airless spray equipment, apply a coat of Color Prime over the prepared drywall and allow to dry.
  - 2. Apply the specified finish in accordance with Dryvit's published installation instructions.
- D. Gypsum Wallboard – High Impact
  - 1. Apply a layer of base coat mixture to the wall surface at an approximate thickness of 1.6 mm (1/16 in). Immediately place the reinforcing mesh into the wet base coat layer and trowel smooth so the mesh is fully embedded. Lap adjacent pieces of mesh a minimum of 64 mm (2 ½ in). Continue until the entire wall surface is covered.
  - 2. Allow to cure a minimum of 24 hours until completely dry. Cool, humid conditions may require longer cure times.
  - 3. Using a brush, roller, or airless spray equipment, apply a coat of Color Prime over the prepared drywall and allow to dry.
  - 4. Apply the specified finish in accordance with Dryvit's published installation instructions.
- E. Plaster
  - 1. Using a brush, roller, or airless spray equipment, apply a coat of Color Prime over the cured plaster and allow to dry.
  - 2. Apply the specified finish in accordance with Dryvit's published installation instructions.
- F. DensGlass® Gold, Dens-Shield®, e<sup>2</sup>XP, Eterspan®, Harditex®, Hardiflex®, Durock® or other cement based sheathing boards.
  - 1. Apply a layer of base coat mixture to the wall surface at an approximate thickness of 1.6 mm (1/16 in). Immediately place the reinforcing mesh into the wet base coat layer and trowel smooth so the mesh is fully

**Dryvit Interior Architectural Coatings Specification**

embedded. Lap adjacent pieces of mesh a minimum of 64 mm (2 ½ in). Continue until the entire wall surface is covered.

2. Allow to cure a minimum of 24 hours until completely dry. Cool, humid conditions may require longer cure times.
  3. Using a brush, roller, or airless spray equipment, apply a coat of Color Prime over the prepared wall surface and allow to dry.
  4. Apply the specified finish in accordance with Dryvit's published installation instructions.
- G. Pool areas, locker rooms and other high humidity areas.
1. A substrate appropriate for the exposure conditions must be specified.
  2. The Dryvit coatings shall not be used in areas of direct water contact.
  3. The Dryvit coatings should not be considered to act as the vapor retarder for the wall, should one be required. If required, the vapor retarder shall be specified and installed separately.
  4. The Dryvit coatings shall be installed as per the applicable substrate described above.

**3.04 FIELD QUALITY CONTROL**

- A. The contractor shall be responsible for the proper application of the Dryvit materials.
- B. Dryvit assumes no responsibility for on-site inspections or application of its products.

**3.05 CLEANING**

- A. All excess Dryvit materials shall be removed from the job site by the contractor in accordance with contract provisions.
- B. All surrounding areas, where Dryvit coatings have been installed, shall be left free of debris and foreign substances resulting from the contractor's work.

**3.06 PROTECTION**

- A. Dryvit coatings, and the project shall be protected from damage and exposure to dust and other contaminants until dry.

**DISCLAIMER**

Information contained in this specification conforms to standard detail and product recommendations for the installation of the Dryvit Interior Architectural Coatings products as of the date of publication of this document and is presented in good faith. Dryvit Systems, Inc. assumes no liability, expressed or implied, as to the architecture, engineering or workmanship of any project. To ensure that you are using the latest, most complete information, contact:

# Dryvit Interior Architectural Coatings

100% Acrylic Architectural Coatings For Interior Use

## Dryvit Interior Architectural Coatings Specifications

**Dryvit Interior Architectural Coatings Specification**

**DRYVIT SYSTEMS, INC.  
MANUFACTURER SPECIFICATION  
SECTION 09960  
DRYVIT INTERIOR ARCHITECTURAL COATINGS**

**PART I - GENERAL****1.01 SUMMARY:**

- A. This document contains all the Manufacturer's requirements for the proper design, use, and installation of the Dryvit Interior Architectural Coatings.
- B. SECTION INCLUDES
  - 1. Interior Architectural Coatings
- C. RELATED SECTIONS
  - 1. Unit Masonry – Section 04200.
  - 2. Concrete – Sections 03300 and 03400.
  - 3. Vapor Barriers – Section 07260.
  - 4. Gypsum Board Systems – Sections 09250 and 09260.

**1.02 REFERENCES**

- A. ASTM B 117 (Federal Test Standard 141A Method 6061) Test Method of Salt Spray (Fog) Testing
- B. ASTM C 67 Modified Standard Test Methods for Sampling and Testing Brick and Structural Clay Tile
- C. ASTM C 150 Specification for Portland Cement
- D. ASTM C 177 Test Method for Steady-State Heat Flux Measurements and Thermal Transmission Properties by Means of the Guarded-Hot-Plate Apparatus
- E. ASTM C 203 Test Methods for Breaking Load and Flexural Properties of Block-Type Thermal Insulation
- F. ASTM C 272 Test Method for Water Absorption of Core Materials for Structural Sandwich Constructions
- G. ASTM C 297 Test Method for Tensile Strength of Flat Sandwich Constructions in Flatwise Plane
- H. ASTM C 303 Test Method for Density of Preformed Block-Type Thermal Insulation
- I. ASTM C 518 Test Method for Steady-State heat Flux Measurements and Thermal Transmission Properties by Means of the Heat Flow Meter Apparatus
- J. ASTM C 1177 Standard Specification for Glass Mat Gypsum Substrate for Use as Sheathing
- K. ASTM C 1396 Standard Specification for Gypsum Board
- L. ASTM D 968 (Federal Test Standard 141A Method 6191) Test Method for Abrasion Resistance of Organic Coatings by Falling Abrasive
- M. ASTM D 1621 Proc. A Test Method for Compressive Properties of Rigid Cellular Plastics
- N. ASTM D 1622 Test Method for Apparent Density of Rigid Cellular Plastics
- O. ASTM D 2247 (Federal Test Standard 141A Method 6201) Standard Practice for Testing Water Resistance of Coatings in 100% Relative Humidity
- P. ASTM D 2863 Test Method for Measuring the Minimum Oxygen Concentration to Support Candle-Like Combustion of Plastics (Oxygen Index)
- Q. ASTM D 3273: Test Method for Resistance to Growth of Mold on Surfaces
- R. ASTM D 4060 Standard Test Method for Abrasion Resistance of Organic Coatings by the Taber Abraser
- S. ASTM E 84 Test Method for Surface Burning Characteristics of Building Materials
- T. ASTM E 96 Test Methods for Water Vapor Transmission of Materials
- U. ASTM E 2098 Test Method for Determining the Tensile Breaking Strength of Glass Fiber Reinforcing Mesh for use in Class PB Exterior Insulation and Finish Systems (EIFS), after Exposure to Sodium Hydroxide Solution
- V. ASTM E 2134 Test Method for Evaluating the Tensile-Adhesion Performance of Exterior Insulation and Finish Systems (EIFS)
- W. ASTM E 2485 (formerly EIMA Std. 101.01) Standard Test Method for Freeze-Thaw Resistance of Exterior Insulation and Finish Systems (EIFS) and Water-Resistive Barrier Coatings
- X. ASTM G 23 (Federal Test Standard 141A Method 6151) Recommended Practice for Operating Exposure Apparatus (Carbon-Arc Type) With and Without Water, for Exposure of Nonmetallic Materials
- Y. ASTM G 155 (Federal Test Standard 141A Method 6151) Standard Practice for Operating-Xenon Arc Light Apparatus for Exposure of Nonmetallic Materials
- Z. ASTM G 154 Standard Practice for Operating Fluorescent Light Apparatus for UV Exposure Nonmetallic Materials
- AA. DS159 Dryvit Water Vapor Transmission Data Sheet

**1.03 DEFINITIONS**

- A. Contractor: The contractor that applies materials to the substrate.
- B. Dryvit: Dryvit Systems, Inc., the manufacturer of the coating materials, a Rhode Island corporation.
- C. Lamina: The layer consisting of the reinforced base coat and finish materials.

Door Frames

Issue Date: 28 JUL 2017

Revision Date: 29 JAN 2018

Item Name	Door Frame
Description:	Steel Door Frame
Manufacturer:	Steelcraft
Frame Type:	F16 series standard double rebbet knock
Material:	16 Gauge Steel, Heavy Duty
Finish:	Refer to guestroom plans and elevations
Hardware:	Refer to Door Schedule
Fire Rating:	Refer to Door Schedule
Quality Standards:	ANSI A250.8-2003 (SDI-100)
Lead Time:	To be verified
Warranty:	Warranty for 36 months from the date the final product is placed into operation.

**ASSA ABLOY**

The global leader in door opening solutions

# VingCard Essence Electronic Lock

VingCard Essence revolutionizes the electronic lock industry by housing all lock components, including the reader and mobile access board, inside the door and therefore, reaching the maximum minimalistic expression, the true essence of an electronic lock.

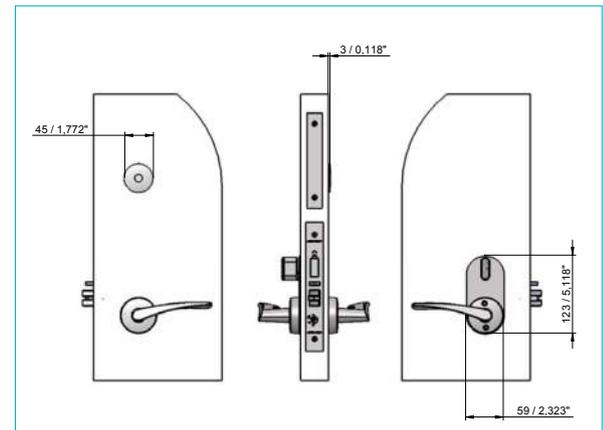

VingCard Essence is always delivered as Mobile Access ready. With Mobile Access board included inside the reader, your property is ready for using the mobile phone as guest room key whenever required.

## FEATURES

- : Solid Stainless Steel or brass handles with self-lubricating long life bearings.
- : 3-point steel latch construction with an antifriction mechanism.
- : Case hardened full 1-inch (ANSI) throw deadbolt.
- : Panic release function – the deadbolt and latch are automatically retracted by inside handle for easy egress in emergency situations.
- : ADA compliant (users with physical disabilities).
- : Future proof re-programmable FLASH lock memory.
- : Powered by three (3) AA batteries that provide up to 2 years normal life (depending on door traffic and online/mobile access functionality).
- : Compatible with Visionline Software platform.
- : 2000 event audit trail.
- : Optional high security mechanical override (key cylinder).
- : Mobile Access board included in reader.
- : RFID Specifications:
  - 13,56MHz technology
  - compatible with the following standards:
    - ISO 14.443 A (MIFARE including Desfire)
    - ISO 14.443 B
    - ISO 15.693

## DIMENSIONS

## TECHNICAL DATA

Power	4,5 V DC (3 x AA alkaline batteries).
Battery location	Inside of the door in electronics module.
Material	Handles: Stainless steel quality SUS304 RFID cover: Polycarbonate UL94V0 (Makrolon 6555).
Metal finishes	Satin Chrome (Stainless Steel with PVD), Polished Chrome (Stainless Steel with PVD), Satin Brass (Stainless Steel with PVD), Polished Brass (Stainless Steel with PVD), Light Bronze, Velour Nickel and US Antique Dark.
Standard plastic color	Black and white.
Handle options in standard range	Straight, Functional ANSI, Wing. Also compatible with 20 different Valli&Valli design handles.
Emergency opening options	Electronic emergency opening with service unit and optional mechanical cylinder.
User interface	3 colored light pipe shaped as ring around the reader (green, red, yellow).
Locking mechanism	Electro-mechanical locking mechanism located in the lockcase.
Door thickness	34 - 120 mm / 1,34 - 4,72 Inches.
System software compatibility	Visionline.
Online compatibility	Wireless (based on ZigBee protocol) in Visionline.
Storage temperature	0-70 °C / 32-158 °F: non-condensing environment.
Tested operating temperature	Tested from -25 °C to 70 °C ( -13 °F to 158 °F), according to IEC 60068-2.
Certifications	European EMC, LVD and R&TTE Directives. Approved according to EN14846. Fire approved according to EN 1634-1. Fire approved according to UL (timber doors).
Supported RFID standards	ISO 14.443 A, ISO 14.443 B, ISO 15.693
Mobile Access support	Mobile Access board included in reader unit.

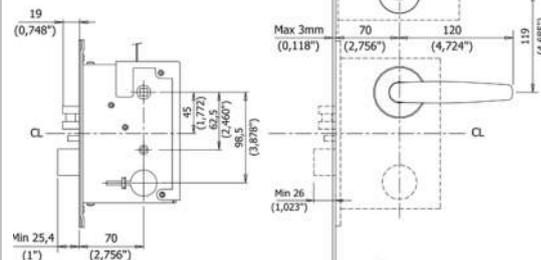

## LOCKCASE DIMENSIONS

ANSI lock case variants	ANSI DA, ANSI DB (both available in the following versions:4-switch, Auto deadbolt (ADB) Australia version (AUS) and Japan (JPN) version).
ANSI lock case widths	25 mm / 0,98 inches, 28 mm / 1,10 inches, 32 mm / 1,26 inches.
ANSI backset	70 mm / 2,76 inches.
EURO lock case variants	EURO, EURO ADB, EURO MPA.
EURO lock case widths	20 mm / 0,79 inches, 22 mm / 0,87 inches, 24 mm / 0,94 inches.
EURO backsets	65 mm / 2,56 inches, 80 mm / 3,15 inches.

Our collection of door stops features our DuraFlex bumper material that outlasts other manufacturers' rubber bumpers many times over. It stays resilient and colorfast for years. These new styles offer solutions for wall, floor and baseboard stops. The door stops are made from solid brass and available in most architectural finishes.

## Door Stops

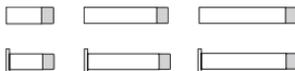

Floor Mounted Stops

Stop No.	Description	Base	Projection

# 8000 SERIES

## Architectural Door Closer

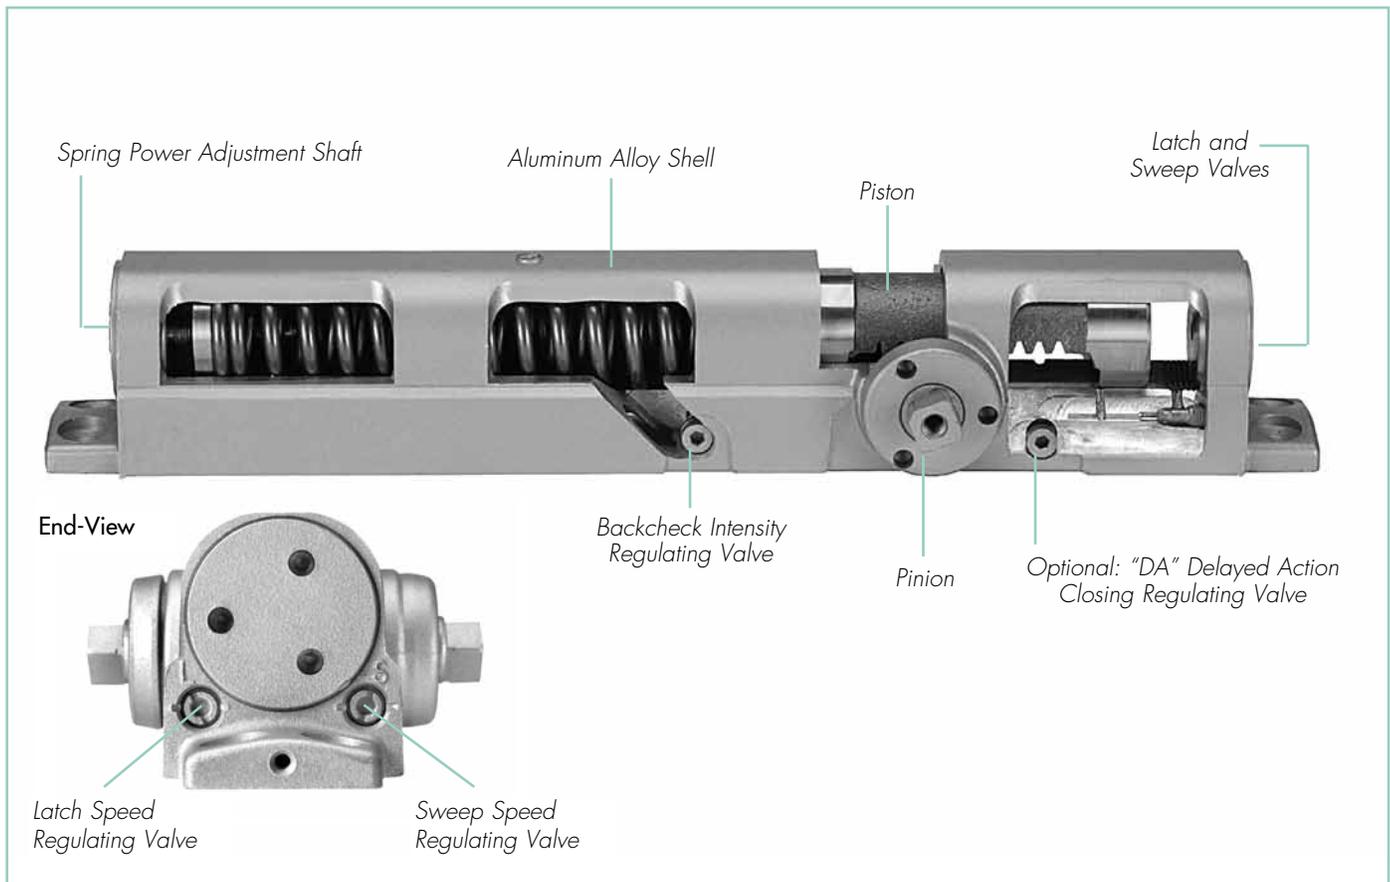

**Norton**<sup>®</sup>  
**ASSA ABLOY**

ASSA ABLOY, the global leader  
in door opening solutions

## OVERVIEW

### Cutaway View

## COMPLIANCE STANDARDS

- ANSI/BHMA A156.4, Grade 1 certified 
- UL / cUL listed for use on fire rated doors 
- UL10C listed for positive pressure fire test
- 8301 and 8501 door closers are designed to comply with requirements for the Americans with Disabilities Act (A.D.A) and ANSI standard A117.1 
- This product is manufactured in an ISO 9001 facility

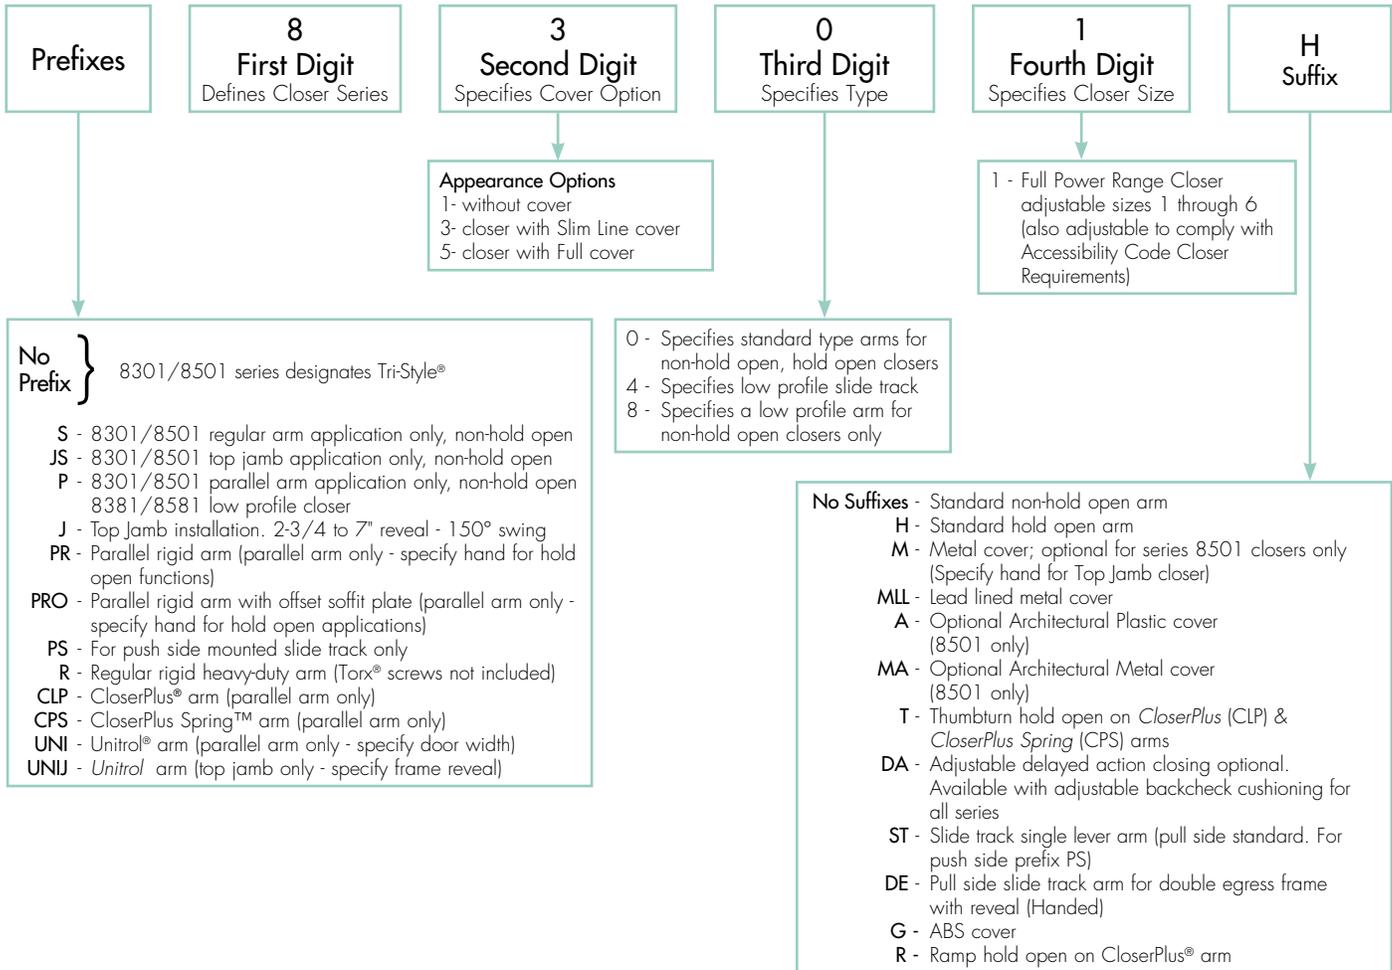

### CAUTION: Door Closers for Low Opening Force Applications:

Door closers installed in openings required to meet the requirements of The Americans with Disabilities Act or ANSI/BHMA Standard A117.1, when adjusted to meet those requirements, may not provide adequate closing power to dependably close and latch the door.

HOW TO ORDER

**HW-016**  
Revision Date:

For optimum protection of door and frame assemblies, always use auxiliary wall, floor, or overhead door stop.

**Notes:**

- Warranty becomes void if door closer is installed on the exterior side of a door in the exterior wall of a building.
- It is strongly recommended, and required on fire door assemblies, that doors having a door closer be hung on ball bearing or anti-friction hinges or pivots; unless an alternate method is identified in the door manufacturer's listing.
- Failure to use the correct type and size fasteners may void factory warranty.
- Fasteners for fire/smoke door assemblies must conform to NFPA 80. In some applications additional fasteners may be mandated by NFPA 80 that are not shipped with standard Norton product, such as sleeve-nuts/sex nuts or through-bolts and grommet nuts.
- Sizing charts provided on pages 13-25 are based on 1-3/4" (44mm) x 7" (2.13m) standard weight doors swinging to 110°. Other conditions (such as door height or weight; or wind/draft conditions) may require a larger size closer.

FEATURES

**HW-016**  
Revision Date:

**Aluminum Alloy Housing**

Closer bodies are constructed of a special aluminum alloy, carefully selected to accommodate interactive steel components and operating conditions.

**Rack & Pinion Operation**

Provides a smooth constant control of the door through its full opening and closing cycle. 180° door swing can be achieved when door, frame, hardware and arm function do not interfere.

**Non-handed**

With few exceptions all series 8301/8501 door closers are non-handed and can be installed on either right- or left-hand swing doors. Pinion shaft extends vertically through the closer body in both directions. Some options, as noted on pages 6-7, will require that the hand of the closer be specified.

**Sweep Speed Control Valve**

Allows adjustment of door speed from the door's full open position down to approximately 10° from the closed position.

**Latch Speed Control Valve**

Allows adjustment of door speed from approximately 10° down to the door's fully closed position.

**Tri-Style®**

8301/8501 comes with screws, brackets and soffit plates to allow for regular, top jamb, and parallel arm installations.

**Adjustable Backcheck Valve**

Provides control of the door in the opening cycle, beginning at approximately 75° of door opening. It cushions the door opening when the door is forcibly opened beyond its pre-adjusted limits.

**Standard Molded Covers**

Molded of high-impact U.L. listed material. These covers are non-handed for all applications.

**Warranty**

Limited 25-year warranty for defects and life of the building on the aluminum housing.

**Closer Fluid**

NorGlide® closer fluid is a specially formulated multi-viscosity hydraulic fluid that contains lubricity and anti-oxidation agents that provide optimum performance and efficiency. This fluid complements the interaction of the door closer's aluminum housing with its steel and brass components, while maintaining stable viscosity to allow the door closer to perform in temperatures ranging from extremely high to as low as -40° F.

**Door Closer Power Options**

**Series 8301/8501 Multi-Sized Door Closer**

Adjustable through the power range of sizes 1 through 6; as outlined in ANSI/BHMA specification A156.4 option PT 4H.

Closers will also comply with the opening force requirements as outlined in the Americans with Disabilities Act (ADA) and ANSI/BHMA standard A117.1 for interior doors.

OPTIONAL FEATURES COVERS

**Optional Metal Cover**

This steel cover is non-handed for regular and parallel arm applications, but is handed for top jamb applications. Cover is available in sprayed or plated finishes.

**Optional Architectural Covers \***

**Plastic** Architectural plastic covers are molded of high-impact U.L. listed material. They are non-handed and available in sprayed finishes.

**Metal** The architectural metal covers are steel and non-handed for all applications. These covers are available in sprayed or plated finishes.

**Optional ABS Cover**

Consult factory for details

OPTIONAL FEATURES

**HW-016**  
Revision Date:

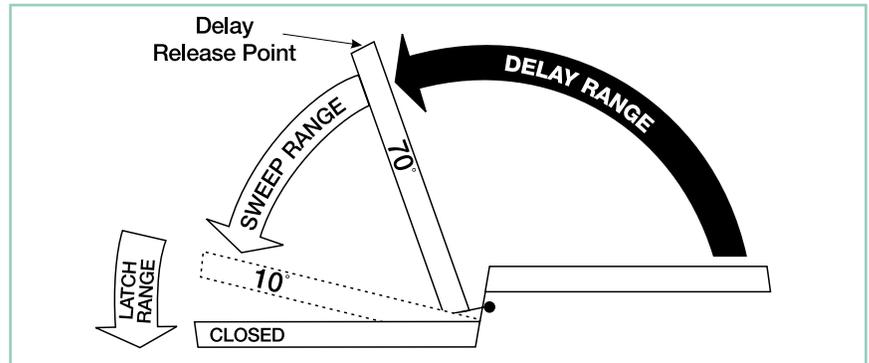

**Adjustable Delayed Action Closing**

An optional hydraulic feature that adds a third speed range to the closing cycle. This feature becomes effective when the door is opened and released at any point beyond 70°. The amount of time delay depends upon the combination of the angle of door release and valve adjustment. The valve can be adjusted with a 1/8" (3mm) hex key from no delay time up to maximum delay times of:

Door Opened	Approximate Time of Delay Cycle
180°	4-5 minutes
120°	2-3 minutes
90°	25-30 seconds

**Pressure Relief Safety Valve**

The delayed action hydraulic system contains a pressure relief valve. Any time the door is forced toward the closed direction while it is in the closing cycle, the valve will open and permit the door to close. This prevents damage to door, frame and closer.

**Suggested Applications**

Delayed Action closing allows slow-moving traffic to clear the opening before the door closer's normal closing cycle begins. This feature can be helpful in health care facilities such as hospitals and nursing homes. It provides sufficient time for persons on crutches or in wheelchairs to pass through a door without concern of it closing. At the same time, it can accommodate the facility's staff with movement of food service carts, beds, and other wheeled traffic.

Use of delayed action closers on many doors throughout industrial and commercial buildings can also assist the flow of traffic. Locations where additional time to clear the opening is advantageous are doors between office and factory/warehouse facilities, doors to workshops or laboratories, to kitchen and food processing areas, etc.

OPTIONAL FEATURES ARMS

**Non-Hold Open**

Self-closes door every time door is opened. Auxiliary stop (by others) required except when using the CloserPlus<sup>®</sup>, CloserPlus Spring<sup>™</sup> or Unitrol<sup>®</sup> arms.

**Hold Open**

Achieved by means of friction or ball and detent/ roller. Friction hold open has a range of 90° to 180° using template location and mechanical adjustment.

Ball and detent or roller hold open is effective in a range of 85° to 110°.

Hold open arm door closers are not permitted to be used on fire door assemblies.

**Door Opening Degrees**

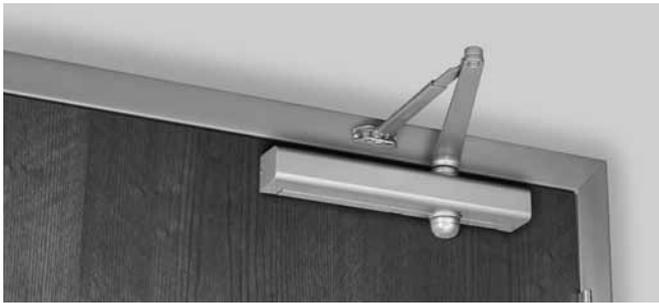

Arm Function	Regular Arm, Top Jamb Parallel Arm	Parallel Rigid Arm	CloserPlus <sup>®</sup> Parallel Arm	CloserPlus Spring <sup>™</sup> Parallel Arm	Unitrol <sup>®</sup> Parallel Arm	Unitrol Top Jamb	Low Profile Regular, Parallel	Slide Track

✓=180° trim and template permitting

APPLICATIONS

HW-016

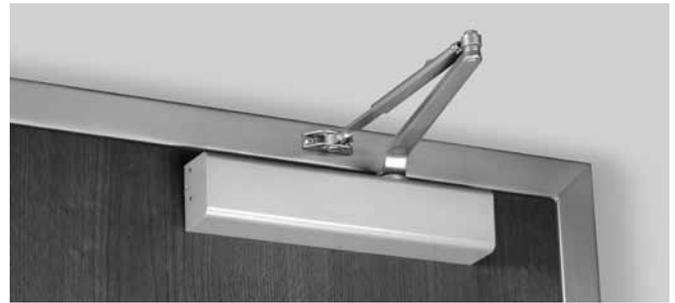

Revision Date:

**Regular Arm**

8301 - slim cover

This is the only pull-side application where a double lever arm is used. It is the most power-efficient application for a door closer. Sufficient frame, door and/or ceiling clearance must be considered.

8501 - full cover

Since the arm assembly projects directly out from the frame, this application may present an aesthetics issue or be prone to vandalism.

**Top Jamb**

For efficiency reasons this application provides the best alternative to the regular arm application. There must be sufficient frame face and/or ceiling clearance for this application. It requires a top rail on the door of just 2-1/4" (57mm). This application provides the best door control for doors in exterior walls that swing out of a building.

**Parallel Arm**

This application provides the most appealing design appearance for a surface-mounted door closer having a double lever arm. This also makes it beneficial in vandalism-prone areas. It is on the push side of the door and the arm assembly extends almost parallel to the door. In the closed position, there is very little or no hardware projecting beyond the frame face in most situations.

Due to the geometry of the arm it is approximately 25% less power efficient than a regular arm application. The entire closer and arm assembly are mounted below the frame stop. Top rail clearance dimensions will vary based on the type of cover used. (See pg. 15)

APPLICATIONS

Non-hold open arm shown

Non-hold open arm shown

**Parallel Rigid Arm**

An enhanced variation of the standard parallel arm assembly that is intended for use in heavy traffic areas where auxiliary door stops are installed.

Hold open available - specify hand when ordering.

**CloserPlus® Arm**

Similar to the Parallel Rigid arm, this arm incorporates a stop at the arm's soffit plate to dead stop the door at a predetermined degree of door swing between 85° and 110°, in 5° increments. Prior to dead stop the door closer's backcheck feature slows the door speed to reduce the impact of the stop action.

The *CloserPlus* Arm is intended for use where an auxiliary door stop cannot be utilized and no more than moderate abuse is anticipated. Where more extreme conditions are expected, use of a *Unitrol* arm is recommended.

Available with or without hold open. (Hold open strength is adjustable.)

Non-hold open arm shown

**CloserPlus Spring™ Arm**

This arm has all the characteristics of the *CloserPlus* arm with an additional steel buffer spring that provides greater protection at the end of the door opening cycle.

For extreme conditions, use of a *Unitrol* arm is recommended. Available with or without hold open.

**CloserPlus Ramp™**

The CLPR uses a patent pending ramp and plunger design that easily slides into place reducing wear often seen on traditional hold open arms. Ideal for applications where the door will constantly be pulled out of hold open.

APPLICATIONS

HW-016

Revision Date:

**Regular Rigid Arm**

This double lever arm features a non-adjustable secondary arm. Orbitally riveted joints prevent tampering or disassembly. Prefix "R" to model number. Available non-hold open only.

**Parallel Rigid Offset Arm**

This heavy-duty parallel rigid arm provides additional vertical clearance. It is well suited for applications where weatherstripping or other hardware prevents the use of the standard Parallel Rigid (PR) soffit plate. The non-hold open and hold arms allow 1-1/4" clearance. When used in conjunction with a #6891 spacer block, the PRO arm provides 1-7/8" clearance to accommodate the use of a surface overhead stop/holder.

Parallel

**Unitrol® Arm**

Can be used for either parallel arm or top jamb applications. *Unitrol* arms combine the features of a double lever arm overhead door stop/holder with the backcheck feature of the door closer to reduce door stopping shock loads to a minimum. The *Unitrol* uses a compression spring buffer at the soffit plate/arm shoe that will absorb 30 lbf. of force, 5° prior to the door's dead stop. Coupled

Top Jamb

with the door closer's backcheck feature, this arm provides the most controlled stop available with a surface door closer. For parallel arm applications there are three different length arm assemblies. Each length is designed for a specific range of door widths, to provide precise door control. This further lessens the dead stop impact on the door's hinges/pivots.

APPLICATIONS

**HW-016**  
Revision Date:

Pull Side

Low Profile Pull Side

Push Side

Low Profile Push Side

**Slide Track**

Whether pull- or push-side mounted, slide track provides the designer with the smoothest lines available in a surface-mounted door closer. The single lever arm allows components to be located in a stack configuration to minimize projection and eliminate obtrusive arm angles. The arm geometry reduces door closer power efficiency by approximately 25% from that of a regular arm.

**Standard unit:**

- Adjustable 85°- 110° (hold open and non-hold open). Track is supplied with a spring buffered stop. An auxiliary stop, by others, is recommended.
- Specify if hold open unit is required.
- 180° swing (non-hold open, pull side only) is also available. This track assembly requires that a door stop, by others, be supplied to stop the door.

Regular Arm

Parallel Arm

**Regular Arm:** Allows closer to be installed where there is as little as 1" (25mm) of frame face or ceiling clearance.

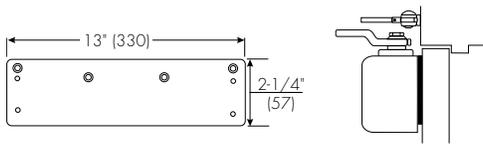

**Parallel Arm:** Allows closer to be installed 1/2" (13mm) higher up on door than standard parallel arm application.

**Low Profile Arm**

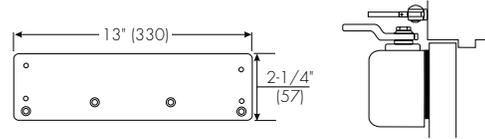

Supplied with 8381/8581 series door closers for non-hold open installations only. Low profile arms have a reduced height elbow joint and a straight main arm. This enables the door closer to be installed in less vertical space.

**Note:** Low profile arm door closers are not supplied with Tri-Style® packaging.

Closer Mounting Plates  
Slim Line Installations

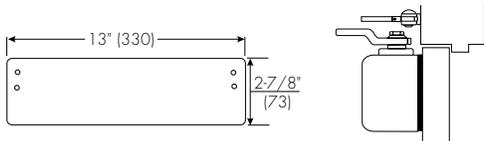

**Narrow Top Rail - #8146 Drop Plate:** For use where the narrow top rail of the door prevents the closer from being mounted directly on to the door surface. This drop plate must be used for any Series 8000 closer mounted on a top rail between 1-9/16" and 2-7/16" (40 and 62mm) in height, or any Series 8080 closer mounted on a top rail between 1-7/16" and 2-5/16" (36 and 59mm) in height.

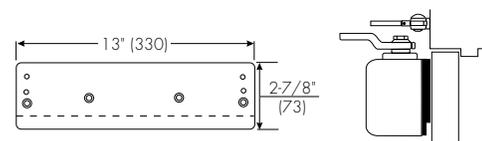

**Concealed Door Holder - #8146 Drop Plate:** For use where a concealed door holder prevents normal mounting of the closer to the door. This is the same plate used for narrow rail mounting, but is inverted for this application to permit the mounting screws to clear the bottom of the door-holder preparation in the top rail of the door. This places the centerline of the plate's upper mounting screws at 2-3/16" (56mm) from the top of the door.

Full Cover Installations

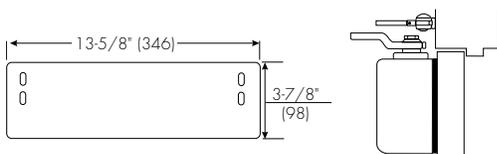

**Exposed Back - #8445 Molded Full Cover Decorative Back Plate:** For use on doors with glass lights where a closer with a molded full cover is installed and the closer back is exposed. This plate covers the back of the installation to give a pleasing appearance from the reverse side.

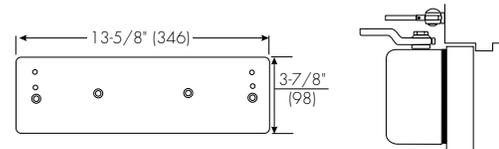

**Exposed Back/Narrow Top Rail - Exposed Back Concealed Door Holder - #8446 Molded Full Cover Drop Plate Kit:** For use with molded full cover installation when an 8146 Plate is needed as a drop plate on a narrow top rail, or as a clearance plate for a concealed door holder, and the closer back is exposed. Kit contains an 8146 Drop Plate and an 8445 Decorative Plate.

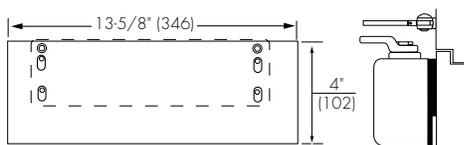

Metal Cover Installations

**Exposed Back - #8545 Metal Cover Decorative Back Plate:** For use on doors with glass lights where a closer with a metal full cover is installed and the closer back is exposed. This plate covers the back of the installation to give a pleasing appearance from the reverse side.

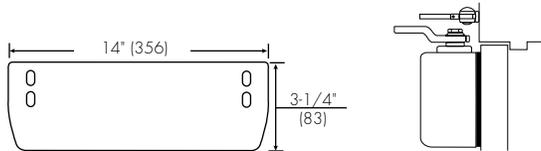

**Concealed Door Holder - #8546 Metal Cover Drop Plate:** For use where a concealed door holder prevents the normal mounting of the closer to the door. This plate permits the mounting screws to clear the bottom of the door-holder preparation in the top rail of the door. This places the centerline of the plate's upper mounting screws at 2-3/16" (56mm) from the top of the door.

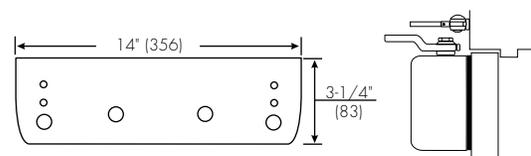

**Exposed Back/Narrow Top Rail - #8549 Metal Cover Drop Plate Kit:** For use with metal full cover installations, when an 8146 Plate is needed as a drop plate on a narrow top rail and the closer back is exposed. Kit contains an 8146 Drop Plate and an 8545 Decorative Plate.

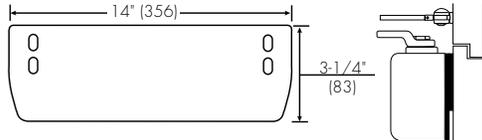

**Closer Mounting Plates**  
Architectural Plastic or Metal Cover Installations

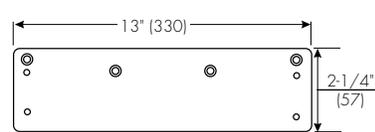

**Exposed Back - #8545A Architectural Plastic or Architectural Metal Cover Decorative Back Plate:** For use on doors with glass lights where a closer with an architectural plastic or metal cover is installed and the closer back is exposed. This plate covers the back of the installation to give a pleasing appearance from the reverse side.

**Concealed Door Holder - #8546A Architectural Plastic or Architectural Metal Cover Drop Plate:** For use where a concealed door holder prevents the normal mounting of the closer to the door. This plate permits the mounting screws to clear the bottom of door-holder preparation in the top rail of the door. This places the centerline of the plate's upper mounting screws at 2-3/16" (56mm) from the top of the door.

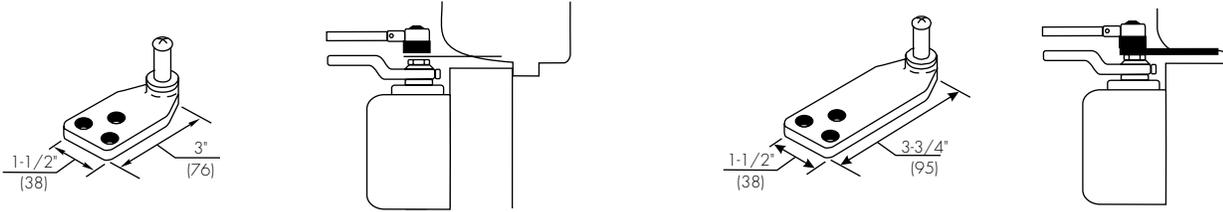

**Exposed Back/Narrow Top Rail - #8549A Architectural Plastic or Architectural Metal Cover Drop Plate Kit:** For use with architectural plastic or metal cover installations when an 8146 plate is needed as a drop plate on a narrow top rail and the closer back is exposed. Kit contains an 8146 Drop Plate and an 8545A Decorative Plate.

REGULAR ARM

**HW-016**  
Revision Date:

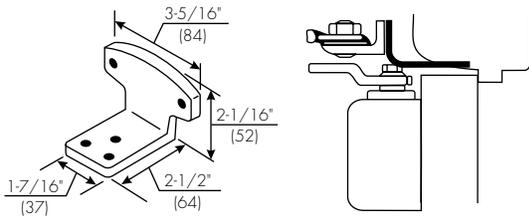

Brackets for Non-Hold Open Arms

**Molded/Bull Nose Trim - #2403B Bracket:** For use where the door frame has molded or bull nose trim which will not accept a standard non-hold open shoe. The bracket is mortised into the frame rabbet, and projects beyond the face of the frame. It will accommodate a frame rabbet up to 2" (51mm) deep.

**Molded / Bull Nose Trim - #2403-3/4 Bracket:** This bracket is similar to, but longer than, the 2403B bracket. It is designed to accommodate frame rabbets from 2" to 2-7/8" (51 to 73mm) deep.

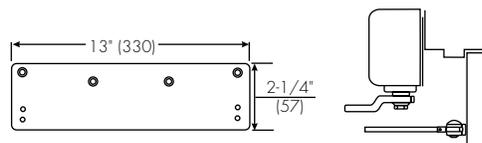

Brackets for Hold Open Arms

**Molded / Bull Nose Trim - #80 Bracket:** For use where the door frame has molded or bull nose trim which will not accept a standard hold open shoe. It is mortised into the frame rabbet, and projects beyond the face of the frame. It will accommodate a rabbet up to 2" (51mm) deep. This bracket is used in combination with the standard hold-open mounting shoe.

TOP JAMB ARM

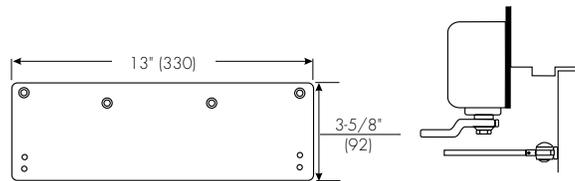

Closer Mounting Plates  
Slim Line Installations

**Low Ceiling Clearance - #8146 Drop Plate:** For use where low ceiling clearance prevents normal top jamb mounting. This plate is used when clearance is from 1-7/8" to 2-7/8" (48 to 73mm). Where ceiling clearance is less than 1-7/8" (48mm) see #8148 Drop Plate on page 30.

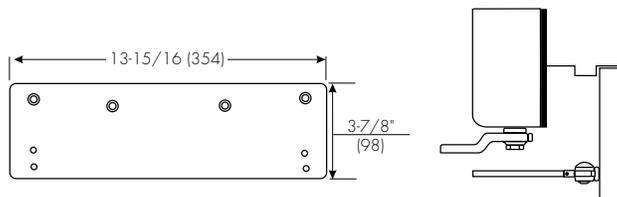

**Overhead Door Holder - #8146 Drop Plate:** For use where a surface or concealed overhead door holder prevents normal top jamb mounting. This plate drops the closer and allows arm mounting screws to clear the bottom of the door holder. This places the centerline of the arm mounting screws at 2-7/8" (73mm) from the top of the door.

**Closer Mounting Plates  
Slim Line Installations**

**Low Ceiling Clearance - #8148 Drop Plate:** For use where the ceiling clearance is between 1-1/2" and 1-3/4" (38 and 44mm).

**Metal Cover Installations**

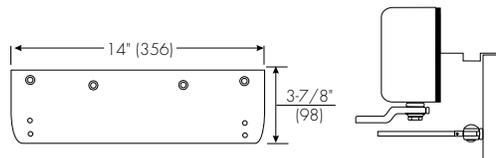

**Low Ceiling Clearance -  
Overhead Door Holder -**

**#8547 Metal Full Cover Drop Plate:** For use where a low ceiling clearance prevents normal top jamb mounting. This plate is used when the clearance is between 1-5/8" and 3-7/8" (41 and 98mm). Or for use where a surface or concealed overhead door holder prevents normal top jamb mounting of a

closer with a metal full cover. This plate drops the closer and allows arm mounting screws to clear the bottom of the door holder. This places the centerline of the arm mounting screws at 3-7/8" (98mm) from the top of the door.

**Architectural Plastic or Metal Cover Installations**

**Low Ceiling Clearance -  
Overhead Door Holder -**

**#8547A Architectural Plastic or Architectural Metal Cover Drop Plate:** For use where low ceiling clearance prevents normal top jamb mounting. This plate is used when the clearance is between 1-5/8" and 3-7/8" (41 and 98mm). Also for use where a surface or concealed overhead door holder prevents normal top jamb mounting of a closer with an

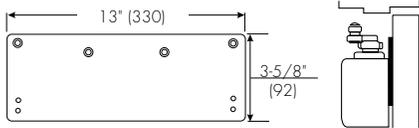

architectural plastic or metal full cover. This plate drops the closer and allows arm mounting screws to clear the bottom of the door holder. This places the centerline of the arm mounting screws at 3-7/8" (98mm) from the top of the door.

PARALLEL ARM

**HW-016**

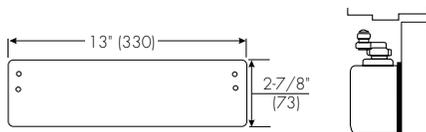

Revision Date:

## Closer Mounting Plates Slim Line Installations

**Narrow Top Rail - #8148 Drop Plate:** For use where a narrow top rail prevents the closer from being mounted directly to the door surface. This drop plate can be used to mount a closer on a top rail as narrow as 2-7/8" (73mm) in height.

## Full Cover Installations

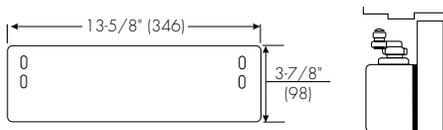

**Exposed Back - #8445 Molded Full Cover Decorative Back Plate:** For use on doors with glass lights where a closer with molded full cover is installed and the closer back is exposed. This plate covers the back of the installation to give a pleasing appearance from the reverse side.

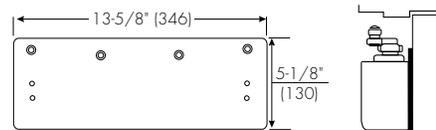

**Exposed Back/Narrow Top Rail - #8158 Molded Full Cover Drop Plate:** For use on doors with glass lights where a closer with molded full cover is installed and the back of the closer is exposed. This covers the back of the installation and gives a pleasing appearance from the reverse side.

## Metal Cover Installations

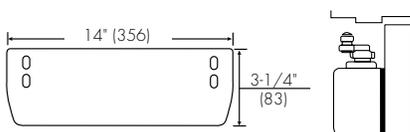

**Exposed Back - #8545 Metal Full Cover Decorative Back Plate:** For use on doors with glass lights where a closer with full metal cover is installed and the back of the closer is exposed. This plate covers the back of the installation and gives a pleasing appearance from the reverse side.

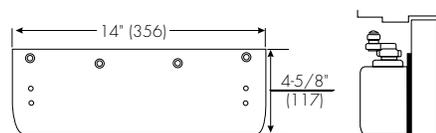

**Exposed Back/Narrow Top Rail - #8548 Metal Full Cover Drop Plate:** For use on doors with glass lights where a closer with metal full cover is installed on a narrow top rail, and the back of the cover is exposed. This drop plate can be used to mount a closer on a top rail as narrow as 2-7/8" (73mm) in height. This plate covers the back of the installation and gives a pleasing appearance from the reverse side.

## Architectural Plastic or Metal Cover Installations

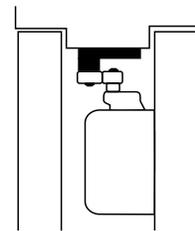

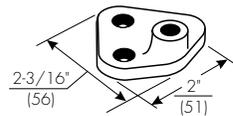

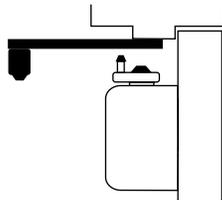

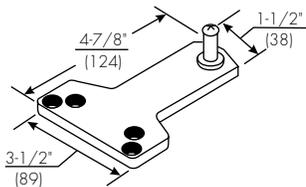

**Exposed Back - #8545A Architectural Plastic or Architectural Metal Cover Decorative Back Plate:** For use on doors with glass lights where a closer with an architectural plastic or metal cover is installed and the closer back is exposed. This plate covers the back of the installation to give a pleasing appearance from the reverse side.

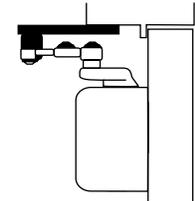

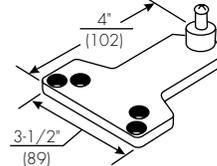

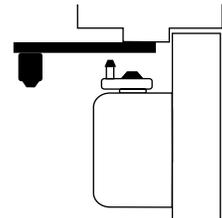

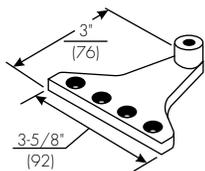

**Exposed Back/Narrow Top Rail - #8548A Architectural Plastic or Architectural Metal Cover Drop Plate:** For use on doors with glass lights where a closer with an architectural plastic or metal cover is installed on a narrow top rail, and the back of the cover is exposed. This drop plate can be used to mount a closer on a top rail as narrow as 2-7/8" (73mm) in height. This plate covers the back of the installation to give a pleasing appearance from the reverse side.

Brackets for Non-Hold Open Arms

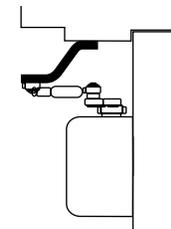

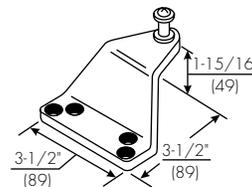

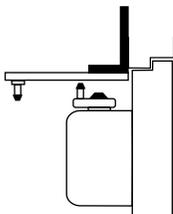

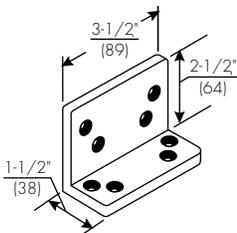

**Standard Installation - #1618A Soffit Plate:** This soffit plate is supplied standard with parallel arm closers. It can be mounted where the frame soffit is as narrow as 1" (25 mm).

**Mounting between Doors - #2018 Soffit Bracket:** For use where insufficient space between companion doors does not permit use of other soffit plates. This bracket permits mounting of the closer between doors with as little as 3" (76mm) of header space. Permits closer arm to clear up to 5/8" (16mm) high stop.

**Narrow Frame/Removable Stop - #2018B Soffit Plate:** For use where a narrow frame or frame with removable stop does not permit use of the standard soffit plate. This soffit plate may be mounted on the frame soffit or the frame rabbet where the stop does not exceed 5/8" (16mm) in height. All of the screw holes are in a straight line, requiring as little as 1-1/4" (32mm) of frame reveal to mount bracket and maintain good closer arm geometry. Where the frame soffit is as wide as 2" (51mm), this soffit plate may be used to clear weather-stripping that is up to 1-3/8" (35mm) wide and 5/8" (16mm) in height.

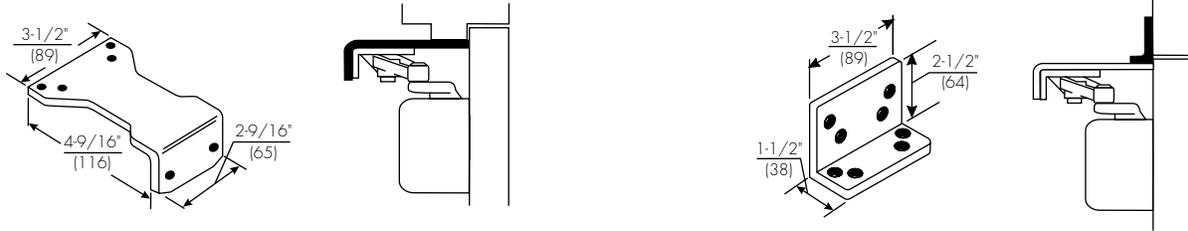

**Blade/Applied Stop - #2018D Soffit Plate:** For use where a blade or applied stop does not permit installation of the standard soffit plate. Mounts to either the frame soffit or rabbet. Since this soffit plate projects 7/8" (22mm) less than a standard soffit plate, it requires a minimum frame reveal of 1-1/2" (38mm). Permits closer to clear up to a 5/8" (16mm) stop.

**Flush Transom - #2022 Angle Bracket:** For use where rabbeted or flush transom conditions prevent installation of a soffit plate. Used in combination with the 1618 soffit plate, or may be used in combination with the 2018S soffit plate when it is necessary for the closer arm to clear a separate overhead door holder.

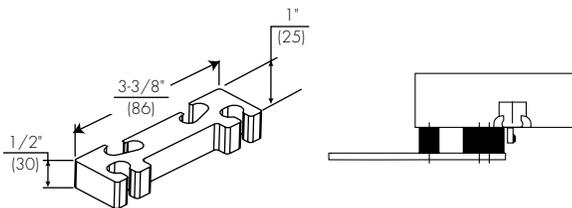

**Extra-Clearance - #2018S Offset Soffit Plate:** For use where the need for additional clearance prevents use of the standard soffit plate. This plate mounts to the frame soffit to provide up to 2" (51mm) of clearance when a separate overhead door holder is used. Standard mounting requires a 2-5/8" (67mm) wide frame soffit. It may also be used where unusually high frame stops or weather-stripping prevent the use of other soffit plates.

Brackets for Non-Hold Open & Hold Open Arms

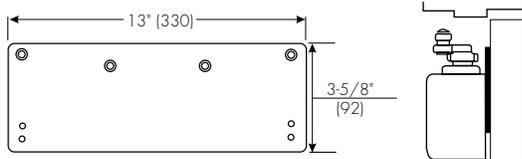

**Parallel Hold-Open - #1628H Adapter Plate:** Supplied standard with all parallel arm hold open closers. It can also be used to convert regular arm or top jamb hold open arms to parallel arm installation. It can be mounted where the frame soffit is as narrow as 1" (25mm).

**Flush Transom - #2022 Angle Bracket:** For use where rabbeted or flush transom conditions prevent installation of a soffit plate. Used in combination with the 1628H adapter plate, this bracket fastens to the overhead transom to provide a mounting surface for the soffit plate assembly.

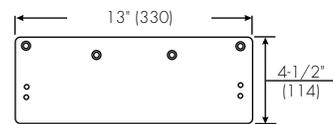

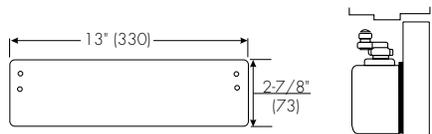

**Clearance/Support Blade Stop - #6891 Spacer Block:** For use where the door frame has a blade stop and the soffit plate must be mounted on the frame rabbet. This accessory is used in combination with the standard spacer block to provide clearance of the blade stop. Also used with non-hold open arms.

Closer Mounting Plates  
Slim Line Installations

**Narrow Top Rail - #8148 Drop Plate:** For use where a narrow top rail prevents the closer from being mounted directly to the door surface. This drop plate can be used to mount a closer on a top rail as narrow as 2-9/16" (65mm) in height.

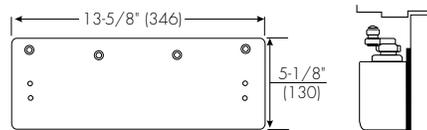

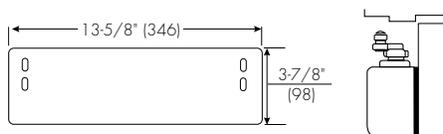

Full Cover Installations

**Exposed Back - #8445 Molded Full Cover Decorative Back Plate:** For use on doors with glass lights where a closer with molded full cover is installed and the closer back is exposed. This plate covers the back of the installation to give a pleasing appearance from the reverse side.

**Exposed Back/Narrow Top Rail - #8158 Molded Full Cover Drop Plate:** For use on doors with glass lights where a closer with molded full cover is installed and the back of the closer is exposed. This covers the back of the installation and gives a pleasing appearance from the reverse side.

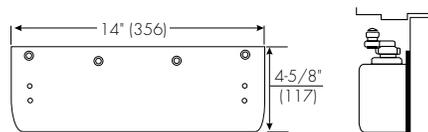

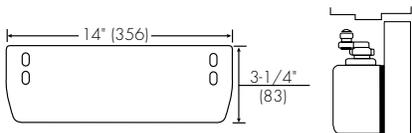

Metal Cover Installations

**Exposed Back - #8545 Metal Full Cover Decorative Back Plate:** For use on doors with glass lights where a closer with full metal cover is installed and the back of the closer is exposed. This plate covers the back of the installation and gives a pleasing appearance from the reverse side.

**Exposed Back/Narrow Top Rail - #8548 Metal Full Cover Drop Plate:** For use on doors with glass lights where a closer with metal full cover is installed on a narrow top rail, and the back of the cover is exposed. This drop plate can be used to mount a closer on a top rail as narrow as 2-9/16" (65mm) in height. This plate covers the back of the installation and gives a pleasing appearance from the reverse side.

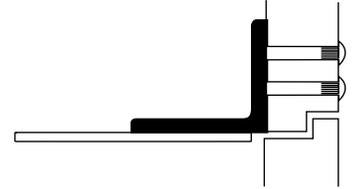

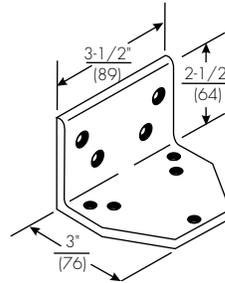

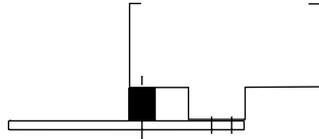

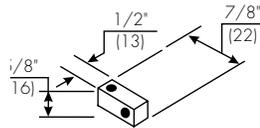

Architectural Plastic or Metal Cover Installations

**Exposed Back - #8545A Architectural Plastic or Architectural Metal Cover Decorative Back Plate:** For use on doors with glass lights where a closer with an architectural plastic or metal cover is installed and the closer back is exposed. This plate covers the back of the installation to give a pleasing appearance from the reverse side.

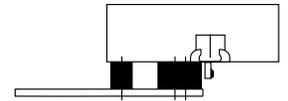

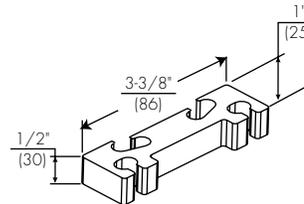

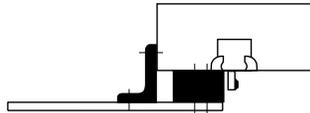

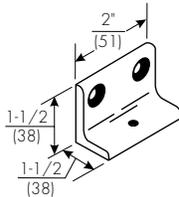

**Exposed Back/Narrow Top Rail - #8548A Architectural Plastic or Architectural Plastic or Architectural Metal Cover Drop Plate:** For use on doors with glass lights where a closer with an architectural plastic or metal cover is installed on a narrow top rail, and the back of the cover is exposed. This drop plate can be used to mount a closer on a top rail as narrow as 2-9/16" (65mm) in height. This plate covers the back of the installation to give a pleasing appearance from the reverse side.

Brackets for Non-Hold Open Arms & Hold Open Arms

**Standard - #2019S Spacer Block:** For use where a narrow frame soffit does not provide adequate support for the soffit plate. Supplied as standard with all parallel rigid arm closers.

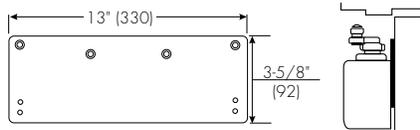

**Flush Rabbeted Transom - #2019L Angle Bracket:** For use where flush transom conditions prevent mounting of the standard soffit plate. This bracket is used in combination with the standard soffit plate.

**Narrow Frame - #6890 Support Bracket:** For use where the frame is narrow and the soffit plate cannot be mounted directly to the frame soffit or rabbet. Used in combination with the #6891 Spacer Block on blade stop frames to provide extra support and needed clearance of the blade stop. Used on frames where the frame stop does not exceed 5/8" (16mm) in height.

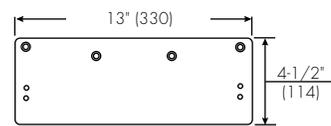

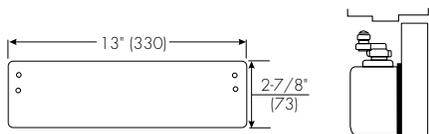

**Clearance/Support Blade Stop - #6891 Spacer Block:** For use where the door frame has a blade stop and the soffit plate must be mounted on the frame rabbet. This accessory is used in combination with the standard spacer block to provide clearance of the blade stop.

Closer Mounting Plates  
Parallel Arm

**Narrow Top Rail - #8148 Drop Plate:** For use where a narrow top rail prevents the closer from being mounted directly to the door surface. This drop plate can be used to mount a closer on a top rail as narrow as 2-7/16" (62mm) in height.

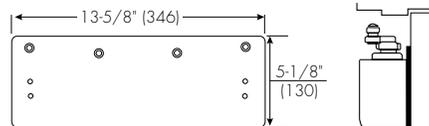

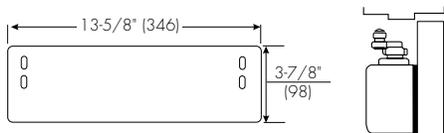

Full Cover Installations

**Exposed Back - #8445 Molded Full Cover Decorative Back Plate:** For use on doors with glass lights where a closer with molded full cover is installed and the closer back is exposed. This plate covers the back of the installation to give a pleasing appearance from the reverse side.

**Exposed Back/Narrow Top Rail - #8158 Molded Full Cover Drop Plate:** For use on doors with glass lights where a closer with molded full cover is installed and the back of the closer is exposed. This covers the back of the installation and gives a pleasing appearance from the reverse side.

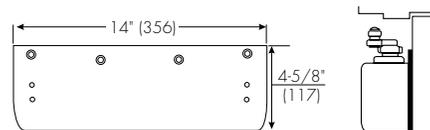

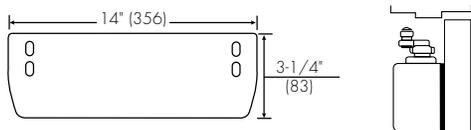

Metal Cover Installations

**Exposed Back - #8545 Metal Full Cover Decorative Back Plate:** For use on doors with glass lights where a closer with full metal cover is installed and the back of the closer is exposed. This plate covers the back of the installation and gives a pleasing appearance from the reverse side.

**Exposed Back/Narrow Top Rail - #8548 Metal Full Cover Drop Plate:** For use on doors with glass lights where a closer with metal full cover is installed on a narrow top rail, and the back of the cover is exposed. This drop plate can be used to mount a closer on a top rail as narrow as 2-9/16" (65mm) in height. This plate covers the back of the installation and gives a pleasing appearance from the reverse side.

Architectural Plastic or Metal Cover Installations

**Exposed Back - #8545A Architectural Plastic or Architectural Metal Cover Decorative Back Plate:** For use on doors with glass lights where a closer with an architectural plastic or metal cover is installed and the closer back is exposed. This plate covers the back of the installation to give a pleasing appearance from the reverse side.

**Exposed Back/Narrow Top Rail - #8548A Architectural Plastic or Architectural Plastic or Architectural Metal Cover Drop Plate:** For use on doors with glass lights where a closer with an architectural plastic or metal cover is installed on a narrow top rail, and the back of the cover is exposed. This drop plate can be used to mount a closer on a top rail as narrow as 2-7/16" (62mm) in height. This plate covers the back of the installation to give a pleasing appearance from the reverse side.

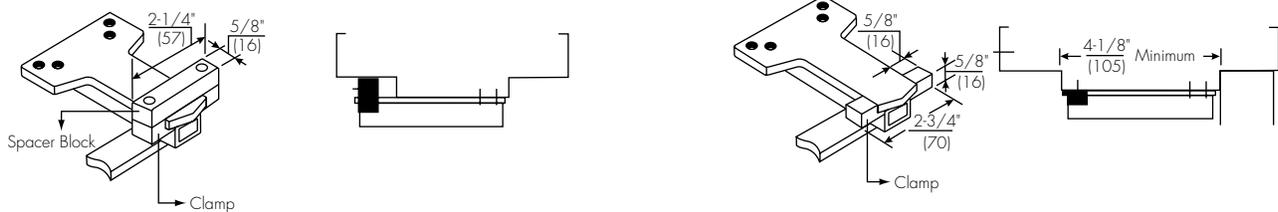

Closer Mounting Plate

Soffit Plate Reinforcing Brackets (for Parallel Arm)

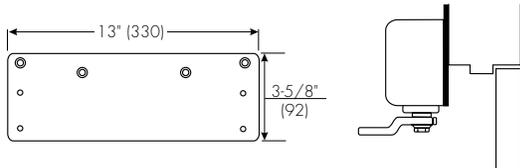

**Additional Support - #6190 Reinforcing Bracket:** Standard for use with all parallel arm *Unitrol* door controls. Provides additional support to the soffit plate on installations with door frame reveals from 1-7/8" to 4-5/8" (48 to 117mm).

**Flush Rabbeted Transom - #2022 Angle Bracket:** Optional for use with all parallel arm *Unitrol* door controls. For use where rabbeted or flush transom conditions prevent installation of the soffit plate assembly. This bracket fastens to the overhead transom to provide a mounting surface for the soffit plate assembly.

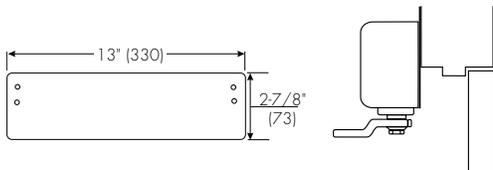

**Wide Frame - #6191 Reinforcing Kit:** Optional for use with all parallel arm *Unitrol* door controls. Used to support the soffit plate on installations with wide frames. Clamps may be used with or without the spacer block, depending on frame conditions.

Closer Mounting Plates  
Top Jamb

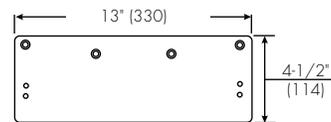

**Narrow Top Rail - #8148 Drop Plate:** For use where a narrow top rail prevents the closer from being mounted directly to the door surface. This drop plate can be used to mount a closer on a top rail as narrow as 2-7/16" (62mm) in height.

Full Cover Installations

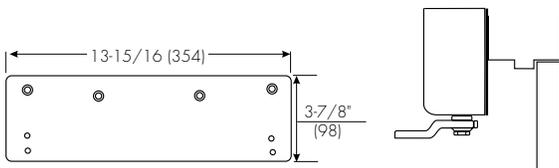

**Exposed Back - #8445 Molded Full Cover Decorative Back Plate:** For use on doors with glass lights where a closer with molded full cover is installed and the closer back is exposed. This plate covers the back of the installation to give a pleasing appearance from the reverse side.

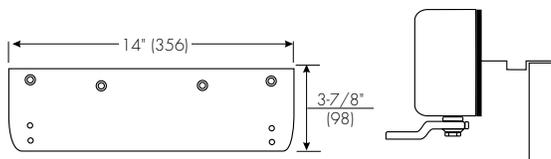

**Exposed Back/Narrow Top Rail - #8158 Molded Full Cover Drop Plate:** For use on doors with glass lights where a closer with molded full cover is installed and the back of the closer is exposed. This covers the back of the installation and gives a pleasing appearance from the reverse side.

Metal Cover Installations

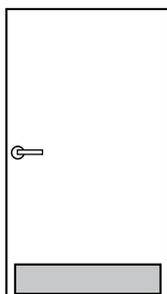

**Low Ceiling Clearance - Overhead Door Holder - #8547 Metal Full Cover Drop Plate:** For use where a low ceiling clearance prevents normal top jamb mounting. This plate is used when the clearance is between 1-5/8" and 3-3/4" (41 and 95mm). Or for use where a surface or concealed overhead door holder prevents normal top jamb mounting of a closer with a metal full cover. This plate drops the closer and allows arm mounting screws to clear the bottom of the door holder. This places the centerline of the arm mounting screws at 3-7/8" (98mm) from the top of the door.

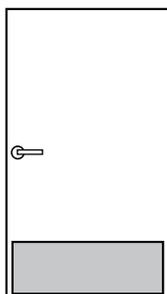

Architectural Plastic or Metal Cover Installations

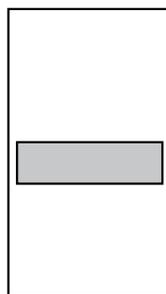

**Low Ceiling Clearance - Overhead Door Holder - #8547A Architectural Plastic or Architectural Metal Cover Drop Plate:** For use where low ceiling clearance prevents normal top jamb mounting. This plate is used when the clearance is between 1-5/8" and 3-3/4" (41 and 95mm). Or for use where a surface or concealed overhead door holder prevents normal top jamb mounting of a closer with an architectural plastic or metal full cover. This plate drops the closer and allows arm mounting screws to clear the bottom of the door holder. This places the centerline of the arm mounting screws at 3-7/8" (98mm) from the top of the door.

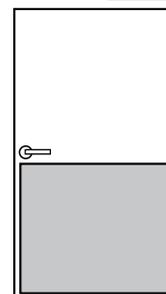

**Mop Plate**  
Up to 6" h x 48" w

**Kick Plate**  
6" to 12" h x 48" w

**Stretcher Plate**  
6" to 12" h and up to 48" w

**Armor Plate**  
Up to 48" h x 48" w and available in most finishes

**Width of Plates:**

Push Side: 2" less than door width. Pull Side: 1 1/2" less than door width.

**NFPA 80 STANDARDS — 2-4.5 Protection Plates:** Factory-installed protection plates shall be installed in accordance with the listing of the door. Field-installed protection plates shall be labeled and installed in accordance with their listing.

Exception: Labeling is not required where the top of the protection plate is not more than 16" (406 mm) above the bottom of the door.

**OPTIONAL**  
Self-Drilling TEK  
Screws  
Cuts door plate  
installation time in half.

## Metal Door Plate – Economy Duty No. K1038

**Material:** .038" aluminum, stainless steel

**Finishes:** Brass look aluminum (BRS LK), US32D, and US3**LIFETIME**

**Fastener:** #6 x 5/8" OH SMS

**Ordering:** Specify height x width x finish code. Add any options

**Weight:** 8" x 34" = 3.2 lbs

- Options:**
- SA – self-adhesive mounting
  - TORX – security Torx screws
  - TEK – self-drilling screws
  - Cutouts for locks, louvers, or windows (see worksheets on pages C14-C15 for details on how to order)

## Metal Door Plate – Standard Duty No. K1050, K1050F

**Material:** .050" aluminum, brass, bronze, stainless steel

**Finishes:** Available in standard architectural finishes, US32D**MS**, US32D**316**, and US32**316** (see page 9)

**Fastener:** #6 x 5/8" OH SMS

**Ordering:** Specify height x width x finish code. Add any options

**Weight:** 8" x 34" = 4.0 lbs

**ANSI:** J101 - metal armor plate, J102 - metal kick plate, J103 - metal stretcher & mop plate

- Options:**
- SA – self-adhesive mounting
  - TEK – self-drilling screws
  - Beveled 3 or 4 edges, specify B3E or B4E
  - Cutouts for locks, louvers, or windows (see worksheets on pages C14-C15 for details on how to order)
  - Heavy bevel available, specify HVBEV
  - Screw mounting (K1050F) and UL listed for use on 90-minute label wood doors and 3-hour label metal doors
  - CSK – countersunk holes
  - TORX – security Torx screws

**ASSA ABLOY**

The global leader in  
door opening solutions

## securex®

### operation

Electric locks provide the ability to electrically lock or unlock the outside trim from a remote location. Fail Safe locks are commonly used in stair towers to release upon fire alarm activation. Fail Secure locks are used on perimeter doors or security doors to allow ingress using access control technologies (proximity cards, keypads, etc.)

### features

- Free Wheeling lever mechanism.
- Self-contained, continuous-duty integral solenoid (allows installation in standard cylindrical prep).
- Available Fail Safe or Fail Secure.
- Available in 12 or 24 volts DC.
- External rectifier available upon request for AC operation.
- Mechanical cylinder override.
- All 5400LN cylinder options.
- Certified ANSI/BHMA Grade 1.
- UL listed.
- 2-year limited warranty.

### REX

Request to Exit - Operating inside lever handle triggers REX switch which can be used to shunt an alarm, monitor egress or release a magnetic lock, etc.

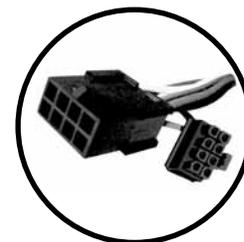

### electrical specifications

- Continuous duty solenoid  
150 mA @ 24VDC  
300 mA @ 12VDC
- REX (SPDT) Contact Rating:  
3A @ 125 VAC  
2A @ 24 VDC

### electrolynx®

Yale® electrified 5400LN locks are equipped with *ElectroLynx* connectors. As a standard feature, these connectors link power from the incoming source to electrified locking products, including hinges, locks, exit devices, magnetic holders and strikes.

**Note: Electrified door hardware with *ElectroLynx* connectors requires a compatible number of lead wires attached to the door hinge.**

### functions

Outside	Inside	Function	Function Description
		5490LN	<b>Fail Safe</b> <ul style="list-style-type: none"> <li>• Power on locks outside lever.</li> <li>• Inside lever always active.</li> <li>• Latchbolt retracted by key when locked electrically.</li> <li>• Free Wheeling lever when locked electrically.</li> </ul>
		5491LN	<b>Fail Secure</b> <ul style="list-style-type: none"> <li>• Power on unlocks outside lever.</li> <li>• Inside lever always active.</li> <li>• Latchbolt retracted by key when power is off.</li> <li>• Free Wheeling lever when power is off (locked).</li> </ul>

## securex® accessories

### BPS power supplies by securitron®

#### Operation

Power supplies are designed to provide reliable filtered and regulated power for long life to a variety of electrified hardware components.

#### Product Features

- Individual output circuit breakers
- Regulated and filtered fuse protected outputs
- LEDs monitor zone status (voltage or no voltage)
- Slide switches connect or disconnect load from power (Not available on 1 Amp supplies)
- Internal Back-Up battery charging circuit
- Rugged steel enclosure
- Fire alarm interface

#### Listings

- UL CLASS 2

#### Applications (use with):

- Fail Safe cylindrical locks
- Fail Secure cylindrical locks

#### Ordering

Ex: BPS-24-4, BPS-12-3

Model	Input	Output	Application
BPS-24-1	120 VAC	1 Amp @ 24 VDC	2-5400LN
BPS-24-2	120 VAC	2 Amp @ 24 VDC	5-5400LN
BPS-24-4	120 VAC	4 Amp @ 24 VDC	11-5400LN
BPS-12-1	120 VAC	1 Amp @ 12 VDC	1-5400LN
BPS-12-3	120 VAC	3 Amp @ 12 VDC	3-5400LN

Consult factory for additional power supply applications.

Yale recommends McKinney®, Pemko and Securitron® for power transfer devices and other electronic accessories.

### Securitron PowerJump™ ICPT

The Securitron PowerJump ICPT Inductive Coupling Power Transfer delivers power contactlessly and invisibly between the frame and door to power electrified hardware on the door. The PowerJump can be installed at the latch side or hinge side of the door and transfers up to 6 watts of power without pins or wires across the door gap, eliminating points of vulnerability and wear ... and no need to core drill the door. The PowerJump is field selectable for 12VDC or 24VDC systems and is ideal for fail secure applications. The unit can hold electrified latches open in continuous duty or can momentarily energize the lockset for latch retraction.

Additional information regarding this product can be found at [www.securitron.com](http://www.securitron.com).

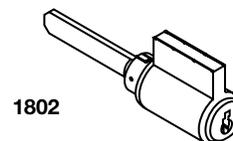

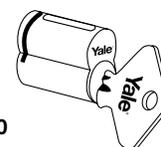

## cylinders

### cylinder options

The following selection guide indicates the correct cylinder for each locking segment.

Lockset Series: 5400LN		Types of Cylinder Mechanisms								
		Conventional		Protected Keyway		Security		High Security		
Cylinder Types	Fixed Core	6-pin	7-pin	6-pin	7-pin	6-pin	7-pin	6-pin	7-pin	
	Key-In-Lever	1802	1802A	K402	K402	5802	5802A	N/A	N/A	
	<b>Interchangeable Core</b>									
	LFIC	1210	1220	K800	K800	5210	5220	N/A	N/A	
SFIC	N/A	N/A	K600	K600	N/A	N/A	N/A	N/A		

Refer to Yale® KeyMark® and/or Cylinders and Keys Catalog sections for all details and how to order examples.

**1802**

**1210**

### Yale® KeyMark®

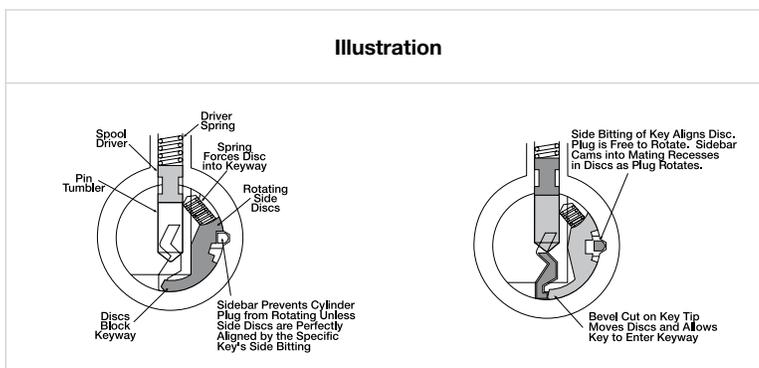

For those applications requiring protected key control, Yale® KeyMark® cylinders guard against unauthorized key duplication. The *Yale KeyMark Security Leg®* keyway feature increases resistance against picking and impressioning and can easily retrofit into existing systems. For further details and availability, refer to the separate *Yale KeyMark* catalog.

### security cylinders

Security cylinders contain two independent locking mechanisms. The first is a traditional 6- or 7-pin tumbler mechanism with spool drivers for greatly increased picking resistance.

The second is an innovative 5-tumbler rotating disc mechanism with sidebar engagement. The rotating discs are spring loaded and block the bottom of the keyway.

## latchbolts

### plain latchbolts

Model No. 693 supplied standard with all 5400LN series locksets without locking function. Standard plain latchbolt has a 2-1/4" (57mm) x 1-1/8" (29mm) beveled front with a 2-3/4" (70mm) backset and a 1/2" (13mm) bolt throw. Optional latchbolts with a greater backset/throw available to special order.

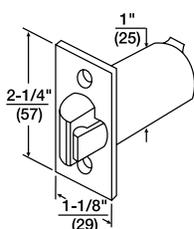

Model No.	Front	Backset	Throw	Front Width	Latch Diameter
693	Beveled	2-3/4" (70mm)	1/2" (13mm)	1-1/8" (29mm)	1" (25mm)
F693	Flat	2-3/4" (70mm)	1/2" (13mm)	1-1/8" (29mm)	1" (25mm)
3693	Beveled	3-3/4" (95mm)	1/2" (13mm)	1-1/8" (29mm)	1" (25mm)

**Note: for 3/4" throw applications, only deadlocking latchbolts available.**

### deadlocking latchbolts

Deadlocking latchbolt Model No. 694 supplied standard with all 5400LN series locksets with locking function. Standard deadlocking latchbolt has a 2-1/4" (57mm) x 1-1/8" (29mm) beveled front with a 2-3/4" (70mm) backset and a 1/2" (13mm) bolt throw. Optional latchbolts with a greater backset/throw available to special order.

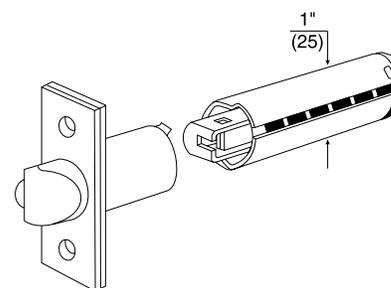

Model No.	Front	Backset	Throw	Front Width	Latch Diameter
694	Beveled	2-3/4" (70mm)	1/2" (13mm)	1-1/8" (29mm)	1" (25mm)
F694	Flat	2-3/4" (70mm)	1/2" (13mm)	1-1/8" (29mm)	1" (25mm)
3694	Beveled	3-3/4" (95mm)	1/2" (13mm)	1-1/8" (29mm)	1" (25mm)
480B	Beveled	2-3/4" (70mm)	3/4" (19mm)	1-1/8" (29mm)	1" (25mm)
F480B	Flat	2-3/4" (70mm)	3/4" (19mm)	1-1/8" (29mm)	1" (25mm)
3480B	Beveled	3-3/4" (95mm)	3/4" (19mm)	1-1/8" (29mm)	1" (25mm)

**Note: For 2-3/8" backset, contact Customer Support.**

### backset extension links

All 5400LN Series locksets are supplied with standard latchbolts of 2-3/4" (70mm) backset; optional latchbolts with a 3-3/4" (95mm) backset are available to special order. Extension links are also available for attachment to 2-3/4" (70mm) or 3-3/4" (95mm) backset latchbolts to extend the backset to the desired length.

Desired Backset	Latchbolt Backset	Order Extension List No.
5" (127mm)	2-3/4" (70mm)	481DL
6" (152mm)	3-3/4" (95mm)	481
7" (178mm)	2-3/4" (70mm)	482
8" (203mm)	3-3/4" (95mm)	482
18" (46cm)	2-3/4" (70mm)	484
19" (48cm)	3-3/4" (95mm)	484

**Other extension links up to 42" (1.06m) backset are available to special order.**

### attaching screws

(Not regularly supplied when latchbolts ordered separately).

- **For all latchbolts**

#8-8-32 x 3/4" (19mm) Phillips flat head combination wood and machine screws  
 Brass - P/N 81-2022-0416\*  
 Bronze - P/N 81-2032-0416\*

- **Hollow Metal Doors**

#8 - 32 x 1" (25mm) Phillips flat head machine screw  
 Brass - P/N 81-0022-0420\*  
 Bronze - P/N 81-0032-0420\*

**\*Specify finish required.**

## strikes

Yale® 5400LN locks are available with a variety of strike options. All strikes are located on the same vertical and horizontal center lines as the latchbolt. Some strikes are available in special lip lengths to accommodate varying thickness of doors and frames. To determine the proper length of the lip, measure from the center line of the strike to the edge of the jamb, accounting for any interfering trim (i.e. wood molding) and then add 1/4" (6mm) for curved lip. All strikes are reversible. Strikes are fabricated of either brass, bronze or stainless steel, depending on the lockset trim finish. When ordering strikes separately, specify the finish required.

<p><b>Model No. 497 ANSI Strike (Standard)</b>                  1-1/4" supplied standard. 1-1/8", 1-1/2", and 1-3/4" lip lengths available by special order. For door and frames with ANSI/BHMA A156.115 preparations.</p>	<p><b>Model No. 371 T-Strike (Optional)</b>                  1-1/4" curved lip supplied standard. 1", 1-1/2", 1-3/4", and 2" curved lip lengths available by special order. Wrought strike box supplied.</p>	<p><b>Model No. 497B Blank ANSI Strike (Optional)</b>                  Available to special order. Installed in frame with standard ANSI/BHMA A156.115 preparation to replace the strike when the lockset has been removed from the door.</p>	<p><b>Model No. 202 Strike Box for ANSI Strike (Optional)</b>                  Specify 497 x 202</p>

## attaching screws

(Not regularly supplied when strikes ordered separately).

**For Model No. 371 strike**

#8-8-32 x 3/4" (19mm) Phillips flat head combination wood and machine screw P/N-81-2012-0416.

**For Model No. 497 strike and 497B plate**

#12-12-24 x 1" (25mm) Phillips flat head combination wood and machine screw P/N-81-2012-0620.

**Note: When ordering strike plates or attaching screws individually, specify the finish required; i.e. 497 x 202 x 612; #81-2012-0620 x 612.**

## sample specification

---

All locksets shall be 5400LN Series Grade 1 cylindrical lever locksets as assembled by Yale Locks & Hardware.

Lockset chassis shall be constructed of heavy-gauge cold-rolled steel, trivalent chrome plated to protect against rust and corrosion. Locksets shall be adjustable to fit doors between 1-3/4" (44mm) to 2" (51mm) thick.

Locksets shall be non-handed, and shall install easily without the need for specialized installation tools. Locksets shall have separate anti-rotation throughbolts in the 6 o'clock and 12 o'clock position outside the 2-1/8" face bore, and shall have no exposed mounting screws.

Locksets shall have solid one-piece, cast levers without plastic inserts, and shall be a minimum of 5-1/4" in length. Levers shall operate independently, and shall have inside and outside lever return springs. Outside levers on the keyed locksets shall be removable only when the designated key is in the cylinder.

Locksets shall have the capability of accepting 7-pin standard, interchangeable core and high-security cylinders to provide expansion capacity for large master keyed systems.

Vandal resistant levers shall be offered as a standard feature in all locking functions, and shall be Free Wheeling in the locked condition. Locksets that are rigid in the locked condition or which must require resetting (breakaway) are not acceptable.

The latchbolt shall be made of stainless steel.

All locksets shall carry a comprehensive seven-year mechanical warranty. Locksets shall carry a lifetime warranty against lever sag or lever spring breakage.

All locksets shall comply with the following certifications:

- UL 3 Hour Fire Rating
- ANSI/BHMA A156.2 Series 4000, Grade 1
- ANSI A117.1 Accessibility Code
- ANSI/BHMA A156.115 or A156.115-W Preparation

# Pivot and Pivot Sets

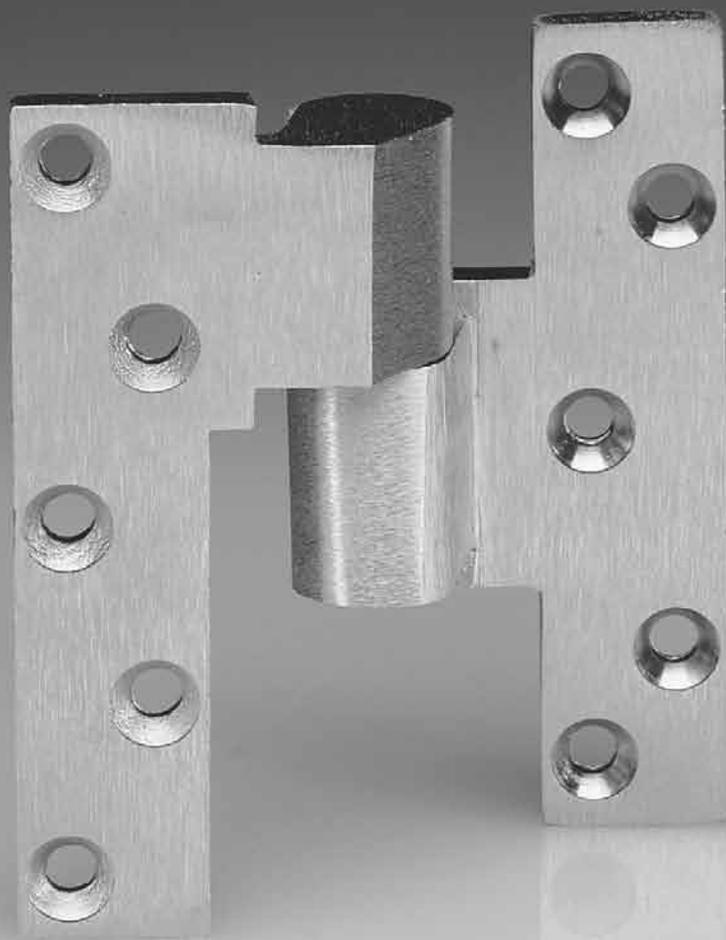

Architectural Solutions for  
Durable and Efficient  
Hanging of Doors

HW-019

Revision Date:

HW-020

Revision Date:

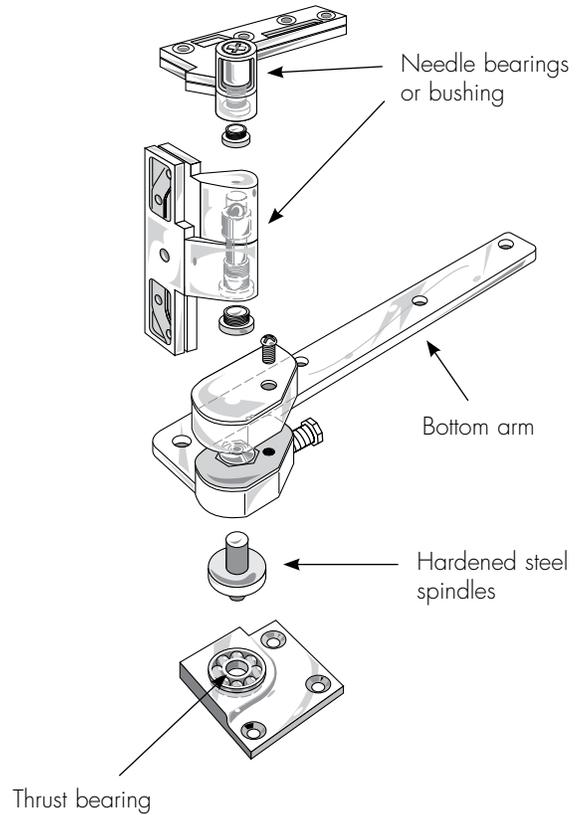

**RIXSON**  
**ASSA ABLOY**

ASSA ABLOY, the global leader  
in door opening solutions

Pivot sets provide the best possible means of hanging a door. They are designed to work with the laws of physics to provide long-lasting performance and reliability.

- The weight of the door is supported at the bottom by the floor
  - Uses principles of gravity to its advantage
  - Door swings with less resistance
  - Heavier doors can be accommodated
- Reduced stress on frame
  - Fasteners are in shear, not tension
  - Eliminates door sag
  - Vertically adjustable
- Heavy-duty hardened steel spindles
  - Thrust bearing supports vertical load
  - Needle bearings and bushings for lateral force
  - Extra heavy-duty models also have an additional surface applied thrust bearing to handle heavier or high-traffic doors
- Offset pivots provide better weight distribution and can accommodate taller doors
- Intermediate pivots are used for alignment and to ensure proper installation of bottom pivot or floor closer
- Center hung pivots are used for aesthetics or if the pivot point is going to be moved nearer the lock edge of the door
- **PIVOTS DO NOT RETURN DOORS TO CENTER.** Pivots in this section are for door hanging means only. For door control see door closer catalog sections.

# PIVOTS AND PIVOT SETS

## HOW TO SELECT PRODUCT

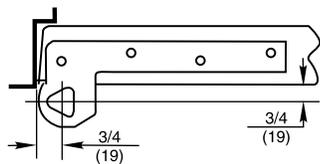

### 1. OFFSET VS. CENTER HUNG APPLICATION

**HW-019**

Revision Date:

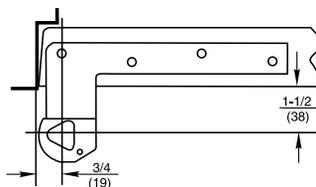

**HW-020**

Revision Date:

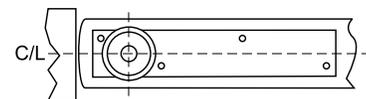

#### 3/4" Offset

Pivot point located 3/4" from the heel edge of the door and 3/4" from face of door

#### 1-1/2" Offset

Pivot point located 3/4" from the heel edge of the door and 1-1/2" from face of door. Extended offsets should be used when there is cladding on the face of door or trim on the frame

#### Center Hung

Pivot point centered in thickness of door.

### 2. SIZE OF DOOR (WIDTH, HEIGHT, THICKNESS)

Estimated door weights pounds per square foot (PSF)

DOOR MATERIAL	DOOR THICKNESS		
	1-3/4"	2-1/4"	3"
Hollow Metal	6.5	7	—
Solid Core Wood	7	9	11.5
Aluminum/Glass Storefront	3.5	4	—
Bullet Resistent	20	21	—
MDF	7	9	11.5
TEMPERED GLASS	GLASS THICKNESS		
	3/8"	1/2"	3/4"
	5	7	9.75
LEAD LINING (add to door weight)	LEAD THICKNESS		
	1/16"	1/8"	1/4"
	5	8	9.75
3/4" CLADDING (add to door weight)	CLADDING MATERIAL		
	Wood	Stone	Bronze
	3	10.5	28

Example: 3/6 X 8/0 X 1/2" Tempered Glass Door

Door: 28sq ft x 7lb./sq ft = 196lbs

For doors of other sizes, consult factory

Example: 3/0 X 7/0 X 1-3/4" WD X 1/4" Lead lining

Door: 21sq ft x 7lb./sq ft = 147lbs

Lead Lining: 9.75 = 204.75lbs

Total Door weight: 351.75lbs

### 2. SIZE OF DOOR (WIDTH, HEIGHT, THICKNESS)

Application	Daily Cycles	Yearly Cycles	
Large department store entrance	5,000	1,500,000	
Large office building entrance	4,000	1,200,000	
Theater entrance	1,000	365,000	
School entrance	1,250	225,000	High
School restroom door	1,250	225,000	
Store or bank entrance	500	150,000	
Office building restroom door	400	118,000	
School corridor door	80	15,000	
Office building corridor door	75	22,000	Average
Store restroom door	60	18,000	
Residential entrance door	40	15,000	
Residential restroom door	25	9,000	
Residential hallway door	10	3,600	Low
Residential closet door	6	2,200	

**HW-019**

Revision Date:

**HW-020**

Revision Date:

**Fire Rated – Prefix F** 

Pivots for fire rated doors (up to 3 hours) include a steel top pivot and must have additional steel intermediate pivots. For F519 pocket pivot, door assemblies must have been tested with pocket pivots.

**Twenty-minute label – Suffix - 20** 

This UL rating is for 20-minute assemblies. Product with this rating has an authorized label.

**Handing**

All offset pivots and pivot sets are handed. Suffix RH or LH.

**Extended Spindle – Suffix extra length needed**

Any special coverings or severe door undercuts will affect the spindle height. In these applications, an extended spindle may be required. Most standard spindle heights accommodate door undercuts up to 1/2". Extended spindles available in 1/2" increments up to 2" longer than standard. See template.

**1-1/2" Offset – Suffix 1-1/2**

Offset is the distance from the face of the door to the pivot point. Extended offsets should not be used unless there is cladding on the face of the door or there is trim to clear on the frame. 1-1/2" offset arms and pivots are for doors with cladding or trim that project 3/4" from the face of the door. The greater the offset the less weight can be carried by the pivot.

**Less Top Pivot – Suffix LTP**

For conditions requiring special top pivots or for arch top doors, the pivot set should be ordered less top pivot – LTP. For offset installations, an additional load bearing intermediate (side jamb) M190 pivot is required. All intermediate pivots for that opening should be M190's, not M19's.

**Special Layouts – Suffix SPLO#**

Unique installations or specially engineered products are called special layouts. These numbers must be assigned by the technical support department and they must be called out specifically by their number when ordering.

**Door Thickness – Suffix 1-3/4", 2", 2-1/4", 2-1/2" or 3"**

When ordering L series pivot for lead-lined doors, the thickness of the door must be given. The purpose of the L product is to have screws spaced so they straddle the lead in the center of the door. Also used when lead lining is under the skins of the door. Recommended for use on extra heavy or high traffic doors.

**Electrolynx® Connectors – Suffix QC – Number of Wires**

The plug-in connectors, with easy color coded wire system, eliminate matching wires. Must be used with ASSA ABLOY doors, frames and hardware. Available 4, 6, 8 or 12 wires for most products.

*Hardwiring Made Easy®*

**CERTIFICATIONS**

All Rixson® pivots and pivot sets are in compliance with ANSI/BHMA A156.4 Standards. See individual products for sub sections.

**LIMITED WARRANTY**

Rixson pivot sets are warranted for 2 years for defect. See Rixson Price Book for specific details of the limited warranty.

**SPECIFICATIONS**

All pivots and pivot sets shall be of one manufacturer. All heavy-duty pivots shall have a minimum of 2 bearings internal to the bottom pivot. One shall be a thrust bearing and the other a needle bearing. Separate bearing surfaces shall be in the top pivot. Lead-lined door units and high traffic pivots shall have additional thrust bearing. Fire rated pivot sets shall have steel top pivots. Fire rated doors require steel intermediate pivots.

## MODEL 117-1/4

**HW-019**

Revision Date:

**HW-020**

Revision Date:

### Application

- Interior Doors
- Weight to 250 lbs.\*
- Door Width up to 3'6" (1067mm)
- Handed

ANSI /C07172

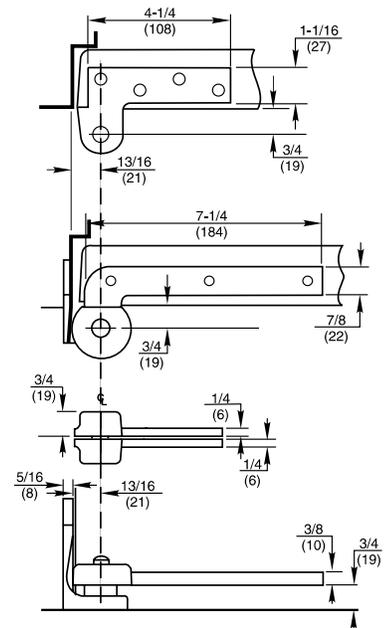

\* Door size & weight guidelines are determined using the appropriate number of intermediate pivots

### Product Description & Features

- Standard top pivot 180 included
- 119 intermediate pivot recommended (order separately); see page 18
- Bottom pivot mortised into side jamb
- Not available for fire-rated doors
- Non-ferrous base material
- Doors 60" (1524mm) to 90" (2286mm) in height should use one intermediate pivot. Each additional 30" (762mm) of door height warrants another intermediate pivot
- 3/4" (19mm) offset (measured from centerline of pivot to face of door)
- Door edges must be beveled 1/8" in 2"
- Weight of door borne by floor
- Furnished with wood and machine screws
- Extended spindles available in 1/2" (13mm) increments up to 2" (51mm) longer than standard

### Technical Information

Frame stop required

## MODEL 117

### Application

- Interior Doors
- Weight to 300 lbs.\*
- Door Width up to 3'6" (1067mm)
- Handed

ANSI/C07162/C07202

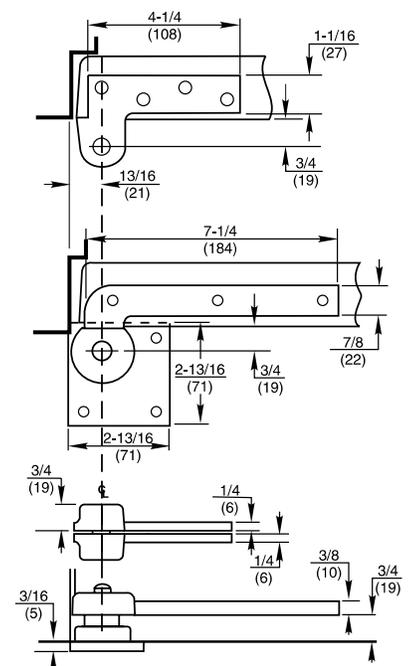

\* Door size & weight guidelines are determined using the appropriate number of intermediate pivots

### Product Description & Features

- Standard top pivot 180 included
- 119 intermediate pivot recommended (order separately); see page 18
- Bottom pivot mortised into floor
- Available for fire door assemblies up to three hours – specify F117. Intermediate pivot required by UL. Specify FM19, (order separately), see page 18
- For 20-minute label suffix "-20" to the part number
- Non-ferrous base material
- Doors up to 90" (2286mm) in height should use one intermediate pivot. Each additional 30" (762mm) of door height warrants another intermediate pivot
- 3/4" (19mm) offset (measured from centerline of pivot to face of door)
- Available for 1-1/2" (38mm) offset (door weight 150 lbs) for doors with cladding or frame molding.
- Door edges must be beveled 1/8" in 2"
- Furnished with wood and machine screws
- Extended spindles available in 1/2" (13mm) increments up to 2" (51mm) longer than standard
- Doors will swing 180°, trim permitting

### Technical Information

Frame stop required

MODEL 173

**HW-019**

Revision Date:

**HW-020**

Revision Date:

**Application**

- Interior Doors
- Weight 150 lbs
- Door Sizes up to 3'0" x 8'0" x 1-3/4"
- Handed

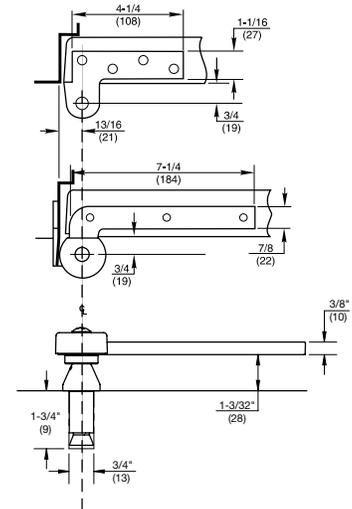

ANSI/C07162/C07202

**Product Description & Features**

- Standard top pivot 180 included
- 119 intermediate pivot recommended for all doors over 6'8" (order separately) see page 18
- Bottom pivot mounts directly to concrete floor
- Uses same arm and cap as 117 pivot set
- Non-ferrous base metal
- 3/4" offset only (measured from centerline of pivot to face of door)
- Available for 1-1/2" (38mm) offset (**door weight 100 lbs**) for doors with cladding or frame molding
- Door edges must be beveled 1/8" in 2"
- Furnished with wood and metal screws
- 3/8" vertical adjustment
- No spindle extensions available
- Door will swing 180°, trim permitting

**Technical Information**

Frame stop required

MODEL 147

**Application**

- Exterior or Interior Doors
- Weight to 600 lbs. \*
- Door Width up to 4'0" (1219mm)
- Handed

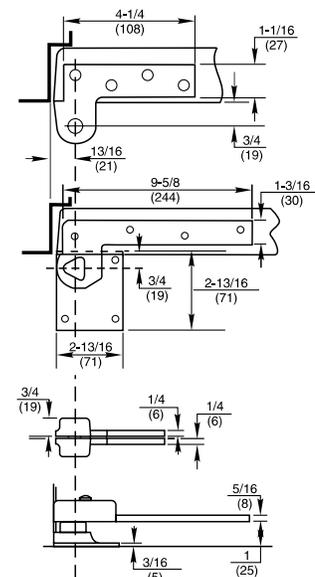

ANSI/C07162/C07202

**Product Description & Features**

- Standard top pivot 180 included
- M19 intermediate pivot required (order separately); see page 18
- Bottom pivot mounts directly to floor
- Uses same arm and cap as 27 floor closer
- Available for fire door assemblies up to three hours (ferrous material) – specify F147. Intermediate pivot required by UL. Specify FM19 (order separately), see page 18
- For 20-minute label suffix “-20” to the part number
- Non-ferrous base material
- Doors 60" (1524mm) to 90" (2286mm) in height should use one intermediate pivot. Each additional 30" (762mm) of door height warrants another intermediate pivot
- 3/4" (19mm) offset (measured from centerline of pivot to face of door)
- Available for 1-1/2" (38mm) offset (**door weight 350 lbs.**) for doors with cladding or frame molding
- Door edges must be beveled 1/8" in 2"
- Furnished with wood and machine screws
- Extended spindles available in 1/2" (13mm) increments up to 2" (51mm) longer than standard
- Doors will swing 180°, trim permitting

**Technical Information**

Frame stop required

\* Door size & weight guidelines are determined using the appropriate number of intermediate pivots

**HW-019**

Revision Date:

**HW-020**

Revision Date:

### Application

- Exterior or Interior Doors
- Lead-lined/Heavy/High Traffic Doors
- Weight to 800 lbs.
- Door Width up to 4'0" (1219mm)
- Handed

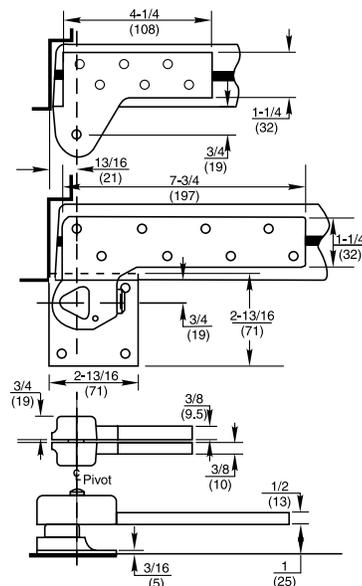

ANSI/C07162/C07202

### Product Description & Features

- Standard top pivot L180 included
- ML19 intermediate pivot required (order separately), see page 19
- Bottom pivot mounts directly to floor
- Doors with lead lining under the skin should also use this product.
- Screw holes in top pivot and bottom arm spaced to straddle lead lining in the middle of the door
- Available for fire door assemblies up to three hours for 1-3/4" (44mm) doors only (ferrous material) – specify FL147. Intermediate pivot required by UL. Specify FML19 (order separately), see page 19
- For 20-minute label suffix "-20" to the part number
- Non-ferrous base material
- Doors 60" (1524mm) to 90" (2286mm) in height should use one intermediate pivot. Each additional 30" (762mm) of door height warrants another intermediate pivot
- Available to accommodate lead in door thicknesses 1-3/4" (44mm), 2" (51mm), 2-1/4" (57mm), 2-1/2" (64mm), or 3" (76mm) – specify when ordering
- 3/4" (19mm) offset (measured from centerline of pivot to face of door)
- Door edges must be beveled 1/8" in 2"
- Furnished with wood and machine screws
- Extended spindles available in 1/2" (13mm) increments up to 2" (51mm) longer than standard
- Doors will swing 180°, trim permitting

MODEL 547

**HW-019**

Revision Date:

**HW-020**

Revision Date:

**Application**

- Exterior or Interior Doors
- For Arch Top Doors or Overhead
- Concealed Closers
- Weight to 500 lbs.
- Door Width up to 3'6" (1067mm)
- Handed

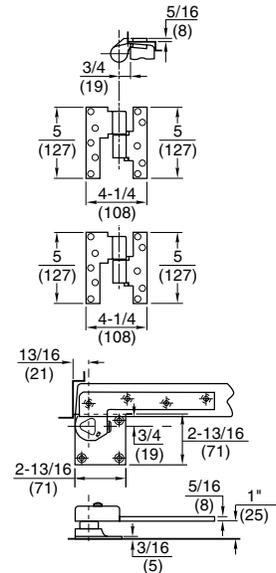

ANSI/C07162 (modified)/C07202

**Product Description & Features**

- Set consists of two each M190 intermediate pivots and bottom pivot
- Bottom pivot mounts directly to floor
- Available for fire door assemblies up to three hours. Specify F547. Intermediate pivots FM190 included
- For 20-minute label suffix "-20" to the part number
- Non-ferrous base material
- Doors 60" (1524) to 90" (2286mm) in height have two intermediate pivots. Each additional 30" (762mm) of door height warrants another intermediate pivot
- 3/4" (19mm) offset (measured from centerline of pivot to face of door)
- Door edges must be beveled 1/8" in 2"
- Furnished with wood and machine screws
- Extended spindles available in 1/2" (13mm) increments up to 2" (51mm) longer than standard
- Doors will swing 180°, trim permitting

- Full Mortise
- Non-handed

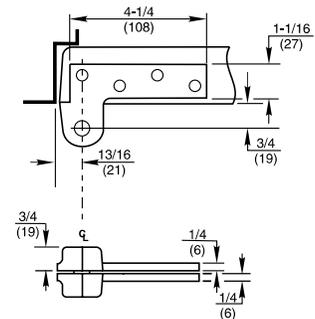

**Product Description & Features**

- Standard top pivot for most offset pivot sets and floor closers
- Oil-impregnated sintered bronze bushing
- Non-ferrous base material
- Available for fire door assemblies (ferrous material) – specify F180 or FH180
- For 20-minute label suffix “-20” to the part number
- 3/4" (19mm) offset (measured from centerline of pivot to face of door)
- Available for 1-1/2" (38mm) offset
- Furnished with wood and machine screws
- Available with longer than standard pivot pins. Increments are 1/4" (6mm), 1/2" (13mm), 3/4" (19mm) only
- For extra wide or high traffic prefix "H" – H pivots have heavy-duty needle bearings; available in 1-1/2" (38mm) offset

**Technical Information**

Frame stop required

MODEL 180 X 102

**Application**

- Full Mortise
- Handed

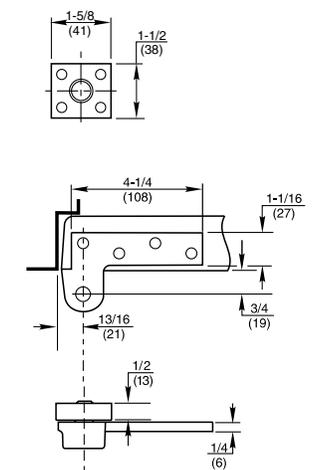

**Product Description & Features**

- Special top pivot for doors in deep reveals or unusual door details where one leaf is too long for the normal door or frame portion
- Oil-impregnated sintered bronze bushings
- Non-ferrous base metal
- Available for 1-1/2" (38mm) offset
- May be inverted
- Furnished with wood and machine screws
- Available with longer than standard pivot pins. Increments are 1/4" (6mm), 1/2" (13mm), 3/4" (19mm) only

**Technical Information**

Frame stop required

### MODEL L180

**HW-019**

Revision Date:

**HW-020**

Revision Date:

#### Application

- Lead-Lined/Heavy/High
- Traffic Doors
- Full Mortise
- Non-handed

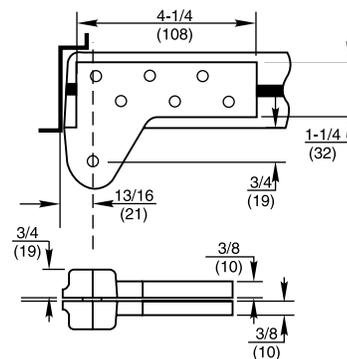

#### Product Description & Features

- Standard top pivot for L147, L117 pivots and L27 floor closers
- Doors with lead lining under the skin should also use this product
- Screw holes spaced to straddle lead in the middle of the door
- Available to accommodate lead lined door thicknesses: 1-3/4" (44mm), 2" (51mm), 2-1/4" (57mm), 2-1/2" (64mm), or 3" (76mm) – specify when ordering
- Available for fire door assemblies for 1-3/4" (19mm) doors only (ferrous material). Specify FL180
- For 20-minute label suffix "-20" to the part number
- Non-ferrous base material
- 3/4" (19mm) offset (measured from centerline of pivot to face of door)
- Furnished with wood and machine screws
- Available with longer than standard pivot pins. Increments are 1/4" (6mm), 1/2" (13mm), 3/4" (19mm) only

#### Technical Information

Frame stop required

1-3/4" door shown

### MODEL FA180

#### Application

- Asylum Design
- Full Mortise
- Handed

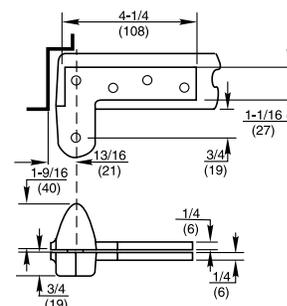

#### Product Description & Features

- Standard top pivot for SEC27-180 floor closer packages
- Optional top pivot for institutional use or installations where flat surfaces are objectionable
- For fire door assemblies
- Ferrous base material
- 3/4" (19mm) offset (measured from centerline of pivot to face of door)
- Furnished with wood and machine Torx® screws
- Available with longer than standard pivot pins. Increments are 1/4" (6mm), 1/2" (13mm), 3/4" (19mm) only

#### Technical Information

Frame stop required

MODEL 280

**HW-019**

Revision Date:

**HW-020**

Revision Date:

**Application**

- Half Surface
- Handed

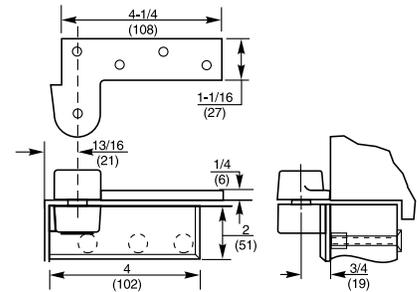

ANSI/C07501

**Product Description & Features**

- Flush door and frame application only
- Optional top pivot where door portion cannot be mortised
- Available for fire door assemblies (ferrous material) – specify F280
- Non-ferrous base material
- 3/4" (19mm) offset (measured from centerline of pivot to face of door)
- 1-3/4" door only
- Contact factory if door is not flush
- Furnished with wood and machine screws
- Available with longer than standard pivot pins. Increments are 1/4" (6mm), 1/2" (13mm), 3/4" (19mm) only

**Technical Information**

MODEL 380

**Application**

- Half Mortise
- Handed

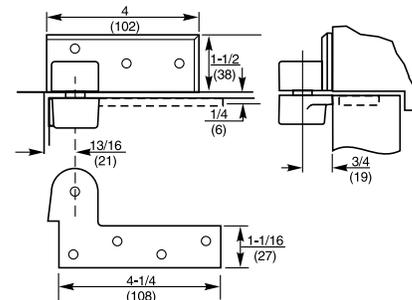

ANSI/C07511

**Product Description & Features**

- Flush door and frame application only
- Optional top pivot where jamb portion cannot be mortised
- Designed for channel iron door frames with aluminum, hollow metal or wood doors
- Available for fire door assemblies (ferrous material) – specify F380
- Door portion from L180 pivot is available if lead-lined doors are used – specify L380 and door thickness
- Non-ferrous base material
- 3/4" (19mm) offset (measured from centerline of pivot to face of door)
- Furnished with wood and machine screws
- Available with longer than standard pivot pins. Increments are 1/4" (6mm), 1/2" (13mm), 3/4" (19mm) only

### MODEL 480

**HW-019**

Revision Date:

**HW-020**

Revision Date:

#### Application

- Full Surface
- Handed

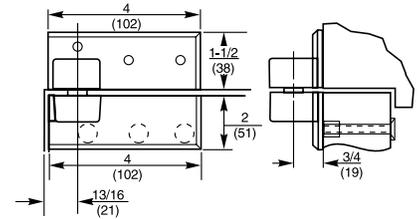

ANSI/C07521

#### Product Description & Features

- Flush door and frame application only
- Optional top pivot where door and jamb portion cannot be mortised
- Designed for channel iron door frames and any door where thru-bolting is advantageous
- Available for fire door assemblies (ferrous material) – specify F480
- Non-ferrous base material
- 3/4" (19mm) offset (measured from centerline of pivot to face of door)
- 1-3/4" door only
- Furnished with wood and machine screws
- Available with longer than standard pivot pins. Increments are 1/4" (6mm), 1/2" (13mm), 3/4" (19mm) only

#### Technical Information

### MODEL 680

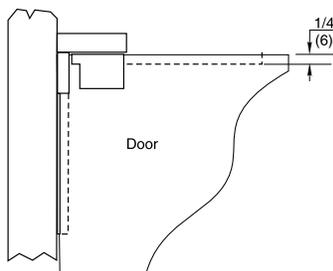

#### Application

- Side Jamb Mounted
- Frame Portion
- Handed

#### Technical Information

Surface Mount Jamb Double Mortise Door

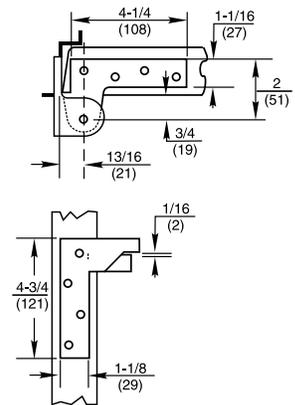

#### Product Description & Features

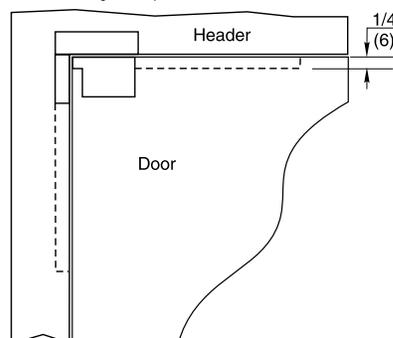

- Used where no frame exists above door, or where it is not possible to anchor pivot into header of frame
- Side jamb portion can be surface mounted or mortised
- Non-ferrous base material
- 3/4" (19mm) offset (measured from centerline of pivot to face of door)
- Door edges must be beveled in 1/8" in 2"
- Furnished with wood and machine screws

#### Technical Information

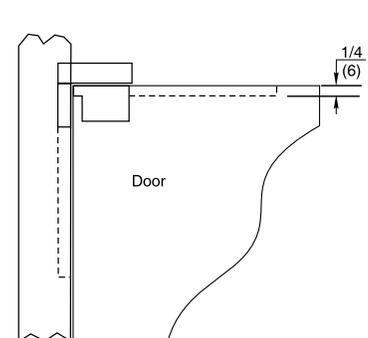

##### Frame stop required

Mortise Jamb, Header and Door

Mortise Jamb and Door

MODEL 119

**HW-019**

Revision Date:

**HW-020**

Revision Date:

**Application**

- Full Mortise
- Handed

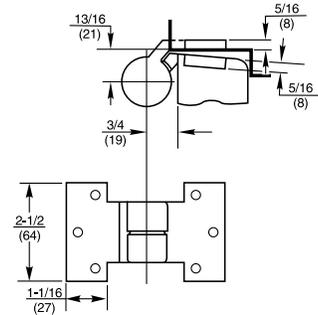

ANSI/C07382

**Product Description & Features**

- Not load-bearing
- Maintains door alignment
- Available 3/4" (19mm) offset only
- Non-ferrous base material
- Doors 60" (1524mm) to 90" (2286mm) in height should use one intermediate pivot. Each additional 30" (762mm) of door height warrants another intermediate pivot
- Door edges must be beveled in 1/8" in 2"
- Used with 117, 117-1/4, 195 pivot sets and 127 and 427 floor closers
- Furnished with wood and machine screws

**Technical Information**

MODEL M19

**Application**

- Full Mortise
- Handed

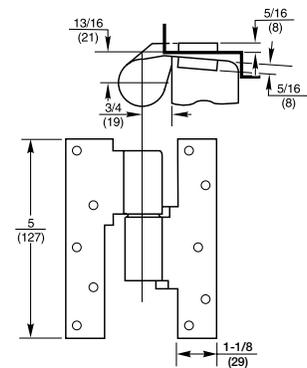

ANSI/C07321/C07371

**Product Description & Features**

- Not load-bearing
- Maintains door alignment
- Aids in installing floor closers and bottom pivots
- For 20-minute label suffix "-20" to the part number
- Non-ferrous base metal
- 3/4" (19mm) offset
- Available for 1-1/2" (38mm) offset
- Available for fire door assemblies (ferrous material) – specify FM19
- Doors 60" (1524mm) to 90" (2286mm) in height should use one intermediate pivot. Each additional 30" (762mm) warrants another intermediate pivot
- Door edges must be beveled in 1/8" in 2"
- Furnished with wood and machine screws

**Technical Information**

MODEL M190

**Application**

- Heavy-Duty Full Mortise
- Handed

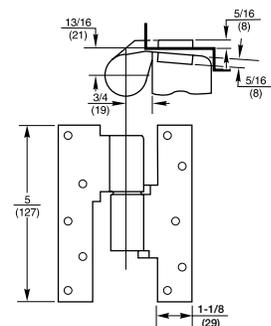

ANSI/C07321/C07371

**Product Description & Features**

Used when frame condition does not allow standard top pivot

- Lateral load-bearing
- Maintains door alignment
- Aids in installing floor closers and bottom pivots
- Heavy-duty needle bearing
- Non-ferrous base metal
- 3/4" (19mm) offset standard
- Available for 1-1/2" (38mm) offset
- Available for fire door assemblies (ferrous material) – specify FM190
- For 20-minute label suffix "-20" to part number
- Doors 60" (1524mm) to 90" (2286mm) in height should use one intermediate pivot. Each additional 30" (762mm) warrants another intermediate pivot
- Door edges must be beveled in 1/8" in 2"
- Furnished with wood and machine screws

### MODEL ML19

**HW-019**

Revision Date:

**HW-020**

Revision Date:

#### Application

- Full Mortise
- Lead-lined, Heavy or High Traffic Doors
- Handed

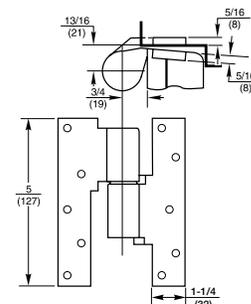

ANSI/C07311

#### Product Description & Features

Screw holes spaced to straddle lead lining in center of door. Also use on extra heavy or high traffic door

- Load-bearing
- Maintains door alignment
- Aids in installing closers and pivots
- For 20-minute label suffix “-20” to the part number
- Available to accommodate door thicknesses 1-3/4" (44mm), 2" (51mm), 2-1/4" (57mm), 2-1/2" (64mm), or 3" (76mm) – specify thickness when ordering
- Non-ferrous base material
- Available for fire door assemblies – 1-3/4" (44mm) door only – specify FML19
- Doors 60" (1524mm) to 90" (2286mm) in height should use one intermediate pivot. Each additional 30" (762mm) warrants another intermediate pivot
- Door edges must be beveled in 1/8" in 2"
- Furnished with wood and machine screws

#### Technical Information

### MODEL FA19

#### Application

- Full Mortise
- Asylum or High Security Applications
- Handed

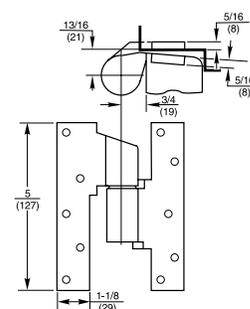

ANSI/C07361

#### Product Description & Features

Optional intermediate pivot for institutional use or installations where flat surfaces are objectionable

- Maintains door alignment
- Aids in installing bottom pivots
- 3/4" (19mm) offset
- May be used with fire door assemblies
- Ferrous base material
- Doors 60" (1524mm) to 90" (2286mm) in height should use one intermediate pivot. Each additional 30" (762mm) warrants another intermediate pivot
- Door edges must be beveled in 1/8" in 2"
- Furnished with wood and machine Torx® screws

Revision Date:

**HW-020**

Revision Date:

#### Application

- Offset Hung
- Electric Pivot for Power Transfer
- Handed

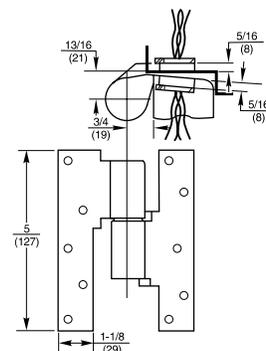

Whenever power transfer pivots are used, the leaves must not be separated

#### Product Description & Features

- Not load-bearing
- Door and jamb portion are factory assembled and cannot be separated
- Always use M19 intermediate pivot to install door
- Specify four, six, eight or twelve wires
- Electrolynx® option available, suffix "QC#" (number of wires)
- 24-gauge wire is rated at 2 amps for low voltage, class II wiring applications
- Available for fire door assemblies (ferrous material) – specify E-FM19
- For 20-minute label, suffix "-20" to the part number
- 3/4" (19mm) offset
- Available 1-1/2" offset
- Door edges must be beveled in 1/8" in 2"
- Furnished with wood and machine screws

#### Technical Information

Hardwiring Made Easy®

### MODEL E-M19U

#### Application

- Offset Hung
- Electric Pivot for Power Transfer
- Handed
- For Electrified Panic Devices with Large Inrush Current

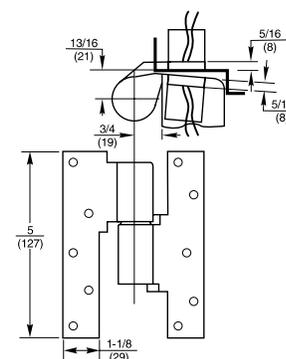

Whenever power transfer pivots are used, the leaves must not be separated

#### Product Description & Features

- Not load-bearing
- Always use M19 intermediate pivot to install door
- Door and jamb portion are factory assembled and cannot be separated
- Junction boxes are supplied with pivots
- Two each 18 gauge wires. Each wire is rated at 2 amps continuously. UL listed for 24-volt, Class I wiring
- Electrolynx® option not available
- Not available in ferrous material
- 3/4" (19mm) offset
- Door edges must be beveled in 1/8" in 2"
- Furnished with wood and machine screws

MODEL F519

**HW-019**

Revision Date:

**HW-020**

Revision Date:

**Application**

- Pocket Door Pivot
- Non-handed

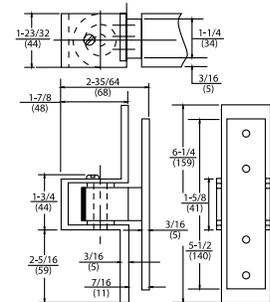

ANSI/C07611

**Product Description & Features**

- Full mortise, non-handed pivot for pocket door applications
- Heavy-duty steel pivot with ball bearings
- Allows doors to swing 90°
- Minimum three pocket pivots per door
- Doors 60" (1524mm) to 90" (2286mm) in height require four pocket pivots. Every additional 30" (762mm) of door height warrants another pocket pivot
- UL listed for all labeled pocket fire-door assemblies up to and including 3 hours
- Fire-rated door assemblies must have been tested with pocket pivots
- Furnished with wood and machine screws

**Technical Information**

MODEL E-F519

**Application**

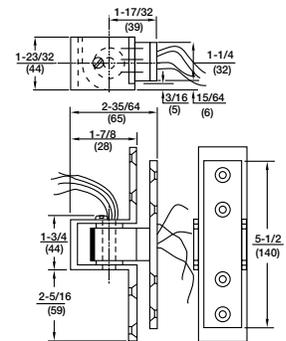

- Pocket Door Pivot
- Electric Pivot for Power Transfer
- Non-handed

**Product Description & Features**

- Full mortise, non-handed pivot for pocket door applications
- Always use as middle pivot
- Available with four wires only
- ElectroLynx® option available, suffix "QC4"
- 24-gauge wire is rated at 2 amps for low voltage, class II wiring applications
- Heavy-duty steel pivot with ball bearings
- Allows doors to swing 90°
- Door and jamb portions are factory assembled and cannot be separated
- Minimum three pocket pivots per door
- Doors over 90" (2286mm) in height require four pocket pivots. Every additional 30" (762mm) of door height warrants another pocket pivot

## MODEL 127-3/4

**HW-019**

Revision Date:

**HW-020**

Revision Date:

### Application

- Interior Doors
- Weight to 200 lbs.
- Door Sizes up to 3'6" x 8'6" (1067 x 2591mm)
- Non-handed

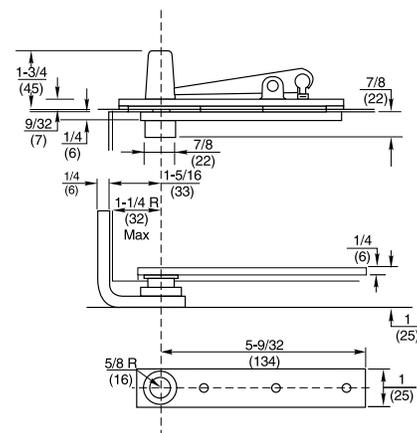

ANSI/C07042

Center hung pivots are door hanging means only. To close doors, see floor closer sections of the catalogs.

### Product Description & Features

- Standard top pivot 320 included
- Bottom pivot mortised into side jamb
- Weight of door borne by floor
- Pivot point centered in thickness of door
- Door must have radius on pivot edge
- Not allowed for use on labeled doors and frames
- Pivot point remains constant at 1-1/4 from the edge of the door
- Furnished with wood and machine screws
- Available with extended spindles in 1/2" (13mm) increments up to 2" (51mm) longer than standard

### Technical Information

## MODEL 128-3/4

### Application

- Interior Doors
- Weight to 250 lbs.
- Door Sizes up to 3'6" x 8'6" (1067 x 2591mm)
- Non-handed

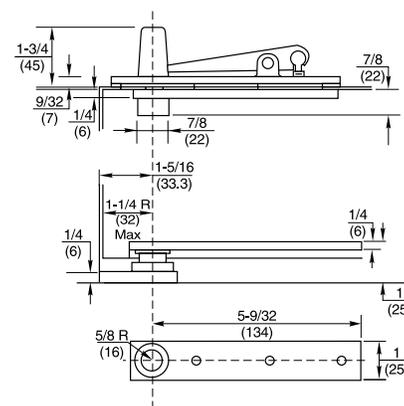

ANSI/C07032

Center hung pivots are door hanging means only. To close doors, see floor closer sections of the catalogs.

### Product Description & Features

- Identical to the 127-3/4 except:
- Bottom pivot mounts directly to floor

### Technical Information

MODEL 370

**HW-020**

Revision Date:

#### Application

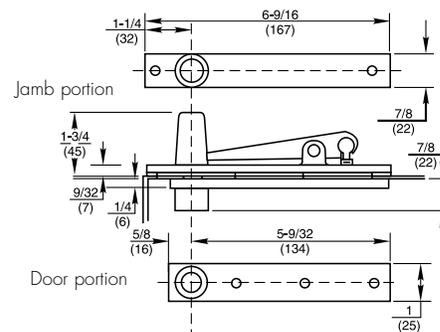

- Fully Concealed
- Non-handed

#### Product Description & Features

- Standard top pivot for Models 127-3/4, 128-3/4, and 176 pivot sets
- Walking beam-type pivot – 1/2" (13mm) diameter pivot pin with 3/4" (19mm) engagement
- Oil-impregnated sintered bronze bushing
- Completely concealed when door is closed
- Furnished with wood and machine screws
- Available with longer than standard pivot pins. Increments are 1/4" (6mm), 1/2" (13mm), 3/4" (19mm) only

#### Technical Information

### MODEL 340

#### Application

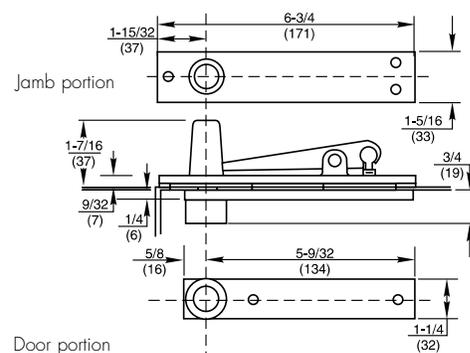

- Fully Concealed
- Non-handed

#### Product Description & Features

- Standard top pivot for Models 370 and 117-3/4 pivot sets. Also used for 28, 30, 40 and 50 Series floor closers
- Walking beam-type pivot – 1/2" (13mm) diameter pivot pin with 3/4" (19mm) engagement
- Oil-impregnated sintered bronze bushing
- Completely concealed when door is closed
- Furnished with wood and machine screws
- Available with longer than standard pivot pins. Increments are 1/4" (6mm), 1/2" (13mm), 3/4" (19mm) only

#### Technical Information

### MODEL H340

#### Application

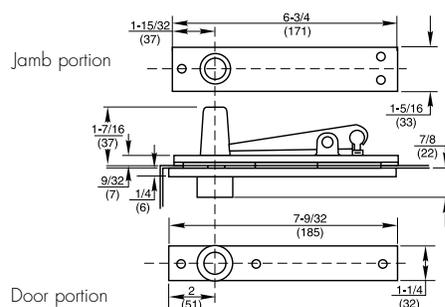

- Fully Concealed
- Heavy-Duty
- Non-handed

#### Product Description & Features

- Standard top pivot for Model H117-3/4 pivot set. Also used for H28 and H40 Series floor closers
- Can be used with any floor closer or pivot set with pivot point 2-3/4", or greater, from edge of the door
- Walking beam-type pivot – 11/16" (17mm) diameter pivot pin with 3/4" (19mm) engagement
- Heavy-duty needle bearing
- Completely concealed when door is closed
- Furnished with wood and machine screws
- Available with longer than standard pivot pins. Increments are 1/4" (6mm), 1/2" (13mm), 3/4" (19mm) only

#### Technical Information

MODEL 345

**HW-019**

Revision Date:

**HW-020**

Revision Date:

**Application**

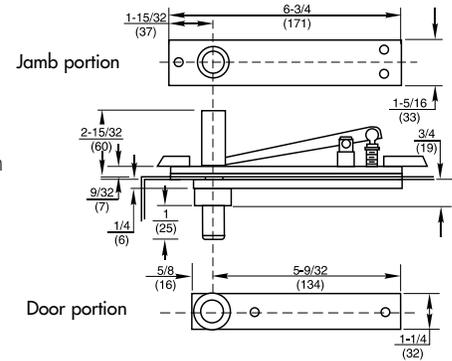

- Fully Concealed
- Center Hung
- Non-handed
- Earthquake Tolerant
- Taller Doors

**Product Description & Features**

- Optional top pivot
- Ideal for locations where there is a fear of dramatic building settling or for doors over 8'6" in height
- Long pivot pin engages in top of door 1-3/4" (44mm)
- Can be used with any center hung bottom pivot or floor closer. Order pivot set or floor closer LTP (less top pivot) with 345 on separate line item
- Walking beam-type pivot – 1/2" (13mm) diameter pivot pin
- Oil-impregnated sintered bronze bushing
- Completely concealed when door is closed
- Furnished with wood and machine screws

**Technical Information**

MODEL H345

**Application**

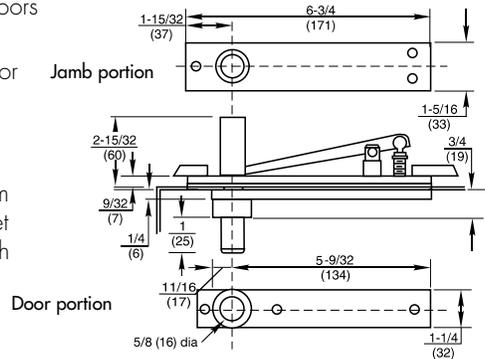

- Fully Concealed
- Center Hung
- Non-handed
- Earthquake Tolerant
- Taller Doors

**Product Description & Features**

- Ideal for locations where there is a fear of dramatic building settling or for doors over 8'6" in height
- Long pivot pin engages in top of door 1-3/4" (44mm)
- Can be used with any center hung bottom pivot or floor closer whose pivot point is 2-3/4, or greater, from the edge of the door. Order pivot set or floor closer LTP (less top pivot) with H345 on separate line item
- Walking beam-type pivot – 1 1/16" (17mm) diameter pivot pin
- Heavy-duty needle bearing
- Completely concealed when door is closed
- Furnished with wood and machine screws

## CENTER HUNG TOP PIVOTS

### MODEL 340 X 102

**HW-019**

Revision Date:

**HW-020**

Revision Date:

#### Application

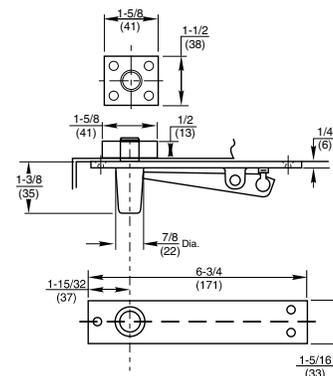

- Fully Concealed
- Non-handed

#### Product Description & Features

- Optional top pivot for doors or frames that have conflicts with other hardware
- Can be inverted. The walking beam portion would be installed the header of the frame
- No finish plate supplied
- If inverted, finish plate should be ordered and priced separately (see page 43 for 340 or 320 plate part numbers)
- Oil-impregnated sintered bronze bushing
- Completely concealed when door is closed
- Available with longer than standard pivot pins. Increments are 1/4" (6mm) up to 3/4" (19mm)
- Furnished with wood and machine screws
- For lighter weight doors use 320 x 102

#### Technical Information

340 x 102 shown

### MODEL 340 X AP3

#### Application

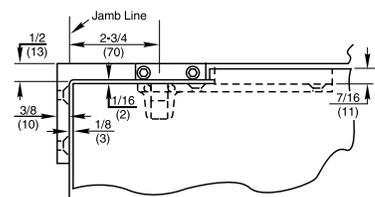

- Surface mounted
- Handed doors up to 3'6" wide

#### Product Description & Features

- Used where no frame exists above door, or where it is not possible to anchor pivot into header of frame
- Center hung applications only
- Furnished with 340 door portion
- Part is handed to keep installation plate to inside of room or building
- Furnished with wood and machine screws

#### Technical Information

MODEL E-H340

<b>HW-019</b>	<b>HW-020</b>
Revision Date:	Revision Date:

**Application**

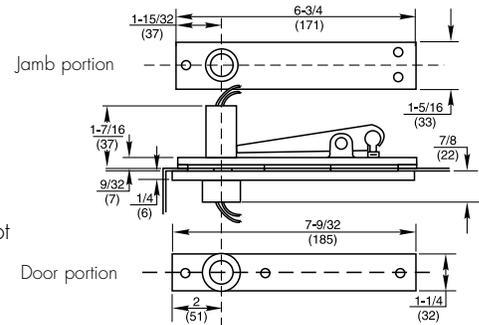

- Center Hung
- Top Pivot for Power Transfer
- Non-handed

**Product Description & Features**

- Walking beam type pivot – 11/16" (17mm) diameter pivot pin with 3/4" (19mm) engagement
- Can be used with any center hung bottom pivot or floor closer. Order the pivot set LTP (less top pivot) with E-H340 as a separate line
- Heavy-duty needle bearing
- Specify two, four, six, eight or twelve wires
- Two-wire is available in 18 gauge and is not available Electrolynx®
- Four, six, eight and twelve wires are 24 gauge and available in Electrolynx®. Suffix QC# (number of wires)
- Completely concealed when door is closed
- Furnished with wood and machine screws

# Overhead Concealed Closers

HW-021

Revision Date:

**RIXSON**  
**ASSA ABLOY**

ASSA ABLOY, the global leader  
in door opening solutions

Rixson Overhead Concealed closers offer an aesthetically appealing way to close a door. In situations where a closer is needed but concealment is required, Rixson offers several different series to meet your application demands. Concealed for minimal appearance, these offset hung or center hung (single or double acting) door closers provide control without sacrificing the aesthetics of the opening.

Model 91 Shown

# OVERHEAD CONCEALED CLOSERS

## GENERAL INFORMATION

HW-021

Revision Date:

### GENERAL INFORMATION

Non-Hold Open closers do not hold the door open. This feature cannot be changed in the field on the 608, 700, or 800 series closers.

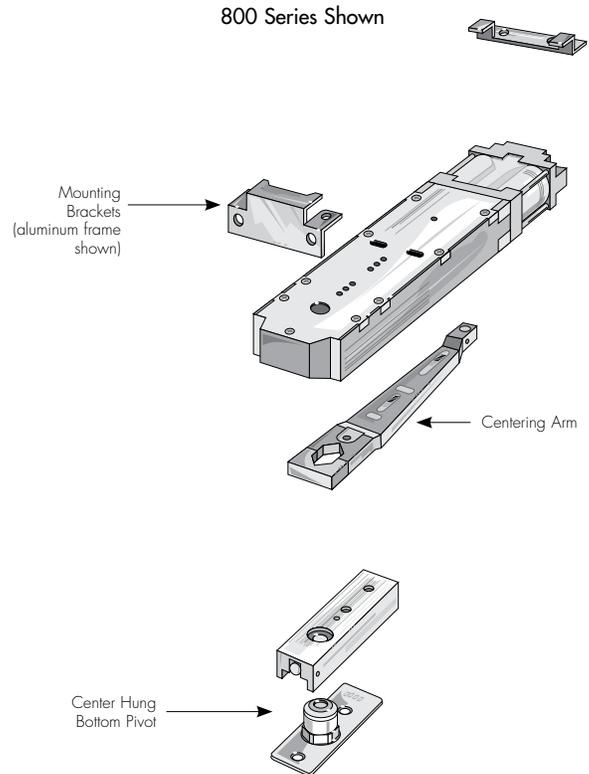

Hold Open closers hold the door open. This feature cannot be changed in the field on the 608, 700, or 800 series closers.

The degree of swing must be specified on some closers (refer to specific product pages for requirements).

When the door closer must be concealed above the ceiling or drywall, a longer or extended spindle is required. Extended spindles are available 1/2" longer than standard. Closer adjustment valves must always be accessible.

End caps are used to cover the mortise edges for wood doors on center hung 608 and 700/800 models. Two 199 End Caps can be furnished; one for the top arm and one for the bottom pivot.

Mounting brackets or boxes for aluminum, wood or metal frames must be specified when ordering the 608 and 700/800 series.

### SPECIFICATIONS

#### Model 91:

Model 91 shall be used for offset hung doors. Closer shall fit in a 1-3/4 x 4 aluminum tube. Closer shall have adjustable spring that complies to accessibility codes. Adjustable spring, backcheck, and closing speed valves must be accessible after door is installed. Where applicable, a hold open feature is achieved in the track. Closer shall be Grade 1 per ANSI A156.4. Closer shall be fire rated UL10C for doors tested for overhead concealed products up to 3 hours.

#### Models 700/800

Model 700 for single acting center hung doors. Hydraulic closer mechanism to fit in minimum 1-3/4" x 4" aluminum frame. Closer shall have a sized spring determined by the door width. Adjustable hydraulic backcheck and closing speed valves. Closers for single acting doors shall be handed and preloaded for positive closing action. Vertically adjustable center hung bottom pivot included. For double acting doors, use model 800 with adjustable closing speed for each swing direction. Hold open (option) is achieved through the closer body and degree called out.

#### Model 608

Compact cast iron body to fit in minimum 1-3/4 x 4" aluminum frame. Closer shall have separate and independent closing and latch speed control valves. Optional hold open at 90 or 105°. For center hung applications, arm shall have door centering adjustments and be directly connected to the closer spindle. Closer body is non-handed, single or double acting. Vertically adjustable center hung bottom pivot included. For independently hung doors use model 0608 with slide track arm and channel.

MODEL 700

**HW-021**

Revision Date:

**Application**

- Exterior or interior doors
- Door weight up to 200 lbs.

**Features**

- Single acting
- Handed
- Available non-hold open (N) or automatic hold open (A).  
Specify 90° or 105°, N or A
- Frame stop required. See Door Control Accessories, page 8 #60131.  
Order separately.
- Adjustable closing speed valve
- Adjustable hydraulic backcheck
- Includes 2183020 bottom pivot
- Product should always be used with auxiliary stop
- 2 year limited warranty

**Optional Features**

- Extended spindle; 1/2" longer than standard closer spindle. Must be ordered as part of the closer; cannot be added later
- End cap 199 for top and bottom of wood door

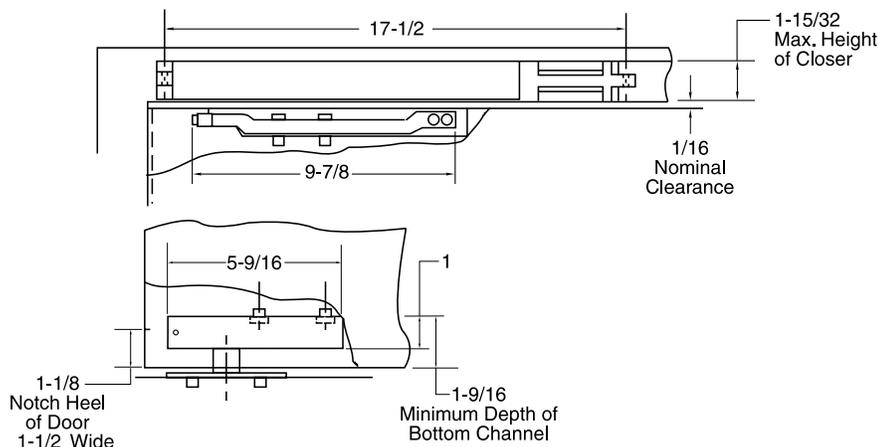

**Compliance**

- ANSI CO5052
- Compliant to ANSI A156.4 standards

**Models**

- 700 should be used on aluminum doors and frames. Package includes closer body, arm, frame mounting clips 1639000 and bottom pivot 2183020. Frame size 1-3/4" x 4" minimum.
- M700 should be used on metal doors and frames. Package includes closer body, arm, cover plate, frame mounting channel 1929000\* and bottom pivot 2183020. Frame size 2"x 5-1/2" minimum.
- MW700 should be used on wood doors and metal frames. Package includes closer body, arm, cover plate, frame mounting channel 1929000\* and bottom pivot 2183020. Frame size 2"x 5-1/2" minimum.
- W700 should be used on wood doors and frames. Package includes closer body, arm, cover plate, frame mounting channel 1980910 and bottom pivot 2183020. Frame size 2"x 5-1/2" minimum.

**Technical Info**

\*Note that mounting channels must be welded into frames prior to shipment to job site.

### Application

- Exterior or interior doors
- Door weight up to 200 lbs.
- Maximum door size: interior 3'8" x 8'0"; exterior 3'6" x 8'0"

### Features

- Single or double acting
- Non-handed
- Available in non-hold open (N) (door swings to 130° each direction)
- Available in automatic hold open (both directions). Specify 90° or 105° (A)
- Adjustable closing and latch speeds
- Includes 608011 bottom pivot
- Frame stop is required. See Door Control Accessories, page 8 #60131. Order separately.
- Product should always be used with auxiliary floor or wall stop
- 2 year limited warranty

End load arm shown

### Optional Features

- Extended spindle; 1/2" longer than standard closer spindle. Must be ordered as part of the closer; cannot be added later
- 199 end caps for top and bottom of wood door

### Compliance

- ANSI CO5052/CO5062
- Compliant to ANSI A156.4 standards

### Models

- 608EL closers should be used on aluminum doors and frames. Package includes closer body, arm, frame mounting clips, and bottom pivot 608011. This can be used in an aluminum frame that is 1-3/4" x 4".
- 608SL closers should be used on aluminum door and frames with an arm that attaches to the spindle thru the face of the door. Package includes body arm, frame, mounting clips and bottom pivot 608011. This can be used on a frame that is 1-3/4" x 4".
- M608 closers should be used on metal doors and frames. Package includes closer body, arm, frame mounting box 608049PKG\*, cover plate and bottom pivot 608011. Frame size 2" x 5-1/2" minimum.
- MW608 closer should be used on wood doors and metal frames. Package includes closer body, arm, frame mounting box 608049PKG\*, cover plate and bottom pivot 608011. Frame size 2" x 5-1/2" minimum.
- W608 closer should be used on wood doors and frames. Package includes closer body, arm, frame, mounting box 608049PKG, cover plate and bottom pivot 608011. Frame size 2" x 5-1/2" minimum.
- AW608 closer should be used on wood doors and aluminum frames. Package includes closer body, arm, frame mounting clips, and bottom pivot 608011. Frame size 1-3/4" x 4".

\*Note that mounting channels must be welded into frames prior to shipment to job site.

Checkmate® overhead stops and holders are used to extend the life of the door, frame and any door closing devices. They may be necessary if there are strong winds, high traffic or abuse.

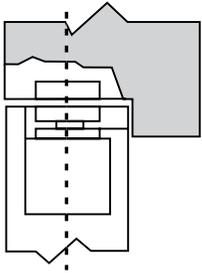

- When used in conjunction with a floor closer, you have absolute door control, top and bottom
- Provides positive deadstop at selected degree
- There are three functions, four ways to order
  - Friction Stay – used on doors without closers to keep doors open
  - Hold Open – door remains held open near deadstop location
  - Stops – door deadstops at a particular degree of opening
  - Multi Function – adaptable as hold open and/or stops
- Available as surface mounted or concealed
- Standard mount on push side of door (see model descriptions for pull side installations)
- Thru bolts are furnished with all surface models and must be used for installation.

**HW-022**

Revision Date:

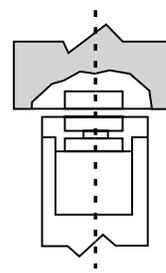

CONCEALED MOUNTING

**Method A – Standard Installation, Single Acting Nos. 1, 1ADJ, 2, 5, 6, 6ADJ Series**

For single acting doors, the jamb bracket is mortised into the frame and the channel mortised into the top of the door. Both the bracket and channel are secured with wood or machine screws.

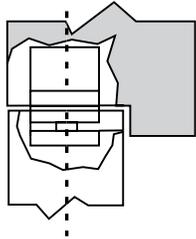

A cutout for the arm is required on the stop side of the door only. A hole must be drilled for the control knob of the No. 1 Series holder only.

**Method B – Standard Installation, Double Acting Nos. 1, 1ADJ, 2, 5, 6, 6ADJ Series**

For double acting center hung floor closer or pivot applications.

Mounting is similar to Method A, with the exception that the cutout for the arm is required on both sides of the door.

**Method C - Inverted Installation, Single Acting Nos. 2, 5 Series**

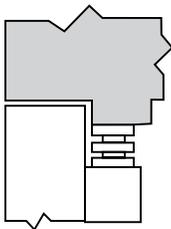

Recommended for doors with minimum top rail depth. The arm and jamb bracket are mortised into the door, and the channel is installed in the header with wood or machine screws. The cutout for the arm is required on the stop side of the door only.

**Method D - Rabbeted Door Installation, Single Acting No. 2, 5 Series**

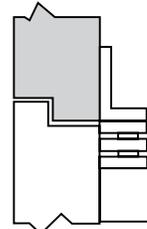

This method is designed for 1-3/4" doors with 1/2" maximum rabbet. The jamb bracket is mortised into the header and the arm and channel are mortised into the door. Wood or machine screws are used for fastening. The cutout for the arm is required on the stop side of the door only.

SURFACE MOUNTING

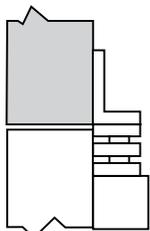

**Method No. 1 – Standard Installation (Push side of door) Nos. 8HD, 9, 9ADJ, 10, 55 Series**

The jamb bracket mounts on the soffit with wood or machine screws. The channel mounts to the door with sex bolts.

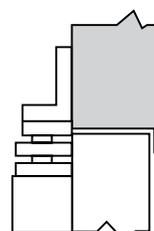

**Method No. 2 – Rabbeted Door Installation (Push side of door) Nos. 8HD, 9, 9ADJ, 10, 55 Series**

A special angle jamb bracket adapter mounts on the header with wood or machine screws. The jamb bracket attaches to the adapter with machine screws. The channel fastens to the door with sex bolts. **(Same bracket as used with Method 3 and 5. See catalog for bracket number for each model.)**

**Method No. 3 - Flush Door Installation (Push side of door) Nos. 8HD, 9, 9ADJ, 10, 55 Series**

This method of installation is identical to Method No. 2 for Rabbeted Doors. **(Same bracket as used with Method 2 and 5. See catalog for bracket number for each model.)**

**Method No. 5 - Reverse Installation (Pull side of door) Nos. 9, 9ADJ, 10 and 55 Series**

The jamb bracket adapter is secured to the header with wood or machine screws. The jamb bracket fastens to the adapter with machine screws and the channel mounts on the door with sex bolts. **(Same bracket as used with Method 2 and 3. See catalog for bracket number.)**

HW-022

Revision Date:

### Less Spring – Suffix LS

Heavy-duty slide track type stops have a spring in the end of the channel that keeps the slider from deadstopping. If these units are being used with electromechanical closer, where the door, must deadstop, the LS option is needed. Available only with models 1 and 9.

### Angle Jamb Bracket Adapter

Standard-duty models suffix **5258 (non-handed)**

Heavy-duty models suffix **5458 (LH) or 5459 (RH)**

When surface mounted units are mounted on a rabbeted door on the push side, flush door and transom on the push side, or in a reverse installation on the pull side of the door, a special bracket is needed.

Note: not all models can be mounted on the pull side of the door (see specific model numbers in catalog.)

5258

5458/5459

### Security Screws – Suffix Torx®

Security screws can be supplied for exposed fasteners.

## CERTIFICATIONS

All Rixson Checkmate® overhead stops and holders are in compliance with ANSI/BHMA A156.8, Grade 1 and 2 Standards. See individual products for sub sections. See individual models for UL Listing.

## LIMITED WARRANTY

Rixson Checkmate® stops and holders are warranted for 2 years for defect. See Rixson price book for specific details of the limited warranty.

## SPECIFICATIONS

All overhead stops and holders shall be from a single manufacturer.

Standard-duty models used for interior or low to moderate traffic doors.

Heavy-duty models used for exterior or high traffic doors or doors subject to abuse.

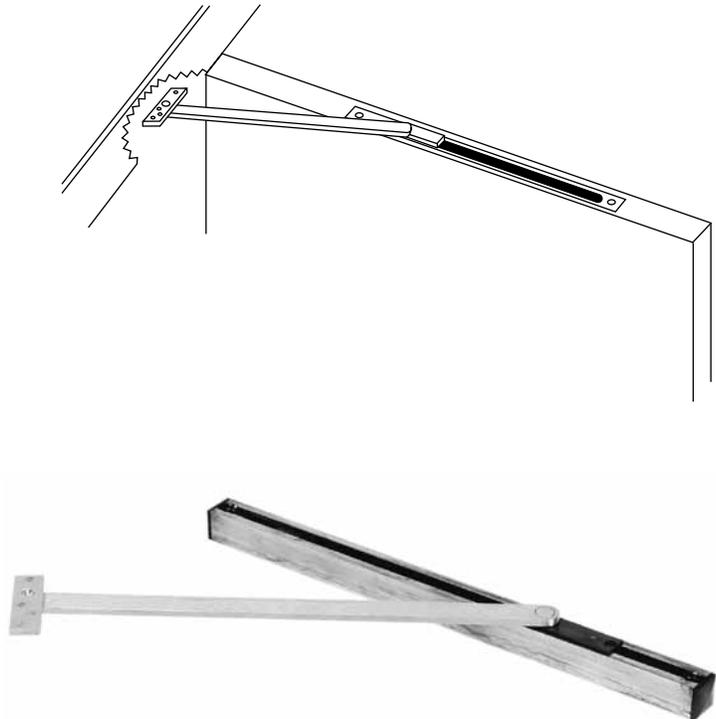

For extremely abusive areas or high winds use double lever arm type.

Coordinate deadstop and/or hold open location with concealed floor closers.

Checkmate products provide hold open and/or deadstop.

**Product Description & Features**

- Heavy-duty
- Interior or exterior doors
- Doors may be single or double acting
- Non-handed
- Slide track design
- Recommended for high traffic, heavy abuse installations
- Heavy shock absorber spring provides 5 -7° compression before dead stop
- LS option omits spring for special applications
- Surface on/off knob on hold open models
- Stop, friction stay or hold open functions
- Complete screw packet for installation in wood and machine screws for door and frame.
- For security areas, Torx® screws available for exposed fasteners
- Standard architectural finishes
- Durable slider cam and shock block
- 110° maximum opening
- 1-3/4" minimum door thickness, for thicker doors, note thickness when ordering
- 1-3/16" square channel
- Stop function UL listed for fire door assemblies
- Hanging means other than standard butts or offset pivots require special templating and pricing. Consult factory

### Cylinder Cam

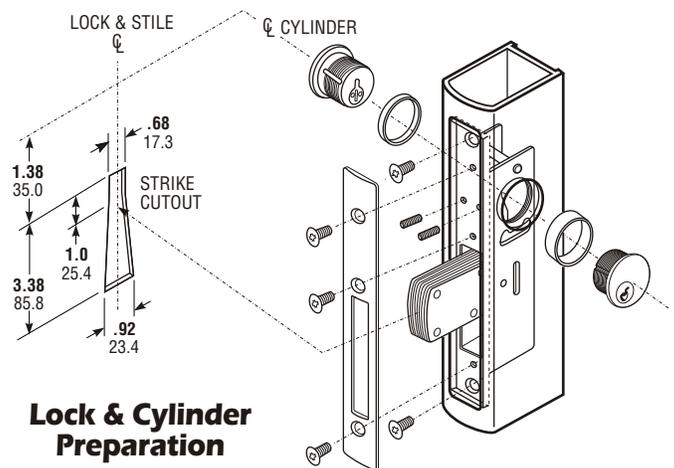

MS1850S Series locks are operable by any standard 1-5/32" diameter mortise cylinder with special MS® cam dimensioned as shown. Cylinders with MS® cams can be readily obtained from most cylinder manufacturers. See page SW-36 for cylinder make and trim ring information.

## INSTALLATION

### Stile Preparation

### Lock & Cylinder Preparation

## HOW TO ORDER

Specify quantity and the following information.  
Order related hardware separately.

## OPTIONS

For jambs too narrow to accept the long bolt, the MS1850S-050 offers a shorter bolt with hook shape to provide equal security against door-prying attempts. (See catalog page SL-1.) 1850S-020 short throw without hook also available. Second and third point locking bolts are available for pairs of doors. (See pages SW-11 and SW-12.) All use any make standard mortise cylinder and thus can be keyed into systems with other types of doors. "SCHOOLHOUSE" version, also available, is modified so that operation from inside is "unlock only." This lock is handed and must be specified LH or RH. Specify Series SCH 1850S. Same faceplate and backset options as Series MS1850S. Operation from inside, with standard Adams Rite 4066 Turn seen on page SW-36 or with 4550 Deadbolt Lever (page SW-16). For wood or hollow metal, see MS1850SN.

## STANDARD PACKAGE

Individually boxed with machine screws for mounting. Cylinders and/or thumbturn available at extra cost. Shipping weight: 1-1/2 lbs.

Faceplate Shape	Backset	Handing

## mortise cylinders

### fixed core for current products

Includes standard, hotel, security and high security for mortise and auxiliary applications. Stock cylinders are furnished 1-1/8" length and 6-pin keyed random. Unless otherwise specified, stock cylinders ordered separately will be provided with cylinder collar 1765.156. If another collar size is required, specify when ordering. Refer to individual product sections for collar applications and sizes.

Mortise cylinders are provided standard with cams to operate Yale® mortise locks, optional cams are available, see page 19.

Model #	Description	Lengths				Cam

## 2842- Automatic Flush Bolt Set

### Available Finishes:

- US10BE/613E
- US32D/630
- US26D/626
- US26/625
- US10/612
- US10B/613
- US4/606
- US3/605

### Specifications:

Material: Brass, stainless steel.

Fastener: 20 ea. #8 x 3/4 FH combo screws, 2 ea. #6 - 8 plastic anchors.

NOTE: No plastic anchor required for top only.

#### Features:

- Non-handed.
- Fully automatic—opening active door retracts top and bottom bolts.
- Low closing force.
- Override feature prevents damage to doors or bolts if bolt heads are blocked from entering strikes.
- Bolt head rods are adjustable up to 1-1/2".
- Thermal lock automatically locks the inactive door under high heat conditions due to fire.
- UL Listed.

Options: Can be used with the No. 570 Dust Proof Strike.

Other: For Metal Doors Fire Rated up to and Including 3 Hours, up to 4'w x 8'h

Size: 1" x 6-3/4"

Weight: 2.4 lbs.

ANSI A156.3: Type 25

## Lever Extension Flush Bolt With Bottom Fire Bolt No. 557 x 19BFB

**Material:** Flush bolt – brass  
Bottom fire bolt – stainless steel

**Finishes:** Available in standard architectural finishes (see page 9)

**Fastener:** 7 ea. #8 x 3/4" FH combo screws  
4 ea. #8 - 32 x 1/2" FH MS  
4 ea. #8 counter sunk washer

**Features:**

- For Fire Rated Plastic & Wood Covered Fire Doors measuring up to 4'w x 9'h rated up to 20 minutes
- 3/4" bolt throw, 3/4" backset; door strength maintained by corner reinforcing plate
- When door is subjected to 230°F the plug and black plastic cover will melt allowing the bolt to project, locking the leaves together
- Bottom fire bolt eliminates need for floor prep
- Oversize fire bolt strike hole allows for slight door misalignment

No.	Size	Weight
557 x 19BFB	Top bolt: 1" x 6 3/4" Bottom bolt: 1 3/16" dia.	0.9 lbs.

## Dust Proof Strike No. 570

**Material:** Brass

**Finishes:** Available in standard architectural finishes (see page 9)

**Fastener:** Adjustment nut  
Spanner wrench  
2 ea. #8 x 1 OH SMS, 2 ea. plastic anchors  
2 ea. #8 - 32 x 3/4" OH MS, 2 ea. lead anchors

**Features:**

- Works with all Rockwood manual and automatic flush bolts
- Removable face plate for use with thresholds
- Adjustable height for carpeted areas

No.	Size	Weight	ANSI A156.16
570	Face plate: 1 3/8" x 2 7/8" Barrel: 7/8" dia. x 2" depth	0.4 lbs.	L04021

## Gravity Door Coordinator No. 576

**Material:** Cast brass

**Finishes:** Available in standard architectural finishes (see page 9).

**Fastener:** Body: 2 ea. #10 x 1" FH SMS, 2 ea. #10 - 24 x 1" FH MS  
Strike: 5 ea. #8 x 1" FH SMS

**Other:**

- For use on door sizes:
  - with Astragal on active door – 18" to 48"
  - with Astragal on inactive door – 18" to 34"
  - with Astragal on both doors – 18" to 30"
- The overlap of the astragal is maximum 7/8" with door hung on standard hinges. Customer must contact the factory for all other astragal situations

**Features:** Non-handed reversible. Prevents the active door from closing until the inactive door is closed

No.	Size	Projection	Weight	ANSI A156.3
576	1" x 5 7/16"	7"	2.2 lbs.	Type 21

## MCK-14HD Series

**Recommended for new construction and renovations including new door and frame, new door with existing frame or existing door with new frame. Designed for use on retrofit applications and allows for adjustment in order to properly align the lock edge of the door to the frame.**

- Designed for use with doors which are the standard 1<sup>3</sup>/<sub>4</sub>" up to 2<sup>1</sup>/<sub>4</sub>" thick
- Extruded 6063-T6 aluminum alloy/temper with pinless assembly
- Special hinge reinforcements are not required. Hollow metal door and frame manufacturers' standard is acceptable. Removal of hinge reinforcements in the door and frame is not advised. If hinge reinforcements are left in place, hinge fillers are needed before installation of hinge
- 79", 83", 85", 95" and 120" lengths are standard for nominal door heights
- May be field-cut to exact door heights and also may be ordered in custom lengths. Consult the factory for minimum requirements on custom sizes
- Standard Fasteners are Custom #12-24 x 1<sup>1</sup>/<sub>16</sub>" FHUC, Type C, self-drilling screws. Wood screws are available upon request
- Designed for use with hollow metal frames, where the inset conforms to S.D.I. specifications for aligning doors and frames
- Available in custom lengths (specify handing and length in inches) and custom finishes (consult factory for availability)
- The Molex connectors or electrically modified hinges are guaranteed for five years

## 8800 Rim Exit Device Line

SARGENT manufactures a full line of exit devices providing the best combination of simplicity, strength, durability, aesthetics and innovation. The 8800 series is designed for standard width stile applications on wood and metal doors. This reversible rim exit device sets the industry standard for durability and reliability.

### Features

- Designed for standard width stile applications on wood and metal doors
- Most functions are non-handed
- Single point rim latching device
- Single door & double door applications with mullions
- Quiet operation and solid security
- Devices are ANSI A156.3 - Grade 1
- UL Fire and Panic listed

Note: Any retrofit or other field modification to a fire rated opening can potentially impact the fire ratings of the opening, and Sargent Manufacturing Company makes no representations or warranties concerning what such impact may be in any specific situation. When retrofitting any portion of an existing fire rated opening, or specifying and installing a new fire-rated opening, please consult with a code specialist or local code official (Authority Having Jurisdiction) to ensure compliance with all applicable codes and ratings.

### Specifications

- Door Types: Wood or metal 1-3/4" (44mm) Thick Door; Over 1-3/4" specify thickness and order as a 31- prefix.
- Door Widths:
  - E Rail - 24" to 32" (61cm to 81cm) No cutting required for 32" door;
  - F Rail - 33" to 36" (84cm to 91cm) No cutting required for 36" door
  - J Rail - 37" to 42" (94cm to 107cm) No cutting required for 42" door;
  - G Rail - 43" to 48" (110cm to 122cm) No cutting required for 48" door

- Strike: 649 Standard Black Nylon Coated
- Optional Strikes: 642, 644 and 613
- Dogging Feature: Hex key dogging standard; Cylinder dogging available (16-)
- NEW! - Visual Status Lock/Unlock Indicator (49-) available on 8816 devices only
- 
- Electric Options: AL-Alarm, PL-SARGuide Photoluminescent, TL-SARGuide Illuminated Touchpad, 53-LX latchbolt Monitor, 54-Outside lever monitoring, 55-Request-to-exit Signal-Rail monitoring, 56-ELR remote latch retraction, 57-Delay egress & Electromagnets, 58-Electric Dogging, 59-Electroguard-Self contained Delayed egress
- Mounting Fasteners: Supplied standard with wood and machine screws; Available with through-bolts and mortise (sex) nuts
- Latch Bolt: Stainless steel, 3/4" (19mm) throw
- Device Centerline from Finished Floor: 41" (1041 mm)
- Center Case Dimensions: 8-3/8" (213mm) x 2-5/8" (67mm)
- Projection: Pushbar Neutral – 3" (76 mm); Pushbar Depressed – 2-1/8" (54 mm)

The 7000 Series is also available in a **Complete One Box Solution**

HW-033

Revision Date:

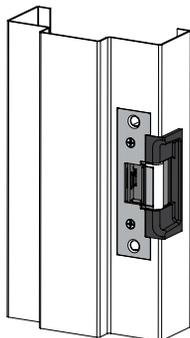

# 7000 Series

The **dual, preload solution** for cylindrical latch bolts and rim exit devices

*Shown with 71 Option*

The 7000 Series offers two solutions to address preloaded doors. The in-frame adjustable feature allows the installer to easily adjust the electric strike opening to accommodate the horizontal position of the latchbolt after installation.

The preload release function allows the electric strike to operate smoothly throughout the year under varying loads on the door caused by air-conditioning pressure, changes in the weather, warped doors or doors with weather stripping that often bind standard electric strikes. This unit accommodates cylindrical latchbolts up to 5/8" throw and rim exit latchbolts up to 3/4" throw.

## Specifications

- UL 1034, burglary-resistant listed
- UL 294 (6th Edition) listed
- ANSI BHMA A156.31, Grade 1 (791 and 792 options)
- ANSI/BHMA A156.31, Grade 2 (783S, 786S, and 789S options)
- MEA New York City accepted
- RoHS compliant

## Frame Application

- Metal
- Wood

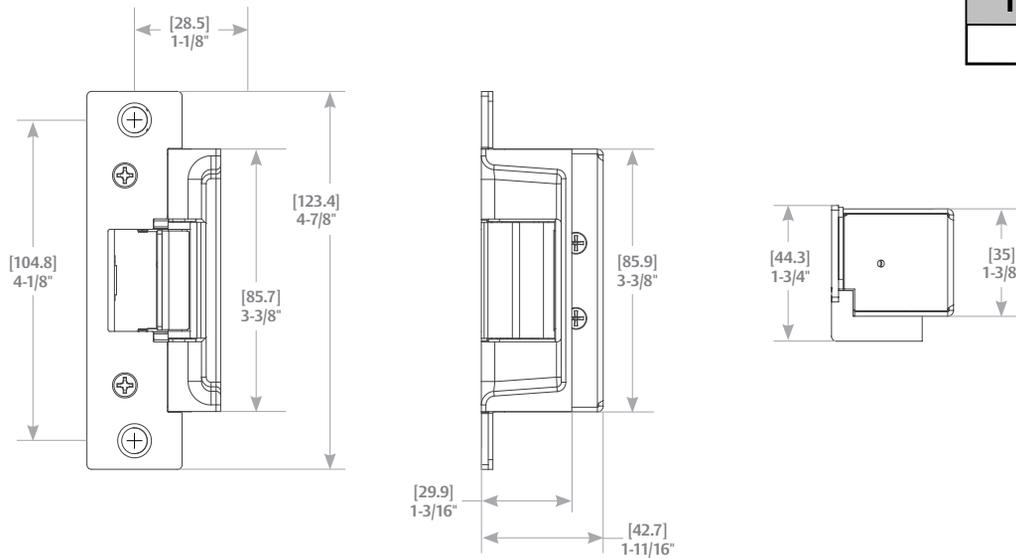

## Electrical (continuous duty)

- .45 Amps at 12 VDC
- .25 Amps at 24 VDC

## 7000 Models

<b>7000</b>	Universal electric strike	Faceplate options ordered separately, see page 31
<b>7000C*</b>	Complete electric strike	Includes the 791 and 792 faceplates
<b>RF7010</b>	Integrated Prox	Includes the strike body, Prox reader and door position switch
<b>IC7020</b>	Integrated iCLASS®	Includes the strike body, iCLASS reader and door position switch

\*Complete Pac is for cylindrical latchbolt only

### Standard Features

- Stainless steel construction
- Tamper-resistant
- Static strength 1,500 lbs (791 and 792 options)
- Dynamic strength 70 ft-lbs (791 and 792 options)
- Static strength 1,000 lbs (783S, 786S, and 789S options)
- Dynamic strength 50 ft-lbs (783S, 786S, and 789S options)
- Dual voltage 12 or 24 VDC/VAC
- Endurance 500,000 cycles
- Field selectable fail secure/fail safe
- Accommodates preload (up to 15lbs: fail secure only)
- Horizontal adjustment
- Non-handed
- Internally mounted solenoid
- Strike body depth 1-11/16"
- Plug-in connector
- Trim enhancer (791 and 792 options)
- Pocket adapter (786S and 789S options)
- 3-year limited warranty

### Optional Features

**LBM** » Latchbolt monitor

### Accessories

**SMB** » Surface mounting box (783S and 789S options)

**7000-104** » Lip extension trim adapter

**7000-105** » Trim enhancer (goof plate)

**7000-106** » Keeper pocket adapter

**7000-107** » Full keeper shim pack

**7000-108** » 1/8" spacer plate (783S and 789S options, black finish only)

**7000-110** » Replacement strike plate (791 and 792 option)

**150** » Strike latch guard

**HESCUT-MTK** » Metal template kit

**2001M** » Plug-in bridge rectifier

**2004M** » ElectroLynx® adapter

**2005M3** » SMART Pac® III

**2006M** » Plug-in buzzer

### Finishes

(791 and 792 options)

**630** » Satin stainless steel

**605** » Bright brass

**606** » Satin brass

**612** » Satin bronze

**613E** » Dark oxidized satin bronze

**629** » Bright stainless steel

**BLK** » Black

*\*Complete Pacs are only available in the 630 finish*

### Finishes

(783S, 786S and 789S options)

**613E** » Dark oxidized satin bronze

## Architectural Door Closer

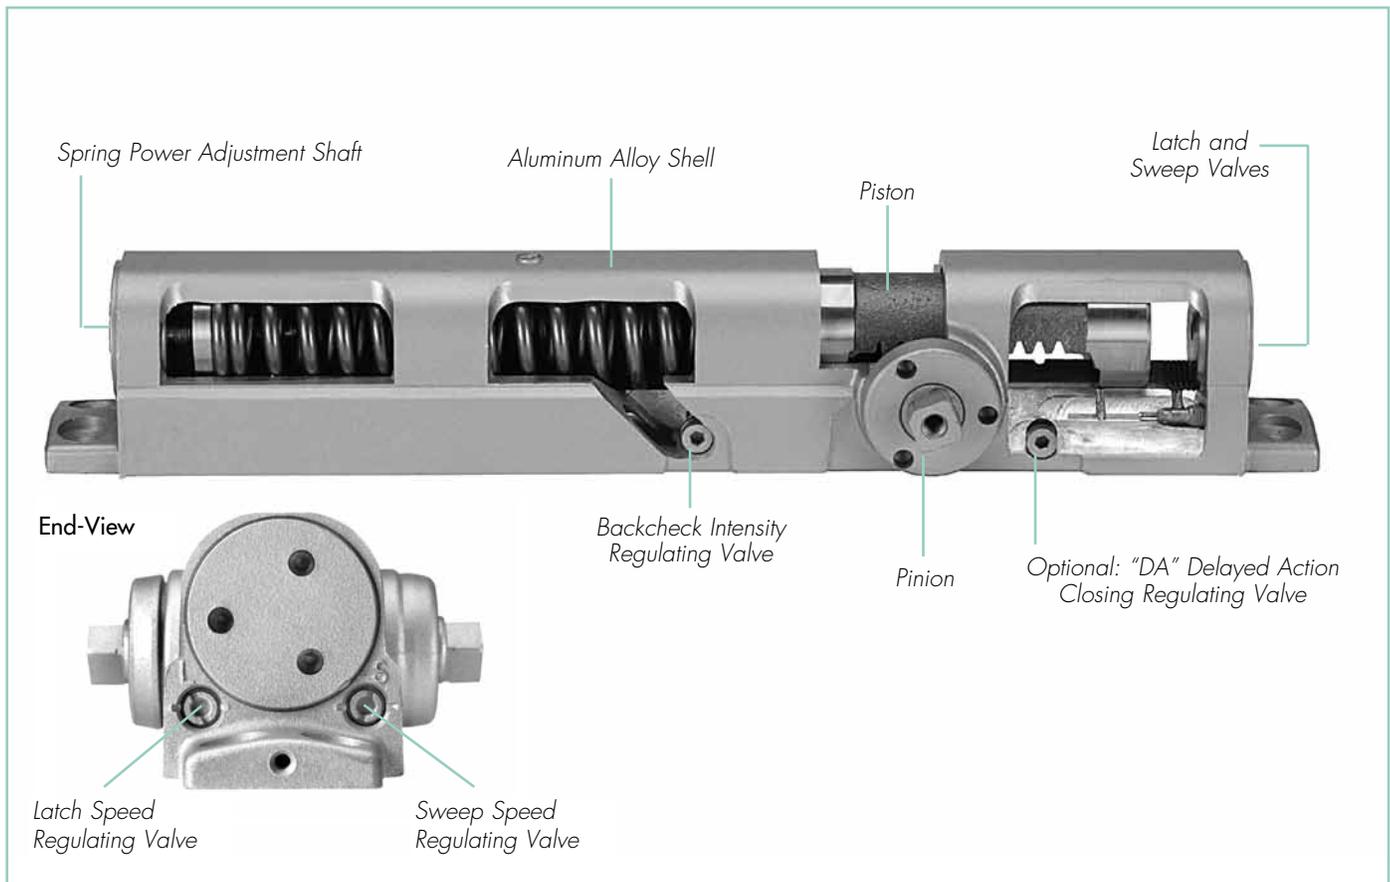

**Norton**<sup>®</sup>  
**ASSA ABLOY**

ASSA ABLOY, the global leader  
in door opening solutions

OVERVIEW

Cutaway View

COMPLIANCE STANDARDS

- ANSI/BHMA A156.4, Grade 1 certified 
- UL / cUL listed for use on fire rated doors 
- UL10C listed for positive pressure fire test
- 8301 and 8501 door closers are designed to comply with requirements for the Americans with Disabilities Act (A.D.A) and ANSI standard A117.1 
- This product is manufactured in an ISO 9001 facility

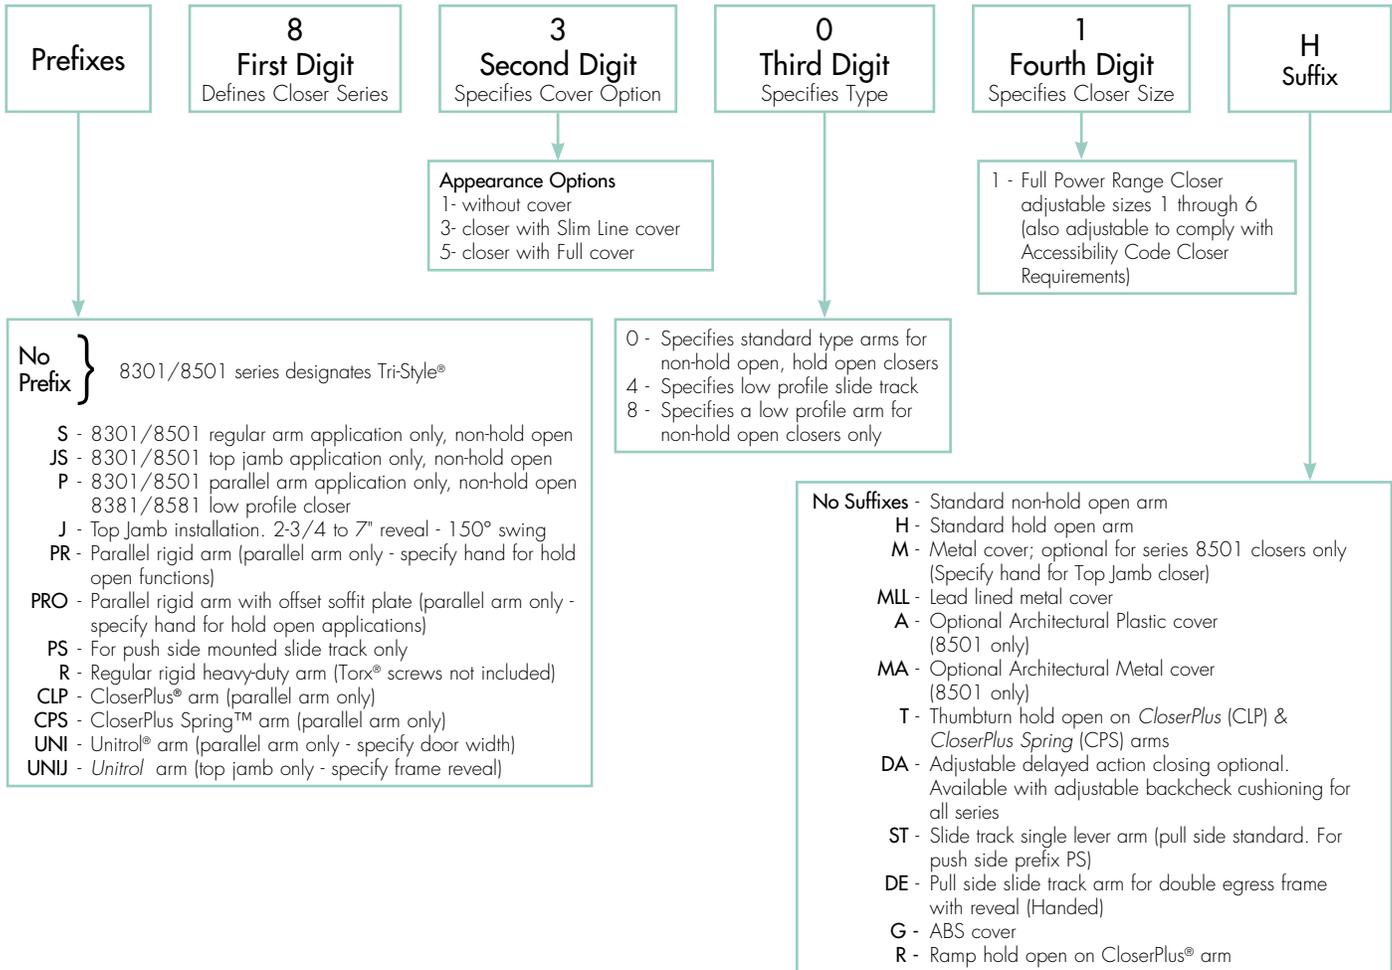

**CAUTION: Door Closers for Low Opening Force Applications:**

Door closers installed in openings required to meet the requirements of The Americans with Disabilities Act or ANSI/BHMA Standard A117.1, when adjusted to meet those requirements, may not provide adequate closing power to dependably close and latch the door.

HOW TO ORDER

**HW-034**  
 Revision Date:

For optimum protection of door and frame assemblies, always use auxiliary wall, floor, or overhead door stop.

**Notes:**

- Warranty becomes void if door closer is installed on the exterior side of a door in the exterior wall of a building.
- It is strongly recommended, and required on fire door assemblies, that doors having a door closer be hung on ball bearing or anti-friction hinges or pivots; unless an alternate method is identified in the door manufacturer's listing.
- Failure to use the correct type and size fasteners may void factory warranty.
- Fasteners for fire/smoke door assemblies must conform to NFPA 80. In some applications additional fasteners may be mandated by NFPA 80 that are not shipped with standard Norton product, such as sleeve-nuts/sex nuts or through-bolts and grommet nuts.
- Sizing charts provided on pages 13-25 are based on 1-3/4" (44mm) x 7" (2.13m) standard weight doors swinging to 110°. Other conditions (such as door height or weight; or wind/draft conditions) may require a larger size closer.

FEATURES

**Aluminum Alloy Housing**

Closer bodies are constructed of a special aluminum alloy, carefully selected to accommodate interactive steel components and operating conditions.

**Rack & Pinion Operation**

Provides a smooth constant control of the door through its full opening and closing cycle. 180° door swing can be achieved when door, frame, hardware and arm function do not interfere.

**Non-handed**

With few exceptions all series 8301/8501 door closers are non-handed and can be installed on either right- or left-hand swing doors. Pinion shaft extends vertically through the closer body in both directions. Some options, as noted on pages 6-7, will require that the hand of the closer be specified.

**Sweep Speed Control Valve**

Allows adjustment of door speed from the door's full open position down to approximately 10° from the closed position.

**Latch Speed Control Valve**

Allows adjustment of door speed from approximately 10° down to the door's fully closed position.

**Tri-Style®**

8301/8501 comes with screws, brackets and soffit plates to allow for regular, top jamb, and parallel arm installations.

**Adjustable Backcheck Valve**

Provides control of the door in the opening cycle, beginning at approximately 75° of door opening. It cushions the door opening when the door is forcibly opened beyond its pre-adjusted limits.

**Standard Molded Covers**

Molded of high-impact U.L. listed material. These covers are non-handed for all applications.

**Warranty**

Limited 25-year warranty for defects and life of the building on the aluminum housing.

**Closer Fluid**

NorGlide® closer fluid is a specially formulated multi-viscosity hydraulic fluid that contains lubricity and anti-oxidation agents that provide optimum performance and efficiency. This fluid complements the interaction of the door closer's aluminum housing with its steel and brass components, while maintaining stable viscosity to allow the door closer to perform in temperatures ranging from extremely high to as low as -40° F.

**Door Closer Power Options**

**Series 8301/8501 Multi-Sized Door Closer**

Adjustable through the power range of sizes 1 through 6; as outlined in ANSI/BHMA specification A156.4 option PT 4H.

Closers will also comply with the opening force requirements as outlined in the Americans with Disabilities Act (ADA) and ANSI/BHMA standard A117.1 for interior doors.

OPTIONAL FEATURES COVERS

**Optional Metal Cover**

This steel cover is non-handed for regular and parallel arm applications, but is handed for top jamb applications. Cover is available in sprayed or plated finishes.

**Optional Architectural Covers \***

**Plastic** Architectural plastic covers are molded of high-impact U.L. listed material. They are non-handed and available in sprayed finishes.

**Metal** The architectural metal covers are steel and non-handed for all applications. These covers are available in sprayed or plated finishes.

**Optional ABS Cover**

Consult factory for details

## OPTIONAL FEATURES

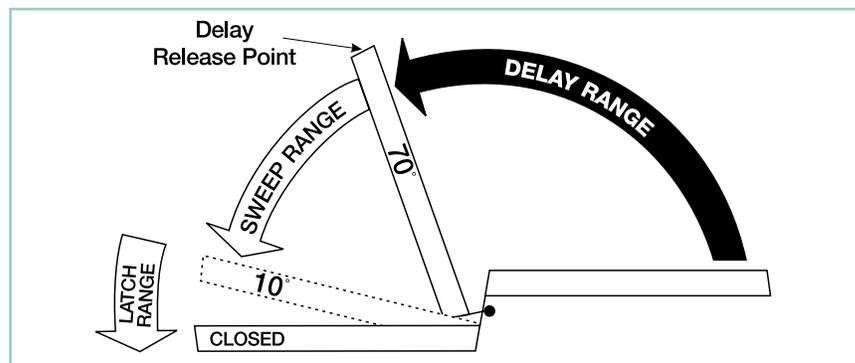

### Adjustable Delayed Action Closing

An optional hydraulic feature that adds a third speed range to the closing cycle. This feature becomes effective when the door is opened and released at any point beyond 70°. The amount of time delay depends upon the combination of the angle of door release and valve adjustment. The valve can be adjusted with a 1/8" (3mm) hex key from no delay time up to maximum delay times of:

Door Opened	Approximate Time of Delay Cycle
180°	4-5 minutes
120°	2-3 minutes
90°	25-30 seconds

### Pressure Relief Safety Valve

The delayed action hydraulic system contains a pressure relief valve. Any time the door is forced toward the closed direction while it is in the closing cycle, the valve will open and permit the door to close. This prevents damage to door, frame and closer.

### Suggested Applications

Delayed Action closing allows slow-moving traffic to clear the opening before the door closer's normal closing cycle begins. This feature can be helpful in health care facilities such as hospitals and nursing homes. It provides sufficient time for persons on crutches or in wheelchairs to pass through a door without concern of it closing. At the same time, it can accommodate the facility's staff with movement of food service carts, beds, and other wheeled traffic.

Use of delayed action closers on many doors throughout industrial and commercial buildings can also assist the flow of traffic. Locations where additional time to clear the opening is advantageous are doors between office and factory/warehouse facilities, doors to workshops or laboratories, to kitchen and food processing areas, etc.

## OPTIONAL FEATURES ARMS

### Non-Hold Open

Self-closes door every time door is opened. Auxiliary stop (by others) required except when using the CloserPlus®, CloserPlus Spring™ or Unitrol® arms.

### Hold Open

Achieved by means of friction or ball and detent/ roller. Friction hold open has a range of 90° to 180° using template location and mechanical adjustment.

Ball and detent or roller hold open is effective in a range of 85° to 110°.

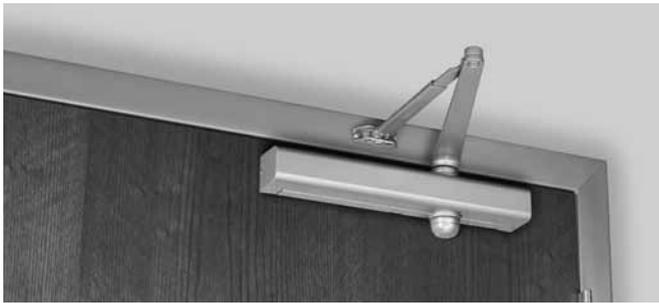

Hold open arm door closers are not permitted to be used on fire door assemblies.

### Door Opening Degrees

Arm Function	Regular Arm, Top Jamb Parallel Arm	Parallel Rigid Arm	CloserPlus® Parallel Arm	CloserPlus Spring™ Parallel Arm	Unitrol® Parallel Arm	Unitrol Top Jamb	Low Profile Regular, Parallel	Slide Track

✓=180° trim and template permitting

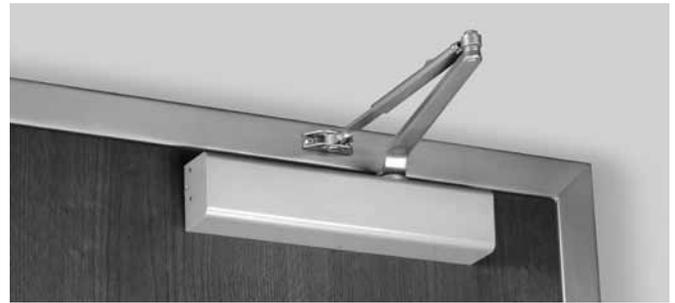

APPLICATIONS

**Regular Arm**

8301 - slim cover

This is the only pull-side application where a double lever arm is used. It is the most power-efficient application for a door closer. Sufficient frame, door and/or ceiling clearance must be considered.

8501 - full cover

Since the arm assembly projects directly out from the frame, this application may present an aesthetics issue or be prone to vandalism.

**Top Jamb**

For efficiency reasons this application provides the best alternative to the regular arm application. There must be sufficient frame face and/or ceiling clearance for this application. It requires a top rail on the door of just 2-1/4" (57mm). This application provides the best door control for doors in exterior walls that swing out of a building.

**Parallel Arm**

This application provides the most appealing design appearance for a surface-mounted door closer having a double lever arm. This also makes it beneficial in vandalism-prone areas. It is on the push side of the door and the arm assembly extends almost parallel to the door. In the closed position, there is very little or no hardware projecting beyond the frame face in most situations.

Due to the geometry of the arm it is approximately 25% less power efficient than a regular arm application. The entire closer and arm assembly are mounted below the frame stop. Top rail clearance dimensions will vary based on the type of cover used. (See pg. 15)

APPLICATIONS

Non-hold open arm shown

Non-hold open arm shown

**Parallel Rigid Arm**

An enhanced variation of the standard parallel arm assembly that is intended for use in heavy traffic areas where auxiliary door stops are installed.

Hold open available - specify hand when ordering.

**CloserPlus® Arm**

Similar to the Parallel Rigid arm, this arm incorporates a stop at the arm's soffit plate to dead stop the door at a predetermined degree of door swing between 85° and 110°, in 5° increments. Prior to dead stop the door closer's backcheck feature slows the door speed to reduce the impact of the stop action.

The *CloserPlus* Arm is intended for use where an auxiliary door stop cannot be utilized and no more than moderate abuse is anticipated. Where more extreme conditions are expected, use of a *Unitrol* arm is recommended.

Available with or without hold open. (Hold open strength is adjustable.)

Non-hold open arm shown

**CloserPlus Spring™ Arm**

This arm has all the characteristics of the *CloserPlus* arm with an additional steel buffer spring that provides greater protection at the end of the door opening cycle.

For extreme conditions, use of a *Unitrol* arm is recommended. Available with or without hold open.

**CloserPlus Ramp™**

The CLPR uses a patent pending ramp and plunger design that easily slides into place reducing wear often seen on traditional hold open arms. Ideal for applications where the door will constantly be pulled out of hold open.

APPLICATIONS

HW-034

Revision Date:

**Regular Rigid Arm**

This double lever arm features a non-adjustable secondary arm. Orbitally riveted joints prevent tampering or disassembly. Prefix "R" to model number. Available non-hold open only.

**Parallel Rigid Offset Arm**

This heavy-duty parallel rigid arm provides additional vertical clearance. It is well suited for applications where weatherstripping or other hardware prevents the use of the standard Parallel Rigid (PR) soffit plate. The non-hold open and hold arms allow 1-1/4" clearance. When used in conjunction with a #6891 spacer block, the PRO arm provides 1-7/8" clearance to accommodate the use of a surface overhead stop/holder.

Parallel

**Unitrol® Arm**

Can be used for either parallel arm or top jamb applications. *Unitrol* arms combine the features of a double lever arm overhead door stop/holder with the backcheck feature of the door closer to reduce door stopping shock loads to a minimum. The *Unitrol* uses a compression spring buffer at the soffit plate/arm shoe that will absorb 30 lbf. of force, 5° prior to the door's dead stop. Coupled

Top Jamb

with the door closer's backcheck feature, this arm provides the most controlled stop available with a surface door closer. For parallel arm applications there are three different length arm assemblies. Each length is designed for a specific range of door widths, to provide precise door control. This further lessens the dead stop impact on the door's hinges/pivots.

APPLICATIONS

Pull Side

Low Profile Pull Side

Push Side

Low Profile Push Side

**Slide Track**

Whether pull- or push-side mounted, slide track provides the designer with the smoothest lines available in a surface-mounted door closer. The single lever arm allows components to be located in a stack configuration to minimize projection and eliminate obtrusive arm angles. The arm geometry reduces door closer power efficiency by approximately 25% from that of a regular arm.

**Standard unit:**

- Adjustable 85°- 110° (hold open and non-hold open). Track is supplied with a spring buffered stop. An auxiliary stop, by others, is recommended.
- Specify if hold open unit is required.
- 180° swing (non-hold open, pull side only) is also available. This track assembly requires that a door stop, by others, be supplied to stop the door.

Regular Arm

Parallel Arm

**Regular Arm:** Allows closer to be installed where there is as little as 1" (25mm) of frame face or ceiling clearance.

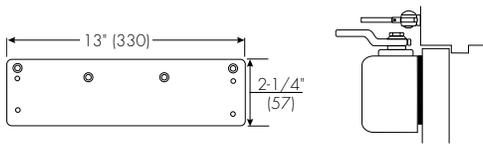

**Parallel Arm:** Allows closer to be installed 1/2" (13mm) higher up on door than standard parallel arm application.

**Low Profile Arm**

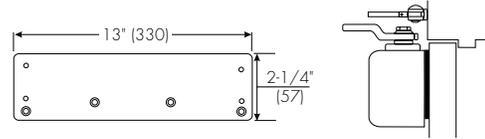

Supplied with 8381/8581 series door closers for non-hold open installations only. Low profile arms have a reduced height elbow joint and a straight main arm. This enables the door closer to be installed in less vertical space.

**Note:** Low profile arm door closers are not supplied with Tri-Style® packaging.

Closer Mounting Plates  
Slim Line Installations

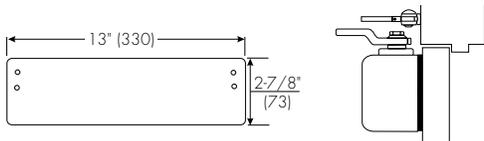

**Narrow Top Rail - #8146 Drop Plate:** For use where the narrow top rail of the door prevents the closer from being mounted directly on to the door surface. This drop plate must be used for any Series 8000 closer mounted on a top rail between 1-9/16" and 2-7/16" (40 and 62mm) in height, or any Series 8080 closer mounted on a top rail between 1-7/16" and 2-5/16" (36 and 59mm) in height.

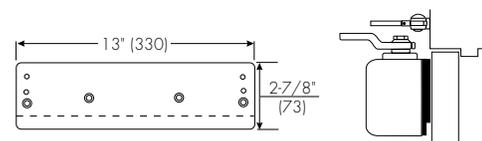

**Concealed Door Holder - #8146 Drop Plate:** For use where a concealed door holder prevents normal mounting of the closer to the door. This is the same plate used for narrow rail mounting, but is inverted for this application to permit the mounting screws to clear the bottom of the door-holder preparation in the top rail of the door. This places the centerline of the plate's upper mounting screws at 2-3/16" (56mm) from the top of the door.

Full Cover Installations

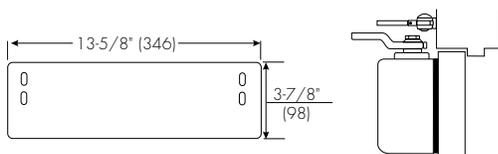

**Exposed Back - #8445 Molded Full Cover Decorative Back Plate:** For use on doors with glass lights where a closer with a molded full cover is installed and the closer back is exposed. This plate covers the back of the installation to give a pleasing appearance from the reverse side.

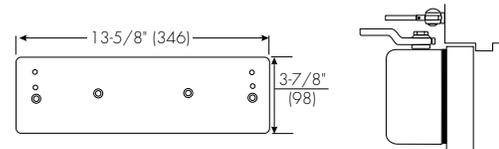

**Exposed Back/Narrow Top Rail - Exposed Back Concealed Door Holder - #8446 Molded Full Cover Drop Plate Kit:** For use with molded full cover installation when an 8146 Plate is needed as a drop plate on a narrow top rail, or as a clearance plate for a concealed door holder, and the closer back is exposed. Kit contains an 8146 Drop Plate and an 8445 Decorative Plate.

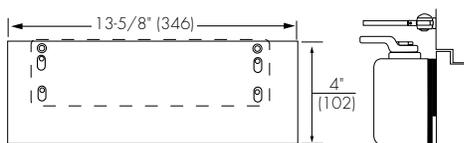

Metal Cover Installations

**Exposed Back - #8545 Metal Cover Decorative Back Plate:** For use on doors with glass lights where a closer with a metal full cover is installed and the closer back is exposed. This plate covers the back of the installation to give a pleasing appearance from the reverse side.

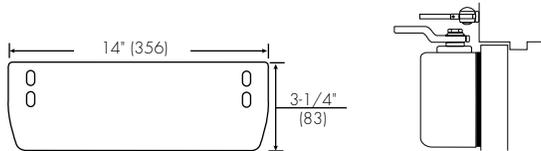

**Concealed Door Holder - #8546 Metal Cover Drop Plate:** For use where a concealed door holder prevents the normal mounting of the closer to the door. This plate permits the mounting screws to clear the bottom of the door-holder preparation in the top rail of the door. This places the centerline of the plate's upper mounting screws at 2-3/16" (56mm) from the top of the door.

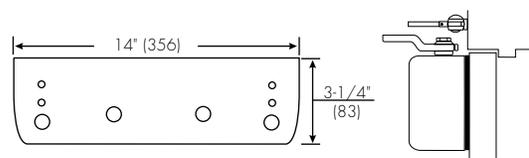

**Exposed Back/Narrow Top Rail - #8549 Metal Cover Drop Plate Kit:** For use with metal full cover installations, when an 8146 Plate is needed as a drop plate on a narrow top rail and the closer back is exposed. Kit contains an 8146 Drop Plate and an 8545 Decorative Plate.

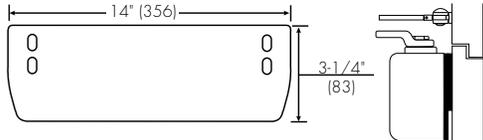

Closer Mounting Plates  
Architectural Plastic or Metal Cover Installations

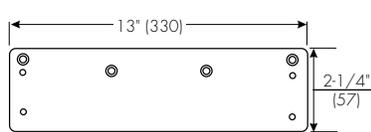

**Exposed Back - #8545A Architectural Plastic or Architectural Metal Cover Decorative Back Plate:** For use on doors with glass lights where a closer with an architectural plastic or metal cover is installed and the closer back is exposed. This plate covers the back of the installation to give a pleasing appearance from the reverse side.

**Concealed Door Holder - #8546A Architectural Plastic or Architectural Metal Cover Drop Plate:** For use where a concealed door holder prevents the normal mounting of the closer to the door. This plate permits the mounting screws to clear the bottom of door-holder preparation in the top rail of the door. This places the centerline of the plate's upper mounting screws at 2-3/16" (56mm) from the top of the door.

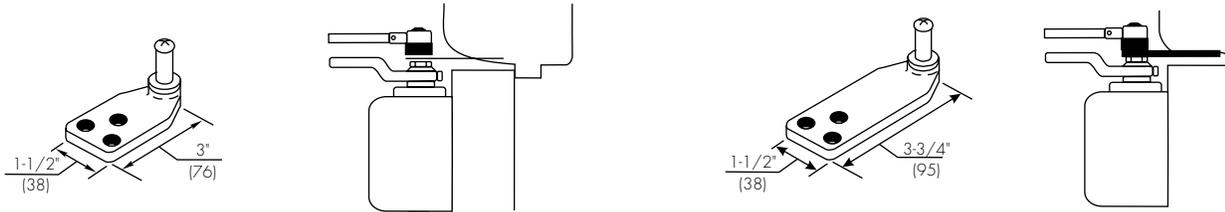

**Exposed Back/Narrow Top Rail - #8549A Architectural Plastic or Architectural Metal Cover Drop Plate Kit:** For use with architectural plastic or metal cover installations when an 8146 plate is needed as a drop plate on a narrow top rail and the closer back is exposed. Kit contains an 8146 Drop Plate and an 8545A Decorative Plate.

REGULAR ARM

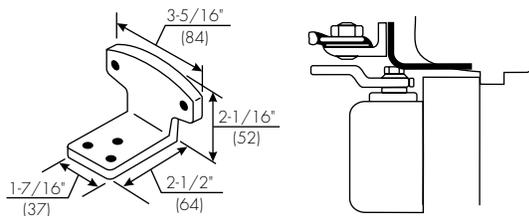

Brackets for Non-Hold Open Arms

**Molded/Bull Nose Trim - #2403B Bracket:** For use where the door frame has molded or bull nose trim which will not accept a standard non-hold open shoe. The bracket is mortised into the frame rabbet, and projects beyond the face of the frame. It will accommodate a frame rabbet up to 2" (51mm) deep.

**Molded / Bull Nose Trim - #2403-3/4 Bracket:** This bracket is similar to, but longer than, the 2403B bracket. It is designed to accommodate frame rabbets from 2" to 2-7/8" (51 to 73mm) deep.

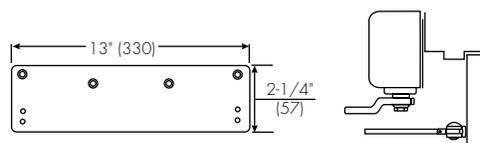

Brackets for Hold Open Arms

**Molded / Bull Nose Trim - #80 Bracket:** For use where the door frame has molded or bull nose trim which will not accept a standard hold open shoe. It is mortised into the frame rabbet, and projects beyond the face of the frame. It will accommodate a rabbet up to 2" (51mm) deep. This bracket is used in combination with the standard hold-open mounting shoe.

TOP JAMB ARM

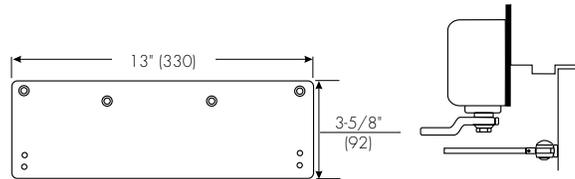

Closer Mounting Plates  
Slim Line Installations

**Low Ceiling Clearance - #8146 Drop Plate:** For use where low ceiling clearance prevents normal top jamb mounting. This plate is used when clearance is from 1-7/8" to 2-7/8" (48 to 73mm). Where ceiling clearance is less than 1-7/8" (48mm) see #8148 Drop Plate on page 30.

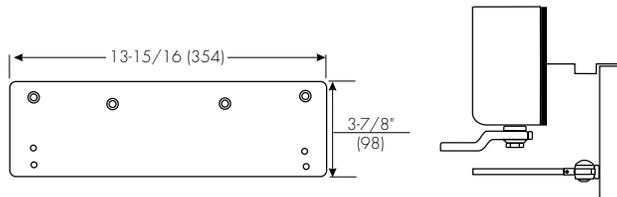

**Overhead Door Holder - #8146 Drop Plate:** For use where a surface or concealed overhead door holder prevents normal top jamb mounting. This plate drops the closer and allows arm mounting screws to clear the bottom of the door holder. This places the centerline of the arm mounting screws at 2-7/8" (73mm) from the top of the door.

Closer Mounting Plates  
Slim Line Installations

**Low Ceiling Clearance - #8148 Drop Plate:** For use where the ceiling clearance is between 1-1/2" and 1-3/4" (38 and 44mm).

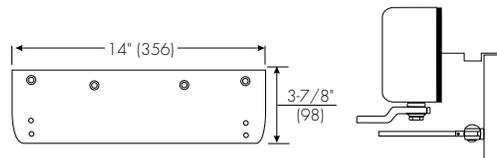

Metal Cover Installations

**Low Ceiling Clearance - Overhead Door Holder - #8547 Metal Full Cover Drop Plate:** For use where a low ceiling clearance prevents normal top jamb mounting. This plate is used when the clearance is between 1-5/8" and 3-7/8" (41 and 98mm). Or for use where a surface or concealed overhead door holder prevents normal top jamb mounting of a

closer with a metal full cover. This plate drops the closer and allows arm mounting screws to clear the bottom of the door holder. This places the centerline of the arm mounting screws at 3-7/8" (98mm) from the top of the door.

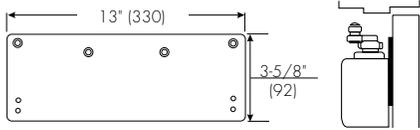

Architectural Plastic or Metal Cover Installations

**Low Ceiling Clearance - Overhead Door Holder - #8547A Architectural Plastic or Architectural Metal Cover Drop Plate:** For use where low ceiling clearance prevents normal top jamb mounting. This plate is used when the clearance is between 1-5/8" and 3-7/8" (41 and 98mm). Also for use where a surface or concealed overhead door holder prevents normal top jamb mounting of a closer with an

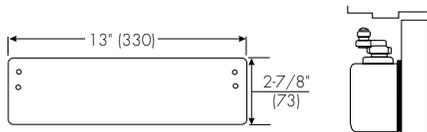

architectural plastic or metal full cover. This plate drops the closer and allows arm mounting screws to clear the bottom of the door holder. This places the centerline of the arm mounting screws at 3-7/8" (98mm) from the top of the door.

**Closer Mounting Plates  
Slim Line Installations**

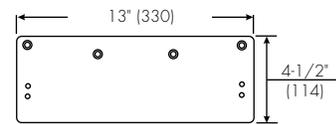

**Narrow Top Rail - #8148 Drop Plate:** For use where a narrow top rail prevents the closer from being mounted directly to the door surface. This drop plate can be used to mount a closer on a top rail as narrow as 2-7/8" (73mm) in height.

**Full Cover Installations**

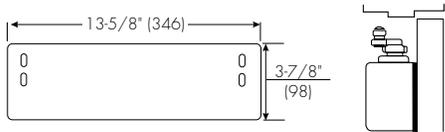

**Exposed Back - #8445 Molded Full Cover Decorative Back Plate:** For use on doors with glass lights where a closer with molded full cover is installed and the closer back is exposed. This plate covers the back of the installation to give a pleasing appearance from the reverse side.

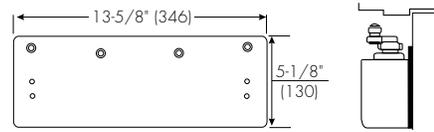

**Exposed Back/Narrow Top Rail - #8158 Molded Full Cover Drop Plate:** For use on doors with glass lights where a closer with molded full cover is installed and the back of the closer is exposed. This covers the back of the installation and gives a pleasing appearance from the reverse side.

**Metal Cover Installations**

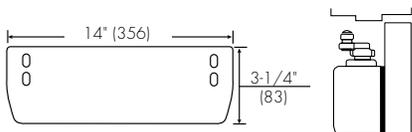

**Exposed Back - #8545 Metal Full Cover Decorative Back Plate:** For use on doors with glass lights where a closer with full metal cover is installed and the back of the closer is exposed. This plate covers the back of the installation and gives a pleasing appearance from the reverse side.

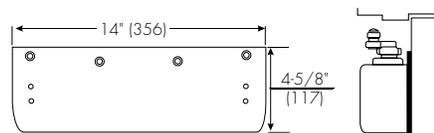

**Exposed Back/Narrow Top Rail - #8548 Metal Full Cover Drop Plate:** For use on doors with glass lights where a closer with metal full cover is installed on a narrow top rail, and the back of the cover is exposed. This drop plate can be used to mount a closer on a top rail as narrow as 2-7/8" (73mm) in height. This plate covers the back of the installation and gives a pleasing appearance from the reverse side.

**Architectural Plastic or Metal Cover Installations**

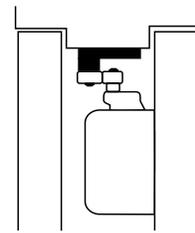

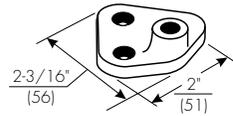

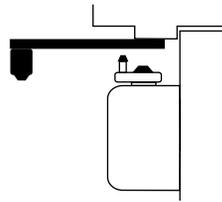

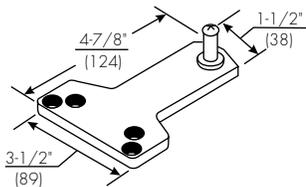

**Exposed Back - #8545A Architectural Plastic or Architectural Metal Cover Decorative Back Plate:** For use on doors with glass lights where a closer with an architectural plastic or metal cover is installed and the closer back is exposed. This plate covers the back of the installation to give a pleasing appearance from the reverse side.

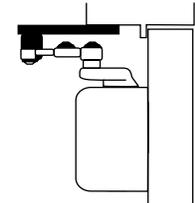

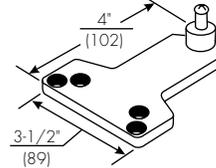

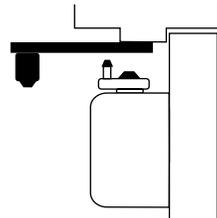

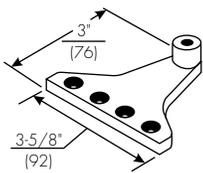

**Exposed Back/Narrow Top Rail - #8548A Architectural Plastic or Architectural Metal Cover Drop Plate:** For use on doors with glass lights where a closer with an architectural plastic or metal cover is installed on a narrow top rail, and the back of the cover is exposed. This drop plate can be used to mount a closer on a top rail as narrow as 2-7/8" (73mm) in height. This plate covers the back of the installation to give a pleasing appearance from the reverse side.

Brackets for Non-Hold Open Arms

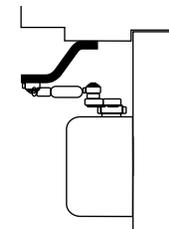

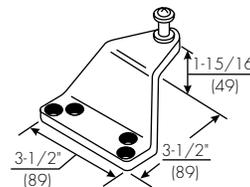

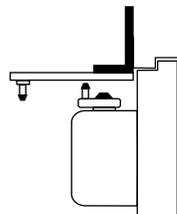

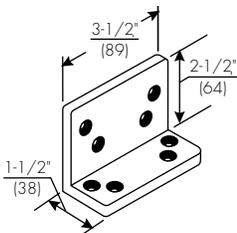

**Standard Installation - #1618A Soffit Plate:** This soffit plate is supplied standard with parallel arm closers. It can be mounted where the frame soffit is as narrow as 1" (25 mm).

**Mounting between Doors - #2018 Soffit Bracket:** For use where insufficient space between companion doors does not permit use of other soffit plates. This bracket permits mounting of the closer between doors with as little as 3" (76mm) of header space. Permits closer arm to clear up to 5/8" (16mm) high stop.

**Narrow Frame/Removable Stop - #2018B Soffit Plate:** For use where a narrow frame or frame with removable stop does not permit use of the standard soffit plate. This soffit plate may be mounted on the frame soffit or the frame rabbet where the stop does not exceed 5/8" (16mm) in height. All of the screw holes are in a straight line, requiring as little as 1-1/4" (32mm) of frame reveal to mount bracket and maintain good closer arm geometry. Where the frame soffit is as wide as 2" (51mm), this soffit plate may be used to clear weather-stripping that is up to 1-3/8" (35mm) wide and 5/8" (16mm) in height.

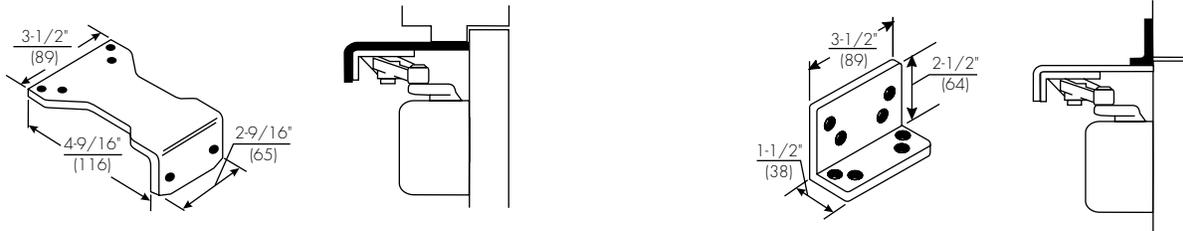

**Blade/Applied Stop - #2018D Soffit Plate:** For use where a blade or applied stop does not permit installation of the standard soffit plate. Mounts to either the frame soffit or rabbet. Since this soffit plate projects 7/8" (22mm) less than a standard soffit plate, it requires a minimum frame reveal of 1-1/2" (38mm). Permits closer to clear up to a 5/8" (16mm) stop.

**Flush Transom - #2022 Angle Bracket:** For use where rabbeted or flush transom conditions prevent installation of a soffit plate. Used in combination with the 1618 soffit plate, or may be used in combination with the 2018S soffit plate when it is necessary for the closer arm to clear a separate overhead door holder.

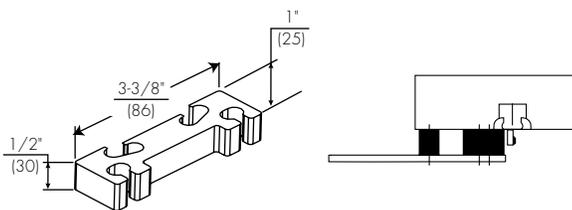

**Extra-Clearance - #2018S Offset Soffit Plate:** For use where the need for additional clearance prevents use of the standard soffit plate. This plate mounts to the frame soffit to provide up to 2" (51mm) of clearance when a separate overhead door holder is used. Standard mounting requires a 2-5/8" (67mm) wide frame soffit. It may also be used where unusually high frame stops or weather-stripping prevent the use of other soffit plates.

Brackets for Non-Hold Open & Hold Open Arms

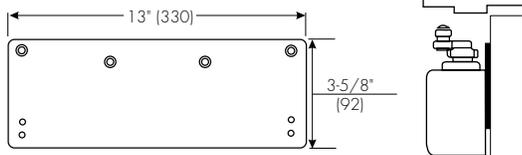

**Parallel Hold-Open - #1628H Adapter Plate:** Supplied standard with all parallel arm hold open closers. It can also be used to convert regular arm or top jamb hold open arms to parallel arm installation. It can be mounted where the frame soffit is as narrow as 1" (25mm).

**Flush Transom - #2022 Angle Bracket:** For use where rabbeted or flush transom conditions prevent installation of a soffit plate. Used in combination with the 1628H adapter plate, this bracket fastens to the overhead transom to provide a mounting surface for the soffit plate assembly.

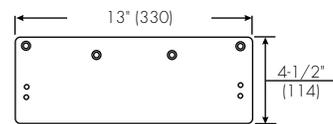

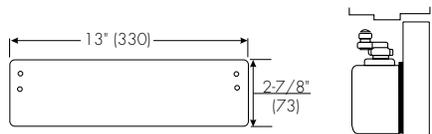

**Clearance/Support Blade Stop - #6891 Spacer Block:** For use where the door frame has a blade stop and the soffit plate must be mounted on the frame rabbet. This accessory is used in combination with the standard spacer block to provide clearance of the blade stop. Also used with non-hold open arms.

Closer Mounting Plates  
Slim Line Installations

**Narrow Top Rail - #8148 Drop Plate:** For use where a narrow top rail prevents the closer from being mounted directly to the door surface. This drop plate can be used to mount a closer on a top rail as narrow as 2-9/16" (65mm) in height.

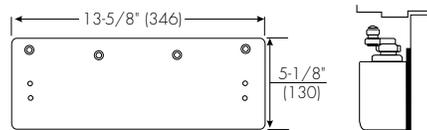

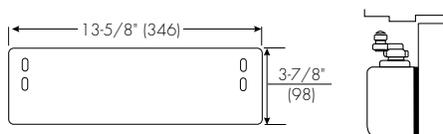

Full Cover Installations

**Exposed Back - #8445 Molded Full Cover Decorative Back Plate:** For use on doors with glass lights where a closer with molded full cover is installed and the closer back is exposed. This plate covers the back of the installation to give a pleasing appearance from the reverse side.

**Exposed Back/Narrow Top Rail - #8158 Molded Full Cover Drop Plate:** For use on doors with glass lights where a closer with molded full cover is installed and the back of the closer is exposed. This covers the back of the installation and gives a pleasing appearance from the reverse side.

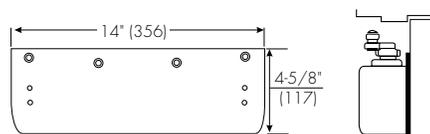

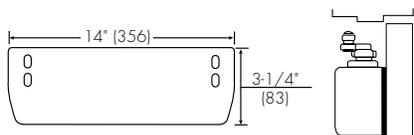

Metal Cover Installations

**Exposed Back - #8545 Metal Full Cover Decorative Back Plate:** For use on doors with glass lights where a closer with full metal cover is installed and the back of the closer is exposed. This plate covers the back of the installation and gives a pleasing appearance from the reverse side.

**Exposed Back/Narrow Top Rail - #8548 Metal Full Cover Drop Plate:** For use on doors with glass lights where a closer with metal full cover is installed on a narrow top rail, and the back of the cover is exposed. This drop plate can be used to mount a closer on a top rail as narrow as 2-9/16" (65mm) in height. This plate covers the back of the installation and gives a pleasing appearance from the reverse side.

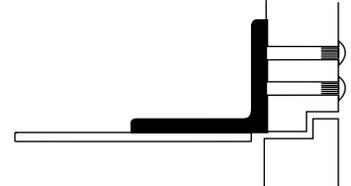

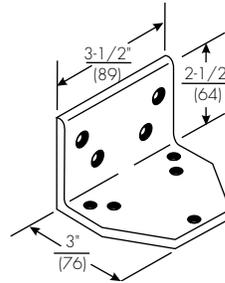

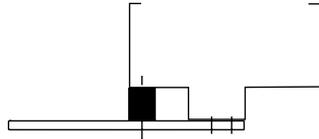

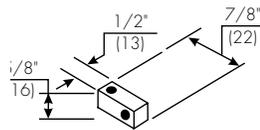

Architectural Plastic or Metal Cover Installations

**Exposed Back - #8545A Architectural Plastic or Architectural Metal Cover Decorative Back Plate:** For use on doors with glass lights where a closer with an architectural plastic or metal cover is installed and the closer back is exposed. This plate covers the back of the installation to give a pleasing appearance from the reverse side.

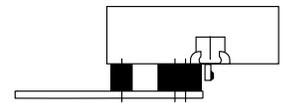

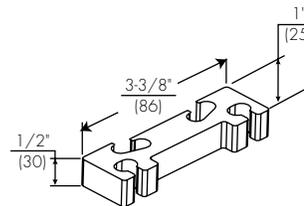

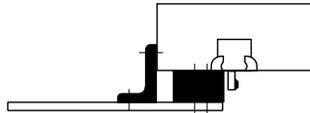

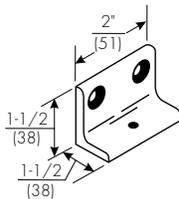

**Exposed Back/Narrow Top Rail - #8548A Architectural Plastic or Architectural Plastic or Architectural Metal Cover Drop Plate:** For use on doors with glass lights where a closer with an architectural plastic or metal cover is installed on a narrow top rail, and the back of the cover is exposed. This drop plate can be used to mount a closer on a top rail as narrow as 2-9/16" (65mm) in height. This plate covers the back of the installation to give a pleasing appearance from the reverse side.

Brackets for Non-Hold Open Arms & Hold Open Arms

**Standard - #2019S Spacer Block:** For use where a narrow frame soffit does not provide adequate support for the soffit plate. Supplied as standard with all parallel rigid arm closers.

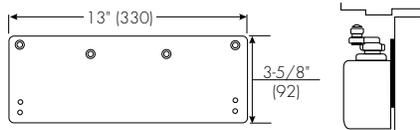

**Flush Rabbeted Transom - #2019L Angle Bracket:** For use where flush transom conditions prevent mounting of the standard soffit plate. This bracket is used in combination with the standard soffit plate.

**Narrow Frame - #6890 Support Bracket:** For use where the frame is narrow and the soffit plate cannot be mounted directly to the frame soffit or rabbet. Used in combination with the #6891 Spacer Block on blade stop frames to provide extra support and needed clearance of the blade stop. Used on frames where the frame stop does not exceed 5/8" (16mm) in height.

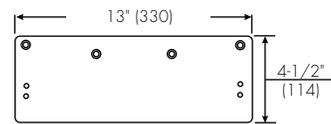

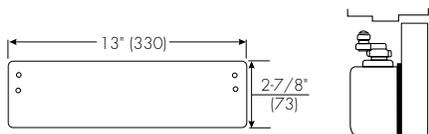

**Clearance/Support Blade Stop - #6891 Spacer Block:** For use where the door frame has a blade stop and the soffit plate must be mounted on the frame rabbet. This accessory is used in combination with the standard spacer block to provide clearance of the blade stop.

Closer Mounting Plates  
Parallel Arm

**Narrow Top Rail - #8148 Drop Plate:** For use where a narrow top rail prevents the closer from being mounted directly to the door surface. This drop plate can be used to mount a closer on a top rail as narrow as 2-7/16" (62mm) in height.

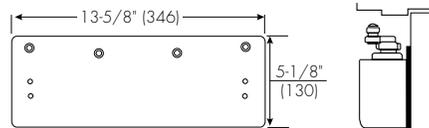

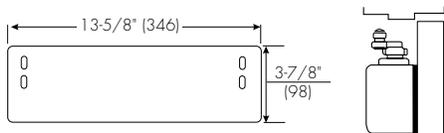

Full Cover Installations

**Exposed Back - #8445 Molded Full Cover Decorative Back Plate:** For use on doors with glass lights where a closer with molded full cover is installed and the closer back is exposed. This plate covers the back of the installation to give a pleasing appearance from the reverse side.

**Exposed Back/Narrow Top Rail - #8158 Molded Full Cover Drop Plate:** For use on doors with glass lights where a closer with molded full cover is installed and the back of the closer is exposed. This covers the back of the installation and gives a pleasing appearance from the reverse side.

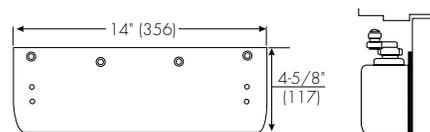

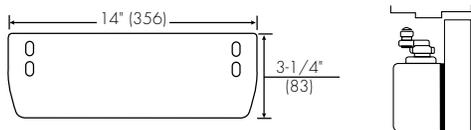

Metal Cover Installations

**Exposed Back - #8545 Metal Full Cover Decorative Back Plate:** For use on doors with glass lights where a closer with full metal cover is installed and the back of the closer is exposed. This plate covers the back of the installation and gives a pleasing appearance from the reverse side.

**Exposed Back/Narrow Top Rail - #8548 Metal Full Cover Drop Plate:** For use on doors with glass lights where a closer with metal full cover is installed on a narrow top rail, and the back of the cover is exposed. This drop plate can be used to mount a closer on a top rail as narrow as 2-9/16" (65mm) in height. This plate covers the back of the installation and gives a pleasing appearance from the reverse side.

Architectural Plastic or Metal Cover Installations

**Exposed Back - #8545A Architectural Plastic or Architectural Metal Cover Decorative Back Plate:** For use on doors with glass lights where a closer with an architectural plastic or metal cover is installed and the closer back is exposed. This plate covers the back of the installation to give a pleasing appearance from the reverse side.

**Exposed Back/Narrow Top Rail - #8548A Architectural Plastic or Architectural Plastic or Architectural Metal Cover Drop Plate:** For use on doors with glass lights where a closer with an architectural plastic or metal cover is installed on a narrow top rail, and the back of the cover is exposed. This drop plate can be used to mount a closer on a top rail as narrow as 2-7/16" (62mm) in height. This plate covers the back of the installation to give a pleasing appearance from the reverse side.

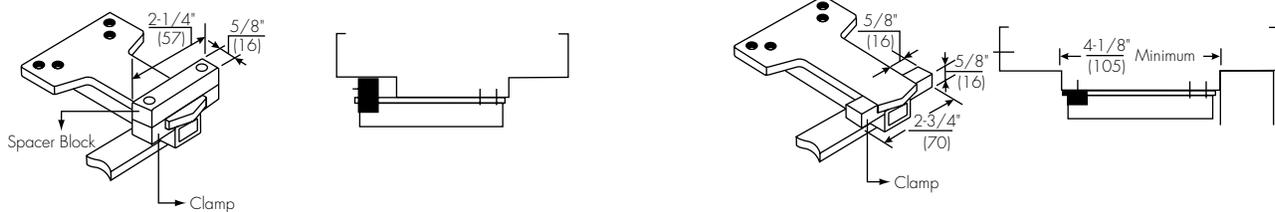

Closer Mounting Plate

Soffit Plate Reinforcing Brackets (for Parallel Arm)

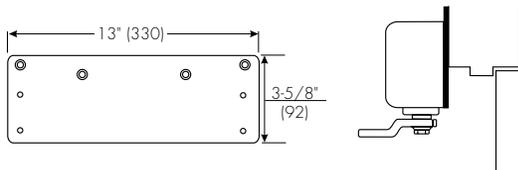

**Additional Support - #6190 Reinforcing Bracket:** Standard for use with all parallel arm *Unitrol* door controls. Provides additional support to the soffit plate on installations with door frame reveals from 1-7/8" to 4-5/8" (48 to 117mm).

**Flush Rabbeted Transom - #2022 Angle Bracket:** Optional for use with all parallel arm *Unitrol* door controls. For use where rabbeted or flush transom conditions prevent installation of the soffit plate assembly. This bracket fastens to the overhead transom to provide a mounting surface for the soffit plate assembly.

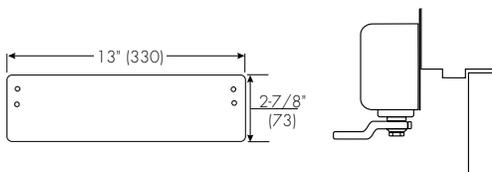

**Wide Frame - #6191 Reinforcing Kit:** Optional for use with all parallel arm *Unitrol* door controls. Used to support the soffit plate on installations with wide frames. Clamps may be used with or without the spacer block, depending on frame conditions.

Closer Mounting Plates  
Top Jamb

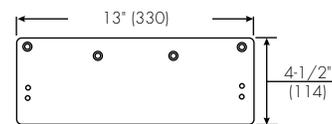

**Narrow Top Rail - #8148 Drop Plate:** For use where a narrow top rail prevents the closer from being mounted directly to the door surface. This drop plate can be used to mount a closer on a top rail as narrow as 2-7/16" (62mm) in height.

Full Cover Installations

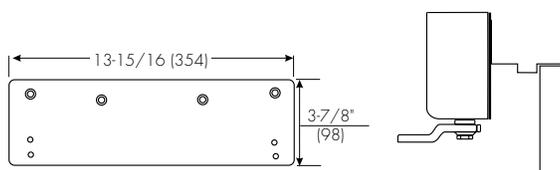

**Exposed Back - #8445 Molded Full Cover Decorative Back Plate:** For use on doors with glass lights where a closer with molded full cover is installed and the closer back is exposed. This plate covers the back of the installation to give a pleasing appearance from the reverse side.

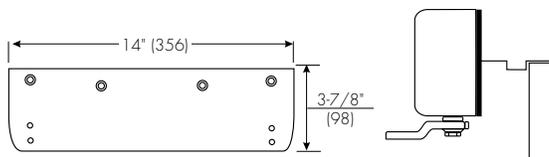

**Exposed Back/Narrow Top Rail - #8158 Molded Full Cover Drop Plate:** For use on doors with glass lights where a closer with molded full cover is installed and the back of the closer is exposed. This covers the back of the installation and gives a pleasing appearance from the reverse side.

Metal Cover Installations

**Low Ceiling Clearance - Overhead Door Holder - #8547 Metal Full Cover Drop Plate:** For use where a low ceiling clearance prevents normal top jamb mounting. This plate is used when the clearance is between 1-5/8" and 3-3/4" (41 and 95mm). Or for use where a surface or concealed overhead door holder prevents normal top jamb mounting of a closer with a metal full cover. This plate drops the closer and allows arm mounting screws to clear the bottom of the door holder. This places the centerline of the arm mounting screws at 3-7/8" (98mm) from the top of the door.

Architectural Plastic or Metal Cover Installations

**Low Ceiling Clearance - Overhead Door Holder - #8547A Architectural Plastic or Architectural Metal Cover Drop Plate:** For use where low ceiling clearance prevents normal top jamb mounting. This plate is used when the clearance is between 1-5/8" and 3-3/4" (41 and 95mm). Or for use where a surface or concealed overhead door holder prevents normal top jamb mounting of a closer with an architectural plastic or metal full cover. This plate drops the closer and allows arm mounting screws to clear the bottom of the door holder. This places the centerline of the arm mounting screws at 3-7/8" (98mm) from the top of the door.

## 8800 Rim Exit Device Line

SARGENT manufactures a full line of exit devices providing the best combination of simplicity, strength, durability, aesthetics and innovation. The 8800 series is designed for standard width stile applications on wood and metal doors. This reversible rim exit device sets the industry standard for durability and reliability.

### Features

- Designed for standard width stile applications on wood and metal doors
- Most functions are non-handed
- Single point rim latching device
- Single door & double door applications with mullions
- Quiet operation and solid security
- Devices are ANSI A156.3 - Grade 1
- UL Fire and Panic listed

Note: Any retrofit or other field modification to a fire rated opening can potentially impact the fire ratings of the opening, and Sargent Manufacturing Company makes no representations or warranties concerning what such impact may be in any specific situation. When retrofitting any portion of an existing fire rated opening, or specifying and installing a new fire-rated opening, please consult with a code specialist or local code official (Authority Having Jurisdiction) to ensure compliance with all applicable codes and ratings.

### Specifications

- Door Types: Wood or metal 1-3/4" (44mm) Thick Door; Over 1-3/4" specify thickness and order as a 31- prefix.
- Door Widths:
  - E Rail - 24" to 32" (61cm to 81cm) No cutting required for 32" door;
  - F Rail - 33" to 36" (84cm to 91cm) No cutting required for 36" door
  - J Rail - 37" to 42" (94cm to 107cm) No cutting required for 42" door;
  - G Rail - 43" to 48" (110cm to 122cm) No cutting required for 48" door

- Strike: 649 Standard Black Nylon Coated
- Optional Strikes: 642, 644 and 613
- Dogging Feature: Hex key dogging standard; Cylinder dogging available (16-)
- NEW! - Visual Status Lock/Unlock Indicator (49-) available on 8816 devices only
- 
- Electric Options: AL-Alarm, PL-SARGuide Photoluminescent, TL-SARGuide Illuminated Touchpad, 53-LX latchbolt Monitor, 54-Outside lever monitoring, 55-Request-to-exit Signal-Rail monitoring, 56-ELR remote latch retraction, 57-Delay egress & Electromagnets, 58-Electric Dogging, 59-Electroguard-Self contained Delayed egress
- Mounting Fasteners: Supplied standard with wood and machine screws; Available with through-bolts and mortise (sex) nuts
- Latch Bolt: Stainless steel, 3/4" (19mm) throw
- Device Centerline from Finished Floor: 41" (1041 mm)
- Center Case Dimensions: 8-3/8" (213mm) x 2-5/8" (67mm)
- Projection: Pushbar Neutral – 3" (76 mm); Pushbar Depressed – 2-1/8" (54 mm)

## HC8800 Rim Exit Device Line

SARGENT manufactures a fine line of exit devices providing the best combination of durability, simplicity, strength, aesthetics and innovation. The HC8800 device is designed for standard width stile applications on metal doors. The Hurricane Code Hardware has been accepted by Dade County, Florida. It meets the abuse and high wind loads required by South Florida building code. These exits are accepted and approved for use with CURRIES hollow metal doors and McKinney hinges.

### Features

- Designed for standard width stile applications on metal doors. For doors 1-3/4" (44mm) thick
- Single door applications - WS8800 Series
- Single and double door applications - HC8800 Series
- Solid stainless steel latchbolt. Meets UL panic test requirements without roller strikes which compromise strength and durability
- "Anti-walk" latchbolt design eliminates the need for guarded latchbolt
- Withstands over 5 times ANSI/BHMA A156.3 2008 grade 1 standards for static load test simulating forced entry
- UL Fire and Panic listed

Note: Any retrofit or other field modification to a fire rated opening can potentially impact the fire rating of the opening, and Sargent Manufacturing Company makes no representations or warranties concerning what such impact may be in any specific situation. When retrofitting any portion of an existing fire rated opening, or specifying and installing a new fire-rated opening, please consult with a code specialist or local code official (Authority Having Jurisdiction) to ensure compliance with all applicable codes and ratings.

- UL listed to ANSI 250.13 Severe Windstorm and listed on Florida Building Code Website

- Approved for use in Dade County, Florida with Notice of Acceptance (See approved windstorm products on page 54 and 55 of the catalog)
- Stainless steel springs throughout
- Simple lever principle with push type action
- Rail travels in direction of door swing
- Trim is thru bolted
- Electric functions available. Consult Product System Manual
- All exit devices meet ANSI standard 156.3, Grade 1
- All exit devices are UL Listed

### ASSA ABLOY

The global leader in  
door opening solutions

# VingCard Essence Electronic Lock

VingCard Essence revolutionizes the electronic lock industry by housing all lock components, including the reader and mobile access board, inside the door and therefore, reaching the maximum minimalistic expression, the true essence of an electronic lock.

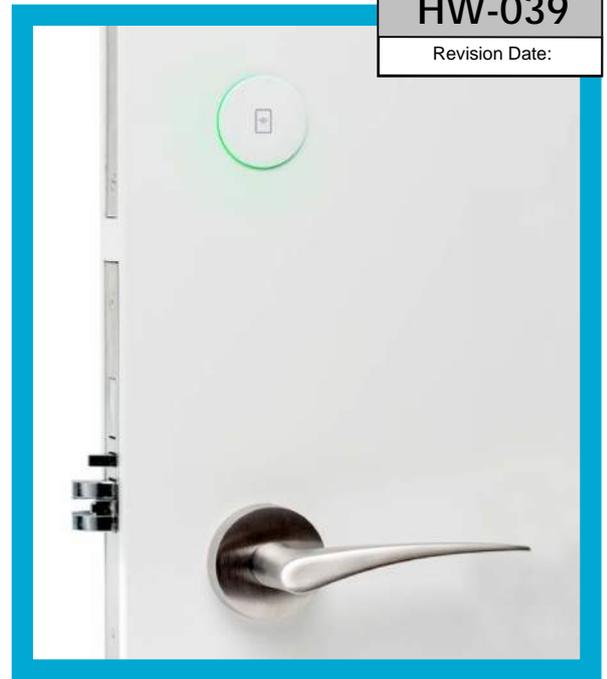

VingCard Essence is always delivered as Mobile Access ready. With Mobile Access board included inside the reader, your property is ready for using the mobile phone as guest room key whenever required.

## FEATURES

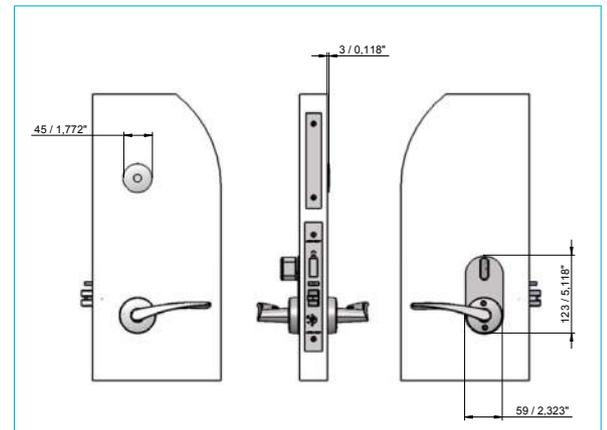

- : Solid Stainless Steel or brass handles with self-lubricating long life bearings.
- : 3-point steel latch construction with an antifriction mechanism.
- : Case hardened full 1-inch (ANSI) throw deadbolt.
- : Panic release function – the deadbolt and latch are automatically retracted by inside handle for easy egress in emergency situations.
- : ADA compliant (users with physical disabilities).
- : Future proof re-programmable FLASH lock memory.
- : Powered by three (3) AA batteries that provide up to 2 years normal life (depending on door traffic and online/mobile access functionality).
- : Compatible with Visionline Software platform.
- : 2000 event audit trail.
- : Optional high security mechanical override (key cylinder).
- : Mobile Access board included in reader.
- : RFID Specifications:
  - 13,56MHz technology
  - compatible with the following standards:
    - ISO 14.443 A (MIFARE including Desfire)
    - ISO 14.443 B
    - ISO 15.693

## DIMENSIONS

**ASSA ABLOY**

ASSA ABLOY Hospitality

The global leader in  
door opening solutions

## TECHNICAL DATA

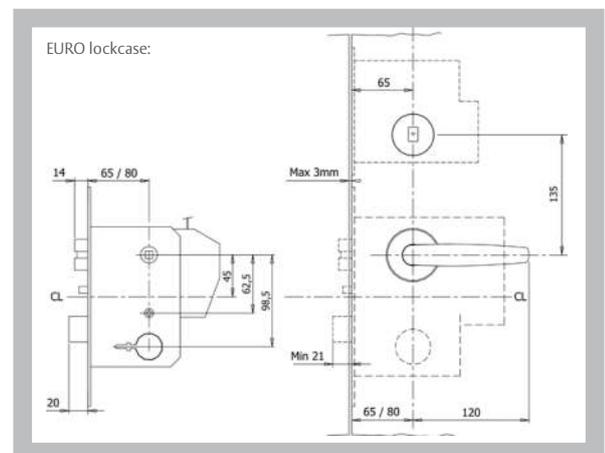

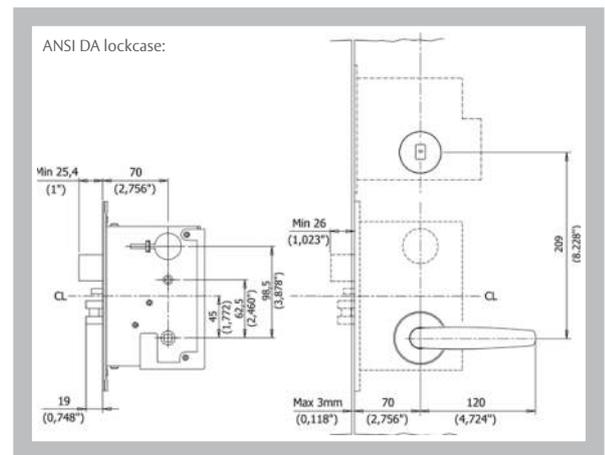

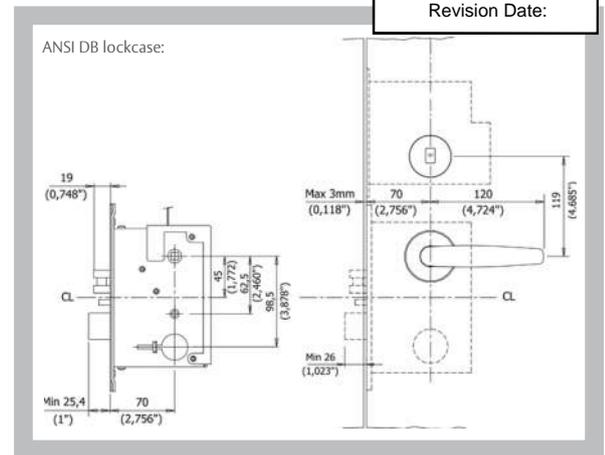

Power	4,5 V DC (3 x AA alkaline batteries).
Battery location	Inside of the door in electronics module.
Material	Handles: Stainless steel quality SUS304 RFID cover: Polycarbonate UL94V0 (Makrolon 6555).
Metal finishes	Satin Chrome (Stainless Steel with PVD), Polished Chrome (Stainless Steel with PVD), Satin Brass (Stainless Steel with PVD), Polished Brass (Stainless Steel with PVD), Light Bronze, Velour Nickel and US Antique Dark.
Standard plastic color	Black and white.
Handle options in standard range	Straight, Functional ANSI, Wing. Also compatible with 20 different Valli&Valli design handles.
Emergency opening options	Electronic emergency opening with service unit and optional mechanical cylinder.
User interface	3 colored light pipe shaped as ring around the reader (green, red, yellow).
Locking mechanism	Electro-mechanical locking mechanism located in the lockcase.
Door thickness	34 - 120 mm / 1,34 - 4,72 Inches.
System software compatibility	Visionline.
Online compatibility	Wireless (based on ZigBee protocol) in Visionline.
Storage temperature	0-70 °C / 32-158 °F: non-condensing environment.
Tested operating temperature	Tested from -25 °C to 70 °C ( -13 °F to 158 °F), according to IEC 60068-2.
Certifications	European EMC, LVD and R&TTE Directives. Approved according to EN14846. Fire approved according to EN 1634-1. Fire approved according to UL (timber doors).
Supported RFID standards	ISO 14.443 A, ISO 14.443 B, ISO 15.693
Mobile Access support	Mobile Access board included in reader unit.

## LOCKCASE DIMENSIONS

ANSI lock case variants	ANSI DA, ANSI DB (both available in the following versions:4-switch, Auto deadbolt (ADB) Australia version (AUS) and Japan (JPN) version).
ANSI lock case widths	25 mm / 0,98 inches, 28 mm / 1,10 inches, 32 mm / 1,26 inches.
ANSI backset	70 mm / 2,76 inches.
EURO lock case variants	EURO, EURO ADB, EURO MPA.
EURO lock case widths	20 mm / 0,79 inches, 22 mm / 0,87 inches, 24 mm / 0,94 inches.
EURO backsets	65 mm / 2,56 inches, 80 mm / 3,15 inches.

## 5400LN series | cylindrical lever locks

## features

## door thickness

Patented (patent no. 6,131,970) door adjustable rose support plates allow the 5400LN to easily adjust to doors from 1-3/4" to 2" thick. It can also be used on 1-3/8" thick doors by adding two spacer plates P/N 14-5401-6644. For 2-1/4" thick doors, please specify door thickness on order.

## ANSI/BHMA

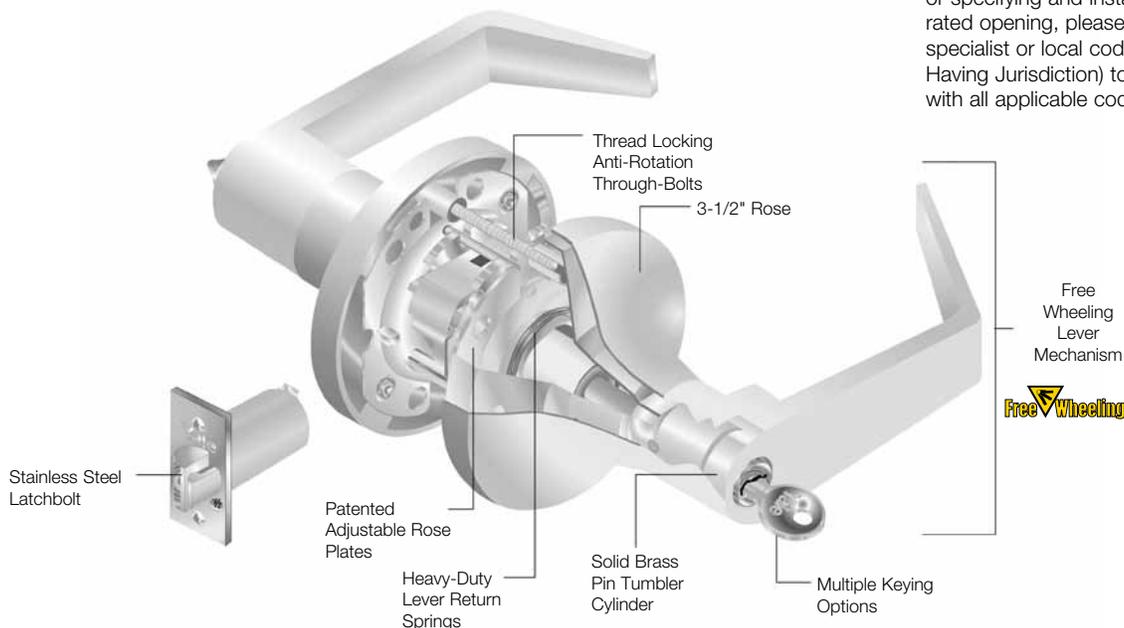

Certified ANSI/BHMA A156.2, Series 4000 Grade 1.

## fire listings

UL - cUL Fire Label for all door functions up to 3 hours.

Note: Any retrofit or other field modification to a fire rated opening can potentially impact the fire rating of the opening, and Yale Locks & Hardware makes no representations or warranties concerning what such impact may be in any specific situation. When retrofitting any portion of an existing fire rated opening, or specifying and installing a new fire-rated opening, please consult with a code specialist or local code official (Authority Having Jurisdiction) to ensure compliance with all applicable codes and ratings.

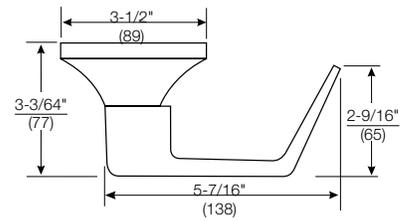

## full-featured grade 1 lever lockset offering

- Free Wheeling lever mechanism increases vandal resistance and reduces the amount of maintenance typically required of locksets with rigid levers.
- 13 finish options.
- 3 lever designs.
- 24 functions including electrified.
- Stainless steel latchbolt provides added strength and wear resistance. Direct 1/2" throw is standard.
- A 3/4" latch throw for fire-rated or pairs of doors is available.
- Wear-resistant plates in the chassis help extend the life of the lockbody and provide smoother lock operation.
- Longer thread locking through-bolts through the chassis provide greater stability and prevent rotation.
- Lifetime warranted heavy-duty lever return springs prevent lever sag and provide positive return of lever to horizontal position.
- Patented (patent no. 6,131,970) door adjustable rose support plates allow for easy adjustment of lockset to fit doors ranging in thickness from 1-3/4" to 2". Rose spacers available for 1-3/8" thick doors.
- Three non-handed lever options (Augusta, Monroe, and Pacific Beach) comply with ADA requirements for easy gripping and operation.
- Expanded cylinder and keying options:
  - Yale® 6- and 7-pin standard and interchangeable core cylinders including Yale® KeyMark® protected keyway cylinders (see page 11).
  - Standard cylinders with Schlage® C and Sargent® LA keyways. Small format interchangeable cores with Best® keyways.
  - Levers which accept interchangeable core cylinders by Best®, Schlage®, ASSA® and Medeco®.
- 3-1/2" roses cover ANSI/BHMA hollow metal door cutout.

## securex®

### operation

Electric locks provide the ability to electrically lock or unlock the outside trim from a remote location. Fail Safe locks are commonly used in stair towers to release upon fire alarm activation. Fail Secure locks are used on perimeter doors or security doors to allow ingress using access control technologies (proximity cards, keypads, etc.)

### features

- Free Wheeling lever mechanism.
- Self-contained, continuous-duty integral solenoid (allows installation in standard cylindrical prep).
- Available Fail Safe or Fail Secure.
- Available in 12 or 24 volts DC.
- External rectifier available upon request for AC operation.
- Mechanical cylinder override.
- All 5400LN cylinder options.
- Certified ANSI/BHMA Grade 1.
- UL listed.
- 2-year limited warranty.

### REX

Request to Exit - Operating inside lever handle triggers REX switch which can be used to shunt an alarm, monitor egress or release a magnetic lock, etc.

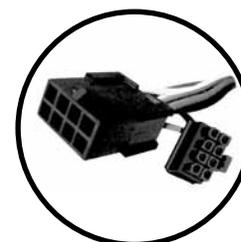

### electrical specifications

- Continuous duty solenoid  
150 mA @ 24VDC  
300 mA @ 12VDC
- REX (SPDT) Contact Rating:  
3A @ 125 VAC  
2A @ 24 VDC

### electrolynx®

Yale® electrified 5400LN locks are equipped with *ElectroLynx* connectors. As a standard feature, these connectors link power from the incoming source to electrified locking products, including hinges, locks, exit devices, magnetic holders and strikes.

**Note: Electrified door hardware with *ElectroLynx* connectors requires a compatible number of lead wires attached to the door hinge.**

### functions

Outside	Inside	Function	Function Description

## securex® accessories

### BPS power supplies by securitron®

#### Operation

Power supplies are designed to provide reliable filtered and regulated power for long life to a variety of electrified hardware components.

#### Product Features

- Individual output circuit breakers
- Regulated and filtered fuse protected outputs
- LEDs monitor zone status (voltage or no voltage)
- Slide switches connect or disconnect load from power (Not available on 1 Amp supplies)
- Internal Back-Up battery charging circuit
- Rugged steel enclosure
- Fire alarm interface

#### Listings

- UL CLASS 2

#### Applications (use with):

- Fail Safe cylindrical locks
- Fail Secure cylindrical locks

#### Ordering

Ex: BPS-24-4, BPS-12-3

Model	Input	Output	Application
BPS-24-1	120 VAC	1 Amp @ 24 VDC	2-5400LN
BPS-24-2	120 VAC	2 Amp @ 24 VDC	5-5400LN
BPS-24-4	120 VAC	4 Amp @ 24 VDC	11-5400LN
BPS-12-1	120 VAC	1 Amp @ 12 VDC	1-5400LN
BPS-12-3	120 VAC	3 Amp @ 12 VDC	3-5400LN

Consult factory for additional power supply applications.

Yale recommends McKinney®, Pemko and Securitron® for power transfer devices and other electronic accessories.

### Securitron PowerJump™ ICPT

The Securitron PowerJump ICPT Inductive Coupling Power Transfer delivers power contactlessly and invisibly between the frame and door to power electrified hardware on the door. The PowerJump can be installed at the latch side or hinge side of the door and transfers up to 6 watts of power without pins or wires across the door gap, eliminating points of vulnerability and wear ... and no need to core drill the door. The PowerJump is field selectable for 12VDC or 24VDC systems and is ideal for fail secure applications. The unit can hold electrified latches open in continuous duty or can momentarily energize the lockset for latch retraction.

Additional information regarding this product can be found at [www.securitron.com](http://www.securitron.com).

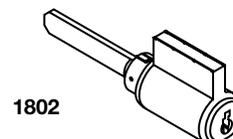

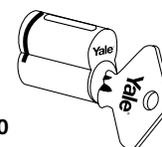

## cylinders

### cylinder options

The following selection guide indicates the correct cylinder for each locking segment.

Lockset Series: 5400LN		Types of Cylinder Mechanisms								
		Conventional		Protected Keyway		Security		High Security		
Cylinder Types	Fixed Core	6-pin	7-pin	6-pin	7-pin	6-pin	7-pin	6-pin	7-pin	
	Key-In-Lever	1802	1802A	K402	K402	5802	5802A	N/A	N/A	
	<b>Interchangeable Core</b>									
	LFIC	1210	1220	K800	K800	5210	5220	N/A	N/A	
SFIC	N/A	N/A	K600	K600	N/A	N/A	N/A	N/A		

Refer to Yale® KeyMark® and/or Cylinders and Keys Catalog sections for all details and how to order examples.

**1802**

**1210**

### Yale® KeyMark®

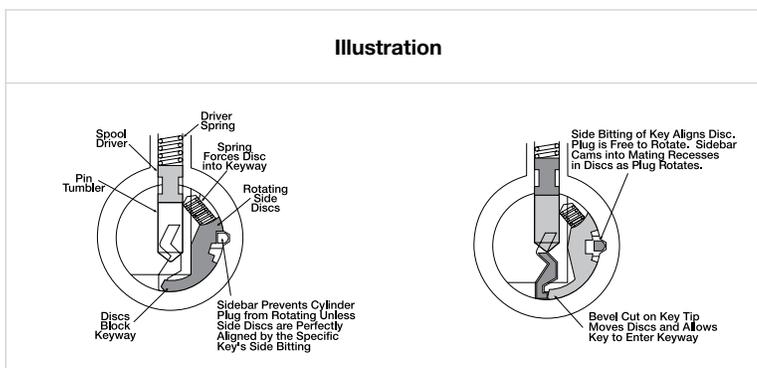

For those applications requiring protected key control, Yale® KeyMark® cylinders guard against unauthorized key duplication. The *Yale KeyMark Security Leg®* keyway feature increases resistance against picking and impressioning and can easily retrofit into existing systems. For further details and availability, refer to the separate *Yale KeyMark* catalog.

### security cylinders

Security cylinders contain two independent locking mechanisms. The first is a traditional 6- or 7-pin tumbler mechanism with spool drivers for greatly increased picking resistance.

The second is an innovative 5-tumbler rotating disc mechanism with sidebar engagement. The rotating discs are spring loaded and block the bottom of the keyway.

## latchbolts

### plain latchbolts

Model No. 693 supplied standard with all 5400LN series locksets without locking function. Standard plain latchbolt has a 2-1/4" (57mm) x 1-1/8" (29mm) beveled front with a 2-3/4" (70mm) backset and a 1/2" (13mm) bolt throw. Optional latchbolts with a greater backset/throw available to special order.

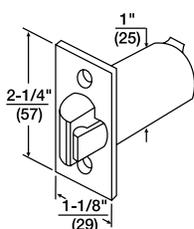

Model No.	Front	Backset	Throw	Front Width	Latch Diameter
693	Beveled	2-3/4" (70mm)	1/2" (13mm)	1-1/8" (29mm)	1" (25mm)
F693	Flat	2-3/4" (70mm)	1/2" (13mm)	1-1/8" (29mm)	1" (25mm)
3693	Beveled	3-3/4" (95mm)	1/2" (13mm)	1-1/8" (29mm)	1" (25mm)

**Note: for 3/4" throw applications, only deadlocking latchbolts available.**

### deadlocking latchbolts

Deadlocking latchbolt Model No. 694 supplied standard with all 5400LN series locksets with locking function. Standard deadlocking latchbolt has a 2-1/4" (57mm) x 1-1/8" (29mm) beveled front with a 2-3/4" (70mm) backset and a 1/2" (13mm) bolt throw. Optional latchbolts with a greater backset/throw available to special order.

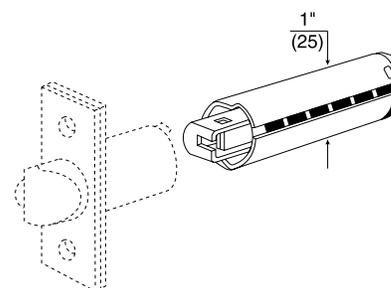

Model No.	Front	Backset	Throw	Front Width	Latch Diameter
694	Beveled	2-3/4" (70mm)	1/2" (13mm)	1-1/8" (29mm)	1" (25mm)
F694	Flat	2-3/4" (70mm)	1/2" (13mm)	1-1/8" (29mm)	1" (25mm)
3694	Beveled	3-3/4" (95mm)	1/2" (13mm)	1-1/8" (29mm)	1" (25mm)
480B	Beveled	2-3/4" (70mm)	3/4" (19mm)	1-1/8" (29mm)	1" (25mm)
F480B	Flat	2-3/4" (70mm)	3/4" (19mm)	1-1/8" (29mm)	1" (25mm)
3480B	Beveled	3-3/4" (95mm)	3/4" (19mm)	1-1/8" (29mm)	1" (25mm)

**Note: For 2-3/8" backset, contact Customer Support.**

### backset extension links

All 5400LN Series locksets are supplied with standard latchbolts of 2-3/4" (70mm) backset; optional latchbolts with a 3-3/4" (95mm) backset are available to special order. Extension links are also available for attachment to 2-3/4" (70mm) or 3-3/4" (95mm) backset latchbolts to extend the backset to the desired length.

Desired Backset	Latchbolt Backset	Order Extension List No.
5" (127mm)	2-3/4" (70mm)	481DL
6" (152mm)	3-3/4" (95mm)	481
7" (178mm)	2-3/4" (70mm)	482
8" (203mm)	3-3/4" (95mm)	482
18" (46cm)	2-3/4" (70mm)	484
19" (48cm)	3-3/4" (95mm)	484

**Other extension links up to 42" (1.06m) backset are available to special order.**

### attaching screws

(Not regularly supplied when latchbolts ordered separately).

- **For all latchbolts**

#8-8-32 x 3/4" (19mm) Phillips flat head combination wood and machine screws  
 Brass - P/N 81-2022-0416\*  
 Bronze - P/N 81-2032-0416\*

- **Hollow Metal Doors**

#8 - 32 x 1" (25mm) Phillips flat head machine screw  
 Brass - P/N 81-0022-0420\*  
 Bronze - P/N 81-0032-0420\*

**\*Specify finish required.**

## strikes

Yale® 5400LN locks are available with a variety of strike options. All strikes are located on the same vertical and horizontal center lines as the latchbolt. Some strikes are available in special lip lengths to accommodate varying thickness of doors and frames. To determine the proper length of the lip, measure from the center line of the strike to the edge of the jamb, accounting for any interfering trim (i.e. wood molding) and then add 1/4" (6mm) for curved lip. All strikes are reversible. Strikes are fabricated of either brass, bronze or stainless steel, depending on the lockset trim finish. When ordering strikes separately, specify the finish required.

<p><b>Model No. 497 ANSI Strike (Standard)</b>                  1-1/4" supplied standard. 1-1/8", 1-1/2", and 1-3/4" lip lengths available by special order. For door and frames with ANSI/BHMA A156.115 preparations.</p>	<p><b>Model No. 371 T-Strike (Optional)</b>                  1-1/4" curved lip supplied standard. 1", 1-1/2", 1-3/4", and 2" curved lip lengths available by special order. Wrought strike box supplied.</p>	<p><b>Model No. 497B Blank ANSI Strike (Optional)</b>                  Available to special order. Installed in frame with standard ANSI/BHMA A156.115 preparation to replace the strike when the lockset has been removed from the door.</p>	<p><b>Model No. 202 Strike Box for ANSI Strike (Optional)</b>                  Specify 497 x 202</p>

## attaching screws

(Not regularly supplied when strikes ordered separately).

**For Model No. 371 strike**

#8-8-32 x 3/4" (19mm) Phillips flat head combination wood and machine screw P/N-81-2012-0416.

**For Model No. 497 strike and 497B plate**

#12-12-24 x 1" (25mm) Phillips flat head combination wood and machine screw P/N-81-2012-0620.

**Note: When ordering strike plates or attaching screws individually, specify the finish required; i.e. 497 x 202 x 612; #81-2012-0620 x 612.**

## sample specification

---

All locksets shall be 5400LN Series Grade 1 cylindrical lever locksets as assembled by Yale Locks & Hardware.

Lockset chassis shall be constructed of heavy-gauge cold-rolled steel, trivalent chrome plated to protect against rust and corrosion. Locksets shall be adjustable to fit doors between 1-3/4" (44mm) to 2" (51mm) thick.

Locksets shall be non-handed, and shall install easily without the need for specialized installation tools. Locksets shall have separate anti-rotation throughbolts in the 6 o'clock and 12 o'clock position outside the 2-1/8" face bore, and shall have no exposed mounting screws.

Locksets shall have solid one-piece, cast levers without plastic inserts, and shall be a minimum of 5-1/4" in length. Levers shall operate independently, and shall have inside and outside lever return springs. Outside levers on the keyed locksets shall be removable only when the designated key is in the cylinder.

Locksets shall have the capability of accepting 7-pin standard, interchangeable core and high-security cylinders to provide expansion capacity for large master keyed systems.

Vandal resistant levers shall be offered as a standard feature in all locking functions, and shall be Free Wheeling in the locked condition. Locksets that are rigid in the locked condition or which must require resetting (breakaway) are not acceptable.

The latchbolt shall be made of stainless steel.

All locksets shall carry a comprehensive seven-year mechanical warranty. Locksets shall carry a lifetime warranty against lever sag or lever spring breakage.

All locksets shall comply with the following certifications:

- UL 3 Hour Fire Rating
- ANSI/BHMA A156.2 Series 4000, Grade 1
- ANSI A117.1 Accessibility Code
- ANSI/BHMA A156.115 or A156.115-W Preparation

## Lever Extension Flush Bolt No. 555

- Material:** Brass
- Finishes:** Available in standard architectural finishes (see page 9)
- Fastener:** 8 ea. #8 x 3/4" FH combo screws
- Features:**
- For Fire Rated Hollow Metal Swinging Doors measuring up to 4'w x 10'h rated up to and including 3 Hours
  - Fits ANSI A115 door and frame preparation
  - 3/4" bolt throw, 3/4" rod backset
  - 12" rod length (center of face to bolt end - retracted)
  - 1 1/2" adjustable bolt head
- Options:**
- Other size rods available are 18", 24", 36", 48"
  - Extra long bolt head - 2 1/2" (or to your specification)
  - Use No. 570 Dust Proof Strike (shown on page E4) to prevent dirt blocking bottom strike

No.	Size	Weight	ANSI A156.16
555	Face plate: 1" x 6 3/4" Strike: 1 5/16" x 2 1/4" Guide: 1" x 2"	1.5 lbs./2	L04251

## Lever Extension Flush Bolt with Bottom Fire Bolt No. 555 x 18BFB

- Material:** Flush bolt – brass  
Bottom fire bolt – stainless steel
- Finishes:** Available in standard architectural finishes (see page 9)
- Fastener:** 8 ea. #8 x 3/4" FH combo screws
- Features:**
- For Fire Rated Hollow Metal Swinging Doors measuring up to 4'w x 9'h rated up to and including 3 Hours
  - Fits ANSI A115 door and frame preparation
  - 3/4" bolt throw, 3/4" rod backset
  - 12" rod length (center of face to bolt end - retracted)
  - 1 1/2" adjustable bolt head
  - When door is subjected to 230°F the plug and black plastic cover will melt allowing the bolt to project, locking the leaves together
  - Bottom fire bolt eliminates need for floor prep.
  - Oversize fire bolt strike hole allows for slight door misalignment
- Options:**
- Other size rods available are 18", 24", 36", 48"
  - Extra long bolt head – 2 1/2" (or to your specification)

No.	Size	Weight
555 x 18BFB	Top bolt: 1" x 6 3/4" Bottom bolt: 1 3/16" dia.	0.9 lbs.

The global leader in  
door opening solutions

## never compromise

The value of any product is equal to the quality of the labor and materials put into making it. And the Yale® 8800 series mortise lock is a perfect example that true quality doesn't just happen. Meticulous design and engineering have gone into manufacturing a mortise lock that brings you versatility as well as uncompromising strength and durability.

With quick lever handing and a patented (Patent No. 7,108,300) quick reversible latchbolt, lockset handing takes only seconds. Add a standard non-handed curved lip strike, and you have a no-hassle mortise lock that's quick and easy to install.

When it comes to strength, the Yale® 8800 series brings a new measure of security to the door. Its 1" throw stainless steel deadbolt extends further back into the reinforced steel case when in the locked position, providing added stability and resistance to abuse. Solid trim packages also provide deterrence to vandalism, making the 8800 series a prime player in your total opening security package.

For over 160 years, Yale Locks and Hardware has built a reputation on manufacturing products that exceed expectations of quality and reliability. The Yale 8800 series mortise lock is no exception, and to demonstrate that quality proves itself, we back it with a 10-year mechanical warranty.

We won't compromise, and neither should you.

### 8800

The Yale 8800 series mortise lock is an industry standard product. Suitable for installation on doors 1-3/4" to 3-1/4" thick with standard trims, these products have a 1" throw stainless steel deadbolt. The latchbolt is 3/4" throw with stainless steel two-piece anti-friction camming action.

### finishes

The Yale 8800 series mortise lock is available in the trim finishes as listed. All knobs, lever handles, roses, escutcheons, cylinder collars and other exposed parts are fabricated of either brass, bronze, stainless steel or zinc and will be compatible with the finish ordered. When ordering, specify the finish required by the ANSI/BHMA Code Number only. When locksets are ordered with different trim finishes on each side, specify the outside finish first, i.e. COR8817-2 x 612 x 625. The front and strike finish will match the inside finish unless specified otherwise.

### camden escutcheon

8800 series locks with escutcheon trim are now provided standard with the Camden (CN) escutcheon. This zinc die cast escutcheon features one-piece casting for superior strength. Locks with this escutcheon are ANSI/BHMA certified operational and security Grade 1 and will retrofit to existing Yale escutcheon preps. The aesthetics of the CN escutcheon provide a design continuum with Yale exit device trim for a consistent look throughout the facility.

### windstorm

Certified (refer to local codes).

Hurricane

### warranty

Yale 8800 series mechanical mortise locks carry a ten (10) year warranty and 8800 series electrified mortise locks carry a two (2) year warranty.

## 8800 series | grade 1 mortise locks

### features

#### A.D.A.

The 8800FL meets accessibility guidelines of the Americans with Disabilities Act and the requirements of the Uniform Federal Accessibility standards and ANSI 117.1, all requiring ease of accessibility for the handicapped.

#### ANSI/BHMA

Certified ANSI/BHMA A156.13, Series 1000, Operational Grade 1 (8800FL with CN escutcheon & SL8800 meet Security Grade 1).

#### bevel front

Yale 8800 series fronts are free-floating to adjust from flat to the standard bevel of 1/8" in 2".

#### door thickness

8800 series mortise locks are supplied as standard for 1-3/4" thick doors. For other than standard, specify the door thickness on the order: (i.e. 2", 2-1/4", etc.)

#### installations

8800 series mortise locks conform to ANSI/BHMA Specifications A156.115 which cover hardware preparations for steel doors and steel frames and A156.115-W which cover hardware preparations for wood doors with wood or steel frames.

#### microshield®

8800 series locks are available with MicroShield® antimicrobial coating. *MicroShield* is a revolutionary hardware finish coating, using a silver ion based technology, which inhibits the growth of bacteria, algae, yeast, fungus, mold and mildew. *MicroShield* is non-toxic and lasts for the lifetime of the finish to which it is applied. To order, suffix option code "YMS".

Note: *MicroShield*® coating may vary finish color from architectural standards. *MicroShield* is not intended as a substitute for traditional infection control programs such as hand hygiene or use of disinfectants. Coated product must still be cleaned to insure the surfaces will be free of destructive microbes. Yale Locks & Hardware makes no representations or warranties, express or implied, as to the efficacy of the *MicroShield* antimicrobial.

#### ISO 9001

Designed and manufactured under a certified ISO 9001 quality system.

#### knurled designs

Where required by the local authority, trim can be knurled to be identifiable to the touch for blind persons. All knob designs except CA may be ordered knurled; all lever designs except designer trim and Reflections® trim (pages 10 & 12) may be ordered knurled.

Only the outside knob or lever will be knurled or abrasive coated unless specified otherwise. To order a complete lockset knurled or abrasive coated, suffix the lockset model number with "Knurled" or "Abrasive Coated," i.e. LF x CN8807 x "Knurled," LF x CN8817-2 x "Knurled Inside Only," AU x CN8828FL "Abrasive Coated."

#### lead shielding

All Yale 8800 series mortise locks are available with a lead shield for installation in lead-lined doors. To order, suffix the lockset model number with "lead-lined."

#### quick reversibility

Yale mortise locks with the same trim on both sides (knob x knob or lever x lever) are field reversible. These locks can be converted to accommodate the hand of the door. However, to reduce installation costs, it is recommended that the hand of the door be specified for each lockset ordered. If the hand of the door is not specified, RH will be furnished.

#### underwriters laboratories (UL - cUL)

Yale 8800 series mortise locks have been listed by Underwriters Laboratories Inc. for use on fire doors having a rating up to and including 3 hours and for use on 20 minute wood doors. This pertains to single swing doors not exceeding 4 feet in width and 8 feet in height and in doors mounted in pairs not exceeding 8 feet in either direction (unless otherwise noted in the individual listings.)

In general, single-point mortise locks or latches with 3/4" minimum latch throw are intended for the active leaf of doors mounted in pairs, with the inactive leaf provided with top and bottom flush or surface bolts of the manual, automatic, or self-latching type. The door Classification Marking specifies the minimum latch throw required for the individual door.

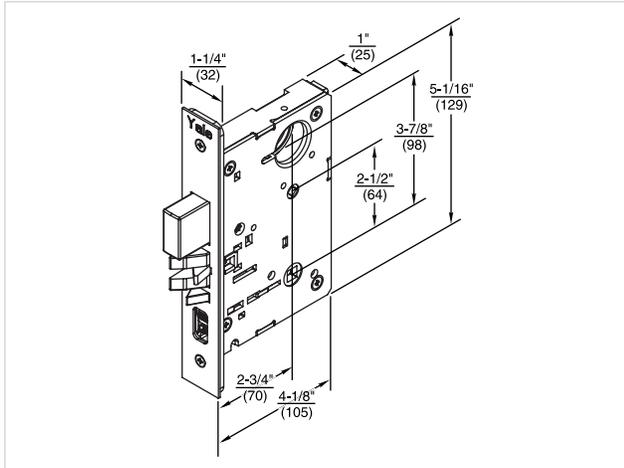

Yale 8800 series mortise locks with 3/4" throw latchbolts may also be used on single swing doors rated 1-1/2 hours or less, up to 4 feet in width and 9 feet in height. This is in addition to the rating mentioned above. All Yale 8800 Series Mortise Locks with Lever Handle Trim are UL listed for fire door applications. Underwriters Laboratories does not list locks with rabbeted fronts, locks with deadbolt only, or locks with hold-back feature on the latchbolt.

Note: Any retrofit or other field modification to a fire rated opening can potentially impact the fire rating of the opening, and Yale Locks & Hardware makes no representations or warranties concerning what such impact may be in any specific situation. When retrofitting any portion of an existing fire rated opening, or specifying and installing a new fire-rated opening, please consult with a code specialist or local code official (Authority Having Jurisdiction) to ensure compliance with all applicable codes and ratings.

## 8800 series | grade 1 mortise locks

## facts and figures

## 8800/SL8800 series

**Armor Front** - 8" x 1-1/4"

**Door Thickness** - 1-3/4" standard, to 3-1/4" thick doors to order when used with standard trim. To 2-1/4" thick doors when used with Reflections® trim.

**Deadbolt** - 1" throw, solid investment cast stainless steel.

**Latchbolt** - 3/4" throw, stainless steel two-piece anti-friction camming action.

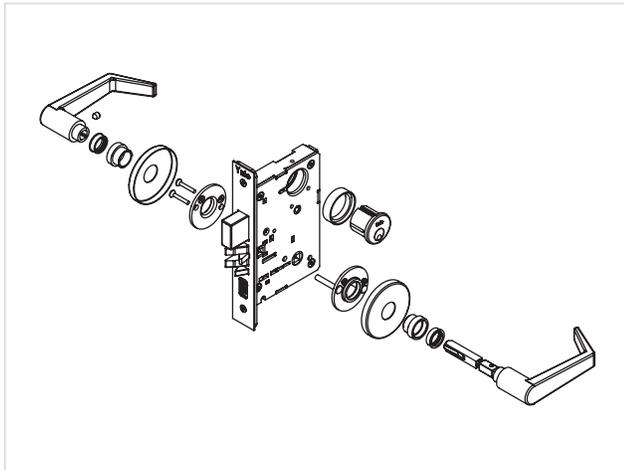

**UL Listed** - for application on labeled fire doors.

**Backset** - 2-3/4" only.

**Case** - wrought steel, zinc dichromated.

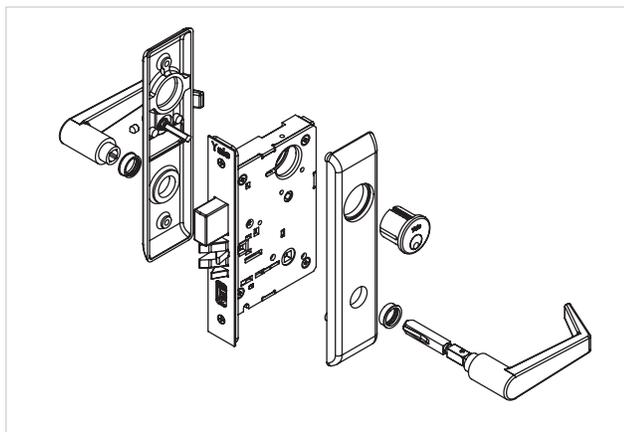

**Hubs** - 3/8" solid steel, fine-blanked and heat treated for additional strength.

## sectional lever installation

- All Yale® 8800FL series sectional lever trims feature through-bolted installation. This ensures positive alignment of the trim with the lock case and offers an attractive appearance.
- Outside trim is held in place by threaded posts. The posts fit through holes in the lock case and are secured by through-bolts from the inside trim.
- Since self-aligning trim is easy to install, on-the-job labor costs may be reduced.
- Each mortise lock ordered with lever trim features an internal heavy-duty spring cartridge which prevents lever sag.
- All Yale mortise lock trims are UL listed for fire door applications.
- A variety of sectional lever designs are available as shown on pages 6-12.

## escutcheon lever installation

- All Yale 8800FL series escutcheon lever trims feature through-bolted installation.
- Outside trim is held in place by threaded posts. The posts fit through the door and are secured by through-bolts from the inside trim.
- Yale outside escutcheon trims have no visible screws – a great deterrent to vandalism.
- Each mortise lock ordered with lever trim features an internal heavy-duty spring cartridge which prevents lever sag.
- All Yale mortise lock trims are UL listed for fire door applications.
- A variety of escutcheon lever designs are available as shown on pages 6-12.

Note: When ordering interchangeable core cylinders or cores only, control keys are not furnished. If control keys are required they must be ordered separately.

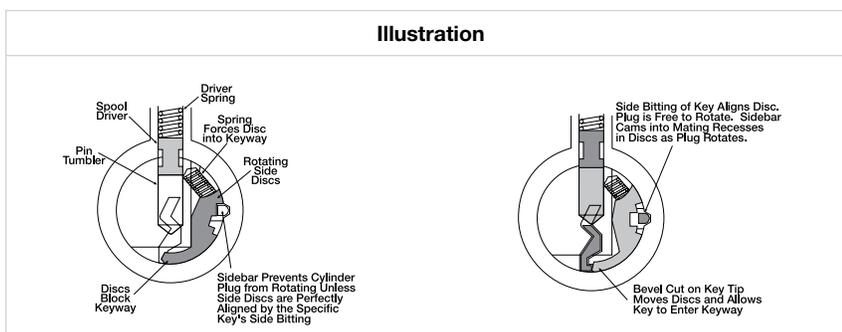

## cylinders

### security cylinders

Security cylinders contain two independent locking mechanisms. The first is a traditional 6- or 7-pin tumbler mechanism with spool drivers for greatly increased picking resistance.

The second is an innovative 5-tumbler rotating disc mechanism with sidebar engagement. The rotating discs are spring loaded and block the bottom of the keyway.

8800 series | grade 1 mortise locks

cylinders

Yale® KeyMark®

For those applications requiring protected key control, Yale® KeyMark® cylinders guard against unauthorized key duplication. The *Yale KeyMark Security Leg®* keyway feature increases resistance against picking and impressioning and can easily retrofit into existing systems. For further details and availability, refer to the separate *Yale KeyMark* catalog.

## cylinder collars

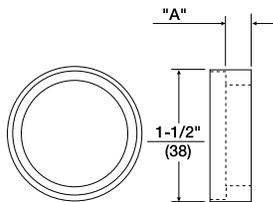

Cylinder collars are supplied as standard where required with those locksets supplied with cylinders. Collar size and thickness are supplied to suit the length of the cylinder, the thickness of the door and the trim ordered. (If door thickness is not specified, collars will be furnished for 1-3/4" (44mm) door.)

Collar length required must be specified for cylinders and/or housings ordered separately.

### 1765 Recessed Cylinder Collar

**"A" Dimension:** Thicknesses from 1/16" (2mm) to 1-15/32" (37mm) as required.

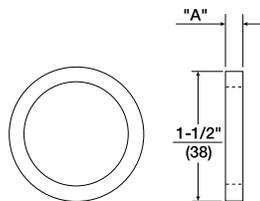

**Material:** Brass, Bronze

### 1766 Tubular Spacer Collar

**"A" Dimension:** 1/8" (3mm), 3/16" (5mm) and 5/16" (8mm)

**Material:** Brass, Bronze, Stainless Steel. (Used with U5153 and U5109 cylinders only.)

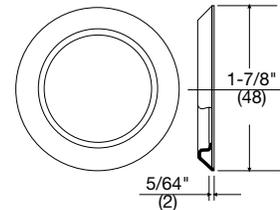

### KP3 Wave Washer

(Furnished standard with 1765 collar for Yale® KeyMark® cylinders only).

### KP4 Flush Mount Cylinder Collar

**Material:** Brass, Bronze

## strikes

Yale® 8800 series mortise locks are supplied standard with a 2815 Curved Lip Strike with a 1-1/4" (32mm) lip length. The strike supplied will accommodate the locking function, i.e. latchbolt and/or deadbolt, and can be installed on doors 1-3/4" (44mm) thick. These strikes are non-handed.

### Longer/Shorter Lip Lengths:

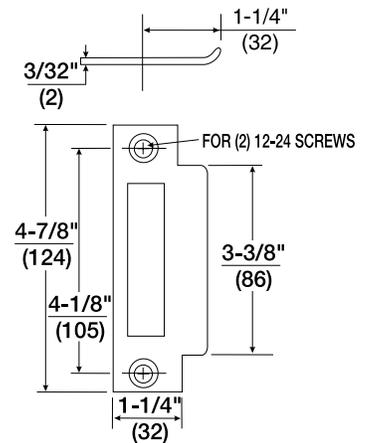

Mortise Lock Strikes are mounted 3/8" above the center line of the lock. To determine the proper length of lip use the following formula:

1/2 of the door thickness, plus 1/16" inset, plus trim thickness, plus 1/8" for flat lip strike OR 1/4" for curved lip strike. Select the nearest available length.

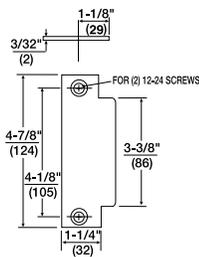

**2815 Curved Lip:** 1-1/4" (32mm) regular; to special order, 1-1/8" (29mm), 1-3/8" (35mm), 1-1/2" (38mm), 1-5/8" (41mm), 1-3/4" (44mm), 1-7/8" (48mm), 2" (51mm), 2-1/8" (54mm), 2-3/8" (60mm)

**2816 Flat Lip:** To special order, 7/8" (22mm), 1" (25mm), 1-1/8" (29mm), 1-1/4" (32mm), 1-1/2" (38mm), 1-3/4" (44mm), 2" (51mm), 2-1/4" (57mm), 2-1/2" (64mm)

**Material:** Brass, Bronze, Stainless Steel.

## optional strikes

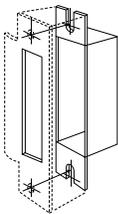

**497B ANSI Blank Filler Plate:** Reversible to replace a strike where a lock has been removed or where a frame with a strike preparation when no lock is installed on a door. Lip Lengths: 1-1/8" (29mm) only.

**Material:** Brass, Bronze, Stainless Steel.

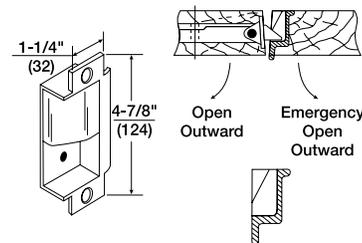

**718 Open Back Strike:** Field handable for a standard V-beveled pair of doors with a latchbolt only function on the active door. This strike permits emergency opening of the inactive door without damaging the lock mechanism. Available for doors 1-3/4" or 2-1/4" thick only. Specify the door thickness required.

**Material:** Stainless Steel, Black Nylon Coated.

**202 Strike Box:** Reversible for installation with all Flat or Curved Lip Strikes. Available to special order only.

**Material:** Wrought Steel, Zinc Plated, Dichromated.

## miscellaneous

### rabbeted door kits

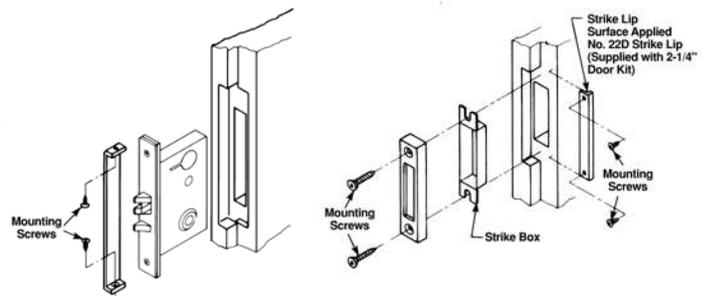

The Yale® 8800 series mortise lock can be installed on a pair of doors with a standard 1/2" (13mm) step rabbet. Kits are available which adapt these locks to the rabbeted doors. These kits contain a 1/2" (13mm) standard step rabbet strip for the active door, a strike, a strike box, and, depending on the door thickness, a strike lip. They are available for doors 1-3/4" (44mm), 2" (51mm) and 2-1/4" (57mm) thick. All components of these kits are reversible.

To order a complete Yale mortise lock with a Rabbet Door Kit, suffix the lock model number with a Rabbeted Door by door thickness, hand and finish required, i.e. AU8807 x Rabbeted Door x 1-3/4" x RH x 626.

Kits for rabbeted doors can be ordered by model number separately from the accompanying chart. When ordered separately, specify the finish required.

Door Thickness	Rabbeted Door Kit Model No.	Strike Model No.
1-3/4" 2"	RK245	22E

These kits contain the above components plus a No. 22D strike lip with attaching screws for doors above 2".

### miscellaneous trim design

#### GF1824 Thumbturn and Round Plate

Supplied as standard on all locks with round rose sectional trim or lock functions with no roses.

**Thumbturn:** Cast Zinc.

**Plate:** 1-7/8" (48mm) Diameter, Brass, Bronze, Simulated Stainless Steel.

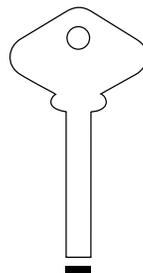

GF1826-Plate Only  
- Used for outside of  
8802 Privacy Lock.

### emergency key

#### E203

Used with 8802 privacy lock and 8862 bathroom lock for emergency access from outside.

### attaching screws

#### GF1824 and GF1826

No. 6 x 3/8" (10mm) type "AB", Oval Phillips Head sheet metal screw, stainless steel plated to match trim (P/N 81-3173-0308). Specify finish required.

## 8800 series | grade 1 mortise locks

### occupancy indicators

#### privacy function indicator

This indicator can be ordered as an option with the 8802 (privacy) and 8862 (bathroom) functions. Available for all lever and knob trim designs.

The privacy occupancy indicator can be ordered with locksets by specifying IND as an option. It can be ordered separately as a retrofit kit for sectional trim by specifying model number IND-K and required finish and for escutcheon trim by specifying CN87 x 261 x finish.

When specifying option IND, the lockset will be provided with an indicator that shows the room is either occupied (OCC) when deadbolt is thrown or vacant (VAC) when deadbolt is retracted.

**Deadbolt Retracted  
"Vacant"**

**Deadbolt Thrown  
"Occupied"**

#### cylinder function indicator

The cylinder indicator is standard with the 8864 (bathroom) function and can be ordered as an option with 8832 (hotel/motel), 8822 (dormitory) and 8818-2 (classroom security intruder) functions. Available for all lever and knob trim designs. Note: Cylinder indicator is not available for use with R1, R2, R3, R4, or R5 roses.

The cylinder occupancy indicator can be ordered with locksets by specifying IND as an option. It can be ordered separately as a retrofit kit for sectional trim by specifying model number CIND-K and required finish and for escutcheon trim by specifying CN87 x 260 x finish (without cointurn) or CN87 x 262 x finish (with cointurn). When ordered separately, cylinder not included.

**Thumbturn Retracted  
"Vacant"**

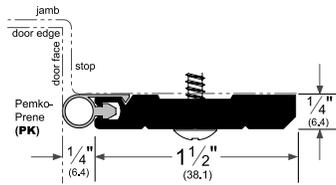

**Thumbturn Thrown  
"Occupied"**

# Heavy Duty Perimeter Gasketing - Head Section

- For the head section of the frame where a parallel arm closer bracket or other hardware is required. Supplied undrilled (36") or drilled (80" and above) and supplied with sheet metal screws for mounting
- If used as a stop, flat head machine screws can be provided upon request and take a countersunk #10 hole. PEMKO will drill the head member only if drilling instructions for countersink holes are provided
- All gasketing shown below is sold individually

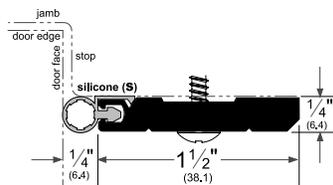

## 2891\_PK

AVAILABLE FINISHES: **A, D, G**  
 REPLACEMENT INSERT: **PK47 (BL, GR)**  
 ANSI: **R3G164, R3G165**

## 2891\_S

AVAILABLE FINISHES: **A, D, G**  
 REPLACEMENT INSERT: **S3 (BL, GR, W)**  
 ANSI: **R3E164, R3E165**

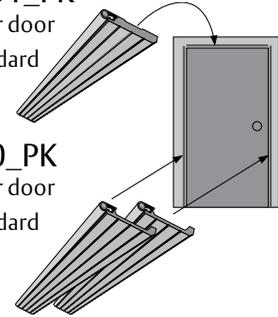

## 2891\_PK

1 per door standard

## 290\_PK

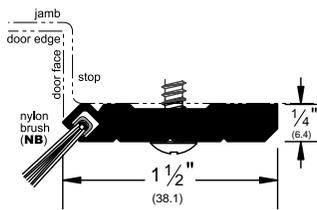

2 per door standard

When ordering a head section such as 2891\_PK, two corresponding side sections (i.e. 290\_PK) should also be ordered for the latch and hinge sides of the frame.

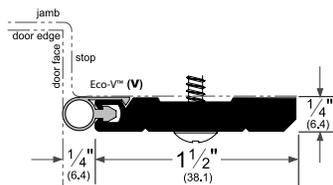

## 28945\_NB

AVAILABLE FINISHES: **A, D, G**  
 REPLACEMENT INSERT: **P14050 (BL, GR)**  
 ANSI: **R3A164, R3A165**

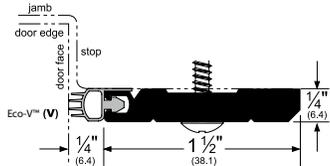

## 2891\_V

AVAILABLE FINISHES: **A, D**

AVAILABLE FINISHES FOR PRODUCTS SHOWN ON THIS PAGE (see General Information section for finish chart)

**A** (Mill Finish Aluminum) **D** (Dark Bronze Anodized) **G** (Gold Anodized)

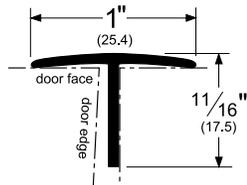

Special finishes available upon request

## "T" and Overlapping Astragals

### 359\_

AVAILABLE FINISHES:  
**A, BDG, D**

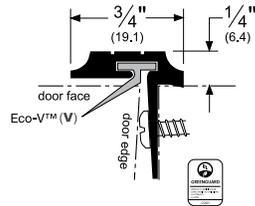

- Supplied with weatherstrip nails for installation

### 356\_V

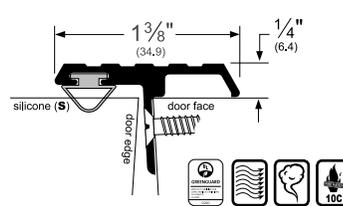

AVAILABLE FINISHES:  
**A, BDG, D, PW, SN**  
REPLACEMENT INSERT:  
**EV17 (BL, GR, W)**

- Countersink drilling with countersunk flathead screws also available upon request at no extra charge

### 355\_S

AVAILABLE FINISHES:  
**B, BDG, C, D, G, PW, SN**  
REPLACEMENT INSERT:  
**S4 (BL, GR)**

### Alternate Inserts For 355

#### 355\_V

AVAILABLE FINISHES:  
**B, BDG, C, D, G, PW, SN**  
REPLACEMENT INSERT:  
**EV7 (BL, GR, W)**

#### 355\_P

AVAILABLE FINISHES:  
**B, BDG, C, D, G, PW, SN**  
REPLACEMENT INSERT:  
**P2 (BL, GR)**

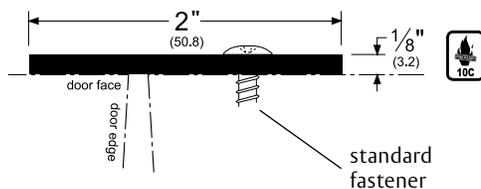

### 357\_

#### 357\_ND

AVAILABLE FINISHES:  
**C, D, G, SP, SS (#4 Finish & #4 Edge)**

#### 11 GAUGE

- "ND" denotes "no drill" (unless specified "ND", astragals are drilled)
- Standard fastener is #10 x 1" Truss Head SMS
- Lead-line option available

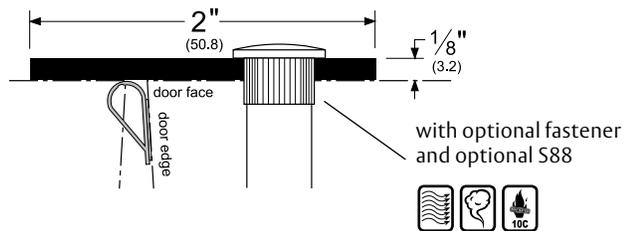

### 357\_ with S88

AVAILABLE FINISHES:  
**SP, SS (#4 Finish & #4 Edge)**

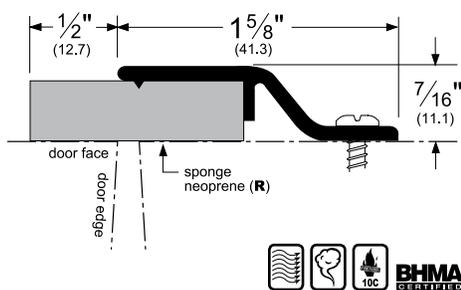

#### 11 GAUGE

- Standard fastener is #10 x 1" Truss Head SMS
- 1/4" - 20 machine screws and thru-bolts must be ordered separately at additional cost
- S88 seal must be ordered separately at an additional cost, if required
- If specifications state that an astragal is required to satisfy a fire and / or smoke opening, then a thru-bolted 357SP or SS in conjunction with S88 seal is the only configuration that can be used.

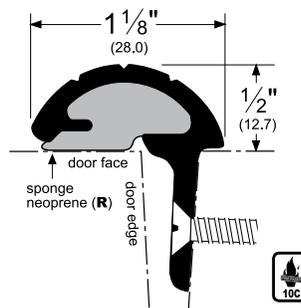

### 375\_R

AVAILABLE FINISHES: **B, C, D, G**  
REPLACEMENT INSERT: **R4 (BL)**  
ANSI: **R3C634, R3C635**

### 352\_R

AVAILABLE FINISHES: **C, D, G**  
REPLACEMENT INSERT: **R8 (BL)**  
For reverse bevel doors

- ANSI/BHMA A156.4, Grade 1 certified 
- UL / cUL listed for use on fire rated doors 
- UL10C listed for positive pressure fire test
- 8301 and 8501 door closers are designed to comply with requirements for the Americans with Disabilities Act (A.D.A) and ANSI standard A117.1 
- This product is manufactured in an ISO 9001 facility

**CAUTION: Door Closers for Low Opening Force Applications:**

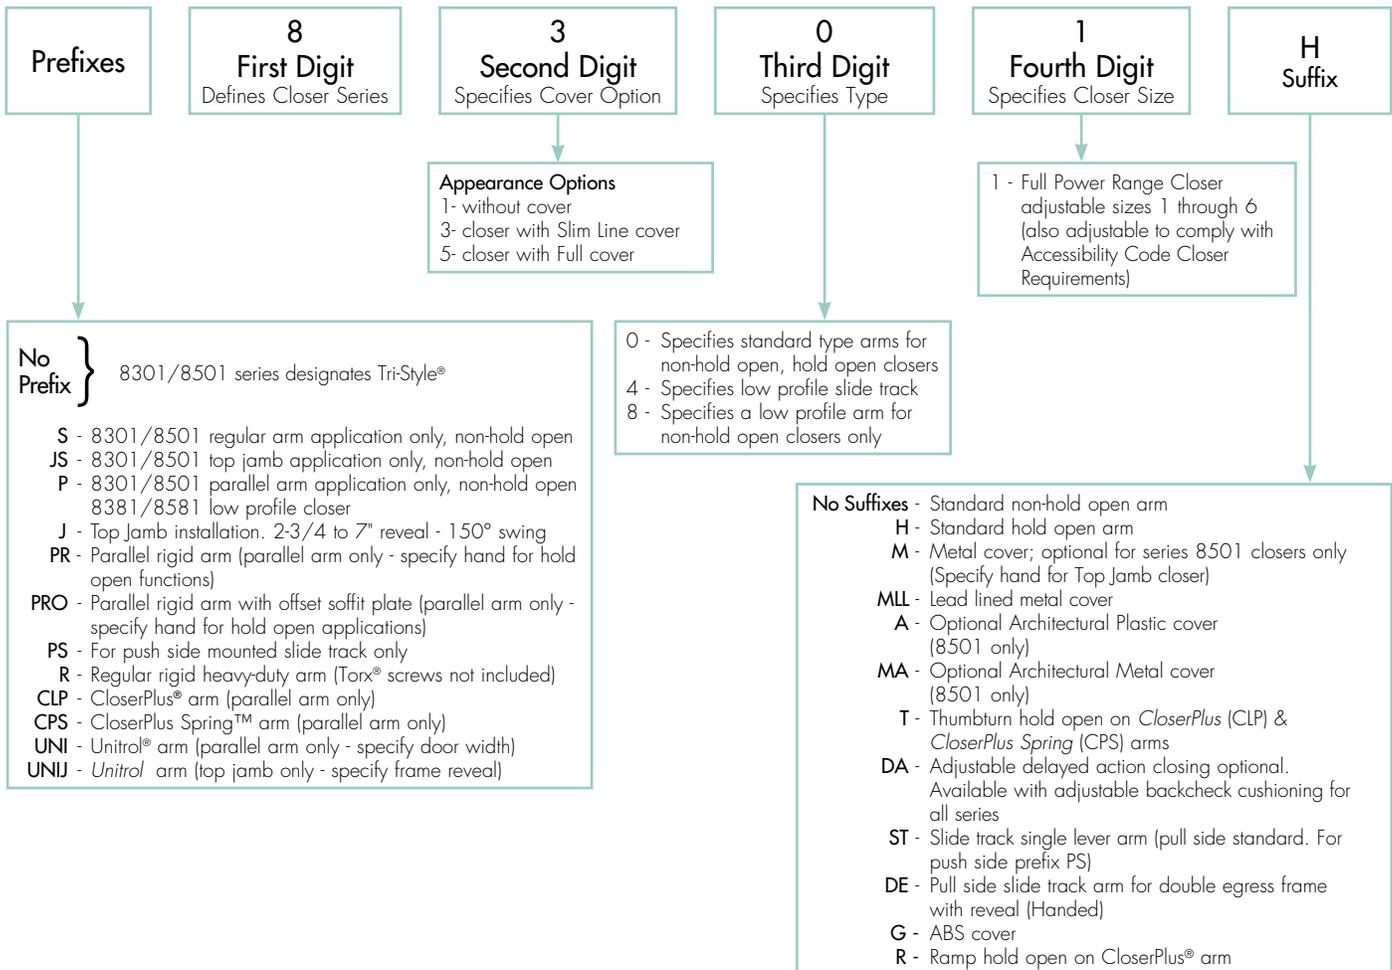

Door closers installed in openings required to meet the requirements of The Americans with Disabilities Act or ANSI/BHMA Standard A117.1, when adjusted to meet those requirements, may not provide adequate closing power to dependably close and latch the door.

HOW TO ORDER

**HW-047**

Revision Date:

For optimum protection of door and frame assemblies, always use auxiliary wall, floor, or overhead door stop.

**Notes:**

- Warranty becomes void if door closer is installed on the exterior side of a door in the exterior wall of a building.
- It is strongly recommended, and required on fire door assemblies, that doors having a door closer be hung on ball bearing or anti-friction hinges or pivots; unless an alternate method is identified in the door manufacturer's listing.
- Failure to use the correct type and size fasteners may void factory warranty.
- Fasteners for fire/smoke door assemblies must conform to NFPA 80. In some applications additional fasteners may be mandated by NFPA 80 that are not shipped with standard Norton product, such as sleeve-nuts/sex nuts or through-bolts and grommet nuts.
- Sizing charts provided on pages 13-25 are based on 1-3/4" (44mm) x 7" (2.13m) standard weight doors swinging to 110°. Other conditions (such as door height or weight; or wind/draft conditions) may require a larger size closer.

FEATURES

**Aluminum Alloy Housing**

Closer bodies are constructed of a special aluminum alloy, carefully selected to accommodate interactive steel components and operating conditions.

**Rack & Pinion Operation**

Provides a smooth constant control of the door through its full opening and closing cycle. 180° door swing can be achieved when door, frame, hardware and arm function do not interfere.

**Non-handed**

With few exceptions all series 8301/8501 door closers are non-handed and can be installed on either right- or left-hand swing doors. Pinion shaft extends vertically through the closer body in both directions. Some options, as noted on pages 6-7, will require that the hand of the closer be specified.

**Sweep Speed Control Valve**

Allows adjustment of door speed from the door's full open position down to approximately 10° from the closed position.

**Latch Speed Control Valve**

Allows adjustment of door speed from approximately 10° down to the door's fully closed position.

**Tri-Style®**

8301/8501 comes with screws, brackets and soffit plates to allow for regular, top jamb, and parallel arm installations.

**Adjustable Backcheck Valve**

Provides control of the door in the opening cycle, beginning at approximately 75° of door opening. It cushions the door opening when the door is forcibly opened beyond its pre-adjusted limits.

**Standard Molded Covers**

Molded of high-impact U.L. listed material. These covers are non-handed for all applications.

**Warranty**

Limited 25-year warranty for defects and life of the building on the aluminum housing.

**Closer Fluid**

NorGlide® closer fluid is a specially formulated multi-viscosity hydraulic fluid that contains lubricity and anti-oxidation agents that provide optimum performance and efficiency. This fluid complements the interaction of the door closer's aluminum housing with its steel and brass components, while maintaining stable viscosity to allow the door closer to perform in temperatures ranging from extremely high to as low as -40° F.

**Door Closer Power Options**

**Series 8301/8501 Multi-Sized Door Closer**

Adjustable through the power range of sizes 1 through 6; as outlined in ANSI/BHMA specification A156.4 option PT 4H.

Closers will also comply with the opening force requirements as outlined in the Americans with Disabilities Act (ADA) and ANSI/BHMA standard A117.1 for interior doors.

OPTIONAL FEATURES COVERS

**Optional Metal Cover**

This steel cover is non-handed for regular and parallel arm applications, but is handed for top jamb applications. Cover is available in sprayed or plated finishes.

**Optional Architectural Covers \***

**Plastic** Architectural plastic covers are molded of high-impact U.L. listed material. They are non-handed and available in sprayed finishes.

**Metal** The architectural metal covers are steel and non-handed for all applications. These covers are available in sprayed or plated finishes.

**Optional ABS Cover**

Consult factory for details

## OPTIONAL FEATURES

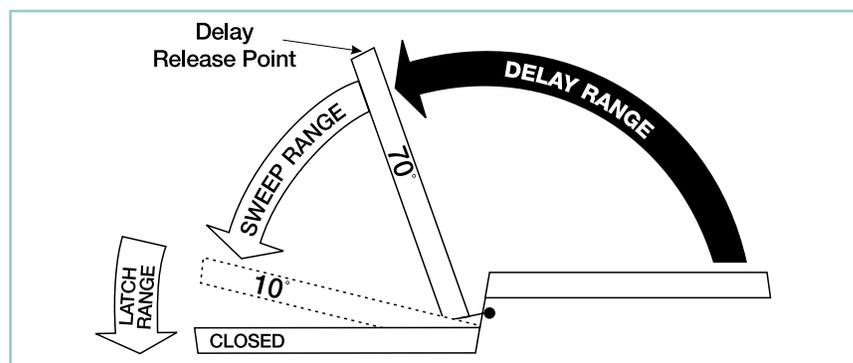

### Adjustable Delayed Action Closing

An optional hydraulic feature that adds a third speed range to the closing cycle. This feature becomes effective when the door is opened and released at any point beyond 70°. The amount of time delay depends upon the combination of the angle of door release and valve adjustment. The valve can be adjusted with a 1/8" (3mm) hex key from no delay time up to maximum delay times of:

Door Opened	Approximate Time of Delay Cycle
180°	4-5 minutes
120°	2-3 minutes
90°	25-30 seconds

### Pressure Relief Safety Valve

The delayed action hydraulic system contains a pressure relief valve. Any time the door is forced toward the closed direction while it is in the closing cycle, the valve will open and permit the door to close. This prevents damage to door, frame and closer.

### Suggested Applications

Delayed action closing allows slow-moving traffic to clear the opening before the door closer's normal closing cycle begins. This feature can be helpful in health care facilities such as hospitals and nursing homes. It provides sufficient time for persons on crutches or in wheelchairs to pass through a door without concern of it closing. At the same time, it can accommodate the facility's staff with movement of food service carts, beds, and other wheeled traffic.

Use of delayed action closers on many doors throughout industrial and commercial buildings can also assist the flow of traffic. Locations where additional time to clear the opening is advantageous are doors between office and factory/warehouse facilities, doors to workshops or laboratories, to kitchen and food processing areas, etc.

## OPTIONAL FEATURES ARMS

### Non-Hold Open

Self-closes door every time door is opened. Auxiliary stop (by others) required except when using the CloserPlus®, CloserPlus Spring™ or Unitrol® arms.

### Hold Open

Achieved by means of friction or ball and detent/ roller. Friction hold open has a range of 90° to 180° using template location and mechanical adjustment.

Ball and detent or roller hold open is effective in a range of 85° to 110°.

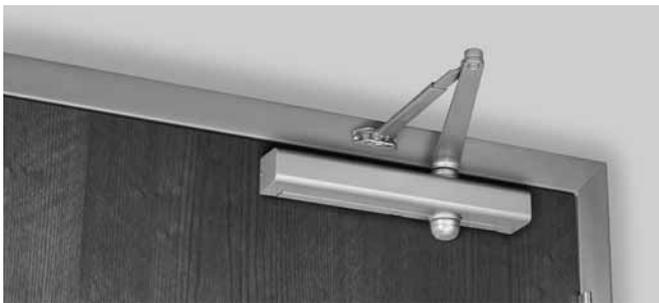

Hold open arm door closers are not permitted to be used on fire door assemblies.

APPLICATIONS

**Regular Arm**

8301 - slim cover

This is the only pull-side application where a double lever arm is used. It is the most power-efficient application for a door closer. Sufficient frame, door and/or ceiling clearance must be considered.

8501 - full cover

Since the arm assembly projects directly out from the frame, this application may present an aesthetics issue or be prone to vandalism.

**Top Jamb**

For efficiency reasons this application provides the best alternative to the regular arm application. There must be sufficient frame face and/or ceiling clearance for this application. It requires a top rail on the door of just 2-1/4" (57mm). This application provides the best door control for doors in exterior walls that swing out of a building.

The entire door closer and arm assembly project from the frame, similar to the regular arm application, where matters of appearance and malicious abuse can be of concern. Consideration must be given to depth of frame reveal.

**Parallel Arm**

This application provides the most appealing design appearance for a surface-mounted door closer having a double lever arm. This also makes it beneficial in vandalism-prone areas. It is on the push side of the door and the arm assembly extends almost parallel to the door. In the closed position, there is very little or no hardware projecting beyond the frame face in most situations.

Due to the geometry of the arm it is approximately 25% less power efficient than a regular arm application. The entire closer and arm assembly are mounted below the frame stop. Top rail clearance dimensions will vary based on the type of cover used. (See pg. 15)

APPLICATIONS

Non-hold open arm shown

Non-hold open arm shown

**Parallel Rigid Arm**

An enhanced variation of the standard parallel arm assembly that is intended for use in heavy traffic areas where auxiliary door stops are installed.

Hold open available - specify hand when ordering.

**CloserPlus® Arm**

Similar to the Parallel Rigid arm, this arm incorporates a stop at the arm's soffit plate to dead stop the door at a predetermined degree of door swing between 85° and 110°, in 5° increments. Prior to dead stop the door closer's backcheck feature slows the door speed to reduce the impact of the stop action.

The *CloserPlus* Arm is intended for use where an auxiliary door stop cannot be utilized and no more than moderate abuse is anticipated. Where more extreme conditions are expected, use of a *Unitrol* arm is recommended.

Available with or without hold open. (Hold open strength is adjustable.)

Non-hold open arm shown

**CloserPlus Spring™ Arm**

This arm has all the characteristics of the *CloserPlus* arm with an additional steel buffer spring that provides greater protection at the end of the door opening cycle.

For extreme conditions, use of a *Unitrol* arm is recommended. Available with or without hold open.

**CloserPlus Ramp™**

The CLPR uses a patent pending ramp and plunger design that easily slides into place reducing wear often seen on traditional hold open arms. Ideal for applications where the door will constantly be pulled out of hold open.

APPLICATIONS

**Regular Rigid Arm**

This double lever arm features a non-adjustable secondary arm. Orbitally riveted joints prevent tampering or disassembly. Prefix "R" to model number. Available non-hold open only.

**Parallel Rigid Offset Arm**

This heavy-duty parallel rigid arm provides additional vertical clearance. It is well suited for applications where weatherstripping or other hardware prevents the use of the standard Parallel Rigid (PR) soffit plate. The non-hold open and hold arms allow 1-1/4" clearance. When used in conjunction with a #6891 spacer block, the PRO arm provides 1-7/8" clearance to accommodate the use of a surface overhead stop/holder.

Parallel

**Unitrol® Arm**

Can be used for either parallel arm or top jamb applications. *Unitrol* arms combine the features of a double lever arm overhead door stop/holder with the backcheck feature of the door closer to reduce door stopping shock loads to a minimum. The *Unitrol* uses a compression spring buffer at the soffit plate/arm shoe that will absorb 30 lbf. of force, 5° prior to the door's dead stop. Coupled

Top Jamb

with the door closer's backcheck feature, this arm provides the most controlled stop available with a surface door closer. For parallel arm applications there are three different length arm assemblies. Each length is designed for a specific range of door widths, to provide precise door control. This further lessens the dead stop impact on the door's hinges/pivots.

APPLICATIONS

Pull Side

Low Profile Pull Side

Push Side

Low Profile Push Side

**Slide Track**

Whether pull- or push-side mounted, slide track provides the designer with the smoothest lines available in a surface-mounted door closer. The single lever arm allows components to be located in a stack configuration to minimize projection and eliminate obtrusive arm angles. The arm geometry reduces door closer power efficiency by approximately 25% from that of a regular arm.

**Standard unit:**

- Adjustable 85°- 110° (hold open and non-hold open). Track is supplied with a spring buffered stop. An auxiliary stop, by others, is recommended.
- Specify if hold open unit is required.
- 180° swing (non-hold open, pull side only) is also available. This track assembly requires that a door stop, by others, be supplied to stop the door.

Regular Arm

Parallel Arm

**Regular Arm:** Allows closer to be installed where there is as little as 1" (25mm) of frame face or ceiling clearance.

**Parallel Arm:** Allows closer to be installed 1/2" (13mm) higher up on door than standard parallel arm application.

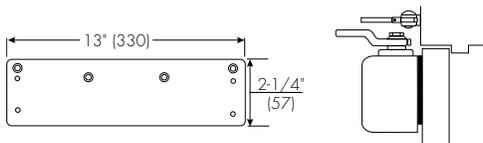

**Low Profile Arm**

Supplied with 8381/8581 series door closers for non-hold open installations only. Low profile arms have a reduced height elbow joint and a straight main arm. This enables the door closer to be installed in less vertical space.

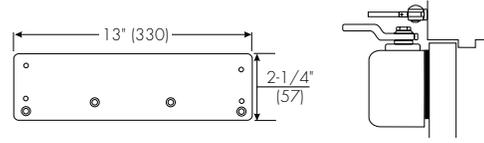

**Note:** Low profile arm door closers are not supplied with Tri-Style® packaging.

REGULAR ARM

### Closer Mounting Plates Slim Line Installations

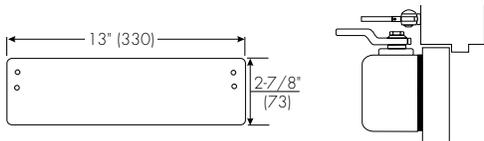

**Narrow Top Rail - #8146 Drop Plate:** For use where the narrow top rail of the door prevents the closer from being mounted directly on to the door surface. This drop plate must be used for any Series 8000 closer mounted on a top rail between 1-9/16" and 2-7/16" (40 and 62mm) in height, or any Series 8080 closer mounted on a top rail between 1-7/16" and 2-5/16" (36 and 59mm) in height.

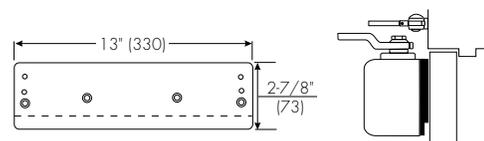

**Concealed Door Holder - #8146 Drop Plate:** For use where a concealed door holder prevents normal mounting of the closer to the door. This is the same plate used for narrow rail mounting, but is inverted for this application to permit the mounting screws to clear the bottom of the door-holder preparation in the top rail of the door. This places the centerline of the plate's upper mounting screws at 2-3/16" (56mm) from the top of the door.

### Full Cover Installations

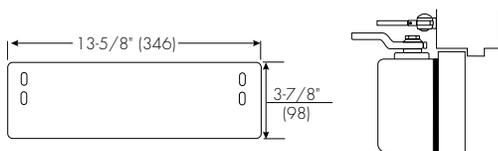

**Exposed Back - #8445 Molded Full Cover Decorative Back Plate:** For use on doors with glass lights where a closer with a molded full cover is installed and the closer back is exposed. This plate covers the back of the installation to give a pleasing appearance from the reverse side.

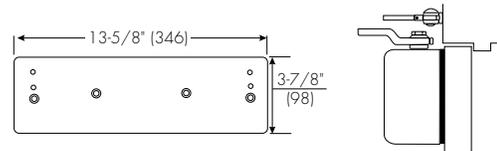

**Exposed Back/Narrow Top Rail - Exposed Back Concealed Door Holder - #8446 Molded Full Cover Drop Plate Kit:** For use with molded full cover installation when an 8146 Plate is needed as a drop plate on a narrow top rail, or as a clearance plate for a concealed door holder, and the closer back is exposed. Kit contains an 8146 Drop Plate and an 8445 Decorative Plate.

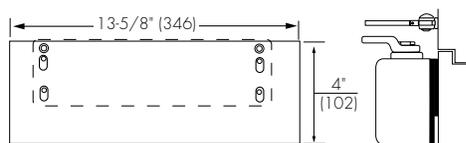

### Metal Cover Installations

**Exposed Back - #8545 Metal Cover Decorative Back Plate:** For use on doors with glass lights where a closer with a metal full cover is installed and the closer back is exposed. This plate covers the back of the installation to give a pleasing appearance from the reverse side.

**Concealed Door Holder - #8546 Metal Cover Drop Plate:** For use where a concealed door holder prevents the normal mounting of the closer to the door. This plate permits the mounting screws to clear the bottom of the door-holder preparation in the top rail of the door. This places the centerline of the plate's upper mounting screws at 2-3/16" (56mm) from the top of the door.

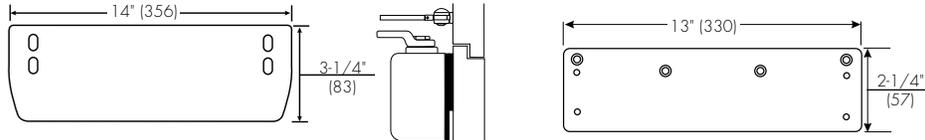

**Exposed Back/Narrow Top Rail - #8549 Metal Cover Drop Plate Kit:** For use with metal full cover installations, when an 8146 Plate is needed as a drop plate on a narrow top rail and the closer back is exposed. Kit contains an 8146 Drop Plate and an 8545 Decorative Plate.

Closer Mounting Plates  
Architectural Plastic or Metal Cover Installations

**Exposed Back - #8545A Architectural Plastic or Architectural Metal Cover Decorative Back Plate:** For use on doors with glass lights where a closer with an architectural plastic or metal cover is installed and the closer back is exposed. This plate covers the back of the installation to give a pleasing appearance from the reverse side.

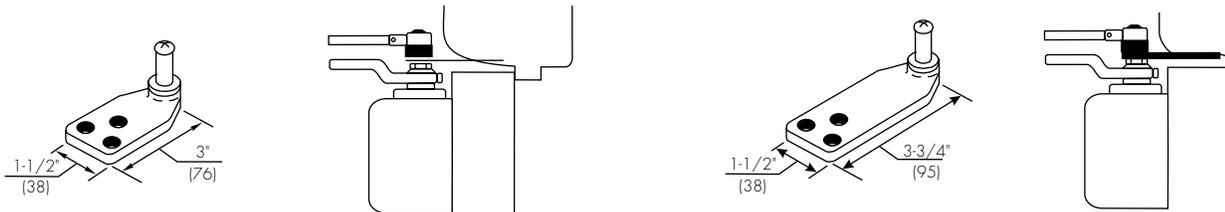

**Concealed Door Holder - #8546A Architectural Plastic or Architectural Metal Cover Drop Plate:** For use where a concealed door holder prevents the normal mounting of the closer to the door. This plate permits the mounting screws to clear the bottom of door-holder preparation in the top rail of the door. This places the centerline of the plate's upper mounting screws at 2-3/16" (56mm) from the top of the door.

**Exposed Back/Narrow Top Rail - #8549A Architectural Plastic or Architectural Metal Cover Drop Plate Kit:** For use with architectural plastic or metal cover installations when an 8146 plate is needed as a drop plate on a narrow top rail and the closer back is exposed. Kit contains an 8146 Drop Plate and an 8545A Decorative Plate.

REGULAR ARM

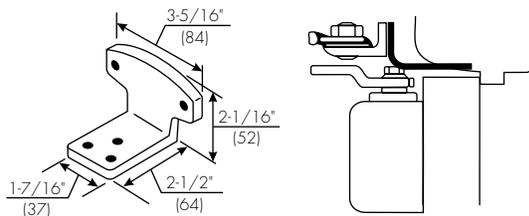

Brackets for Non-Hold Open Arms

**Molded/Bull Nose Trim - #2403B Bracket:** For use where the door frame has molded or bull nose trim which will not accept a standard non-hold open shoe. The bracket is mortised into the frame rabbet, and projects beyond the face of the frame. It will accommodate a frame rabbet up to 2" (51mm) deep.

**Molded / Bull Nose Trim - #2403-3/4 Bracket:** This bracket is similar to, but longer than, the 2403B bracket. It is designed to accommodate frame rabbets from 2" to 2-7/8" (51 to 73mm) deep.

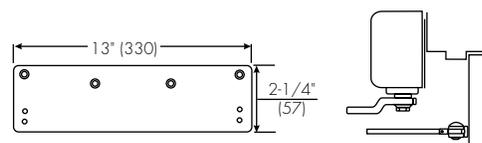

Brackets for Hold Open Arms

**Molded / Bull Nose Trim - #80 Bracket:** For use where the door frame has molded or bull nose trim which will not accept a standard hold open shoe. It is mortised into the frame rabbet, and projects beyond the face of the frame. It will accommodate a rabbet up to 2" (51mm) deep. This bracket is used in combination with the standard hold-open mounting shoe.

TOP JAMB ARM

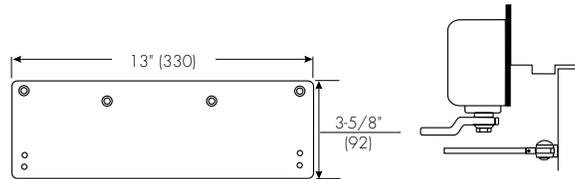

Closer Mounting Plates  
Slim Line Installations

**Low Ceiling Clearance - #8146 Drop Plate:** For use where low ceiling clearance prevents normal top jamb mounting. This plate is used when clearance is from 1-7/8" to 2-7/8" (48 to 73mm). Where ceiling clearance is less than 1-7/8" (48mm) see #8148 Drop Plate on page 30.

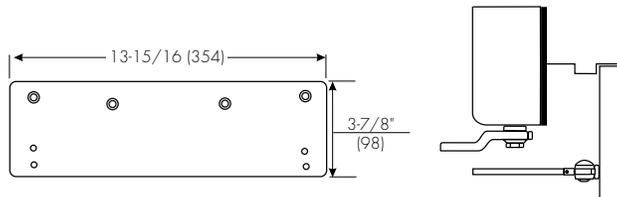

**Overhead Door Holder - #8146 Drop Plate:** For use where a surface or concealed overhead door holder prevents normal top jamb mounting. This plate drops the closer and allows arm mounting screws to clear the bottom of the door holder. This places the centerline of the arm mounting screws at 2-7/8" (73mm) from the top of the door.

Closer Mounting Plates  
Slim Line Installations

**Low Ceiling Clearance - #8148 Drop Plate:** For use where the ceiling clearance is between 1-1/2" and 1-3/4" (38 and 44mm).

Metal Cover Installations

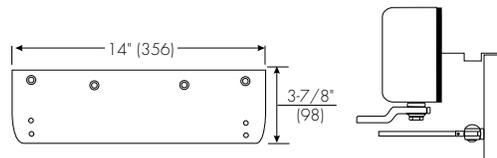

Low Ceiling Clearance -  
Overhead Door Holder -

**#8547 Metal Full Cover Drop Plate:** For use where a low ceiling clearance prevents normal top jamb mounting. This plate is used when the clearance is between 1-5/8" and 3-7/8" (41 and 98mm). Or for use where a surface or concealed overhead door holder prevents normal top jamb mounting of a

closer with a metal full cover. This plate drops the closer and allows arm mounting screws to clear the bottom of the door holder. This places the centerline of the arm mounting screws at 3-7/8" (98mm) from the top of the door.

Architectural Plastic or Metal Cover Installations

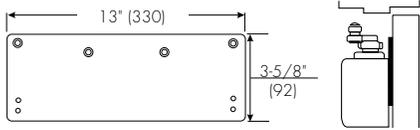

Low Ceiling Clearance -  
Overhead Door Holder -

**#8547A Architectural Plastic or Architectural Metal Cover Drop Plate:** For use where low ceiling clearance prevents normal top jamb mounting. This plate is used when the clearance is between 1-5/8" and 3-7/8" (41 and 98mm). Also for use where a surface or concealed overhead door holder prevents normal top jamb mounting of a closer with an

architectural plastic or metal full cover. This plate drops the closer and allows arm mounting screws to clear the bottom of the door holder. This places the centerline of the arm mounting screws at 3-7/8" (98mm) from the top of the door.

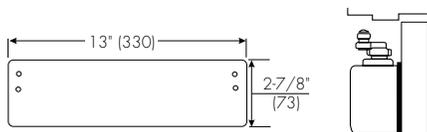

PARALLEL ARM

Closer Mounting Plates  
Slim Line Installations

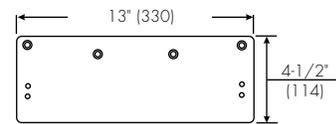

**Narrow Top Rail - #8148 Drop Plate:** For use where a narrow top rail prevents the closer from being mounted directly to the door surface. This drop plate can be used to mount a closer on a top rail as narrow as 2-7/8" (73mm) in height.

Full Cover Installations

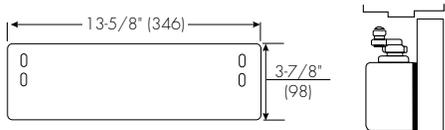

**Exposed Back - #8445 Molded Full Cover Decorative Back Plate:** For use on doors with glass lights where a closer with molded full cover is installed and the closer back is exposed. This plate covers the back of the installation to give a pleasing appearance from the reverse side.

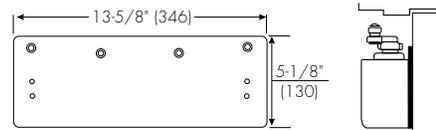

**Exposed Back/Narrow Top Rail - #8158 Molded Full Cover Drop Plate:** For use on doors with glass lights where a closer with molded full cover is installed and the back of the closer is exposed. This covers the back of the installation and gives a pleasing appearance from the reverse side.

Metal Cover Installations

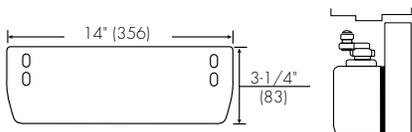

**Exposed Back - #8545 Metal Full Cover Decorative Back Plate:** For use on doors with glass lights where a closer with full metal cover is installed and the back of the closer is exposed. This plate covers the back of the installation and gives a pleasing appearance from the reverse side.

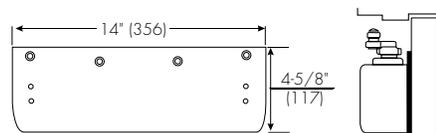

**Exposed Back/Narrow Top Rail - #8548 Metal Full Cover Drop Plate:** For use on doors with glass lights where a closer with metal full cover is installed on a narrow top rail, and the back of the cover is exposed. This drop plate can be used to mount a closer on a top rail as narrow as 2-7/8" (73mm) in height. This plate covers the back of the installation and gives a pleasing appearance from the reverse side.

Architectural Plastic or Metal Cover Installations

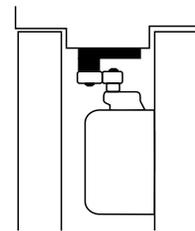

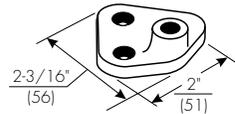

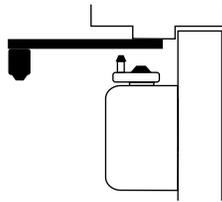

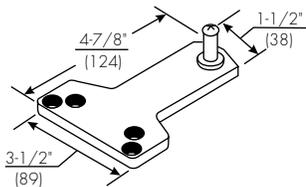

**Exposed Back - #8545A Architectural Plastic or Architectural Metal Cover Decorative Back Plate:** For use on doors with glass lights where a closer with an architectural plastic or metal cover is installed and the closer back is exposed. This plate covers the back of the installation to give a pleasing appearance from the reverse side.

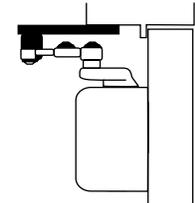

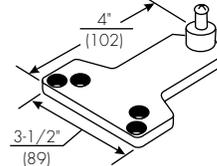

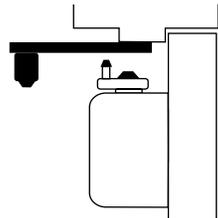

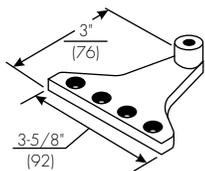

**Exposed Back/Narrow Top Rail - #8548A Architectural Plastic or Architectural Metal Cover Drop Plate:** For use on doors with glass lights where a closer with an architectural plastic or metal cover is installed on a narrow top rail, and the back of the cover is exposed. This drop plate can be used to mount a closer on a top rail as narrow as 2-7/8" (73mm) in height. This plate covers the back of the installation to give a pleasing appearance from the reverse side.

Brackets for Non-Hold Open Arms

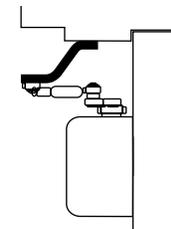

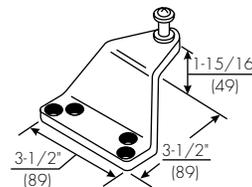

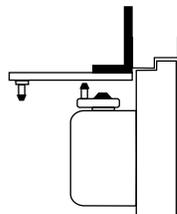

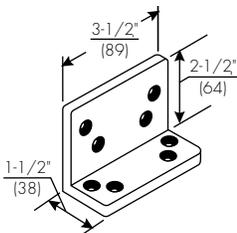

**Standard Installation - #1618A Soffit Plate:** This soffit plate is supplied standard with parallel arm closers. It can be mounted where the frame soffit is as narrow as 1" (25 mm).

**Mounting between Doors - #2018 Soffit Bracket:** For use where insufficient space between companion doors does not permit use of other soffit plates. This bracket permits mounting of the closer between doors with as little as 3" (76mm) of header space. Permits closer arm to clear up to 5/8" (16mm) high stop.

**Narrow Frame/Removable Stop - #2018B Soffit Plate:** For use where a narrow frame or frame with removable stop does not permit use of the standard soffit plate. This soffit plate may be mounted on the frame soffit or the frame rabbet where the stop does not exceed 5/8" (16mm) in height. All of the screw holes are in a straight line, requiring as little as 1-1/4" (32mm) of frame reveal to mount bracket and maintain good closer arm geometry. Where the frame soffit is as wide as 2" (51mm), this soffit plate may be used to clear weather-stripping that is up to 1-3/8" (35mm) wide and 5/8" (16mm) in height.

**Blade/Applied Stop - #2018D Soffit Plate:** For use where a blade or applied stop does not permit installation of the standard soffit plate. Mounts to either the frame soffit or rabbet. Since this soffit plate projects 7/8" (22mm) less than a standard soffit plate, it requires a minimum frame reveal of 1-1/2" (38mm). Permits closer to clear up to a 5/8" (16mm) stop.

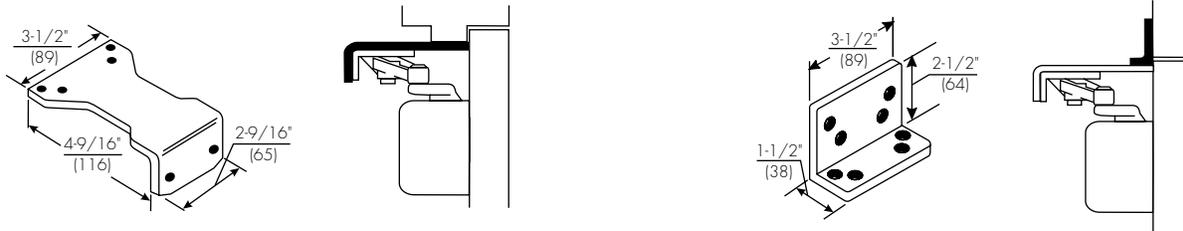

**Flush Transom - #2022 Angle Bracket:** For use where rabbeted or flush transom conditions prevent installation of a soffit plate. Used in combination with the 1618 soffit plate, or may be used in combination with the 2018S soffit plate when it is necessary for the closer arm to clear a separate overhead door holder.

**Extra-Clearance - #2018S Offset Soffit Plate:** For use where the need for additional clearance prevents use of the standard soffit plate. This plate mounts to the frame soffit to provide up to 2" (51mm) of clearance when a separate overhead door holder is used. Standard mounting requires a 2-5/8" (67mm) wide frame soffit. It may also be used where unusually high frame stops or weather-stripping prevent the use of other soffit plates.

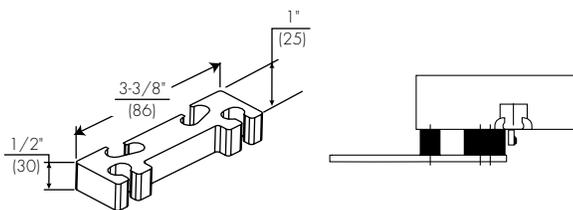

PARALLEL ARM

Brackets for Non-Hold Open & Hold Open Arms

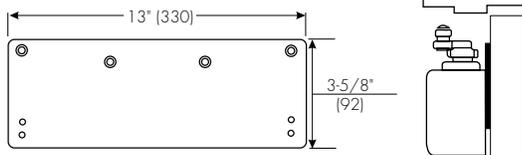

**Parallel Hold-Open - #1628H Adapter Plate:** Supplied standard with all parallel arm hold open closers. It can also be used to convert regular arm or top jamb hold open arms to parallel arm installation. It can be mounted where the frame soffit is as narrow as 1" (25mm).

**Flush Transom - #2022 Angle Bracket:** For use where rabbeted or flush transom conditions prevent installation of a soffit plate. Used in combination with the 1628H adapter plate, this bracket fastens to the overhead transom to provide a mounting surface for the soffit plate assembly.

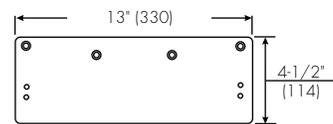

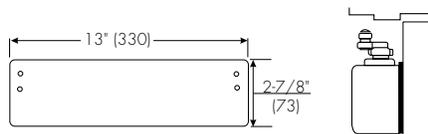

**Clearance/Support Blade Stop - #6891 Spacer Block:** For use where the door frame has a blade stop and the soffit plate must be mounted on the frame rabbet. This accessory is used in combination with the standard spacer block to provide clearance of the blade stop. Also used with non-hold open arms.

Closer Mounting Plates  
Slim Line Installations

**Narrow Top Rail - #8148 Drop Plate:** For use where a narrow top rail prevents the closer from being mounted directly to the door surface. This drop plate can be used to mount a closer on a top rail as narrow as 2-9/16" (65mm) in height.

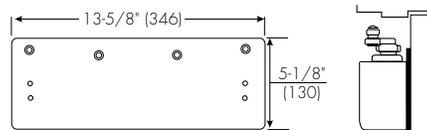

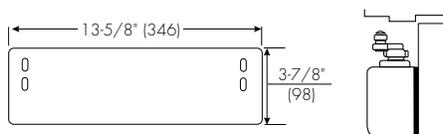

Full Cover Installations

**Exposed Back - #8445 Molded Full Cover Decorative Back Plate:** For use on doors with glass lights where a closer with molded full cover is installed and the closer back is exposed. This plate covers the back of the installation to give a pleasing appearance from the reverse side.

**Exposed Back/Narrow Top Rail - #8158 Molded Full Cover Drop Plate:** For use on doors with glass lights where a closer with molded full cover is installed and the back of the closer is exposed. This covers the back of the installation and gives a pleasing appearance from the reverse side.

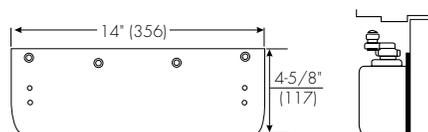

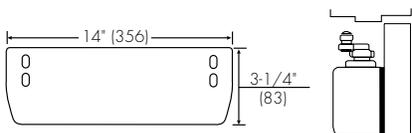

Metal Cover Installations

**Exposed Back - #8545 Metal Full Cover Decorative Back Plate:** For use on doors with glass lights where a closer with full metal cover is installed and the back of the closer is exposed. This plate covers the back of the installation and gives a pleasing appearance from the reverse side.

**Exposed Back/Narrow Top Rail - #8548 Metal Full Cover Drop Plate:** For use on doors with glass lights where a closer with metal full cover is installed on a narrow top rail, and the back of the cover is exposed. This drop plate can be used to mount a closer on a top rail as narrow as 2-9/16" (65mm) in height. This plate covers the back of the installation and gives a pleasing appearance from the reverse side.

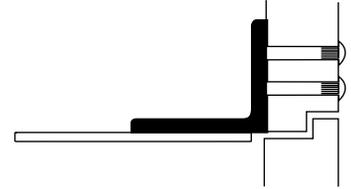

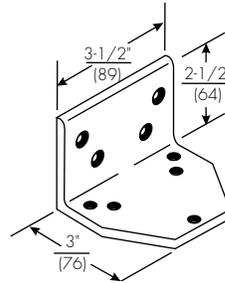

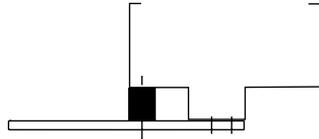

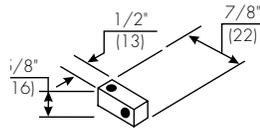

Architectural Plastic or Metal Cover Installations

**Exposed Back - #8545A Architectural Plastic or Architectural Metal Cover Decorative Back Plate:** For use on doors with glass lights where a closer with an architectural plastic or metal cover is installed and the closer back is exposed. This plate covers the back of the installation to give a pleasing appearance from the reverse side.

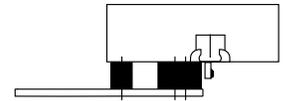

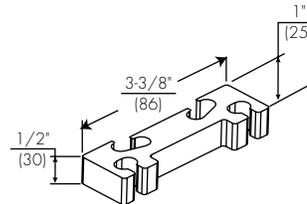

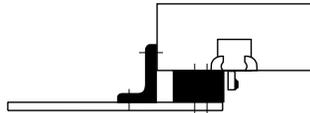

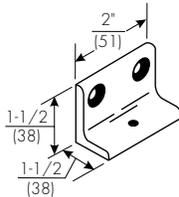

**Exposed Back/Narrow Top Rail - #8548A Architectural Plastic or Architectural Plastic or Architectural Metal Cover Drop Plate:** For use on doors with glass lights where a closer with an architectural plastic or metal cover is installed on a narrow top rail, and the back of the cover is exposed. This drop plate can be used to mount a closer on a top rail as narrow as 2-9/16" (65mm) in height. This plate covers the back of the installation to give a pleasing appearance from the reverse side.

Brackets for Non-Hold Open Arms & Hold Open Arms

**Standard - #2019S Spacer Block:** For use where a narrow frame soffit does not provide adequate support for the soffit plate. Supplied as standard with all parallel rigid arm closers.

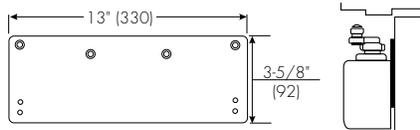

**Flush Rabbeted Transom - #2019L Angle Bracket:** For use where flush transom conditions prevent mounting of the standard soffit plate. This bracket is used in combination with the standard soffit plate.

**Narrow Frame - #6890 Support Bracket:** For use where the frame is narrow and the soffit plate cannot be mounted directly to the frame soffit or rabbet. Used in combination with the #6891 Spacer Block on blade stop frames to provide extra support and needed clearance of the blade stop. Used on frames where the frame stop does not exceed 5/8" (16mm) in height.

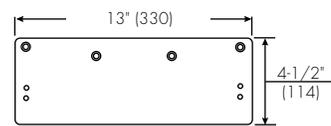

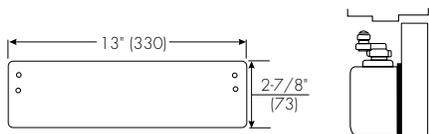

**Clearance/Support Blade Stop - #6891 Spacer Block:** For use where the door frame has a blade stop and the soffit plate must be mounted on the frame rabbet. This accessory is used in combination with the standard spacer block to provide clearance of the blade stop.

Closer Mounting Plates  
Parallel Arm

**Narrow Top Rail - #8148 Drop Plate:** For use where a narrow top rail prevents the closer from being mounted directly to the door surface. This drop plate can be used to mount a closer on a top rail as narrow as 2-7/16" (62mm) in height.

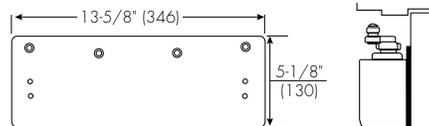

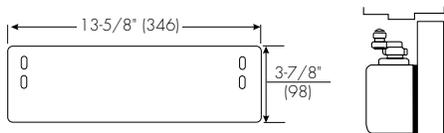

Full Cover Installations

**Exposed Back - #8445 Molded Full Cover Decorative Back Plate:** For use on doors with glass lights where a closer with molded full cover is installed and the closer back is exposed. This plate covers the back of the installation to give a pleasing appearance from the reverse side.

**Exposed Back/Narrow Top Rail - #8158 Molded Full Cover Drop Plate:** For use on doors with glass lights where a closer with molded full cover is installed and the back of the closer is exposed. This covers the back of the installation and gives a pleasing appearance from the reverse side.

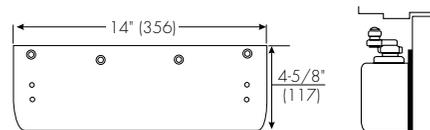

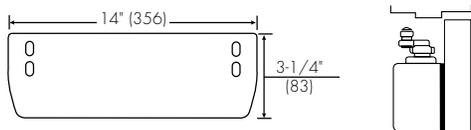

Metal Cover Installations

**Exposed Back - #8545 Metal Full Cover Decorative Back Plate:** For use on doors with glass lights where a closer with full metal cover is installed and the back of the closer is exposed. This plate covers the back of the installation and gives a pleasing appearance from the reverse side.

**Exposed Back/Narrow Top Rail - #8548 Metal Full Cover Drop Plate:** For use on doors with glass lights where a closer with metal full cover is installed on a narrow top rail, and the back of the cover is exposed. This drop plate can be used to mount a closer on a top rail as narrow as 2-9/16" (65mm) in height. This plate covers the back of the installation and gives a pleasing appearance from the reverse side.

Architectural Plastic or Metal Cover Installations

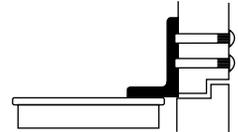

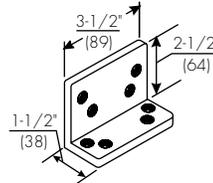

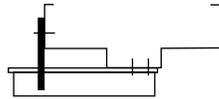

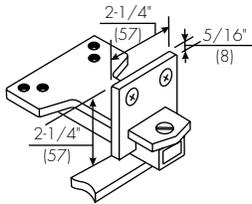

**Exposed Back - #8545A Architectural Plastic or Architectural Metal Cover Decorative Back Plate:** For use on doors with glass lights where a closer with an architectural plastic or metal cover is installed and the closer back is exposed. This plate covers the back of the installation to give a pleasing appearance from the reverse side.

**Exposed Back/Narrow Top Rail - #8548A Architectural Plastic or Architectural Plastic or Architectural Metal Cover Drop Plate:** For use on doors with glass lights where a closer with an architectural plastic or metal cover is installed on a narrow top rail, and the back of the cover is exposed. This drop plate can be used to mount a closer on a top rail as narrow as 2-7/16" (62mm) in height. This plate covers the back of the installation to give a pleasing appearance from the reverse side.

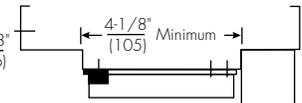

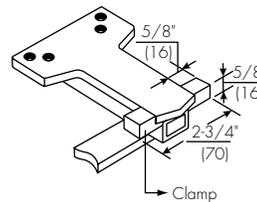

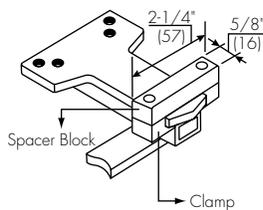

Closer Mounting Plate

Soffit Plate Reinforcing Brackets (for Parallel Arm)

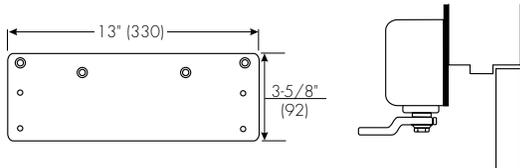

**Additional Support - #6190 Reinforcing Bracket:** Standard for use with all parallel arm *Unitrol* door controls. Provides additional support to the soffit plate on installations with door frame reveals from 1-7/8" to 4-5/8" (48 to 117mm).

**Flush Rabbeted Transom - #2022 Angle Bracket:** Optional for use with all parallel arm *Unitrol* door controls. For use where rabbeted or flush transom conditions prevent installation of the soffit plate assembly. This bracket fastens to the overhead transom to provide a mounting surface for the soffit plate assembly.

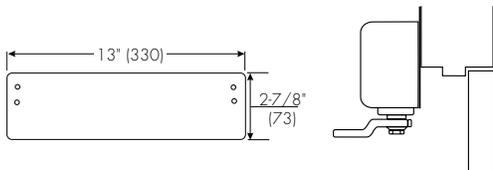

**Wide Frame - #6191 Reinforcing Kit:** Optional for use with all parallel arm *Unitrol* door controls. Used to support the soffit plate on installations with wide frames. Clamps may be used with or without the spacer block, depending on frame conditions.

Closer Mounting Plates  
Top Jamb

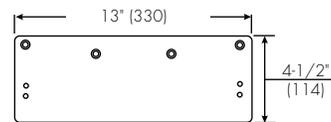

**Narrow Top Rail - #8148 Drop Plate:** For use where a narrow top rail prevents the closer from being mounted directly to the door surface. This drop plate can be used to mount a closer on a top rail as narrow as 2-7/16" (62mm) in height.

Full Cover Installations

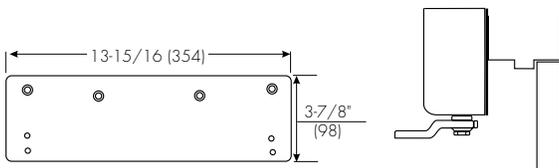

**Exposed Back - #8445 Molded Full Cover Decorative Back Plate:** For use on doors with glass lights where a closer with molded full cover is installed and the closer back is exposed. This plate covers the back of the installation to give a pleasing appearance from the reverse side.

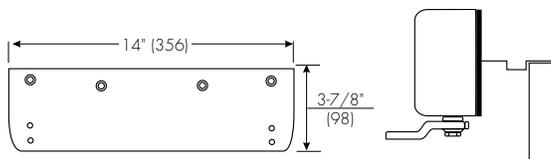

**Exposed Back/Narrow Top Rail - #8158 Molded Full Cover Drop Plate:** For use on doors with glass lights where a closer with molded full cover is installed and the back of the closer is exposed. This covers the back of the installation and gives a pleasing appearance from the reverse side.

Metal Cover Installations

**Low Ceiling Clearance - Overhead Door Holder - #8547 Metal Full Cover Drop Plate:** For use where a low ceiling clearance prevents normal top jamb mounting. This plate is used when the clearance is between 1-5/8" and 3-3/4" (41 and 95mm). Or for use where a surface or concealed overhead door holder prevents normal top jamb mounting of a closer with a metal full cover. This plate drops the closer and allows arm mounting screws to clear the bottom of the door holder. This places the centerline of the arm mounting screws at 3-7/8" (98mm) from the top of the door.

Architectural Plastic or Metal Cover Installations

**Low Ceiling Clearance - Overhead Door Holder - #8547A Architectural Plastic or Architectural Metal Cover Drop Plate:** For use where low ceiling clearance prevents normal top jamb mounting. This plate is used when the clearance is between 1-5/8" and 3-3/4" (41 and 95mm). Or for use where a surface or concealed overhead door holder prevents normal top jamb mounting of a closer with an architectural plastic or metal full cover. This plate drops the closer and allows arm mounting screws to clear the bottom of the door holder. This places the centerline of the arm mounting screws at 3-7/8" (98mm) from the top of the door.

## 5400LN series | cylindrical lever locks

## features

## door thickness

Patented (patent no. 6,131,970) door adjustable rose support plates allow the 5400LN to easily adjust to doors from 1-3/4" to 2" thick. It can also be used on 1-3/8" thick doors by adding two spacer plates P/N 14-5401-6644. For 2-1/4" thick doors, please specify door thickness on order.

## ANSI/BHMA

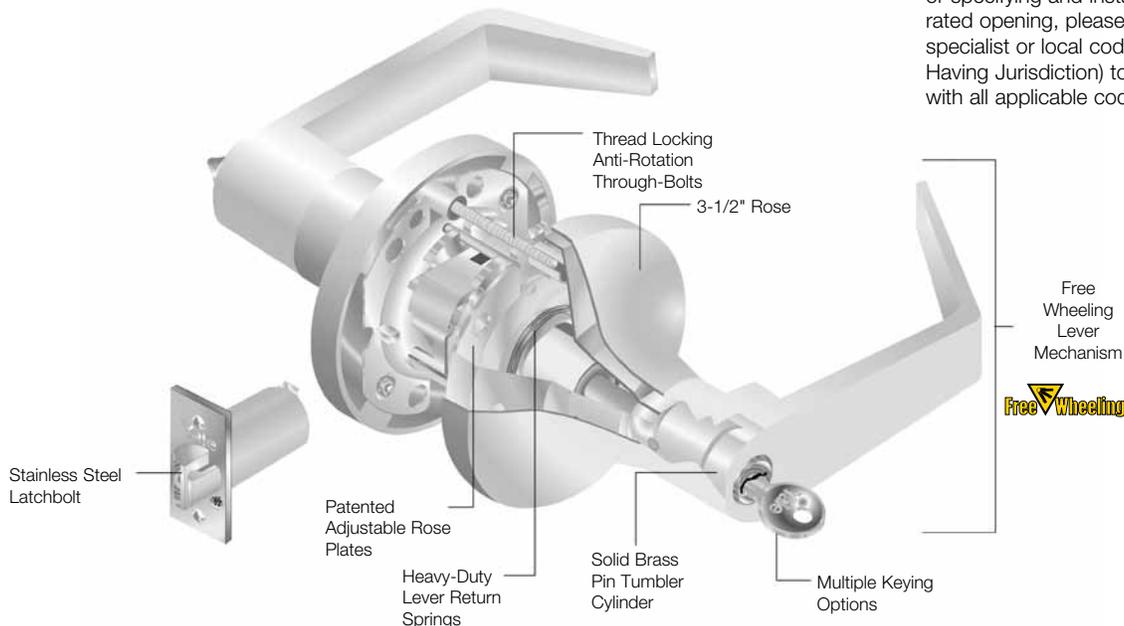

Certified ANSI/BHMA A156.2, Series 4000 Grade 1.

## fire listings

UL - cUL Fire Label for all door functions up to 3 hours.

Note: Any retrofit or other field modification to a fire rated opening can potentially impact the fire rating of the opening, and Yale Locks & Hardware makes no representations or warranties concerning what such impact may be in any specific situation. When retrofitting any portion of an existing fire rated opening, or specifying and installing a new fire-rated opening, please consult with a code specialist or local code official (Authority Having Jurisdiction) to ensure compliance with all applicable codes and ratings.

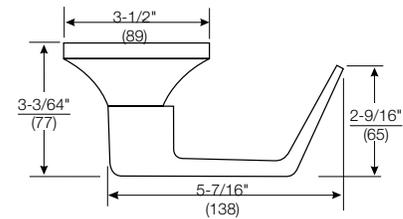

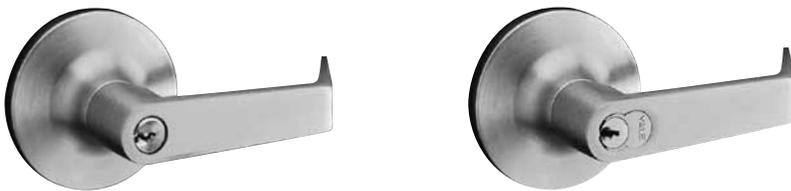

## full-featured grade 1 lever lockset offering

- Free Wheeling lever mechanism increases vandal resistance and reduces the amount of maintenance typically required of locksets with rigid levers.
- 13 finish options.
- 3 lever designs.
- 24 functions including electrified.
- Stainless steel latchbolt provides added strength and wear resistance. Direct 1/2" throw is standard.
- A 3/4" latch throw for fire-rated or pairs of doors is available.
- Wear-resistant plates in the chassis help extend the life of the lockbody and provide smoother lock operation.
- Longer thread locking through-bolts through the chassis provide greater stability and prevent rotation.
- Lifetime warranted heavy-duty lever return springs prevent lever sag and provide positive return of lever to horizontal position.
- Patented (patent no. 6,131,970) door adjustable rose support plates allow for easy adjustment of lockset to fit doors ranging in thickness from 1-3/4" to 2". Rose spacers available for 1-3/8" thick doors.
- Three non-handed lever options (Augusta, Monroe, and Pacific Beach) comply with ADA requirements for easy gripping and operation.
- Expanded cylinder and keying options:
  - Yale® 6- and 7-pin standard and interchangeable core cylinders including Yale® KeyMark® protected keyway cylinders (see page 11).
  - Standard cylinders with Schlage® C and Sargent® LA keyways. Small format interchangeable cores with Best® keyways.
  - Levers which accept interchangeable core cylinders by Best®, Schlage®, ASSA® and Medeco®.
- 3-1/2" roses cover ANSI/BHMA hollow metal door cutout.

lever designs

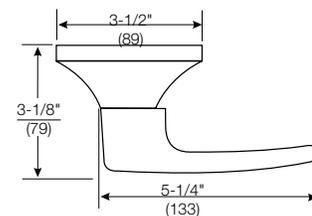

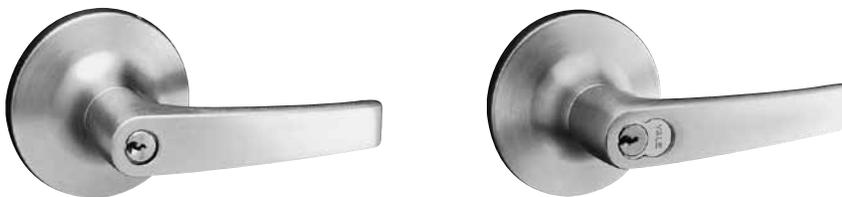

Augusta AU

**Lever:** Cast Zinc  
**Rose:** Cold Forged Brass, Bronze

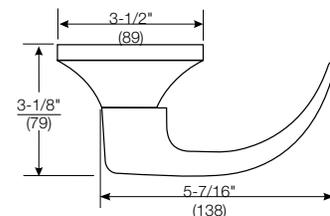

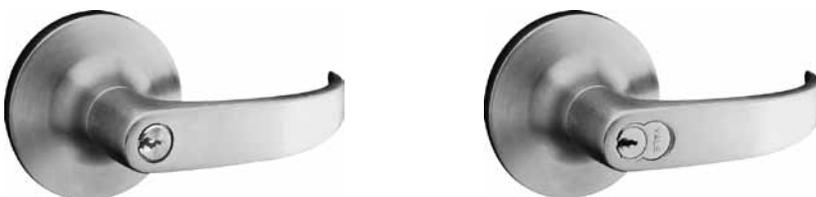

Monroe MO

**Lever:** Cast Zinc  
**Rose:** Cold Forged Brass, Bronze

Pacific Beach PB

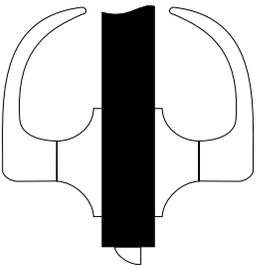

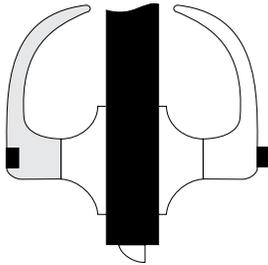

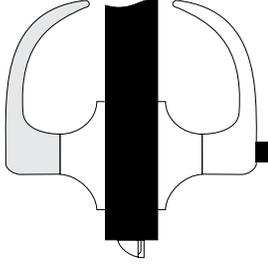

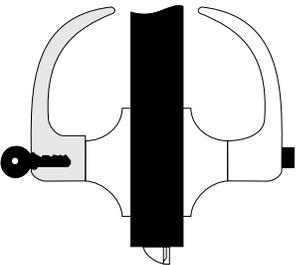

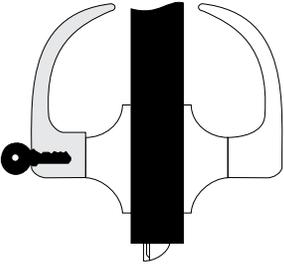

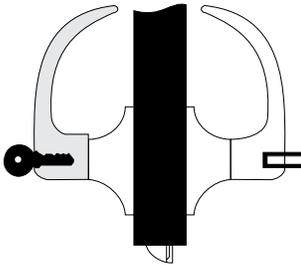

**Lever:** Cast Zinc  
**Rose:** Cold Forged Brass, Bronze

## securex®

### operation

Electric locks provide the ability to electrically lock or unlock the outside trim from a remote location. Fail Safe locks are commonly used in stair towers to release upon fire alarm activation. Fail Secure locks are used on perimeter doors or security doors to allow ingress using access control technologies (proximity cards, keypads, etc.)

### features

- Free Wheeling lever mechanism.
- Self-contained, continuous-duty integral solenoid (allows installation in standard cylindrical prep).
- Available Fail Safe or Fail Secure.
- Available in 12 or 24 volts DC.
- External rectifier available upon request for AC operation.
- Mechanical cylinder override.
- All 5400LN cylinder options.
- Certified ANSI/BHMA Grade 1.
- UL listed.
- 2-year limited warranty.

### REX

Request to Exit - Operating inside lever handle triggers REX switch which can be used to shunt an alarm, monitor egress or release a magnetic lock, etc.

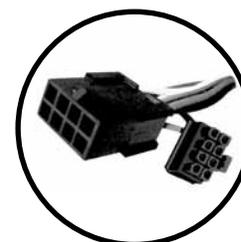

### electrical specifications

- Continuous duty solenoid  
150 mA @ 24VDC  
300 mA @ 12VDC
- REX (SPDT) Contact Rating:  
3A @ 125 VAC  
2A @ 24 VDC

### electrolynx®

Yale® electrified 5400LN locks are equipped with *ElectroLynx* connectors. As a standard feature, these connectors link power from the incoming source to electrified locking products, including hinges, locks, exit devices, magnetic holders and strikes.

**Note: Electrified door hardware with *ElectroLynx* connectors requires a compatible number of lead wires attached to the door hinge.**

### functions

Outside	Inside	Function	Function Description
		5490LN	<b>Fail Safe</b> <ul style="list-style-type: none"> <li>• Power on locks outside lever.</li> <li>• Inside lever always active.</li> <li>• Latchbolt retracted by key when locked electrically.</li> <li>• Free Wheeling lever when locked electrically.</li> </ul>
		5491LN	<b>Fail Secure</b> <ul style="list-style-type: none"> <li>• Power on unlocks outside lever.</li> <li>• Inside lever always active.</li> <li>• Latchbolt retracted by key when power is off.</li> <li>• Free Wheeling lever when power is off (locked).</li> </ul>

## securex® accessories

### BPS power supplies by securitron®

#### Operation

Power supplies are designed to provide reliable filtered and regulated power for long life to a variety of electrified hardware components.

#### Product Features

- Individual output circuit breakers
- Regulated and filtered fuse protected outputs
- LEDs monitor zone status (voltage or no voltage)
- Slide switches connect or disconnect load from power (Not available on 1 Amp supplies)
- Internal Back-Up battery charging circuit
- Rugged steel enclosure
- Fire alarm interface

#### Listings

- UL CLASS 2

#### Applications (use with):

- Fail Safe cylindrical locks
- Fail Secure cylindrical locks

#### Ordering

Ex: BPS-24-4, BPS-12-3

Model	Input	Output	Application
BPS-24-1	120 VAC	1 Amp @ 24 VDC	2-5400LN
BPS-24-2	120 VAC	2 Amp @ 24 VDC	5-5400LN
BPS-24-4	120 VAC	4 Amp @ 24 VDC	11-5400LN
BPS-12-1	120 VAC	1 Amp @ 12 VDC	1-5400LN
BPS-12-3	120 VAC	3 Amp @ 12 VDC	3-5400LN

Consult factory for additional power supply applications.

Yale recommends McKinney®, Pemko and Securitron® for power transfer devices and other electronic accessories.

### Securitron PowerJump™ ICPT

The Securitron PowerJump ICPT Inductive Coupling Power Transfer delivers power contactlessly and invisibly between the frame and door to power electrified hardware on the door. The PowerJump can be installed at the latch side or hinge side of the door and transfers up to 6 watts of power without pins or wires across the door gap, eliminating points of vulnerability and wear ... and no need to core drill the door. The PowerJump is field selectable for 12VDC or 24VDC systems and is ideal for fail secure applications. The unit can hold electrified latches open in continuous duty or can momentarily energize the lockset for latch retraction.

Additional information regarding this product can be found at [www.securitron.com](http://www.securitron.com).

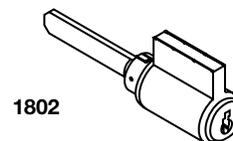

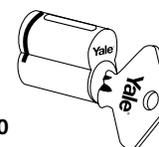

## cylinders

### cylinder options

The following selection guide indicates the correct cylinder for each locking segment.

Lockset Series: 5400LN		Types of Cylinder Mechanisms								
		Conventional		Protected Keyway		Security		High Security		
Cylinder Types	Fixed Core	6-pin	7-pin	6-pin	7-pin	6-pin	7-pin	6-pin	7-pin	
	Key-In-Lever	1802	1802A	K402	K402	5802	5802A	N/A	N/A	
	<b>Interchangeable Core</b>									
	LFIC	1210	1220	K800	K800	5210	5220	N/A	N/A	
SFIC	N/A	N/A	K600	K600	N/A	N/A	N/A	N/A		

Refer to Yale® KeyMark® and/or Cylinders and Keys Catalog sections for all details and how to order examples.

**1802**

**1210**

### Yale® KeyMark®

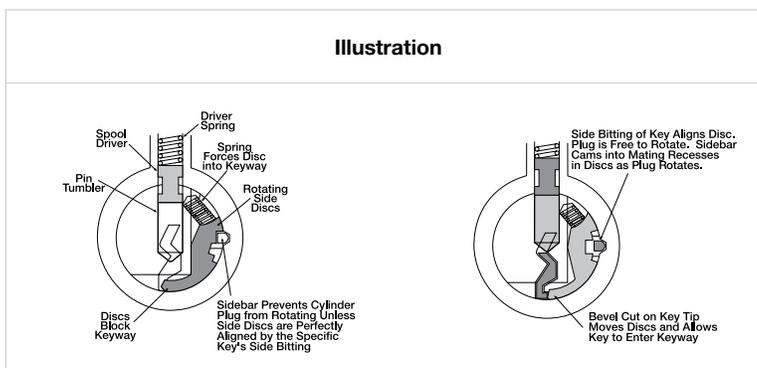

For those applications requiring protected key control, Yale® KeyMark® cylinders guard against unauthorized key duplication. The *Yale KeyMark Security Leg®* keyway feature increases resistance against picking and impressioning and can easily retrofit into existing systems. For further details and availability, refer to the separate *Yale KeyMark* catalog.

### security cylinders

Security cylinders contain two independent locking mechanisms. The first is a traditional 6- or 7-pin tumbler mechanism with spool drivers for greatly increased picking resistance.

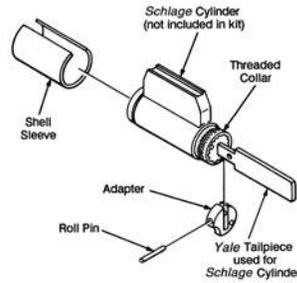

The second is an innovative 5-tumbler rotating disc mechanism with sidebar engagement. The rotating discs are spring loaded and block the bottom of the keyway.

5400LN series | cylindrical lever locks

## latchbolts

### plain latchbolts

Model No. 693 supplied standard with all 5400LN series locksets without locking function. Standard plain latchbolt has a 2-1/4" (57mm) x 1-1/8" (29mm) beveled front with a 2-3/4" (70mm) backset and a 1/2" (13mm) bolt throw. Optional latchbolts with a greater backset/throw available to special order.

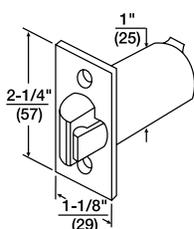

Model No.	Front	Backset	Throw	Front Width	Latch Diameter
693	Beveled	2-3/4" (70mm)	1/2" (13mm)	1-1/8" (29mm)	1" (25mm)
F693	Flat	2-3/4" (70mm)	1/2" (13mm)	1-1/8" (29mm)	1" (25mm)
3693	Beveled	3-3/4" (95mm)	1/2" (13mm)	1-1/8" (29mm)	1" (25mm)

**Note: for 3/4" throw applications, only deadlocking latchbolts available.**

### deadlocking latchbolts

Deadlocking latchbolt Model No. 694 supplied standard with all 5400LN series locksets with locking function. Standard deadlocking latchbolt has a 2-1/4" (57mm) x 1-1/8" (29mm) beveled front with a 2-3/4" (70mm) backset and a 1/2" (13mm) bolt throw. Optional latchbolts with a greater backset/throw available to special order.

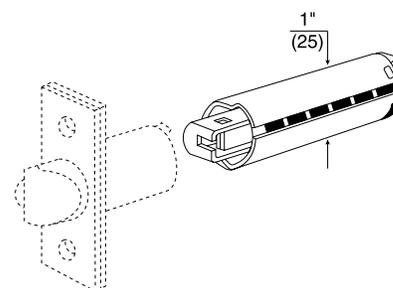

Model No.	Front	Backset	Throw	Front Width	Latch Diameter
694	Beveled	2-3/4" (70mm)	1/2" (13mm)	1-1/8" (29mm)	1" (25mm)
F694	Flat	2-3/4" (70mm)	1/2" (13mm)	1-1/8" (29mm)	1" (25mm)
3694	Beveled	3-3/4" (95mm)	1/2" (13mm)	1-1/8" (29mm)	1" (25mm)
480B	Beveled	2-3/4" (70mm)	3/4" (19mm)	1-1/8" (29mm)	1" (25mm)
F480B	Flat	2-3/4" (70mm)	3/4" (19mm)	1-1/8" (29mm)	1" (25mm)
3480B	Beveled	3-3/4" (95mm)	3/4" (19mm)	1-1/8" (29mm)	1" (25mm)

**Note: For 2-3/8" backset, contact Customer Support.**

### backset extension links

All 5400LN Series locksets are supplied with standard latchbolts of 2-3/4" (70mm) backset; optional latchbolts with a 3-3/4" (95mm) backset are available to special order. Extension links are also available for attachment to 2-3/4" (70mm) or 3-3/4" (95mm) backset latchbolts to extend the backset to the desired length.

Desired Backset	Latchbolt Backset	Order Extension List No.
5" (127mm)	2-3/4" (70mm)	481DL
6" (152mm)	3-3/4" (95mm)	481
7" (178mm)	2-3/4" (70mm)	482
8" (203mm)	3-3/4" (95mm)	482
18" (46cm)	2-3/4" (70mm)	484
19" (48cm)	3-3/4" (95mm)	484

**Other extension links up to 42" (1.06m) backset are available to special order.**

### attaching screws

(Not regularly supplied when latchbolts ordered separately).

- **For all latchbolts**

#8-8-32 x 3/4" (19mm) Phillips flat head combination wood and machine screws  
 Brass - P/N 81-2022-0416\*  
 Bronze - P/N 81-2032-0416\*

- **Hollow Metal Doors**

#8 - 32 x 1" (25mm) Phillips flat head machine screw  
 Brass - P/N 81-0022-0420\*  
 Bronze - P/N 81-0032-0420\*

**\*Specify finish required.**

## strikes

Yale® 5400LN locks are available with a variety of strike options. All strikes are located on the same vertical and horizontal center lines as the latchbolt. Some strikes are available in special lip lengths to accommodate varying thickness of doors and frames. To determine the proper length of the lip, measure from the center line of the strike to the edge of the jamb, accounting for any interfering trim (i.e. wood molding) and then add 1/4" (6mm) for curved lip. All strikes are reversible. Strikes are fabricated of either brass, bronze or stainless steel, depending on the lockset trim finish. When ordering strikes separately, specify the finish required.

<p><b>Model No. 497 ANSI Strike (Standard)</b>                  1-1/4" supplied standard. 1-1/8", 1-1/2", and 1-3/4" lip lengths available by special order. For door and frames with ANSI/BHMA A156.115 preparations.</p>	<p><b>Model No. 371 T-Strike (Optional)</b>                  1-1/4" curved lip supplied standard. 1", 1-1/2", 1-3/4", and 2" curved lip lengths available by special order. Wrought strike box supplied.</p>	<p><b>Model No. 497B Blank ANSI Strike (Optional)</b>                  Available to special order. Installed in frame with standard ANSI/BHMA A156.115 preparation to replace the strike when the lockset has been removed from the door.</p>	<p><b>Model No. 202 Strike Box for ANSI Strike (Optional)</b>                  Specify 497 x 202</p>

## attaching screws

(Not regularly supplied when strikes ordered separately).

### For Model No. 371 strike

#8-8-32 x 3/4" (19mm) Phillips flat head combination wood and machine screw P/N-81-2012-0416.

### For Model No. 497 strike and 497B plate

#12-12-24 x 1" (25mm) Phillips flat head combination wood and machine screw P/N-81-2012-0620.

**Note: When ordering strike plates or attaching screws individually, specify the finish required; i.e. 497 x 202 x 612; #81-2012-0620 x 612.**

## sample specification

---

All locksets shall be 5400LN Series Grade 1 cylindrical lever locksets as assembled by Yale Locks & Hardware.

Lockset chassis shall be constructed of heavy-gauge cold-rolled steel, trivalent chrome plated to protect against rust and corrosion. Locksets shall be adjustable to fit doors between 1-3/4" (44mm) to 2" (51mm) thick.

Locksets shall be non-handed, and shall install easily without the need for specialized installation tools. Locksets shall have separate anti-rotation throughbolts in the 6 o'clock and 12 o'clock position outside the 2-1/8" face bore, and shall have no exposed mounting screws.

Locksets shall have solid one-piece, cast levers without plastic inserts, and shall be a minimum of 5-1/4" in length. Levers shall operate independently, and shall have inside and outside lever return springs. Outside levers on the keyed locksets shall be removable only when the designated key is in the cylinder.

Locksets shall have the capability of accepting 7-pin standard, interchangeable core and high-security cylinders to provide expansion capacity for large master keyed systems.

Vandal resistant levers shall be offered as a standard feature in all locking functions, and shall be Free Wheeling in the locked condition. Locksets that are rigid in the locked condition or which must require resetting (breakaway) are not acceptable.

The latchbolt shall be made of stainless steel.

All locksets shall carry a comprehensive seven-year mechanical warranty. Locksets shall carry a lifetime warranty against lever sag or lever spring breakage.

All locksets shall comply with the following certifications:

- UL 3 Hour Fire Rating
- ANSI/BHMA A156.2 Series 4000, Grade 1
- ANSI A117.1 Accessibility Code
- ANSI/BHMA A156.115 or A156.115-W Preparation

# NB-8700 Top Latch Surface Vertical Rod Exit Device

80 Series

**SARGENT®**

**ASSA ABLOY**

**HW-049**

Revision Date:

## Features

- Single point top latching
- Top latchbolt projection adjustable through center case
- Devices are ANSI A156.3 – 2008 Grade 1
- UL Fire and Panic listed
- Tripping potential removed - no bottom strike
- Rods are 1/2" (13mm) brass, bronze or stainless steel

## Specifications for NB-8700 Series Exit

Door Types	Wood or metal 1-3/4" (44mm) minimum thickness. For doors over 1-3/4" to 2-1/4" thick, specify thickness and order as 31- Option 4-1/2" (114mm) minimum stile with trim and 3-1/2" (44mm) minimum stile without trim.
Rail sizes as determined by door width	Rails are available in 4 sizes, use door width to determine size needed. Rails will be factory cut to size, if door width is supplied <ul style="list-style-type: none"> <li>• E Rail for 24" to 32" door widths, No cutting required for 32" door</li> <li>• F Rail for 33" to 36" door widths, No cutting required for 36" door</li> <li>• J Rail for 37" to 42" door widths, No cutting required for 42" door</li> <li>• G Rail for 43" to 48" door widths, No cutting required for 48" door</li> </ul>
Strike	646 Top Strike (Panic and Fire Rated)
Dogging Feature	Hex key dogging standard on non fired rated devices; specify 16- for cylinder dogging (#41 cylinder supplied)
Electric Options	AL- Alarm BT- Beacon™ PL- SARGuide Photoluminescent Coated TL- SARGuide Illuminated Touchpad 53- LX Latchbolt Monitor 54- Outside Lever Monitoring 55- Request-to-Exit Signal - Rail Monitoring 56- ELR Remote Latch Retraction 57- Delay Egress & Electromagnets 58- Electric Dogging
Mounting Fasteners	Supplied standard with wood and machine screws Available with through-bolts and mortise (sex) nuts
Top Bolt	Stainless steel
Device Centerline from Finished Floor	41" (1041mm) for Standard Applications
Door/Opening Height	<b>Must be specified</b> - 120" (3048mm) Max Door Opening
Center Case Dimensions	8-3/8" (213mm) x 2-5/8" (67mm)
Projection	Pushbar Neutral – 3" (76 mm) Pushbar Depressed – 2-1/8" (54 mm)
Fire Exit Hardware	See Chart – Page 3

## NB-300 Series Aux Control

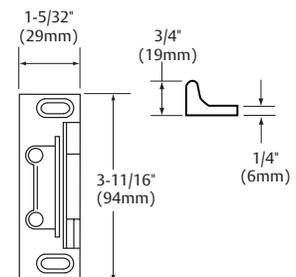

- Available as an 06 or 13 function
- Supplied with SARGENT #41 Mortise Cylinder
- NB-300 is mounted in-line with the exit chassis

**Note:** NB 300 Series Controls only work with NB8710 Devices

## 646 Top Strike

- Standard for both Panic & Fire (12-) Hardware
- Surface applied
- Fire Rated
- Black nylon coated

# Electromagnetic Door Holder/Releases

**RIXSON**  
**ASSA ABLOY**

ASSA ABLOY, the global leader  
in door opening solutions

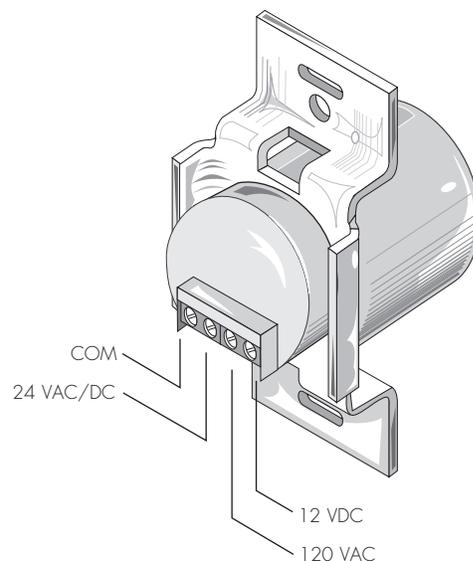

## GENERAL INFORMATION

Electromagnetic door holder/releases are designed for virtually any remote door release applications. They must be used in conjunction with closing devices.

- Fire/smoke barrier doors
  - Door releases when tripped by an alarm or smoke detector
- Private offices
  - Door releases when triggered by a remote switch
- All devices come with a wall/floor portion and a door portion (armature)
- Circuit normally closed
- Door portions have screws and plates to accommodate surface and concealed mounting

### Features

- 25 to 40 pounds holding power, except where noted
- Fail-safe operation; power failure releases door to close
- Positive release button initiates closing motion
- Tri-volt coils on most models see [table 1](#)
- Spotting template included
- For stronger holding forces (50-55 lbs.) specify model and voltage. Not available in tri-volt coils

## CERTIFICATIONS

- Compliant with ANSI/BHMA A156.15 Standards. See individual products for sub sections
- UL/ULC listed
- Listed by California State Fire Marshal

## SPECIFICATIONS

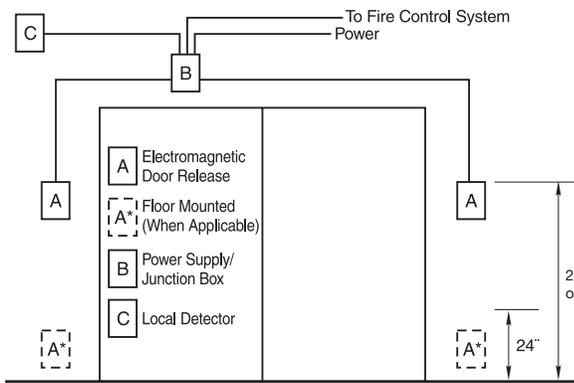

All electromagnetic door holder/releases shall be supplied by architectural hardware supplier. All units shall have a single coil to accommodate 12VDC, 24VAC, 24VDC and 120VAC. The coils shall be independently wound, employing a fuse. Armatures will have positive release button.

# ELECTROMAGNETIC DOOR HOLDER/RELEASES SCHEMATICS AND ACCESSORIES

**HW-050**  
Revision Date:

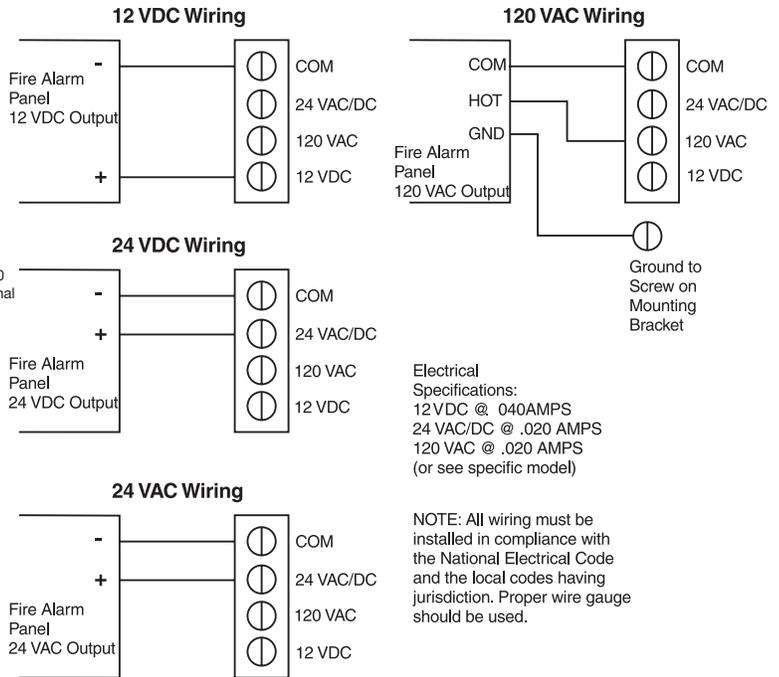

**RIXSON**  
**ASSA ABLOY**

## SCHEMATICS

### Operation Narrative

Doors are to be normally held open. The electromagnetic door releases will be energized with the voltage shown (at right) in the hardware set for this opening. Power shall be controlled by the fire control system. It will interrupt the power if alarmed, causing the doors to be released, thus allowing the door closers to close the doors. When power is restored the magnets will re-energize, permitting the doors to be manually returned to their held open position.

## ACCESSORIES

1-1/2 (38mm)

Base Unit Armature Extension Mounts between armature and contact plate.  
Part# 900  
**Cannot be used with model 994M**

# ELECTROMAGNETIC DOOR HOLDER/RELEASES

## HOW TO ORDER

<b>HW-050</b>	<b>RIXSON®</b>
Revision Date:	<b>ASSA ABLOY</b>

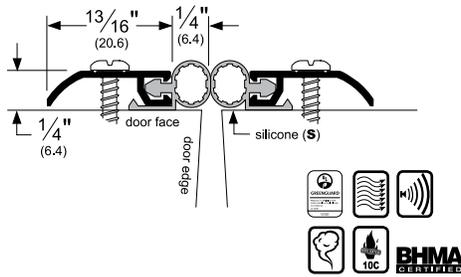

## Astragal and Meeting Stile Gasketing - Split Astragals

- Astragals and meeting stiles with a fire label may be mounted on pairs of doors wherein the gap meets the requirements of **NFPA 80, 6.3.1.7.1 "The clearance between... the meeting edges of doors swinging in pairs on the pull side shall be 1/8" ± 1/16" (3.18mm ± 1.59mm) for steel doors and shall not exceed 1/8" (3.18mm) for wood doors"**
- Order split astragals at two (2) pieces by door height per set of double doors. When ordering add "/2" to the end of the part number to specify 2 pieces (i.e. order quantity 1 each 303AS84/2 to get two lengths at 84 inches)
- Punched with slotted holes for adjustment
- Clear anodized brush products are supplied with gray brush. Painted white brush products are supplied with white brush when available, otherwise black brush is supplied. All other finishes supplied with black brush. Black brush is available for clear anodized and painted white brush products upon request.

# 1. Introduction

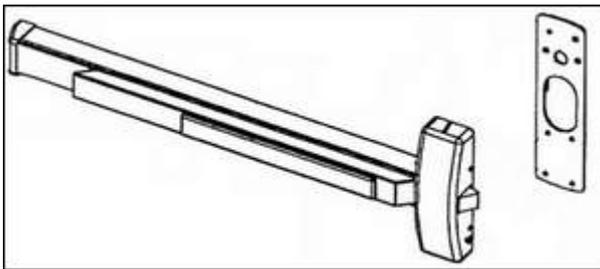

This manual contains

- part dimensions
- a description of *rim version* and *rod version* of exit device with additional parts
- installation procedures
- installation check list
- information about *RFID 3G* specific parts
- information about endnode kit (only applicable for VISIONLINE)

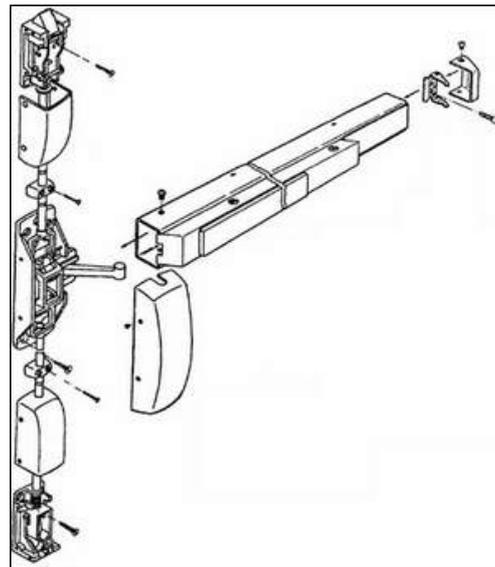

The exit device combines the electronic card lock with a push bar from Sargent. This makes it possible to use encoded cards to control all guest and staff access to the building, and at the same time provide a panic exit device to satisfy all safety considerations for emergency exit. Opening the door from the inside is achieved by simply pushing the push bar.

The exit device is suitable for wood, metal and glazed doors. It is supplied in two versions:

- *rim version* with latch on the side of the door; for horizontal installation
- *rod version* with latch on top and bottom of the door; for vertical installation

*Figure 1: Rim version of exit device*

*Figure 2: Rod version of exit device*

## 2. Dimensions

There are two standard lengths for the horizontally installed push bar;

- 92 cm (36") can be cut to fit other door width, min. 82 cm (32")
- 122 cm (4") can be cut to fit other door width, min. 92 cm (36")

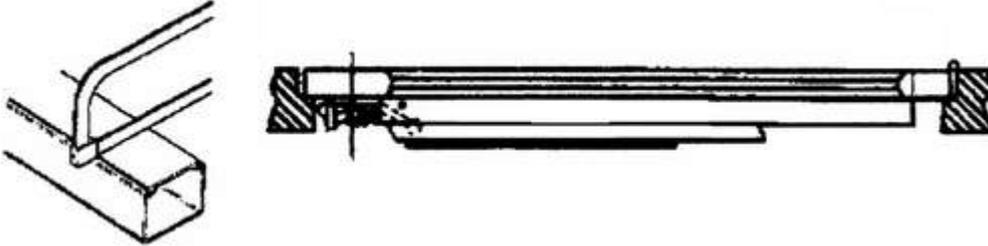

Figure 3: Push bar

Dimensions in mm (inches):

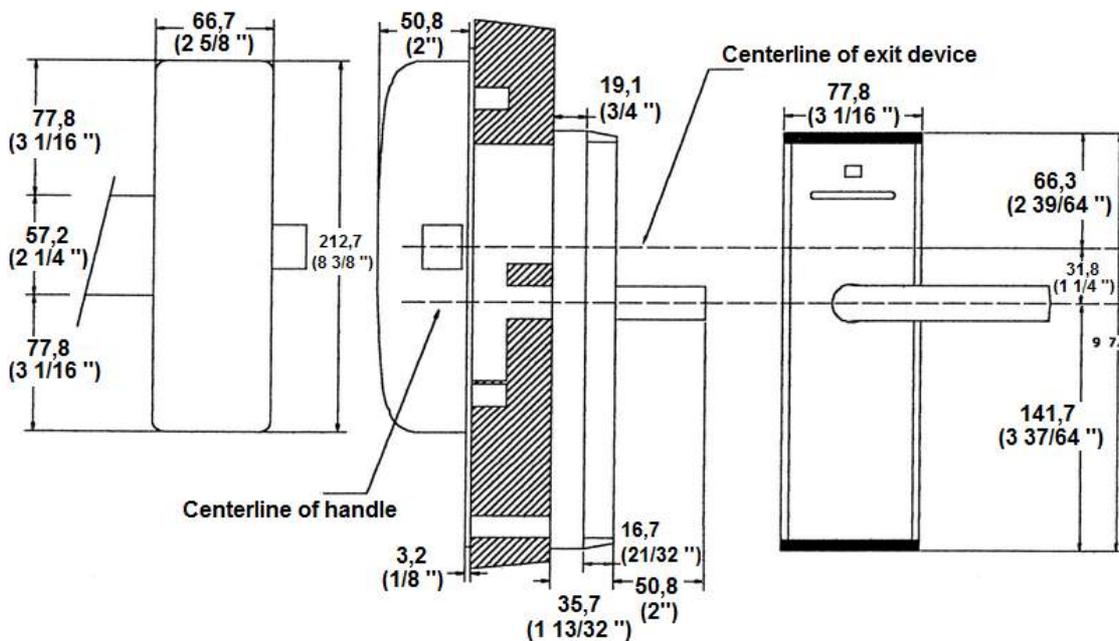

Figure 4: Dimensions of escutcheon and exit device

### 2.1 Dimensions for rim version of exit device

Recommended heights of centerline:

Exit device	1008 mm (4") above finish floor
Escutcheon handle	976 mm (39 3/4 ") above finish floor

Table 1: Dimensions for rim version

## 2.2 Dimensions for rod version of exit device

- Standard length for up to 213 cm (84") doors
- A rod extension kit needs to be ordered for door heights from 213 cm (84") to 259 cm (102")

### 2.2.1 Top strike for rod version

Dimensions in mm (inches):

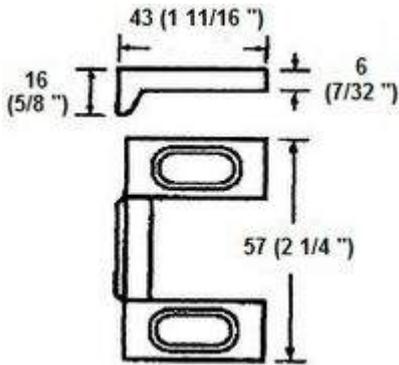

Figure 5: Top strike 'J' mounted on header of the door

### 2.2.2 Bottom strike for rod version

Dimensions in mm (inches):

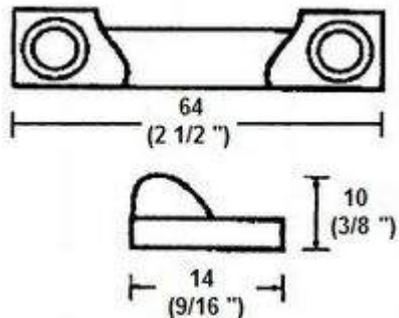

Figure 6: Bottom strike 'K' mounted on floor

## 2.3 Outside escutcheon

The exit device is designed for flush-mounting on the door; see a picture of the escutcheon and its dimensions in [Figure 4](#).

For the rod version of the exit device, a glass bead shim kit is available for doors with glass beads or raised molding with a height of no more than 6mm (1/4"). See [section 3.3.1](#) for detailed information.

### 3. System components

The outside escutcheon set includes an LCU (*lock controller unit*) and an electromechanical lock mechanism. The LCU is powered by a 4.5V or 9V battery (9V for older installations only) that is located inside the push bar behind the battery cover plate; see [Figure 8](#) for rim version and [Figure 9](#) for rod version.

The exit device is released mechanically from the inside by pushing on the bar. The door is unlocked from the outside by using a valid key card. The LCU will accept cards programmed in the VISIONLINE, VISION or 2100 system.

Table 4: Components in rod version of exit device

### 3.3.1 Components in glass bead shim kit

On doors with raised molding or glass beads, a special glass bead shim kit *12-587* (see arrows in Figure 10) must be used between the devices and the door.

- the kit consists of two sets of 3 mm shims
- maximum thickness is 6 mm (1/4 ")
- available in PEN and PEB finishes

*Figure 10: Glass beam shim kit*

Note: Since the thickness of the adapter plate is 3 mm (1/8 "), one shim set 3 mm (1/8 ") must always be used for rod guides, top strike chassis and bottom strike chassis. Shim for lock chassis should not be used.

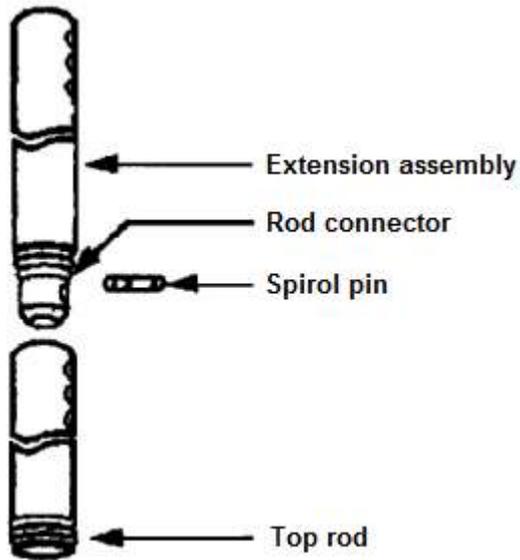

*Figure 11: Adapter plate*

### 3.3.2 Components in rod extension kit

For installations of an exit device with rod, be aware when the door height exceeds 2133 mm (84"); in these cases, a rod extension kit must be used. The rod extension kit can be ordered in the following lengths:

- 150 mm (6")
- 300 mm (12")
- 450 mm (18")

*Figure 12: Rod extension kit*

## 4. Installation

### 4.1 Preparing the outside escutcheon

1. Make sure that the protector plate is mounted onto the lock case; see [Figure 7](#).
2. Make sure that the label on the handle spindle is facing upwards; label marked *RO* or *LO*. If this is not the case, turn the spindle until it stops with the label upwards.
3. For correct positioning of the exit device at the door, see the applicable one of section [2.1](#) (rim version) and [2.2](#) (rod version).
4. Machine the door according to the provided templates; see [Appendix A](#) (outside template for card reader) and [Appendix B](#) (inside template for exit device).
5. Mount the outside escutcheon to the adapter plate with the four machine screws provided, and make sure to pull the LCU battery cable through the 20mm hole in the adapter plate; see Figure 15.

Figure 13: Cut-out, push bar side

Figure 14: Cut-out, outside escutcheon

Figure 15: Adapter plate

Figure 16: Outside escutcheon

#### 4.2 Preparing the battery cable in the push bar

In many cases, the batteries are placed inside the push bar but also other locations are possible. See pictures below for information on how to proceed with the battery cable.

Figure 17

Figure 18

Figure 19

1. Insert the battery cable in the push bar; make sure that the connector is facing upwards in the guide groove. Only the connector and the dismantled part of the cable will be seen.
2. Push the cable into the guide groove while the push bar is depressed. The cable will follow the guide groove. When the battery cable is slid all the way through the rail, release the push bar.

### 4.3 Installation of the exit device, rim version

*Note:* See [section 3.2](#) for exploded view and component list of the exit device in rim version.

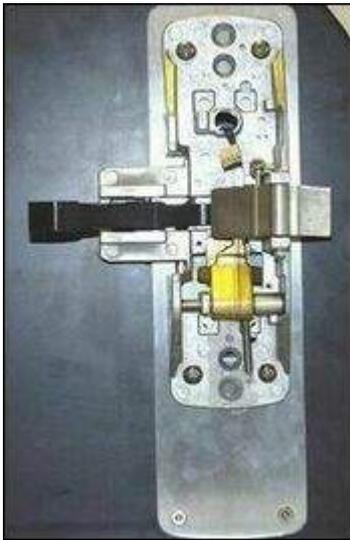

Figure 20

1. Mount the lock chassis (B) on the adapter plate with the machine screws provided, and make sure to pull the battery cable through the hole in the lock chassis.

Figure 21

2. Mount the push bar (A) on the lock chassis (B) with the machine screws provided; see Figure 21.
3. Connect the battery cable from the push bar to the cable from the LCU.

Figure 22

4. Strap the battery cable to the chassis.

Figure 23

5. Level the push bar and mount the end cap bracket (F) on the 3 mm (1/8") shim plate with the screws provided; see Figure 23.
6. Connect the battery cable to the battery and press the battery cover plate onto the rail.
7. Hook up the battery cable inside the push bar.
8. Install the strike plate (C).

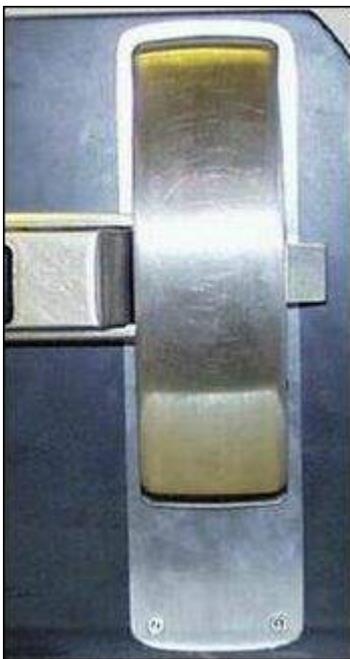

Figure 24

9. Install the cover (D) for the lock chassis (see Figure 24), and the cover for the end cap (see Figure 25).
10. Check that the push bar releases the lock mechanism; see [section 5.1 Mechanical check](#) for details.
11. Load the applicable lock firmware into the LCU using a service device with the *Lock Service* software (see *Quick reference guide Lock Service*), or the HCU.
12. Test for proper card operation; see [section 5.2 Functional check](#) for details.

Figure 25

#### 4.4 Installation of the exit device, rod version

Note: See [section 3.3](#) for exploded view and component list of the exit device in rod version.

1. Mount the push bar (G) on the lock chassis (D) with the machine screws provided.
2. Connect the battery cable from the push bar to the cable from the LCU (*lock controller unit*).
3. Strap the battery cable to the chassis; see Figure 26.

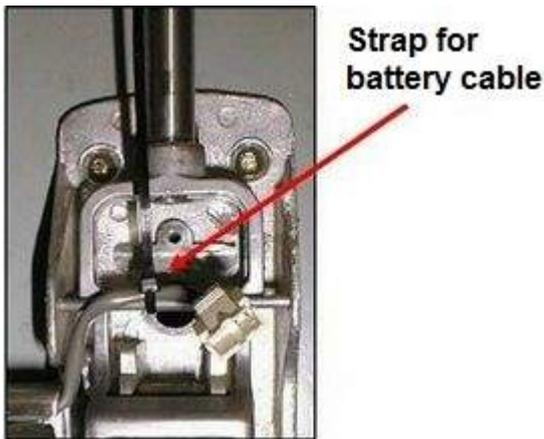

Figure 26

4. Level the push bar and mount the end cap bracket (H) on the 3 mm (1/8") shim plate with the screws provided.
5. Mount the top latch chassis (A) on the 3 mm (1/8") shim plate according to the templates delivered with the exit device.
6. Install the top strike according to the templates delivered with the exit device.
7. Mount the cover (B) for the top latch chassis with the screws provided.
8. Mount the bottom latch chassis (F) on the 3 mm (1/8") shim plate according to the templates delivered with the exit device.
9. Install the bottom strike according to the templates delivered with the exit device.
10. Mount the cover (E) for the bottom latch chassis with the screws provided.
11. Install the rod guides (C).
12. Connect the battery cable to the battery and press the battery cover plate onto the rail.
13. Hook up the battery cable inside the push bar.
14. Install the top and bottom strike plates according to the templates delivered with the exit device.
15. Install the cover (I) for the lock chassis and the cover for the end cap.
16. Check that the push bar releases the lock mechanism; see [section 5.1 Mechanical check](#) for details.
17. Load the applicable lock firmware into the LCU using a service device with the *Lock Service* software (see *Quick reference guide Service PC*), or the HCU.  
Note: HCU is not applicable for the RFID 3G exit device.
18. Test for proper card operation; see [section 5.2 Functional check](#) for details.

## 5. Checking the installation

### *5.1 Mechanical check*

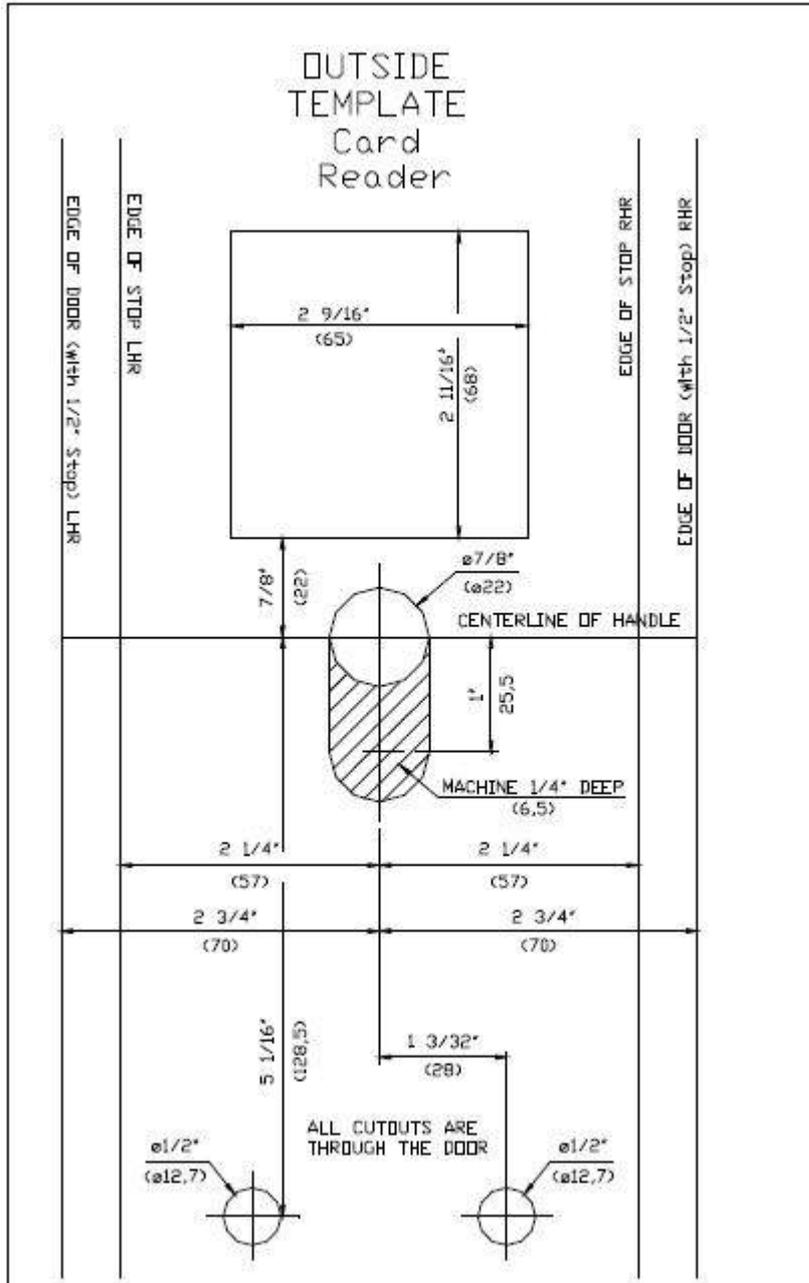

1. Check that the exit device latch goes smoothly into the strike plate when the door is closed.
2. Check that the push bar moves freely back into position after it has been depressed.
3. Check that when depressing the push bar, the parts inside the rail do not inhibit the push bar from movement.
4. Check that the latch can be freely moved in and out from the exit device chassis.
5. *For rod installation.* make sure that the vertical rod extension moves freely when the push bar is depressed.
6. *For rod installation.* make sure that the latches in the top latch chassis and bottom latch chassis move freely.
7. *For rod installation.* make sure that the exit device top latch and/or bottom latch goes smoothly into the strike plates when the door is closed.

### *5.2 Functional check*

1. Insert a valid key card into the LCU in the outside escutcheon; the LED will illuminate with a green flash.
2. Enter the room by depressing the handle.

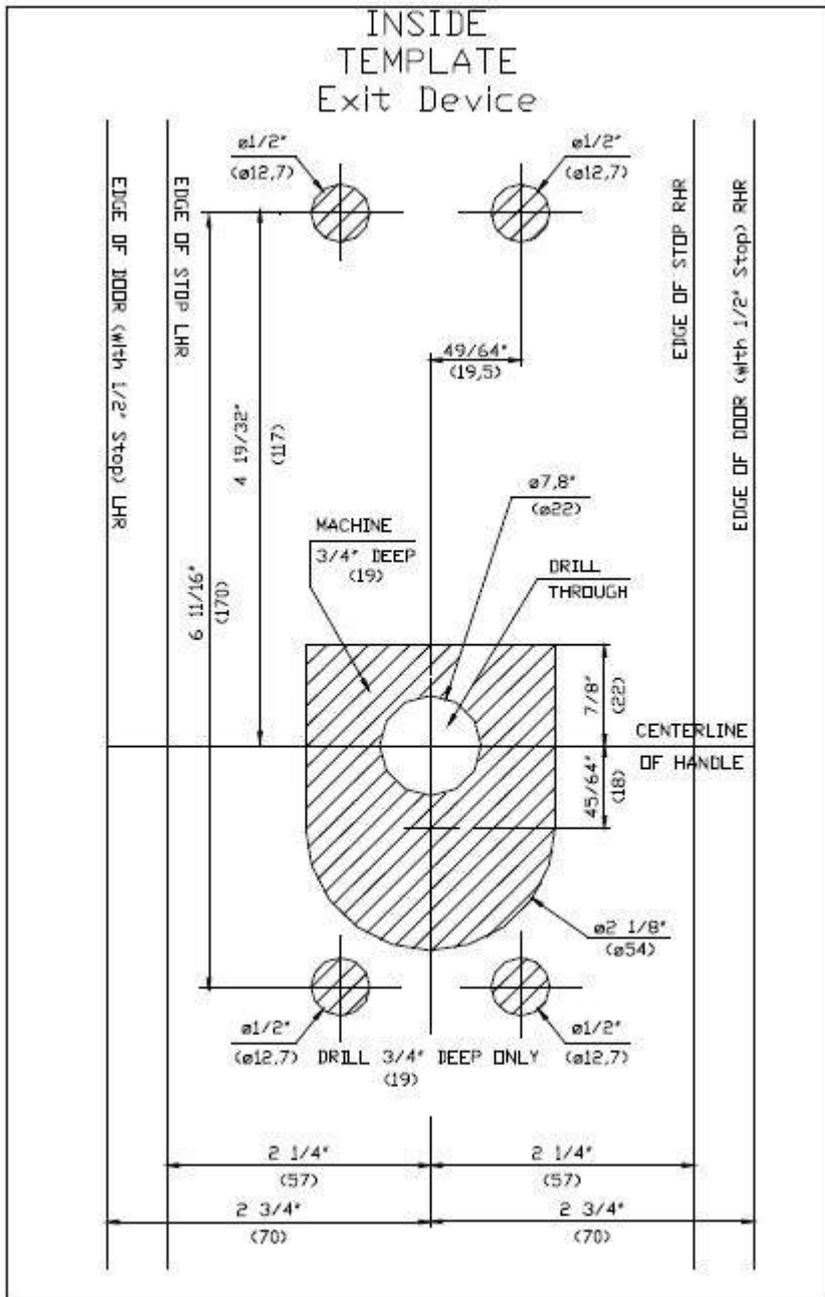

# Appendix A: Outside template for card reader

Dimensions in mm (inches)

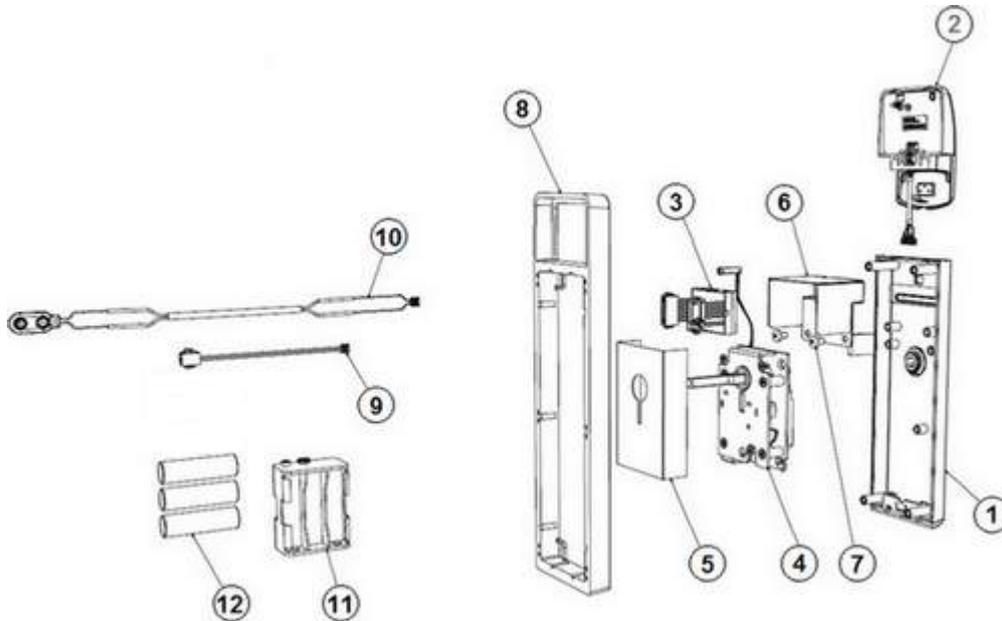

# Appendix B: Inside template for exit device

Dimensions in mm (inches)

## Appendix C: RFID 3G exit device

### *Exploded view and component list*

*Figure C1: Exploded view of Classic RFID 3G*

*Note:* If upgrading an old exit device installation to RFID 3G, the 9V electronics is kept and 9V (6AA) batteries are used instead.

### *RFID 3G specific parts*

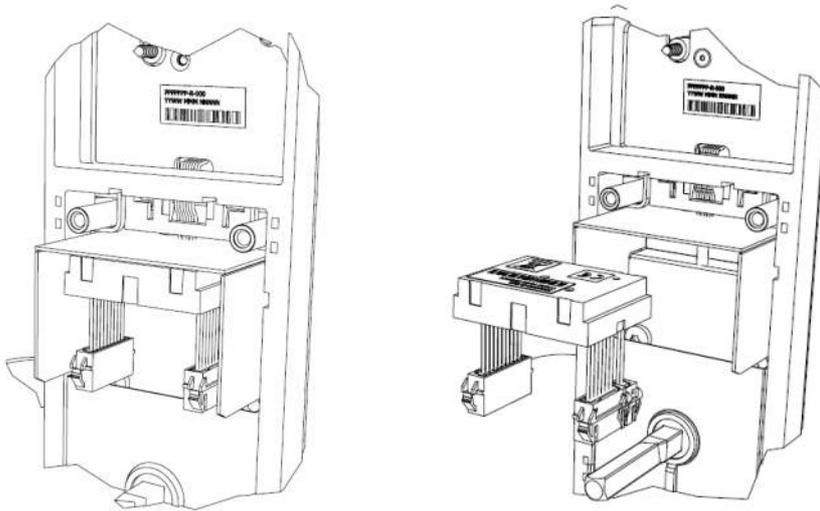

Pos	Description
1	Front escutcheon
2	4823880 RFID 3G module, assy-
3	LCA 6343 (lock case adapter)
4	Lock case for escutcheon
5	Protection
6	Upgrade plate
7	Screw, machine, pan, M5x8
8	Frame
9	Cable ext., 2p IDC 2p IDC
10	Battery cable for exit device
11	Battery holder 4.5V
12	3 batteries, LR6- AA

*Table C1: RFID 3G specific parts for exit device*

## Appendix C: RFID 3G exit device

### *Mounting the upgrade plate*

Mount the upgrade plate using the mounting brackets normally used for the mag LCU. The *LCA 6343* is to be mounted inside the upgrade plate. Either tape or Velcro (not included) can be used to fasten the LCA.

*Figure C2: Mounting of LCA and upgrade plate*

## Appendix C: RFID 3G exit device

### *Cable connection*

*Figure C3*

1. When the RFID 3G module has been mounted on the front escutcheon, slide the cable from the RFID 3G module through the hole marked with red in Figure C3.

*Figure C4*

2. Connect the cable from the RFID module to the LCA; the LCA is marked with red in Figure C4 (also see exploded view [here](#)).

*Figure C5*

3. To avoid squeezing the cables, place them inside the upgrade plate according to Figure C5.

## Appendix C: RFID 3G exit device

### *Removing the front cover*

Press the two wings on top of the cover (marked with arrows in the left picture below), and at the same time pull the cover according to Figure C6.

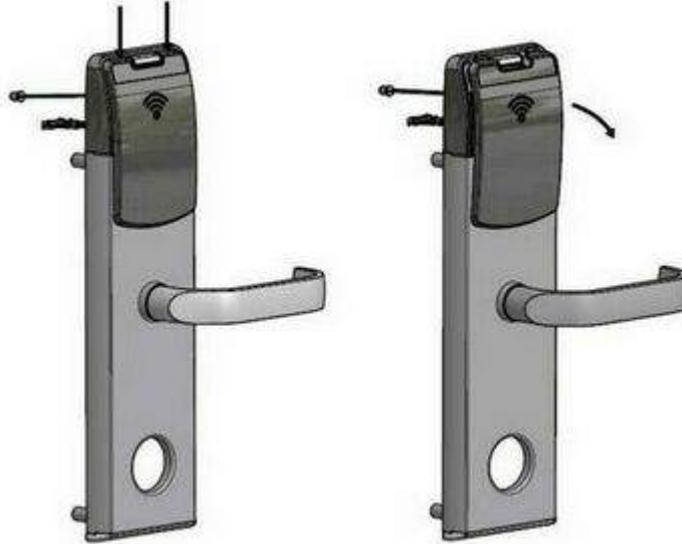

Figure C6

### *Dimensions in mm (inches)*

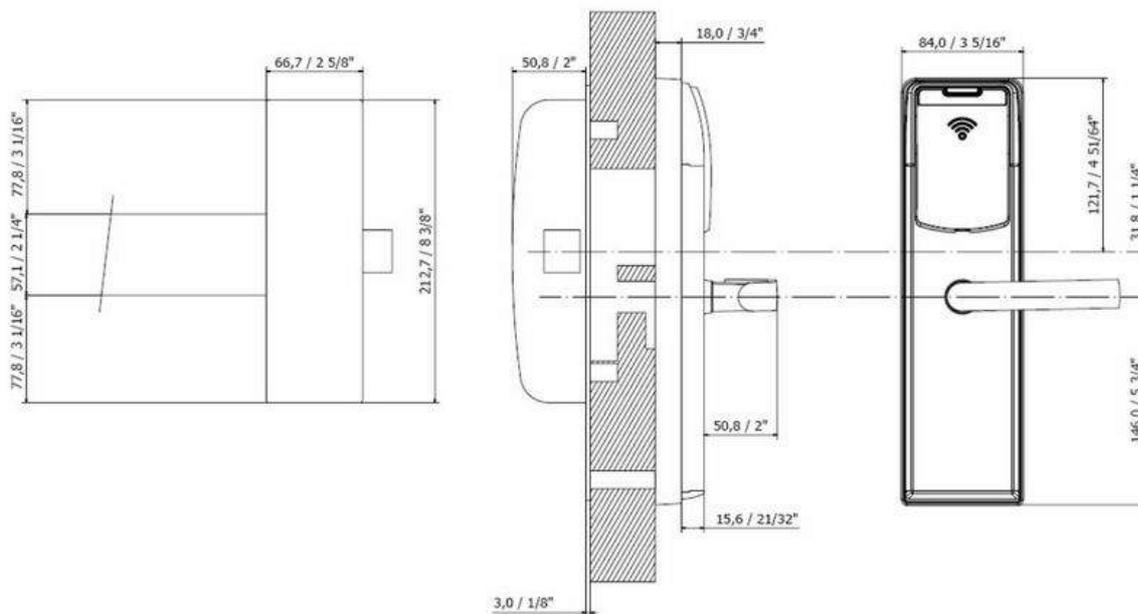

Figure C7

## Appendix D: Endnode kit

### Introduction

If the exit device should be online (only applicable for VISIONLINE), an endnode kit must be mounted on the escutcheon according to the instruction [Mounting of endnode kit](#) in this appendix. The endnode kit consists of the parts shown in Figure D1.

*Note:* The endnode itself (see Figure D2) is sold separately.

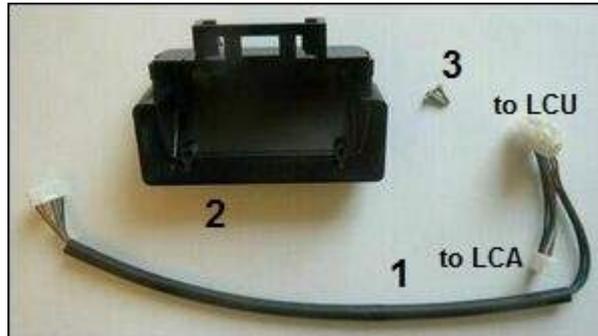

Figure D1: Endnode kit for exit device:  
Y-cable, endnode holder and screws

Pos	Description
1	Y-cable
2	Endnode holder
3	Screw, WN 1423 K25x8

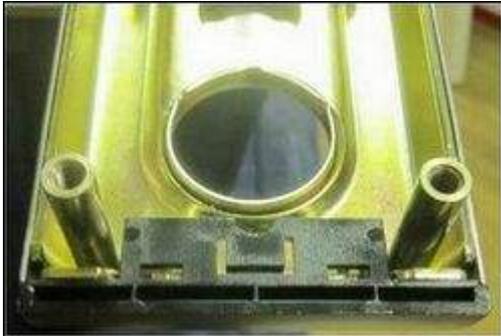

Table D1: Parts included in the endnode kit

Figure D2: Endnode

## Appendix D: Endnode kit

### *Mounting of endnode kit*

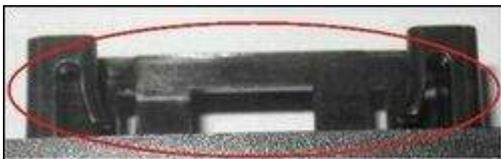

*Figure D3*

1. Before the endnode kit is mounted, the escutcheon has an end plug which looks as in Figure D3.
2. Use a pliers to remove the end plug.

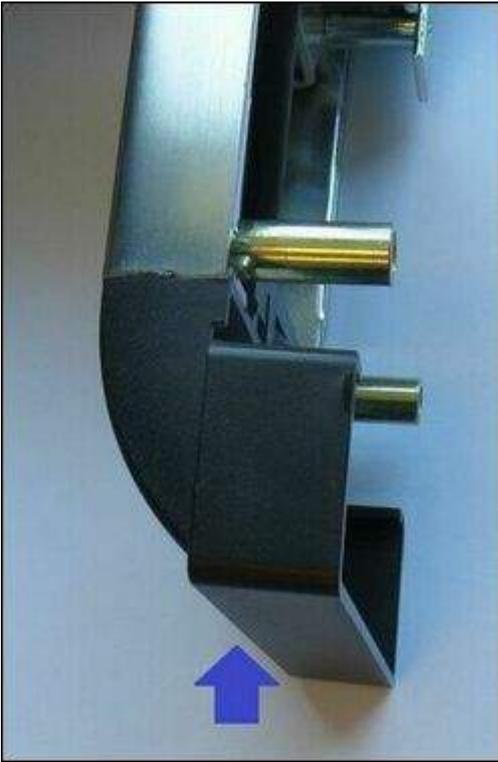

*Figure D4*

3. Figure D4 shows the back of the endnode holder. On top of the holder are the hooks (see close-up in Figure D5) that should be snapped onto the escutcheon according to step 4 on next page.

*Figure D5*

*Figure D6*

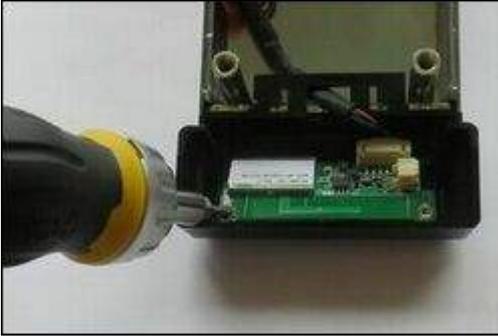

4. Snap the endnode holder onto the escutcheon in the direction shown with the blue arrow in Figure D6. Make sure that the holder snaps into the correct position.

*Figure D7*

5. Thread the Y-cable from the inside of the escutcheon through the hole in the endnode holder; place the endnode in the holder (but do not fasten the endnode with screws at this point). Connect the Y-cable to the endnode as shown in Figure D7.

*Figure D8*

6. Pull the cable protection down so it covers the escutcheon metal, i.e. so that the distance between contact and cable protection is approximately 15 mm (19/32 ").

*Figure D9*

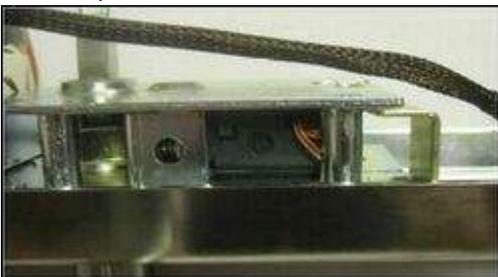

7. Fasten the endnode in the endnode holder with the two screws that are enclosed with the endnode kit; a Torx T8 driver is needed.

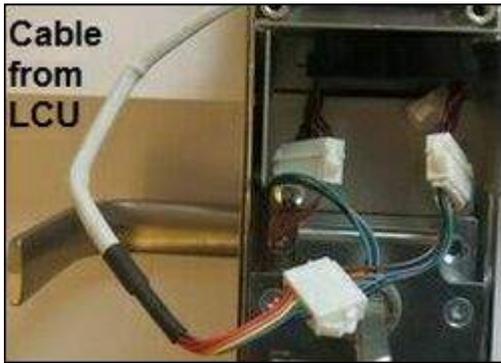

*Figure D10*

8. Pull the Y-cable on the same side of the lock case as where the retaining mechanism (motor) is located. Figure D10 shows an example where the retaining mechanism (marked with red) is located on the left side.

Close-up of the motor:

*Figure D11*

*Figure D12*

9. The contacts from the Y-cable should be connected to the LCU and LCA respectively according to Figure 12.

*Figure D13*

10. Mount the frame.
11. Connect the battery cable to the contact marked with red in Figure 13.
12. Mount the escutcheon on the door.

# AD8500 Narrow Design Rim Exit Device for Aluminum Doors

80 Series

HW-053

Revision Date:

**SARGENT®**

**ASSA ABLOY**

**AD8500 Series  
Narrow Design Rim Exit Device**

## AD8500 Features

- Designed for narrow stile applications (e.g., aluminum frame full glass doors)
- Single and double doors with mullion
- Single point rim latching device
- Quiet operation and solid security
- Devices are ANSI A156.3 – 2008 Grade 1
- Available Windstorm-rated; order WS-

## Specifications for AD8500 Series Exit

Door Types	Aluminum 1-3/4" (44mm) minimum thickness. For doors over 1-3/4" to 2-1/4" thick, specify thickness and order as 31- option. 1-3/4" (114mm) minimum stile
Rail sizes as determined by door width	Rails are available in 4 sizes, use door width to determine size needed. Rails will be factory cut to size, if door width is supplied <ul style="list-style-type: none"> <li>• E Rail for 24" to 32" door widths</li> <li>• F Rail for 33" to 36" door widths</li> <li>• J Rail for 37" to 42" door widths</li> <li>• G Rail for 43" to 48" door widths</li> </ul>
Strike	649 Strike, Supplied standard for fired rated devices on non fired rated devices
Dogging Feature	Hex key dogging standard; specify 16- for cylinder dogging (#41 cylinder supplied)
Electric Options	AL- Alarm BT- Beacon™ PL- SARGuide Photoluminescent Coated TL- SARGuide Illuminated Touchpad 53- LX Latchbolt Monitor 54- Outside Lever Monitoring 55- Request-to-Exit Signal - Rail Monitoring 56- ELR Remote Latch Retraction 57- Delay Egress & Electromagnets 58- Electric Dogging 59- Electroguard – Self Contained Delayed Egress
Mounting Fasteners	Supplied standard with wood and machine screws Available with through-bolts and mortise (sex) nuts
Latch Bolt	Stainless steel, 3/4" (19mm) throw
Device Centerline from Finished Floor	41" (1041 mm) for Standard Applications
Center Case Dimensions	8-5/16" (211mm) x 1-1/16" (27mm)
Projection	Pushbar Neutral – 3" (77mm) Pushbar Depressed – 2-1/8" (54mm)

## 649 Standard Strike

- Surface applied
- Black nylon coated

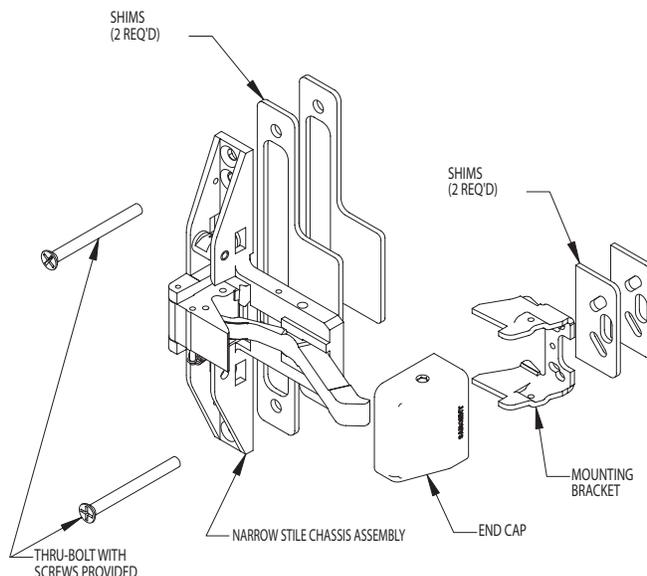

## 651 Mullion Stabilizer Kit

- Stabilizer block
- Furnished standard w/650A Mullion
- Order as a 651 Kit

## 535 Kit for Windstorm Applications (WS-AD8500)

- Two Chassis Shims and Two End Cap Shims
- Shims are 1/8" for a total height of 1/4"

### 700 Series ET Trim

Exits with ET Trim, specify lever design after the ET designation (e.g., ETL)

### Lever Designs for ET Controls

A, B, E, F, J, L, P, W

Also available with Coastal Series & Studio Collection Levers

### ET Designation with Suffix (Used to order ET without device)

AD8500 Series: 704, 706-8, 710, 713-8, 715-8, 740, 743-8, 744, 746-8, 773-8 & 774-8

### Freewheeling Trim

The lever rotates when the door is locked preventing excessive force from being applied to the horizontal lever

### Electrified ET Trim

Voltage must be specified for the following functions: 73 and 74. Specify: 12VDC or 24VDC

SARGENT Function Numbers	ANSI Function Numbers	Description & Cylinder Info. (1-3/4" Door)	ANSI Type 4 AD8500 Panic
04	03	Night Latch Key Retracts Latch #34 Cylinder Supplied	AD8504 x ET_
06	09	Key unlocks Trim, Trim retracts latch/ Trim relocks when key is removed #41 Cylinder Supplied	AD8506 x ET_
10	01	No outside operation (No Cylinder)	AD8510
10	02	No outside operation (No Cylinder) ET Control is used as Pull Only	AD8510 x ET_

15	14	Passage Only (No cylinder)	AD8515 x ET_
40	02	Freewheeling Trim - No outside operation (No Cylinder) Dummy Trim	AD8540 x ET_
43	08	Freewheeling Trim - Key Outside Unlocks/locks Trim #41 Cylinder Supplied	AD8543 x ET_
44	03	Freewheeling Trim - Key Retracts Latch #34 Cylinder Supplied	AD8544 x ET_
46	09	Freewheeling Trim - Key unlocks Trim, Trim retracts latch/ Trim relocks when key is removed #41 Cylinder Supplied	AD8546 x ET_
73		Electrified ET Trim - Fail Safe Power Off, Unlocks Lever (No Cylinder)***	AD8573 x ET_
74		Electrified ET Trim - Fail Secure Power Off, Locks Lever (No Cylinder)***	AD8574 x ET_

**Note:** Exit devices are available in all standard finishes, except 14, 15, 26 & 26D. With these finishes, exit devices are supplied in 32 or 32D to match accordingly. 26 or 26D is automatically supplied when 32 or 32D is specified. For nickel finishes, specify 14/32 or 15/32D to receive nickel finished trims and stainless exit devices.

\*\*\* Cylinder override is not available with AD8500 Series Devices

# ELECTROMAGNETIC DOOR HOLDER/RELEASES WALL MOUNTED

**HW-054**

Revision Date:

**RIXSON**  
**ASSA ABLOY**

## MODEL 997

### Application

- Wall Mount
- Concealed Wiring
- ANSI/C00011

### Product Description & Features

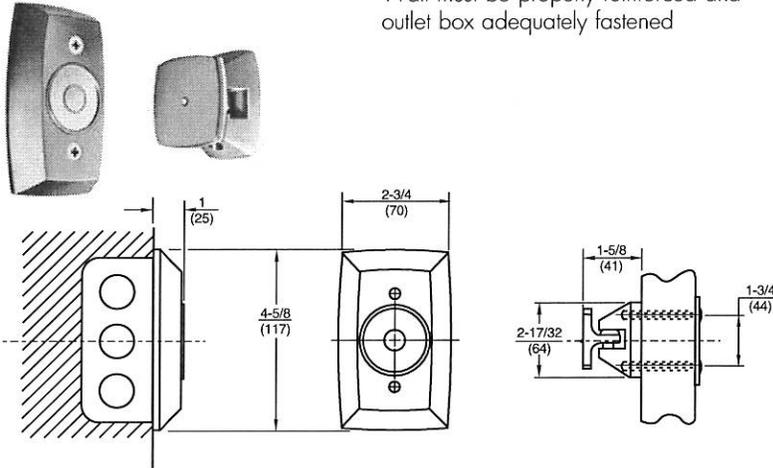

- Total Projection: 2-5/8" (67mm)
- Mounting Requirements: 2" x 4" x 1-3/4" (51 x 102 x 45mm) outlet box
- Wall must be properly reinforced and outlet box adequately fastened

### Technical Information

- Voltage and Current:
 

120VAC, 60Hz., .020 amp	} 
24VAC/DC, 60Hz., .020 amp	
12VDC, .040 amp	
- For 50-55 lbs. of holding force, specify voltage
 

120VAC, 60Hz .017 amp
24VAC, 60Hz .080 amp
24VDC, .068amp
12VDC, .180amp
240VAC, 50/60Hz. .009 amp
- Shipping Weight: 2 lbs. (0.9 kg)

## MODEL 998

### Application

- Wall Mount
- Concealed Wiring
- ANSI/C00011

### Product Description & Features

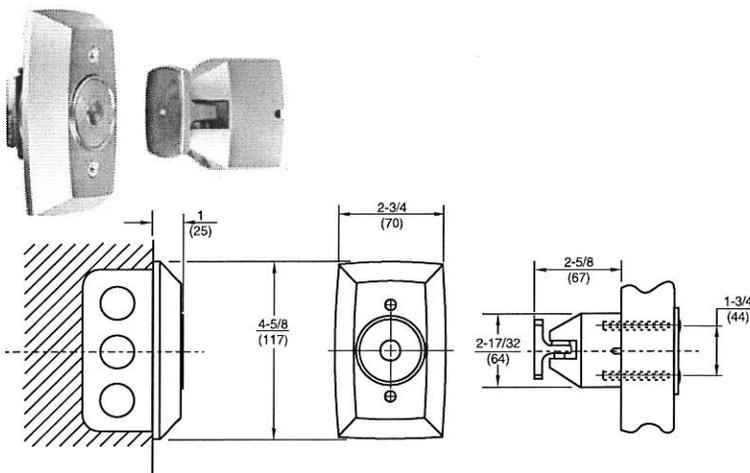

- Total Projection: 3-5/8" (92mm)
- Mounting Requirements: 2" x 4" x 1-3/4" (51 x 102 x 45mm) outlet box
- Wall must be properly reinforced and outlet box adequately fastened

### Technical Information

- Voltage and Current:
 

120VAC, 60Hz., .020 amp	} 
24VAC/DC, 60Hz., .020 amp	
12VDC, .040 amp	
- For 50-55 lbs. of holding force, specify voltage
 

120VAC, 60Hz .017 amp
24VAC, 60Hz .080 amp
24VDC, .068amp
12VDC, .180amp
240VAC, 50/60Hz. .009 amp
- Shipping Weight: 2-1/2 lbs. (1.1 kg)

Concrete

Item Name	Polished Concrete
Description:	Polished concrete at lobby floors
Manufacturer:	Advanced Floor Products
Product:	RetroPlate 99
Dimensions:	Verify in field (VIF)
Finish:	Natural matte level #01
Color:	
Abrasion:	ASTM C779
Hardness:	ASTM C805
Coefficient Friction:	ASTM-1028 All levels of finish to exceed OSHA and ADA recommendations; also for wet and dry surfaces
Composition:	Non flammable, water-based, non toxic. Meets USDA and VOC compliance.
Lead Time:	TBD
Warranty:	10 year product and labor warranty
Eco Feature(s) *as per manufacturer:	LEED Certified

Description:	Acrylic Spray Texture Coating
Product:	Sundeck SunSplash/Classic Texture Copolymer System
Manufacturer:	Sundeck Products Inc.
Dimensions:	Verify in field (VIF)
Finish:	Clear Top coat protective sealing material to be matte finish acrylic with slip-resistant aluminum oxide broadcast.
Color:	Aloft Grey (50% Tweed Grey/50% Smoke Grey) with gradient technique/radial design as shown (consistent fade from 100% at center to 5% at ends)
Abrasion:	ASTM D-1242
Hardness:	ASTM D1242 - Standard Test Methods for Abrasion Resistance Abrasion. 0328 in. = 3000 psi Concrete
Coefficient Friction:	ASTM C-1028 All levels of finish to exceed OSHA and ADA recommendations; also for wet and dry surfaces
Composition:	Copolymer Modified Portland cement, fine aggregates, vinyl acetate emulsion, and water based acrylic.
Lead Time:	TBD
Warranty:	Standard for installation and workmanship is 2 years
Eco Feature(s) *as per manufacturer:	Quantified Solar Reflective Index Values, Cooler than typical concrete surfaces for your comfort • Non-porous applications for ease of maintenance and care with general use Eco friendly cleaners. Water based Low VOC meets all US Standards.

## Product Description & Benefits

RetroPlate 99 is a chemically reactive liquid which **enhances concrete density and hardness**, allowing concrete surfaces to be polished to a high, marble like sheen. In conjunction with diamond tools and machinery, and the process of grinding and polishing concrete, it is known as the RetroPlate Concrete Polishing System.

The RetroPlate System began as a way of removing old, worn out coatings. But owners, facility managers and architects soon realized its potential for new concrete floors and quickly began to specify it. The results were durable, beautifully polished floors void of typical coating pitfalls.

By chemically treating concrete surfaces and polishing the bare concrete, the RetroPlate System creates a **highly abrasion resistant, dustproofed, polished and aesthetically pleasing floor** that is very **easy to clean and maintain**.

The RetroPlate System can be used in conjunction with acid staining, shake-on hardeners, integral color and cementitious terrazzo. Colored aggregate, recycled glass and other decorative material can be embedded into the concrete surface, later to be exposed during the grinding process.

A desire to help owners, facility managers and architects find a permanent solution to floor coating problems created the RetroPlate Concrete Polishing System, a state-of-the-art flooring alternative that is **limitless in its design potential** and **unmatched in durability and performance**.

### AGGREGATE EXPOSURE CHARTS

<b>Cream</b>	Little aggregate exposure
<b>Fine (Salt &amp; Pepper)</b>	Fine aggregate exposure
<b>Medium</b>	Medium aggregate exposure
<b>Large</b>	Large aggregate exposure

### FINISHED GLOSS CHART

<b>Level 1</b>	<b>Flat</b> (Below 100 grit) <i>None to very slight diffused reflection</i>
<b>Level 2</b>	<b>Satin</b> (100 - 400 grit) <i>Matte; with or without slight diffused reflection</i>
<b>Level 3</b>	<b>Semi-Polished</b> (800 grit +) <i>Objects being reflected are not quite sharp and crisp but can be easily identified</i>
<b>Level 4</b>	<b>Highly-Polished</b> (800 grit +) <i>Objects being reflected are sharp and crisp as would be seen in a mirror-like reflection</i>

## Technical Data +

<b>Coverage Area:</b>	200 ft <sup>2</sup> /gal (5 m <sup>2</sup> /L) <i>Depends on porosity and state of concrete</i>
<b>Form &amp; Odor:</b>	Clear, colorless liquid; odorless
<b>pH:</b>	11.3 - 11.6
<b>Thinners:</b>	None <i>Use as packaged</i>
<b>Duration of Effectiveness:</b>	Permanent
<b>Internal Comp:</b>	Non-flammable, water-based, non-toxic <i>Meets USDA and VOC compliance</i>
<b>Storage Life:</b>	Indefinite <i>Agitate before use if product is more than 1 year old.</i>
<b>Packaging:</b>	1 gal (3.79 L) Samples 5 gal (19 L) Pails 55 gal (208 L) Drums

### APPLICABLE STANDARDS

**ABRASION** - ASTM C779 - Up to 400% increase in abrasion resistance, depending on concrete quality.

**HARDNESS** - ASTM C805 - 21% increase in impact resistance.

**WEATHERING** - ASTM G23-81 - No adverse effect to ultraviolet light or water spray.

**LIGHT REFLECTIVITY** - 30% increase in reflectivity.

**SKIDABILITY STATIC** - Coefficient of Friction ASTM 1028 - Independent testing has shown that RetroPlate can exceed OSHA and ADA recommendations for wet and dry hard surfaces.

### Considerations

RetroPlate 99 provides a hardened, durable, and dense concrete surface when applied after smoothing and honing of the rough, pitted concrete or removal of soft, carbonated concrete surfaces prior to Level 1, 2, 3 or 4 finishing. Over time, RetroPlate 99 increases in penetration resistance.

RetroPlate 99 must be applied to structurally sound concrete surfaces. Soft, carbonated or structurally unsound concrete surfaces must be removed so that RetroPlate 99 can react with a stable substrate. All restrictive coatings must be removed to allow RetroPlate 99 to fully penetrate the concrete surface.

RetroPlate 99 should not be applied when freezing conditions may occur.

## Availability & Installation

RetroPlate 99 is installed by a network of factory approved applicators as part of the RetroPlate Concrete Polishing System. Contact your Advanced Floor Products representative for a list of approved applicators in your area by calling toll free **888.942.3144** or **801.812.3420**.

## Technical Info & Safety Data Sheet (SDS)

Contact Advanced Floor Products at **801.812.3420**, toll free at **888.942.3144**, or by email at **technical@retroplatesystem.com**.

For emergencies call **800.633.8253** or **801.629.0667**.

## Industries Served

RetroPlate has become a hallmark of excellence, durability and beauty in a number of industries and facilities including, but not limited to:

Arenas  
Automotive  
Building Exteriors  
Commercial

Government  
Medical  
Museums  
Office

Residential  
Restaurants  
Retail  
Schools

Sports & Recreation  
Transportation  
Universities

## **PART 1 GENERAL**

### 1.1 SUMMARY

- A. This section includes the following.
  - 1. Applying Sealer and Hardener, and polishing concrete to specified finish level.
- B. Related Work:
  - 1. Section 03300 Cast-In-Place Concrete
  - 2. Section 09639 Concrete Hardening/Sealing

### 1.2 REFERENCES

- A. American Society for Testing and Materials:
  - 1. ASTM-C779, Standard Test Method for Abrasion Resistance of Horizontal Concrete Surfaces
  - 2. ASTM G23-81, Ultraviolet Light & Water Spray
  - 3. ASTM C805, Impact Strength
- B. American Concrete Institute
  - 1. ACI 302. 1R-89, Guide for Concrete Floor and Slab Construction
- C. Other Test:
  - 1. Reflectivity

### 1.3 SUBMITTALS

- A. Comply with pertinent provisions of Section 01600- Product Requirements.
  - 1. Provide submittal information within 35 calendar days after the contractor has received the owner's notice to proceed.
- B. Product data:
  - 1. Submit special concrete finishes manufacturer's specifications and test data.
  - 2. Submit special concrete finishes describing product to be provided, giving manufacturer's name and product name for the specified material proposed to be provided under this section.

3. Submit special concrete finishes manufacturer's recommended installation procedures; which when approved by the Architect, will become the basis for accepting or rejecting actual installation procedures used on the work.
4. Submit special concrete finishes technical data sheet giving descriptive data, curing time, and application requirements.
5. Submit special concrete finishes manufacturer's Material Safety Data Sheet (MSDS) and other safety requirements.
6. Follow all special concrete finishes published manufacturer's installation instructions.

C. Test Reports:

1. Provide certified test reports, prepared by an independent testing laboratory, confirming compliance with specified performance criteria.

#### 1.4 QUALITY ASSURANCE

A. Installer Qualifications:

1. Use an experienced installer and adequate number of skilled workmen who are thoroughly trained and experienced in the necessary craft.
2. The special concrete finish manufacturer shall certify applicator.
3. Applicator shall be familiar with the specified requirements and the methods needed for proper performance of work of this section.

B. Manufacturer's Certification:

1. Provide letter of certification from concrete finish manufacturer stating that installer is certified applicator of special concrete finishes, and is familiar with proper procedures and installation requirements required by the manufacturer.

C. Mock-ups:

1. Apply mock-ups of each type finish, to demonstrate typical joints, surface finish, color variation (if any), and standard of workmanship.
  - a. Build mock-ups approximately 50 square feet in the location indicated or if not indicated, as directed by the Architect or Owner Representative.
  - b. Notify Architect or Owner Representative seven days in advance of dates and times when mock-ups will be constructed.
  - c. Obtain from the Architect or Owner Representative approval of mock-ups before starting construction.
  - d. If the Architect or Owner Representative determines that mock-ups do not meet requirements, demolish and remove them from the site and cast others until mock-ups are approved.
  - e. Maintain mock-ups during construction in an undisturbed condition as a standard for judging the completed work.

- f. Approved mock-ups may become part of the completed work if undisturbed at time of substantial completion.

D. Protection

1. No satisfactory chemical or cleaning procedure is available to remove petroleum stains from the concrete surface. Prevention is therefore essential.
  - a. All hydraulic powered equipment must be diapered to avoid staining of the concrete.
  - b. No trade will park vehicles on the inside slab. If necessary to complete their scope of work, drop cloths will be placed under vehicles at all times.
  - c. No pipe cutting machine will be used on the inside floor slab.
  - d. Steel will not be placed on interior slab to avoid rust staining.
  - e. Acids and acidic detergents will not come into contact with slab.
  - f. All trades informed that the slab must be protected at all times.

E. Pre-Installation Conference:

1. Conduct conference at project site to comply with requirements in Division 1 Section "Project Management and Coordination"

1.5 DELIVERY, STORAGE AND HANDLING

- A. Deliver materials in original containers, with seal's unbroken, bearing manufacturer labels indicating brand name and directions for storage.
- B. Dispense special concrete finish material from factory numbered and sealed containers. Maintain record of container numbers.

1.6 PROJECT CONDITIONS

A. Environmental limitations:

1. Comply with manufacturers written instructions for substrate temperature and moisture content, ambient temperature and humidity, ventilation, and other conditions affecting topping performance.
  - a. Concrete Floor Flatness rating recommended at least 40, where possible.
  - b. Concrete Floor Levelness rating recommended at least 30, where possible.
  - c. Concrete must be cured a minimum of 45 days or as directed by the manufacturer before application of Retro Plate can begin.
  - d. Application of Retro-Plate shall take place 10 days prior to installation of equipment and substantial completion, thus providing a complete, uninhibited concrete slab for application.

- B. Close areas to traffic during floor application and after application, for time period recommended in writing by manufacturer.

## **PART 2 – PRODUCTS**

### **2.1 MATERIALS AND MANUFACTURERS**

- A. **HARDENING/SEALING AGENT**
  - 1. Retro-Plate 99, manufactured by Advanced Floor Products, Inc., P.O. Box 50533, Provo, Utah 84605, 801-812-3420.
    - a. Performance Criteria:
      - i. Abrasion Resistance: ASTM C779 – Up to 400% increase in abrasion resistance.
      - ii. Impact Strength: ASTM C805 – Up to 21% increase impact strength.
      - iii. Ultra Violet Light and Water Spray: ASTM G23-81 – No adverse effect to ultra violet and water spray.
      - iv. Reflectivity: Up to 30% increase in reflectivity.
  - 2. Certified Applicators
  - 3. Manufacturer’s Regional Representative

### **2.2 RELATED MATERIALS**

- A. Neutralizing Agent:
  - 1. Tri-sodium Phosphate
- B. Water:
  - 1. Potable

## **PART 3- EXECUTION**

### **3.1 SURFACE CONDITIONS:**

- A. Examine substrate, with installer present, for conditions affecting performance of finish. Correct conditions detrimental to timely and proper work. Do not proceed until unsatisfactory conditions are corrected.
- B. Verify that base slab meet finish and surface profile requirements in Division 3 Section “Cast-In-Place Concrete,” and Project Conditions above.

- C. Prior to application, verify that floor surfaces are free of construction latents.

### 3.2 APPLICATION

- A. Start any of the floor finish applications in presence of manufacturer's technical representative.
- B. Sealing, Hardening and Polishing of Concrete Surface
  1. Concrete must be in place a minimum of 45 days or as directed by the manufacturer before application can begin.
  2. Application is to take place at least 10 days prior to racking and other in-store accessory installation, thus providing a complete, uninhibited concrete slab for application
  3. Only a certified applicator shall apply Retro-Plate 99. Applicable procedures must be followed as recommended by the product manufacturer and as required to match approved test sample.
  4. Achieve waterproofing, hardening, dust-proofing, and abrasion resistance of the surface without changing the natural appearance of the concrete, except for the sheen.
  5. Polish to required sheen level.

### 3.3 WORKMANSHIP AND CLEANING:

- A. The premises shall be kept clean and free of debris at all times.
- B. Remove spatter from adjoining surfaces, as necessary.
- C. Repair damages to surface caused by cleaning operations.
- D. Remove debris from jobsite
  1. Dispose of materials in separate, closed containers in accordance with local regulations.

### 3.4 PROTECTION:

- A. Protect finished work until fully cured in accordance with manufacturer's recommendations.

**END OF SPECIFICATION  
SECTION 033600**

Sundek Exterior Decorative Concrete Overlay System

Product Specification Prepared Exclusively for Marriott Corporation ALOFT Hotels

RE: Pool Deck and Outdoor Experience Area, Decorative Concrete Application

**Product:** Sundek SunSpalsh/Classic Texture Copolymer System. Sundek product shall be installed directly on fully cured cast in place concrete with CSP level 2-3 surface profile. Color and pattern to match of Marriott "ALOFT" finish color and design. Clear Top coat protective sealing material to be matte finish urethane with slip-resistant aluminum oxide broadcast. Installation shall be by approved Sundek products applicator installed in accordance to manufactures specifications. Acceptable product manufacture; Sundek Products Inc., 805 Ave H East, Arlington Texas 76011 USA [www.sundek.com](http://www.sundek.com).

ALOFT Hotels  
Pool Deck and Outdoor Experience Area

Suggested Maintenance:

Sundek Systems:

Monthly regular cleaning is recommended by use of a citrus based cleaner and light pressure washing (under 2000 psi) is the most effective method. Apply cleaner by light scrub with a stiff bristled brush allow to penetrate dirt then rinse with hose or pressure washer. In the event of oils, substitute citrus based cleaner with a de-greaser type cleaner. Always apply solution in a wet state and keep fluid during cleaning. After 24 months of service it is suggested to apply a light application of a clear water based top-coat sealer. Sundek offers a maintenance program these recommended services.

Caution should be taken to avoid deicer chemicals containing calcium chloride. In the event corrosive chemicals are spilled on surface please neutralize with TSP, soda ash or baking soda, scrub lightly and rinse immediately with clean water.

In the event other cleaning or repair are required please contact Sundek products USA 877.476.6335 for information.

# SunClear ♦ HT Clear

## (Solvent Base)

### POLYURETHANE

#### PRODUCT DESCRIPTION AND USE

HT Clear is a two component, high solids aliphatic polyurethane. This product offers a remarkable combination of performance properties not found in other polymer coatings. HT Clear produces protective films which are hard, flexible and very impact resistant. These coatings feature high abrasion and scratch resistance, exterior durability, easy soil release and excellent resistance to a broad range of chemicals. A special accelerator is available when rapid project turnaround is required. HT Clear has been designed as a high performance top coat in various protective coating and seamless flooring applications. It provides maximum cleanability and stain resistance when used as a finish coat in color chip flooring or epoxy-quartz flooring. This coating is ideally suited for clean-room floors, automotive repair facilities, aircraft hangars and other high wear areas requiring resistance to fuels and chemicals. When used as a finish coat in wall coating systems, anti-graffiti properties are greatly enhanced.

#### Chemical Composition

Saturated polyester cross linked with aliphatic polyisocyanate.

#### Colors

Clear and 16 standard colors. available in high gloss or satin.

#### Limitations

- Do not use on unprimed substrate.
- Use of satin material requires the addition of accelerator during mixing.

#### TECHNICAL DATA

##### Physical Properties

Mixing Ratio, by Volume .....	2-1

**GENERAL INFORMATION****Moisture Vapor Emissions/Alkalinity Precautions**

All interior concrete floors not poured over an effective moisture vapor retarder are subject to possible moisture vapor transmission and related high levels of alkalinity that may lead to blistering and failure of the coating system. It is the coating applicator's responsibility to conduct calcium chloride and relative humidity probe testing to determine if excessive levels of vapor emissions or alkalinity are present before applying any coatings. These test kits are available from Sundeck Products USA, Inc.. Sundeck Products USA, Inc. and its sales agents will not be responsible for coating failures due to undetected moisture vapor emissions or related high levels of alkalinity.

## Surface Preparation

HT Clear is intended to be applied over primed or previously coated surfaces. Do not apply directly to concrete. Surface must be absolutely clean, dry and free from all dirt, wax, oil, chalk, incompatible paint or detergent film. Fully cured, previously coated surfaces must be cleaned and sanded lightly with 80-100 grit sandpaper or otherwise mechanically abraded before recoating. If multiple coats of High Traffic HT are applied, apply additional coats as soon as possible. If more than 24 hours has elapsed or the coating cannot be indented with a fingernail, lightly sand surface to insure intercoat adhesion.

## Mixing Instructions

Mix only that amount of material that can be used in a 2 hour period at 77°F. Higher temperatures and the addition of accelerator will reduce work time. In hot weather, mix smaller batches. If using the pigmented system, premix part A well before adding part B. Combining ratio is 2 part A to 1 part B. **Proportion the amounts carefully and mix for two full minutes using a slow speed drill, scraping the bottom and sides of the mixing container.** Material is normally applied as received, but may be thinned with up to 15% MEK. Always thin the satin material to achieve a low application viscosity. Avoid contamination with moisture. Reseal partially used containers completely after use.

## Application Recommendations

HT Clear may be applied by brush, roller or airless spray. Apply at 275-350 sq. ft. per gallon with 3/8" or 1/2" nap roller as a finish coat over primed concrete. May be applied up to 200 sq. ft. per gallon as a fill coat in aggregate-filled flooring systems using a rubber squeegee and back rolling with a 3/8" nap roller. If using the satin version of this material, it is very important to achieve a uniform application rate of 300-350 sq. ft. per gallon. Heavier films will be glossier, thinner applications will be flatter.

## Handling Precautions

Material is combustible. Extinguish all flames, pilot lights and electric motors until all vapors are gone and the coating is hard. The vapor is harmful. Use only with adequate ventilation/or appropriate cartridge-type respirator. Avoid contact with skin; wear protective gloves. Read Material Safety Data Sheet before using.

## Slip and Fall Precautions

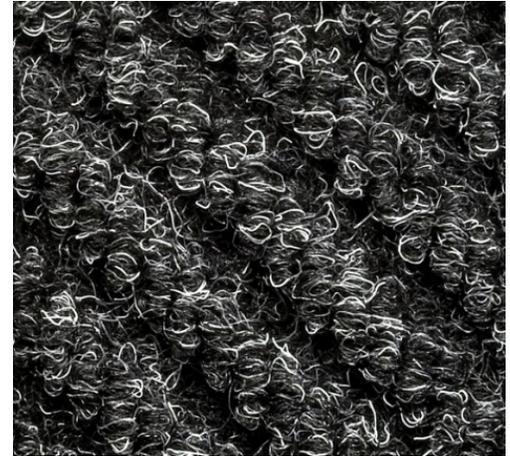

OSHA and the American Disabilities Act (ADA) have now set enforceable standards for slip-resistance on pedestrian surfaces. The current coefficient of friction required by ADA is .6 on level surfaces and .8 on ramps. Sundeck Products USA, Inc. recommends the use of angular slip-resistant aggregate in all coatings or flooring systems that may be exposed to wet, oily or greasy conditions. It is the contractor and end users' responsibility to provide a flooring system that meets current safety standards. Sundeck Products USA, Inc. or its sales agents will not be responsible for injury incurred in a slip and fall accident.

## WARRANTY INFORMATION

Sundeck Products USA, Inc. guarantees that this product is free from manufacturing defects and complies with our published specifications. In the event that the buyer proves that the goods received do not conform to these specifications or were defectively manufactured, the buyer's remedies shall be limited to either the return of the goods and repayment of the purchase price or replacement of the defective material at the option of the seller. SUNDECK PRODUCTS USA, INC. MAKES NO OTHER WARRANTY, EXPRESSED OR IMPLIED, AND ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE HEREBY DISCLAIMED. Sundeck Products USA, Inc. shall not be liable for damages caused by application of its products over concrete with excessive moisture vapor transmission or alkalinity. Sundeck Products USA, Inc. shall not be liable for any injury incurred in a slip and fall accident. Manufacturer or seller shall not be liable for prospective profits or consequential damages resulting from the use of this product.

Entrance Mat

Item Name	<b>Entry Vestibule Mat</b>
Description:	Entry walk-off mat
Manufacturer:	Mats Inc.
Product:	Modular diagonal tile
Color:	07 Charcoal
Content:	100% solution-dyed UV stabilized polypropylene fibers
Dimensions:	6-0" x 6-4 3/4" approximately 2.7 sq ft per tile 3/8" overall thickness
Weight:	131 oz total weight
Backing:	Bitumen
Transition:	Schluter zinc divider strip
Quality Standards:	Passes ASTM D2859, CPSC FF 1-70 ASTM C1028 Wet: 0.63 ASTM C1028 Dry: 0.65 Passes ASTM E662
Adhesive:	Not applicable
Lead Time:	Low-Emitting adhesive With a VOC of 70 g/L or less for <sup>step</sup> multipurpose adhesive
Warranty:	3 year limited warranty
Eco Feature(s)* as per manufacturer:	52.05% recycled (post-consumer) Release-Bond VOC: 0 g/L GreenLabelPlus Certified Designed for semi-permanent installation

Glass Film

Issue Date: 28 JUL 2017

Revision Date: 29 JAN 2018

Item Name: Graphic adhesive film  
 Description: Pressure sensitive film  
 Manufacturer: MDC  
 Model #: MAR711 - Binary Tweed  
 Content: Digital Print on clear pressure sensitive vinyl film (PSV) with 3M 3645 Luster over-laminate  
 MAR709: Guest Laundry entry door - Binary Tweed film  
 MAR710: Guestroom floor corridor window graphic (next to elevators) - Binary Tweed film (optional)  
 MAR711: Elevator window graphic - Binary Tweed film (optional)  
 Dimensions: 48"W x 30"H (VIF)  
 Graphic: Graphic artwork files are available. Contact Marriott for details.  
 Site Measurements: Required - Installer to verify all dimensions and conditions on site prior to ordering. See door and window schedule for locations.  
 Color: Black on clear film  
 Lead Time: 3-4 weeks  
 Warranty: 5 years

## Metal Ceiling Panel Cutsheets

# USG CELEBRATION™ SNAP-IN METAL PANELS

MCP-002

Revision Date:

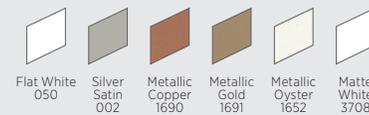

USG Celebration™ Snap-In Metal Panels in Beech/USG Donn® Brand Finline® DXF™ Acoustical Suspension System/USG Compaço™ Standard in Beech

## TO ORDER SAMPLES, GO TO USG.COM OR CGCINC.COM

See IC415 for color and perforation availability.

### PAINTED METALS

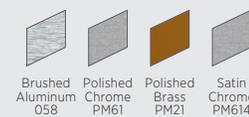

### PREMIUM METALS

### WOOD TONES\*

### ANODIZED METALS

\*Grid and trim available in painted coordinating colors.

## FEATURES AND BENEFITS

- Aluminum panels provide a monolithic appearance.
- Easy installation into standard USG Donn® Brand Finline® DXF™ Acoustical Suspension System.
- Aluminum panels are positively attached to the suspension system through engineered connection.
- Downward panel access is excellent for shallow plenum areas.
- Wall-mount solution available; see IC605.
- Wind load tested and approved, including Miami-Dade NOA, for exterior applications with proper bracing and framing.

## APPLICATIONS

- Entertainment
- Gaming
- Exterior ceilings
- Hospitality
- Transportation terminals

Perforation C500G

## PRODUCT INFORMATION

Materials	Finishes	Typical Module Sizes <sup>1</sup>	Plenum Depth	Weight
Aluminum panels	Painted, powder coated or anodized in a variety of optional perforation and embossing patterns.	1'x 4', 1'x 5', 2'x 2', 2'x 4', 2'x 6', 2'x 8', 4'x 4', 20"x 60", 30"x 30", 30"x 60"	Since panels are installed from below, the clearance for installation and removal of panels is minimal. Additional plenum clearance of up to 9" may be required for air boot and lighting installations, depending on the unit selected.	Approximately 0.53 lb./sq. ft., not including lights and air diffusers.

## GRID LAYOUT

The modular nature of USG Celebration™ Snap-In panels must be considered when an assembly is designed. The main tees and cross tees must be installed exactly on module lines. USG Celebration Snap-In panels cannot be installed across main tee and a 4 ft. cross tee. Panels may be field-cut at walls and columns or terminated at a grid module for island installations. Larger panels will require cross tees at their midspan<sup>2</sup>. Please refer to IC592 for more information.

## ACOUSTICS<sup>3</sup>

Description	Optional Acoustical Material	Sound Rating – NRC	
		Perforation A062	Perforation A116
Perforated Panel	Acoustibond™ backer	0.60	0.70
Perforated Panel	2", 0.75 lb. fiberglass in polybag (by others)	0.85	0.90

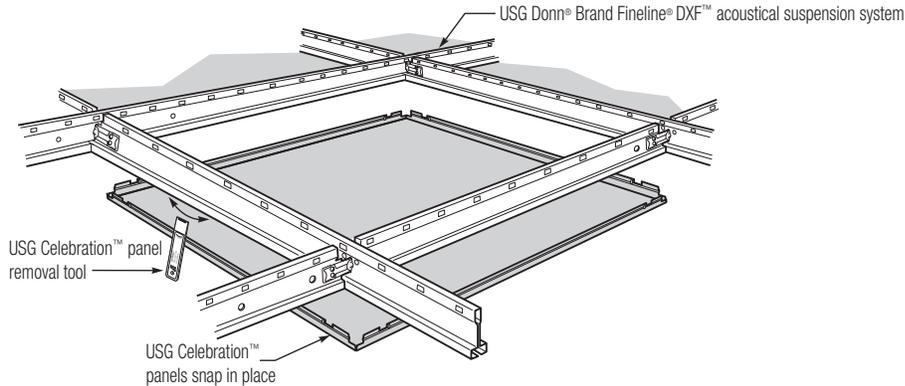

## AIR HANDLING

The USG Celebration™ diffuser is an extruded aluminum frame with matching faceplate and color-coordinated vanes, in one-, two-, three- and four-slot configurations, with four-directional throw. Please refer to IC415 for more information.

## CODE APPROVAL

USG Celebration™ Snap-In panels provide a continuous interlock with the suspension system through positive attachment. Supporting grid is capable of sustaining loads greater than those imposed by the USG Celebration system when installed in accordance with manufacturer's instructions. The system meets requirements of ASTM C635 and tested per AC368. See PER-14077 and PER-12055.

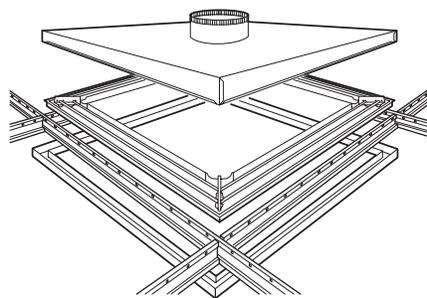

## PERSPECTIVE

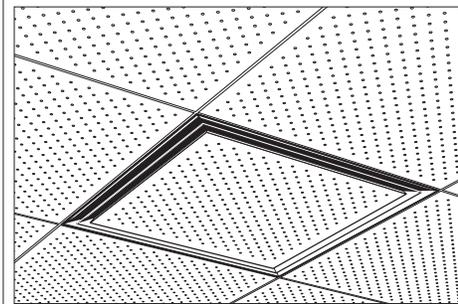

## USG CELEBRATION™ AIR DIFFUSER

Available in one-, two-, three- and four-slot configurations, with four-directional throw. See IC415.

### Product literature

System brochure: IC415  
 Data sheet: IC308  
 Perforations selection guide: IC425  
 Exterior ceiling systems guide: SC2561

### Online tools

[usgdesignstudio.com](http://usgdesignstudio.com) or [cgcdesignstudio.com](http://cgcdesignstudio.com)

### Limitation

Some commercially acceptable color variation may occur between lots and between different size products of the same color. For more information about metal ceiling finishes, refer to *Metal Ceilings Technical Guidelines* published by the Ceilings & Interior Systems Construction Association.

### ASTM E84 surface-burning characteristics (with Acoustibond™ backer)

Class A  
 Flame spread: 25 or less  
 Smoke developed: 50 or less

### ASTM E84 surface-burning characteristics (with light diffusing backer)

Class A  
 Flame spread: 25 or less  
 Smoke developed: 50 or less

### Notes

- Additional sizes available on request.
- If panel length is ≥ 60 inches then one stabilizer bar or cross tee is required at midpoint.  
 - If panel length is ≥ 96 inches then two stabilizer bars or cross tees are required at the 1/3 and 2/3 points.  
 - Cross tees ≥ 96 inches used in large modules shall have hanger wires installed minimum 4 ft. o.c.
- Refer to IC425 for additional NRC information based on perforation pattern.

### High Recycled Content

Classified as containing greater than 50% total recycled content. Total recycled content is based on product composition of postconsumer and preconsumer (postindustrial) recycled content per FTC guidelines.

Manufactured by USG Interiors, LLC

Beech 3467 Dark Bamboo 3465 Light Bamboo 3466 Dark Cherry 3468 Light Cherry 3469 Maple 3470 Red Oak 3471 Walnut 3472

### FEATURES AND BENEFITS

- Creates free-form ceiling islands or fascias to define space and provide visual impact.
- Available in variable trim heights.
- Costs a fraction of conventional drywall soffit construction.
- Made to order; arrives on-site pre-engineered.
- Strong, durable and long-lasting steel or aluminum construction.
- Fits all USG ceiling systems.

### APPLICATIONS

- Contemporary offices
- Entertainment
- Gaming
- High-bay areas
- Retail spaces

Paint

Item Name	Wall Paint
Manufacturer:	Benjamin Moore
Color:	Black Panther (2125-10)
Product Type:	Paint: BM Aura Waterborne Interior Paint (2 coats) Primer: N023 Fresh Start Acrylic
Finish:	Satin
Lead Time:	Varies per paint supplier
Warranty:	Limited Lifetime
Eco-Feature(s) *as per manufacturer:	VOC compliant in all regulated areas, anti-microbial, Green Seal GS-11 2010

**SPECIAL INSTRUCTIONS**

1. Primer, undercoat, block filler, finish coat(s) are to be compatible and of the same manufacturer. All primers and undercoats are to be tinted to 50% lighter than the selected and approved finish coat color. All finish coats are to be tinted 25% darker than the primer coat until approved finish coat color is achieved. When the color schedule calls for the use of DEEP TONES (interior and/or exterior), it is the responsibility of the painting contractor to utilize the appropriate Deep Base Primers as manufactured by the painting company for use on the substrate for which they are intended.
2. Provide level 5 drywall finish prior to application of wall paint.

Finish:	Egg shell
Lead Time:	Varies per paint supplier
Warranty:	Limited Lifetime
Eco-Feature(s) *as per manufacturer:	VOC compliant in all regulated areas, anti-microbial, Green Seal GS-11 2010

**SPECIAL INSTRUCTIONS**

1. Provide level 5 drywall finish prior to application of wall paint.
2. Primer, undercoat, block filler, finish coat(s) are to be compatible and of the same manufacturer. All primers and undercoats are to be tinted to 50% lighter than the selected and approved finish coat color. All finish coats are to be tinted 25% darker than the primer coat until approved finish coat color is achieved. When the color schedule calls for the use of DEEP TONES (interior and/or exterior), it is the responsibility of the painting contractor to utilize the appropriate Deep Base Primers as manufactured by the painting company for use on the substrate for which they are intended.

PT-014, PT-016, PT-023,  
PT-027, PT-028  
Revision Date:

#### Features

- Extreme hide for fewer coats
- Color Lock® Technology, no color rub-off
- Provides a mildew resistant coating
- Zero VOC, low odor
- Easy application
- Self priming
- Stains wash off easily
- Excellent touch up
- Easy clean up

#### Recommended For

New or previously painted wallboard, plaster, masonry and wood; primed or previously painted metal; new or coated acoustic ceilings. It is ideal for surfaces where maximum durability is required and lasting color is desired

#### General Description

Aura® Satin Finish is part of an innovative paint and colorant system integrating the best technologies to deliver superior durability for any color along with the promise of long lasting beauty. In addition to using 100% acrylic latex, proprietary resins have been incorporated to give the product its extraordinary performance properties.

#### Limitations

- Do not apply when air and surface temperatures are below 50°F (10°C)
- Only Gennex® Waterborne Colorants can be added to Aura® Paint

#### Product Information

<b>Colors: —Standard:</b> White (01)			
<b>—Tint Bases:</b> Benjamin Moore® Gennex® Bases 1X, 2X, 3X, & 4X			
<b>—Special Colors:</b> Contact your Benjamin Moore representative.			
<b>Certification:</b> <b>VOC compliant in all regulated areas</b> Zero VOC according to EPA Method 24 Master Painters Institute MPI # 43, 43 X-Green, 140, 140 X-Green Class A (0-25) over non-combustible surfaces in accordance with ASTM E-84 <b>Anti-microbial</b> - This product contains agents which inhibit the growth of microbes on the surface of this paint film. This product contains antimicrobial additives that inhibit the growth of mold and mildew on the surface of the paint film.			
			
Benjamin Moore's Green Promise® designation is our company's assurance that this product meets – and often exceeds– rigorous environmental and performance criteria regarding VOCs, emissions, application, washability, scrubability and packaging, while also delivering the premium levels of performance you expect from Benjamin Moore.

Green Seal™ GS-11 2010			

Technical Data◇		Pastel Base
Vehicle Type	Acrylic & Proprietary Resins	
Pigment Type	Titanium Dioxide	
Volume Solids	42%	
Coverage per Gallon at Recommended Film Thickness	350 – 400 Sq. Ft.	
Recommended Film Thickness	– Wet	4.3 mils
	– Dry	1.8 mils
Depending on surface texture and porosity. Be sure to estimate the right amount of paint for the job. This will ensure color uniformity and minimize the disposal of excess paint.		
Dry Time @ 77°F (25°C) @ 50% RH	– To Touch	1 Hour
	– To Recoat	1 Hour
Painted surfaces can be washed after two weeks. High humidity and cool temperatures will result in longer dry, recoat and service times.		
Dries By	Evaporation, Coalescence	
Viscosity	100 ± 3 KU	
Flash Point	None	
Gloss / Sheen	Satin (28 - 38 @ 60°)	
Surface Temperature at Application	– Min.	50°F
	– Max.	90°F
Thin With	See Chart	
Clean Up Thinner	Clean Water	
Weight Per Gallon	11.3 lbs	
Storage Temperature	– Min.	40°F
	– Max.	90°F
<b>Volatile Organic Compounds (VOC)</b>		
0g/L		
Zero VOC post tint (any base and any color)		

◇Reported values are for Pastel Base. Contact Benjamin Moore for values of other bases or colors.

**Technical Assistance:**  
Available through your local authorized independent Benjamin Moore retailer. For the location of the retailer nearest you, call 1-800-826-2623, see [www.benjaminmoore.com](http://www.benjaminmoore.com), or consult your local Yellow Pages.

**Surface Preparation**

Surfaces to be painted must be clean, dry, and free of dirt, dust, grease, oil, soap, wax, scaling paint, water soluble materials and mildew. Remove any peeling or scaling paint, and sand these areas to feather edges smooth with adjacent surfaces. Glossy areas should be dulled. Drywall surfaces must be free of sanding dust. Spot prime with Aura® Satin Finish Paint before and after filling nail holes, cracks, and other surface imperfections.

New plaster or masonry surfaces must be allowed to cure (30 days) before applying base coat. Cured plaster should be hard, have a slight sheen and maximum pH of 10; soft, porous or powdery plaster indicates improper cure. Never sand a plaster surface; knife off any protrusions and prime plaster before and after applying patching compound. Poured or pre-cast concrete with a very smooth surface should be etched or abraded to promote adhesion, after removing all form release agents and curing compounds. Remove any powder or loose particles.

**Difficult Substrates:** Benjamin Moore offers a variety of specialty primers for use over difficult substrates such as plaster, bleeding woods, grease stains, crayon markings, hard glossy surfaces, galvanized metal or other substrates where paint adhesion or stain suppression is a particular problem. Your Benjamin Moore® retailer can recommend the right problem-solving primer for your special needs.

**WARNING!** If you scrape, sand, or remove old paint, you may release lead dust. **LEAD IS TOXIC. EXPOSURE TO LEAD DUST CAN CAUSE SERIOUS ILLNESS, SUCH AS BRAIN DAMAGE, ESPECIALLY IN CHILDREN. PREGNANT WOMEN SHOULD ALSO AVOID EXPOSURE.** Wear a NIOSH approved respirator to control lead exposure. Clean up carefully with a HEPA vacuum and a wet mop. Carefully clean up with a HEPA vacuum and a wet mop. Before you start, find out how to protect yourself and your family by contacting the National Lead Information Hotline at 1-800-424-LEAD or log on to [www.epa.gov/lead](http://www.epa.gov/lead)

**Primer/Finish Systems**

Aura® Satin Finish is self priming on most surfaces. Aura® will act as its own primer, providing the optimal foundation for the subsequent finish coat. On bare substrates two coats are required; previously painted surfaces can be finished with 1 or 2 coats. **Special Note:** For certain deep colors, Aura® Color Foundation must be used to achieve maximum hide and the desired topcoat color. Consult your retailer.

**Wood and Engineered Wood Products:**

**Primer:** Fresh Start® Multi-Purpose Latex Primer (023) or Fresh Start® High-Hiding All Purpose Primer (046)

**Finish:** 1 or 2 coats Aura® Satin Finish

**Bleeding woods such as cedar and redwood:**

**Primer:** Fresh Start® High-Hiding All Purpose Primer (046) or Fresh Start® Multi-Purpose Oil Based Primer (024)

**Plaster/Wallboard:**

**Primer/Finish:** 1 or 2 coats of Aura® Satin Finish.

**Rough or Pitted Masonry:**

**Primer:** Ultra Spec® Masonry Interior/Exterior Hi-Build Block Filler (571)

**Finish:** 1 or 2 coats of Aura® Satin Finish.

**Smooth Poured or Precast Concrete:**

**Primer/Finish:** 1 or 2 coats of Aura® Satin Finish.

**Ferrous Metal (Steel & Iron):**

**Primer:** Ultra Spec® HP Acrylic Metal Primer (HP04) or Super Spec HP® Alkyd Metal Primer (P06)

**Finish:** 1 or 2 coats of Aura® Satin Finish.

**Non-Ferrous Metal (galvanized & aluminum)**

All new metal surfaces must be thoroughly cleaned with Oil & Grease Emulsifier Corotech® V600 to remove contaminants. New shiny non-ferrous metal surfaces that will be subject to abrasion should be dulled with very fine sandpaper or a synthetic steel wool pad to promote adhesion.

**Primer:** Not required on properly prepared surfaces

**Finish:** 1 or 2 coats of Aura® Satin Finish.

**Repaint, All Substrates:** Prime bare areas with the primer / finish recommended for the substrate above.

**Application**

Mixing of Paint: Stir thoroughly before and during use.

Use the same brushing techniques as you would for any low-VOC interior coating. Benjamin Moore recommends an extra firm nylon polyester brush for best results.

Aura® offers excellent flow and leveling. Do not over brush in the attempt to smooth out brush marks.

We recommend the Benjamin Moore® Aura® shed-resistant, 3/8" nap roller cover for best results. Aura® dries faster than other acrylic paints, so avoid lap marks by maintaining a wet edge. Roll out vertical sections in 3' to 4' widths.

If your edge begins to dry or you see that you missed a spot and the paint is already setting up, allow it to dry completely before touching up that area.

This product can also be sprayed; refer to the chart below for spray recommendations.

**Thinning/Clean Up**

Conditioning with Benjamin Moore® 518 Extender may be necessary under certain conditions to adjust open time or spray characteristics. The chart below is for general guidance		
	Mild conditions	Severe conditions
	Humid (RH> 50%) with no direct sunlight & with little to no wind	Dry (RH<50%), in direct sunlight, or windy conditions
<b>Brush:</b> Nylon / Polyester	No thinning necessary	Add <b>518 Extender</b> or <b>water:</b>  Max of 8 fl. oz. to a gallon of paint  <b>Never add other paints or solvents.</b>
<b>Roller:</b> 3/8" Aura® Roller Cover		
<b>Spray:</b> Airless Pressure: 1000 - 2000 psi Tip: 0.013-0.017		

**Clean up:** Wash painting tools in warm soapy water immediately after use. Spray equipment should be given a final rinse with mineral spirits to prevent rusting.

**USE COMPLETELY OR DISPOSE OF PROPERLY.** Dry, empty containers may be recycled in a can recycling program. **Local disposal requirements vary; consult your sanitation department or state-designated environmental agency on disposal options.**

**Environmental Health & Safety Information**

**Use only with adequate ventilation.** Do not breathe spray mist or sanding dust. Ensure fresh air entry during application and drying. Avoid contact with eyes and prolonged or repeated contact with skin. May cause allergic skin reaction. Avoid exposure to dust and spray mist by wearing a NIOSH approved respirator during application, sanding and clean up. Follow respirator manufacturer's directions for respirator use. Close container after each use. Wash thoroughly after handling.

**WARNING:** This product contains a chemical known to the state of California to cause cancer and birth defects, or other reproductive harm.

**FIRST AID:** In case of eye contact, flush immediately with plenty of water for at least 15 minutes; for skin, wash thoroughly with soap and water. If symptoms persist, seek medical attention. If you experience difficulty breathing, leave the area to obtain fresh air. If continued difficulty is experienced, get medical attention immediately.

**IN CASE OF SPILL –** Absorb with inert material and dispose of as specified under **Thinning/Clean up.**

**KEEP OUT OF REACH OF CHILDREN  
PROTECT FROM FREEZING**

**Refer to Safety Data Sheet for additional health and safety information.**

Approved  
No. CF 5303

## Contego High Solids Reactive Fire Barrier Intumescent (RFB)

**General Description:** Contego HS RFB is a full-bodied water-based acrylic latex, single component coating designed to protect a wide range of building materials including structural steel, aluminum, dimensional lumber, manufactured wood products, trusses, drywall, spray polyurethane foam insulation, HDPE wall panels, concrete, plaster, solid core doors and more. The product may also be used for conduit, decking and cladding. Refer to our architectural specification for more details.

### Technical Data:

Color	White
Specific Gravity	1.35 +/- 0.05
pH Range	8.0 - 8.5
Weight/Gal	11.5 +/- 0.2 lbs (5.2 Kgs)*
Hazardous Ingredients	N/A
Volume Solids	67.0 - 69.0%
Weight Solids	68.0 - 72.0%
Viscosity	20 - 25,000 cPs
Flammability	Not Flammable
VOC. (less Water)	.01 gm/L (Nil)

\*Does not include weight of packaging.

**Application Conditions:** Contego HS RFB is designed to be applied by spray application. For application using a brush or roller, use Contego Original Formula. Contego HS RFB should not be applied when the relative humidity exceeds 80% or the surface to be coated is less than 50°F (10°C) or less than 15°F (9°C) above the current or forecasted dew point. The product is best applied when ambient temperatures are between 50°F (10°C) and 95°F (35°C). Once applied and cured, lower or higher temperatures can be tolerated. On structural steel and other metals such as aluminum, copper, brass, or composites, - a primer is always required. On combustible substrates such as dimensional lumber, manufactured wood (Oriented Strand Board, Particle Board, Plywood, etc.), Polyurethane foam, and drywall (GWB) a primer is not required but may be useful if:

**Dimensional Lumber** The wood is very old and/or dry and would likely absorb too much of the Contego coating.

**Manufactured Wood** The substrate is very old and/or dry or if the resin content is unusually high.

**Polyurethane Foam** The foam is soy-based or made from other organics that emit a vegetable oil.

**Drywall (GWB)** The drywall has been previously painted with oil-based (alkyd) paint or if you're not sure.

Consult your Contego representative for specific information regarding the brand, and types of acceptable primers to be used under Contego HS RFB. **SEE Application Instructions at [www.contegointernational.com](http://www.contegointernational.com).**

**Drying & Cure Times at Standard Ambient Temperature and Humidity:** As with any water-based acrylic latex coating, drying time is always a function of ambient temperature, ambient humidity and coating thickness. At 60°F (15°C) with a relative humidity of 70%, a 20 mil (500µ) wet film thickness coat should be dry to touch within 3 hours, completely dry in 6 hours and dried hard enough to handle in 8 hours. While our specifications call for a 72 hour cure time, the product is active as soon as it is hard dried.

**DO NOT** apply additional coats until you are sure the underlying coats are completely dry. Applying additional coats on top of product that still has moisture may cause the finish to crack and, if enough moisture is trapped under a surface film, blistering and delamination can occur. A top coat is recommended and permitted after the total amount of required thickness of Contego HS RFB has been applied and completely dried. **SEE Drying and Cure Times at [www.contegointernational.com](http://www.contegointernational.com).**

### Contego HS RFB Product Advantages:

- **Exceptional protection from heat and fire.**
- **Smooth, thin, architectural grade finish.**
- **Top coat with a wide range of paints including alkyds, acrylics, water-based epoxy or polyurethane.**
- **Contego HS RFB commonly requires perhaps half the coating thickness and fewer coats to provide protection equal to or better than the competition. That means HUGE savings!**
- **Nontoxic, nondermatic and noncarcinogenic acrylic latex.**
- **Can be pre-applied to steel and other materials during fabrication and is easy to repair.**
- **Designed specifically for sprayer application. No special equipment is required.**
- **Any qualified contractor can apply it.**
- **Interior or exterior application (use an exterior grade top coat for exterior applications).**
- **Economically priced.**
- **Fast drying and fast curing times.**
- **Cleans up with soap and water.**
- **The longest shelf life in the industry. Does not need to be periodically reapplied.**

Contego is Truly  
Non-Toxic!

## Contego *High Solids* Reactive Fire Barrier Intumescent (RFB)

**Required Coating Thickness:** Current recommendations are a maximum wet film thickness of 40 mils (1000 $\mu$ ), drying to 28 mils (710 $\mu$ ) - refer to the Contego HS RFB Application Guide. **For structural steel applications**, refer to our Project Planner to determine required thickness for various substrates, densities and required ratings. Contact a qualified Contego representative with further questions.

### General Guidelines for Coating Thickness Requirements:

**Dimensional Lumber** - Up to 2 hours depending on the size of the wood and the thickness of Contego HS RFB applied. (20 mils/500 $\mu$  dft)

**Manufactured Wood** - Up to 2 hours depending on the size of the wood and the thickness of Contego HS RFB applied. (20 mils/500 $\mu$  dft)

**Polyurethane Foam** - Meets or exceeds the 15 minute thermal barrier requirements of IBC-2603 using UL-1715 (20 mils/500 $\mu$  dft). (Under EN-13823, Contego exceeded 25 minutes with no change after 6 minutes).

**Drywall (GWB)** - Contego HS RFB adds 1 hour to any type of GWB. (15 mils/380 $\mu$  dft)

**Structural Steel** - Contego HS RFB provides up to 3 hours restrained protection depending on the W/D, Hp/A or A/P of the steel and the thickness of Contego HS RFB applied. (8-200 mils/200-5000 $\mu$  dft) - refer to our steel calculator.

**Aluminum** Columns have been tested for 2 hours. Aviation grade .025 panels for an estimated 4+ hours. (20-50 mils/500-1270 $\mu$  dft)

### Precautions:

- Do not mix, thin or dilute the Contego HS RFB product with water or other materials.
- Do not allow the product to freeze. If frozen, the texture will be obviously different. Discard it.
- Do not store at temperatures above 105°F (40°C) for extended periods of time.
- Do not expose the product to rain, snow, dew or extreme humidity until a top coat is applied.

**Warranty:** Contego products are warranted for ten years from date of application against material defects. Proof of purchase (store receipt and bar code from container) is required for warranty claims. Claims are limited to replacement of product only. The manufacturer accepts no responsibility for other losses or claims and the user waives such claims by breaking the seal on the container.

**Testing:** Contego products are tested to a variety of standards including UL, ULc, EN, BS, ASTM, NFPA, UBC, CEN, ISO, and others by the best independent fire testing laboratories available. Contego uses Underwriters Laboratories (UL), Exova/Warrington, Intertek, Western Fire Center, Southwest Research Institute (SwRI), Guardian Laboratories, SGS/US Testing, KTA-Tator, Materials Analytical Services, MAGI and more. All labs are certified, accredited and audited. **Test results are available online at [www.contegointernational.com](http://www.contegointernational.com)** or can be obtained on DVD by contacting our customer services department or your local representative.

**Contego is Latin for "to shield, defend, or protect". That is also the mission of our group. Today, Contego affiliates around the world offer solutions to the commercial and industrial sector as well as consumers. Structures and materials treated with Contego Fire Barrier Latex offer a level of security and safety that can be measured in lives saved and property losses that are averted.**

**Contego was formed in 2000 for the express purpose of seeking out the best fire prevention products available and expanding their use through refinement, education and exposure.**

**Our goal is to make the world a safer place. Our Fire Barrier Latex is formulated to deliver important benefits at a significantly lower cost per square foot applied. Thank you for taking the time to learn more about Contego International and looking for ways to be a part of our worldwide family.**

PART 1 PRODUCTS

1.1 SECTION INCLUDES

- A. Intumescent coatings.

1.2 RELATED SECTIONS

**\*\* NOTE TO SPECIFIER \*\* Delete any sections below not relevant to this project; add others as required.**

- A. Section 05120: Structural steel and framing with reference to primer receiving fire protection materials.
- B. Section 09900 - Paints and Coatings: Field painting not specified in this Section.

1.3 REFERENCES

- A. ANSI A2.1 - Standard Test Method for Fire Tests of Building Construction and Materials.
- B. ASTM International:
  - 1. ASTM D 1475 - Standard Test Method For Density of Paint, Varnish, Lacquer, and Related Products.

2. ASTM D 2369 - Standard Test Method For Volatile Content of Coatings.
  3. ASTM D 3359 - Standard Methods for Measuring Adhesion by Tape Test (Methods A and B)
  4. ASTM D 3960 - Standard Practice for Determining Volatile Organic Compound (VOC) Content of Paints and Related Coatings.
  5. ASTM D 4017 - "Standard Test Method for Water in Paints and Paint Materials by Karl Fischer Method.
  6. ASTM E 84 - Standard Test Method for Surface Burning Characteristics of Building Materials.
  7. ASTM E 119 - Standard Test Methods for Fire Tests of Building Construction and Materials.
  8. ASTM E 283 - Standard Test Method for Determining Rate of Air Leakage Through Exterior Windows, Curtain Walls, and Doors Under Specified Pressure Differences Across the Specimen.
  9. ASTM E 662 - Standard Guide for Measurement of Gases Present or Generated During Fires.
- C. AZ/NZS 1425:2007 - Western Australia DOC Test for LPG Storage Containers.
- D. BSS 476 - Standard Test Method for Fire Tests of Building Construction and Materials.
- E. BSS 7239 - Test Method for Toxic Gas Generation by Materials on Combustion.
- F. UBC 8.1 - Standard Test Method for Surface Burning Characteristics of Building Materials.
- G. DIN 4102, Part 8 - Standard Test Method for Fire Tests of Building Construction and Materials.
- H. National Fire Protection Association (NFPA):
1. NFPA 251 - Standard Test Method for Fire Tests of Building Construction and Materials.
  2. NFPA 255 - Standard Test Method for Surface Burning Characteristics of Building Materials.
  3. NFPA 286 - Standard Methods of Fire Tests for Evaluating Contribution of Wall and Ceiling Interior Finish to Room.
- I. UL 263 - Fire Tests of Building Construction and Materials.
- J. UL 723 - Test for Surface Burning Characteristics of Building Materials.
- K. UL-C-S101 - Standard Test Method for Fire Tests of Building Construction and Materials.

- L. Uniform Building Code (UBC):
  - 1. UBC 7-1 - Standard Test Method for Fire Tests of Building Construction and Materials.
  - 2. UBC 26-2, Test Method for Evaluation of Thermal Barriers.
  - 3. UBC 26-3, Room Fire Test Standard for interior of foam plastic systems met all criteria.
- 1.4 SUBMITTALS
  - A. Submit under provisions of Section 01300.
  - B. Product Data: Manufacturer's data sheets on each product to be used.
    - 1. Preparation instructions and recommendations.
    - 2. Storage and handling requirements and recommendations.
    - 3. Installation methods.
  - C. Verification Samples: For each finished product specified, two samples, minimum size 6 inches (150 mm) square, representing actual product and finish.
- 1.5 DELIVERY, STORAGE, AND HANDLING
  - A. Deliver and store all materials in manufacturer's unopened, labeled packaging until ready for installation.
  - B. Store above 65 degrees F (18 degrees C) for 48 hours prior to application.
- 1.6 PROJECT CONDITIONS
  - A. Maintain environmental conditions (temperature, humidity, and ventilation) within limits recommended by manufacturer for optimum results. Do not install products under environmental conditions outside manufacturer's absolute limits.
  - B. Do not expose applied product to rain, dew, snow, heavy fog, condensation or other forms of accumulated moisture or precipitation before having dried completely and a top coat of acrylic enamel, designed for the ambient environment, has been applied and allowed to dry.
- PART 2 PRODUCTS
  - 2.1 MANUFACTURERS
    - A. Acceptable Manufacturer: Contego International, Carmel, IN 46032; Toll Free Tel: 800-434-6444; Tel: 317-580-0665; Email: [request info \(info@contegointernational.com\)](mailto:info@contegointernational.com)  
**\*\* NOTE TO SPECIFIER \*\* Delete one of the following two paragraphs; coordinate with requirements of Division 1 section on product options and substitutions.**
    - B. Substitutions: Not permitted.
    - C. Requests for substitutions will be considered in accordance with provisions of Section 01600.  
**\*\* NOTE TO SPECIFIER \*\* Contego Passive Fire Barrier is a heavy-bodied, single-part latex designed for use on construction materials such as Oriented Strand Board (OSB), Structural Insulated Panels (SIPS), framing lumber, plywood, trusses, drywall, doors, and more. May also be used on aluminum and steel sheets, and structural steel including round and box steel columns.**

## 2.2 MATERIALS

### A. Contego Passive Fire Barrier Intumescent Latex Paint: As manufactured by Contego International.

1. Color: White.
2. VOC (Less Water): 0 Grams/Litre.
3. Weight/US Gallon: 10.8 lbs. (11.2 for HS Version)
4. Hazardous Ingredient: N/A.
5. WHMIS Class: Not Controlled.
6. Flammability: Not Flammable.
7. Weight Solids: 52.93 percent. (62.45 for HS Version)
8. Volume Solids: 43.7 percent. (68.3% for HS Version)
9. Specific Gravity: 1.29. (1.67 for HS Version)
10. pH Range: 8.0-8.5.

**\*\* NOTE TO SPECIFIER \*\* Refer to manufacturer's website for additional test results on a wide range of materials.**

### B. Testing Compliance:

1. ANSI/UL723 Class A Doug Fir. (a=10 minutes, b=Extended to 30 minutes)
  - a. Results: Average Flame spread Index 0; Smoke Index 0, Class A.
  - b. Results: Average Flame spread Index 0; Smoke Index 5, Class A.
2. ASTM E 119/UL-263/UBC 7.1, ANSI A2.1/ULC-S01/NFPA 251:
  - a. Results: Ranged from 103 to 121 minutes. STEEL "I" Beams Unrestrained.
  - b. Steel Plate: ASTM 119 UL-263 ON .250 Plate 73 mil coating of Contego achieved 126 minutes (1000 degrees F, 538 degrees C unexposed surface) Unrestrained.
  - c. Steel Beams and Decking With 4 Inches Concrete: ASTM 119 UL-263 with 58 mil coating of Contego achieved 87 minutes (1100 degrees F, 593 degrees C unexposed surface) Unrestrained, 174 minutes Restrained.
  - d. 0.500 Steel Plate: ASTM E 119/UL-263/UBC 7.1, ANSI A2.1/ULC-S01/NFPA 251 Top Coated with 60 mils and Acrylic Enamel. The thermocouples exceeded an average of 1,200 degrees F (649 degrees C) at 2:21.50 proving that top coating adds 25% to 32% to the total fire resistance.
3. NFPA 286, Standard Methods of Fire Tests for Evaluating Contribution of Wall and Ceiling Interior Finish to Room. Met all criteria.

## PART 3 EXECUTION

### 3.1 EXAMINATION AND PREPARATION

- A. If preparation is the responsibility of another installer, notify Architect of deviations from manufacturer's recommended installation tolerances and conditions.
- B. Do not proceed with installation until substrates have been properly prepared and deviations from manufacturer's recommended tolerances are corrected. Prepare surfaces using the methods recommended by the manufacturer for achieving the best result for the substrate under the project conditions. Surfaces must be clean, dry, and free of any grease, oils or other contaminants. Previous layers of paint must be solidly adhered to the surface

with no flaking, chipping, or cracks.

1. Remove hardware, hardware accessories, plates, machined surfaces, lighting fixtures, and similar items already installed that are not to be painted. If removal is impractical or impossible because of size or weight of item, provide surface-applied protection before surface preparation and painting.
2. After completing painting operations in each space or area, reinstall items removed using workers skilled in the trades involved.
3. Cleaning: Before applying coatings or other surface treatments, clean substrates of substances that could impair bond of intumescent paint systems.
4. Schedule cleaning and painting application so dust and other contaminants will not fall on wet, newly painted surfaces.
5. Surface Preparation: Clean and prepare surfaces to be painted according to manufacturer's written instructions for each particular substrate condition and as specified. Coordinating shop-applied primers with finish coats is critical. If compatibility problems develop, it may be necessary to provide barrier coats over shop-applied primers or to remove primer and reprime substrate.

C. Commencement of installation constitutes acceptance of conditions.

### 3.2 INSTALLATION

A. Installation General: Install in accordance with Manufacturer's printed instructions.

1. Product must be mixed thoroughly before application. Manufacturer recommends using a mixing paddle with power drill for a minimum of three 3 minutes at highest speed. Concentrate on bottom of bucket periodically moving to the middle and top areas.
2. Product is properly mixed when:
  - a. There are no solids attached to the paddle after mixing at the bottom.
  - b. Paint shows a uniform consistency when mixed at the surface.
3. Do not dilute or thin this product with any other liquid.

B. Priming Requirements:

1. Bare steel must always be primed with red oxide primer or manufacturer approved equivalent prior to applying the Contego product.

**\*\* NOTE TO SPECIFIER \*\* Product may be applied as any other high quality latex based paint: brush, roller, airless spray as described below.**

C. Application: Apply intumescent paints according to manufacturer's written instructions. Use applicators and techniques best suited for substrate and type of material being applied.

1. Do not paint over dirt, rust, scale, grease, moisture, scuffed surfaces, or conditions detrimental to forming a durable paint film.
  2. The Original formula (Type R, 50% solids) can be applied with a brush, roller, mitt or spray gun. The HS (High Solids) variant can only be applied with a spray gun.
  3. Spraying is the recommended method for either application. The recommended spray setup is 2400 psi (165 bar) with a 0.025 - .032 inch tip (0.63 - .813 mm). All Contego test applications are performed using a Graco XR5, but other commercial quality, positive displacement, airless spray guns are acceptable. If using the HS (High Solids) variant, use a spray gun with 3,600 psi with a 0.036 tip or bigger. In either case, spray a test patch to make sure the product is being properly atomized without clogging the nozzle or other parts of the spray gun.
  4. NEVER allow the Contego coating to be exposed to rain, dew, snow, heavy settling fog, water spray or other forms or condensation until completely dry to protected with a suitable top coat. ALL exterior applications must be top coated. The Contego finish must be protected until a suitable top coat has been applied and allowed to dry.
  5. Optimal application temperature is 75 degrees F (41 degrees C); application below 45 degrees F (25 degrees C) is not recommended.
  6. Provide finish coats that are compatible.
  7. The term "exposed surfaces" includes areas visible when permanent or built-in fixtures and similar components are in place. Extend coatings in these areas, as required, to maintain system integrity and provide desired protection.
  8. Paint surfaces behind movable equipment and furniture the same as similar exposed surfaces.
- D. Scheduling Painting: Apply first coat to surfaces that have been cleaned, pretreated, or otherwise prepared for painting as soon as practicable after preparation and before subsequent surface deterioration.
1. Film thickness required is the same regardless of application method or whether applying Type R or HS.
  2. Do not apply succeeding coats until previous coats have dried completely as recommended by manufacturer. If sanding is required to produce a smooth, even surface, do so according to manufacturer's written instructions.
  3. If undercoats, stains, or other conditions show through the final coat of paint, apply additional coats until paint film is of uniform finish, color, and appearance. Give special attention to ensure that edges, corners, crevices, and exposed fasteners receive a dry film thickness equivalent to that of flat surfaces.
  4. Allow enough time between successive coats to permit complete

drying. Drying time between coats depends on ambient temperature, humidity and the thickness of the coat. Do not recoat surfaces until paint has dried thoroughly, not just dry to the touch. Applying additional coats of Contego before existing coats have dried thoroughly can trap moisture under the surface film and cause the finish to loose adhesion or crack.

- E. Application Procedures: Apply coatings by brush, roller, spray, or other methods according to manufacturer's written instructions.
1. Spray Equipment: Use airless spray equipment with orifice size as recommended by manufacturer for material and texture required.
  2. Prime Coat: Before applying Contego on steel, apply a prime coat, as recommended by manufacturer, to substrates required to be painted that have not been prime coated by others. Recoat primed and sealed surfaces where evidence of suction spots or unsealed areas appears in the first coat.
  3. Minimum Coating Thickness: Apply materials at not less than manufacturer's recommended spreading rate for surface to be coated. Provide total dry film thickness of entire system as recommended by manufacturer. This varies between different substrates and the kind of rating needed.
  4. Produce a smooth surface film using multiple coats. Provide a finish free of laps, runs, color irregularity, brush marks, orange peel, nail holes, or other surface imperfections.
  5. Completed Work: Match approved samples for texture and coverage. Remove, refinish, or repaint work not complying with specified requirements.
- F. Coverage: Coverage varies depending on the thickness of the Contego coating applied and that depends on the weight of the steel, whether or not it is restrained, whether or not it is top coated and the fire resistance rating needed. The dry thickness of each coat depends on the wet thickness applied. Structural steel requires between 5 and 170 dry mils, so multiple coats may be required as shown in our Hp/A regression tables for either version of the product being used.

Generally, you can apply a maximum of 20 wet mils using our Type R before running the risk of sags or runs with the Regular Version and 35 mils with the HS version, but your actual maximum thickness also depends on ambient temperature and humidity. Keep in mind that it is difficult or impossible to lay down the maximum wet film thickness using a brush, roller or mitt. To maximize your wet film thickness per pass, use a spray gun as discussed in this section.

**\*\* NOTE TO SPECIFIER \*\* Delete if not required.**

**\*\* NOTE TO SPECIFIER \*\* Delete if not required.**

- G. Structural Steel: A final dry film coating of 5 to 170 mil (0.25 to 4.32 mm) is recommended for adequate protection. The thickness needed depends on the W/D, Hp/A or A/P ratios of the steel being protected. Under proper conditions it is possible to achieve this with multiple coats of 20 mil (0.50 mm) wet (36 mils wet for the HS Version). Under less than ideal conditions, it may be necessary to apply more at a lesser thickness until the total required dry film thickness is achieved. In all cases the next coat may be applied when the prior is completely dry.

**\*\* NOTE TO SPECIFIER \*\* Top coating is optional but HIGHLY recommended since the use of a top coat improves Contego's fire resistance 25% to 32%. However, exterior**

**applications MUST be top coated with an exterior grade acrylic enamel. Delete if not required.**

- H. Top Coating: To add color or sheen to surfaces, Contego PFB may be top coated using virtually any alkyd, or latex based acrylic enamel paint as soon as the intumescent coating is completely dry. To top coat with acrylic or latex, spray or roll initial color coat.
1. If using a roller, do not try to re-roll or touch up until your initial color coat is dry.
  2. Failure to wait for the first color coat to dry will cause the first color coat to smear or back-roll off the wall.
  3. Once first color coat of latex/acrylic is dry apply second coat.
  4. Top coating does not reduce intumescent capability and, in fact, improves our fire resistance as discussed earlier.
- I. Tinting is possible, but to pastel shades only. Limit tint to 10 percent of paint volume. However, since top coating is both possible and recommended, use a top coat to achieve the exact color and sheen desired.

### 3.3 CLEANING AND PROTECTION

- A. Cleanup: At the end of each workday, remove rubbish, empty cans, rags, and other discarded materials from Project site.
1. After completing painting, clean glass and paint-spattered surfaces. Remove spattered paint by proper methods. Be careful not to scratch or otherwise damage adjacent finished surfaces.
- B. Provide "Wet Paint" signs to protect newly painted finishes. After completing painting, remove temporary protective wrappings provided by others to protect their work.
1. After work of other trades is completed, touch up and restore damaged or defaced surfaces.
  2. Exterior applications must be protected by a tarp, tenting, or other method to avoid exposure to rain, dew, snow, condensation, heavy fog or other forms of accumulating moisture.

Revision Date:

# SAFETY DATA SHEET

**Issuing Date** No data available

**Revision Date** 4-Aug-2016

**Revision Number** 0

## 1. IDENTIFICATION

### GHS product identifier

**Product Name** Contego Intumescent Fire Barrier Latex (Original Formula)

### Other means of identification

**Synonyms** None

### Recommended use of the chemical and restrictions on use

**Recommended Use** Fire barrier paint

**Uses advised against** No information available

### Supplier's details

#### **Supplier Address**

Contego International, Inc.  
P.O. Box 49  
1013 Arthur Street  
Rochester, IN 46975  
TEL: 1-317-580-0655

### Emergency telephone number

**Emergency Telephone Number** 1-800-434-6444

## 2. HAZARDS IDENTIFICATION

### Classification

This chemical is not considered hazardous according to the OSHA Hazard Communication Standard 2012 (29 CFR 1910.1200).

Not classified

### GHS Label elements, including precautionary statements

#### Emergency Overview

**Signal Word**

None

The product contains no substances which at their given concentration are considered to be hazardous to health

**Appearance** White.

**Physical State** Liquid.

**Odor** Mild.

## 2. HAZARDS IDENTIFICATION - Continued

### Precautionary Statements

**Prevention**

- None

**General Advice**

- None

**Storage**

- None

**Disposal**

- None

### Hazard Not Otherwise Classified (HNOC)

Not applicable.

### Other information

If product is removed by sanding or grinding may produce dust particulates.

<50% of the mixture consists of ingredient(s) of unknown toxicity.

## 3. COMPOSITION/INFORMATION ON INGREDIENTS

Proprietary Formulation

## 4. FIRST AID MEASURES

### Description of necessary first-aid measures

<b>Eye Contact</b>	Rinse thoroughly with plenty of water, also under the eyelids. Keep eye wide open while rinsing. Get medical attention if symptoms occur.
<b>Skin Contact</b>	Wash skin with soap and water. Remove and wash contaminated clothing before re-use. If skin irritation occurs: Get medical advice/ attention.
<b>Inhalation</b>	IF INHALED: Remove to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur.
<b>Ingestion</b>	Do NOT induce vomiting. Drink plenty of water. Never give anything by mouth to an unconscious person. Consult a physician if necessary.
<b>Protection of First-aiders</b>	Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

### Most important symptoms/effects, acute and delayed

**Most Important Symptoms/Effects**      No information available.

### Indication of immediate medical attention and special treatment needed, if necessary

**Notes to Physician**                      Treat symptomatically.

**5. FIRE-FIGHTING MEASURES****Suitable Extinguishing Media**

Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.

**Unsuitable Extinguishing Media** None

**Specific Hazards Arising from the Chemical**

None known

**Explosion Data**

**Sensitivity to Mechanical Impact** None.

**Sensitivity to Static Discharge** None.

**Protective Equipment and Precautions for Firefighters**

As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear.

**6. ACCIDENTAL RELEASE MEASURES****Personal precautions, protective equipment and emergency procedures**

**Personal Precautions** Avoid contact with the skin and the eyes. Use personal protective equipment as required.

**Environmental Precautions**

**Environmental Precautions** See Section 12 for additional Ecological Information.

**Methods and materials for containment and cleaning up**

**Methods for Containment** Prevent further leakage or spillage if safe to do so.

**Methods for Cleaning Up** Soak up with inert absorbent material. Pick up and transfer to properly labeled containers.

**7. HANDLING AND STORAGE****Precautions for safe handling**

**Handling** Handle in accordance with good industrial hygiene and safety practice. Avoid contact with skin and eyes. Use personal protective equipment as required. Do not take internally. Wash thoroughly after handling. Avoid sanding and grinding surfaces containing dried paint film.

**Conditions for safe storage, including any incompatibilities**

**Storage** Keep container tightly closed.

**Incompatible Products** Strong acids. Strong oxidizing agents.

## 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

### Control parameters

#### Exposure Guidelines

Chemical Name	ACGIH TLV	OSHA PEL	NIOSH IDLH
Pentaerythritol 115-77-5	TWA: 10 mg/m <sup>3</sup>	TWA: 15 mg/m <sup>3</sup> total dust TWA: 5 mg/m <sup>3</sup> respirable fraction (vacated) TWA: 10 mg/m <sup>3</sup> total dust (vacated) TWA: 5 mg/m <sup>3</sup> respirable fraction	TWA: 10 mg/m <sup>3</sup> total dust TWA: 5 mg/m <sup>3</sup> respirable dust
Titanium dioxide 13463-67-7	TWA: 10 mg/m <sup>3</sup>	TWA: 15 mg/m <sup>3</sup> total dust (vacated) TWA: 10 mg/m <sup>3</sup> total dust	IDLH: 5000 mg/m <sup>3</sup>
Aluminum hydroxide 21645-51-2	TWA: 1 mg/m <sup>3</sup> respirable fraction	-	-
Glass, oxide 65997-17-3	TWA: 1 fiber/cm <sup>3</sup> TWA: 5 mg/m <sup>3</sup> inhalable fraction	-	-

### Appropriate engineering controls

<b>Engineering Measures</b>	Showers Eyewash stations Ventilation systems
-----------------------------	--

### Individual protection measures, such as personal protective equipment

<b>Eye/Face Protection</b>	At minimum, wear safety glasses with side shields. Goggles are preferred, especially with spray applications
<b>Skin and Body Protection</b>	Wear latex, vinyl, or nitrile gloves and a long sleeved work or jump suit such as Tyvek or similar.
<b>Respiratory Protection</b>	A dust mask is recommended to protect against exposure to airborne particulates or mists. If exposure limits are exceeded or irritation is experienced, NIOSH/MSHA approved respiratory protection should be worn.

<b>Hygiene Measures</b>	Handle in accordance with good industrial hygiene and safety practice.
-------------------------	--

## 9. PHYSICAL AND CHEMICAL PROPERTIES

### Information on basic physical and chemical properties

<b>Physical State</b>	Liquid.	<b>Appearance</b>	White.
<b>Odor</b>	Mild.	<b>Odor Threshold</b>	No information available.

Property	Values	Remarks / Method
<b>pH</b>	8.0 - 8.5	None known
<b>Melting Point/Range</b>	No data available	None known
<b>Boiling Point/Boiling Range</b>	100 °C / 212 °F	None known
<b>Flash Point</b>	Not flammable.	None known
<b>Evaporation rate</b>	No data available	None known

<b>Oxidizing Properties</b>	No data available
<b><u>Other information</u></b>	
<b>VOC Content (%)</b>	Negligible
<b>VOC (g/l)</b>	0.01

**10. STABILITY AND REACTIVITY****Reactivity**

No data available.

**Chemical stability**

Stable under recommended storage conditions.

**Possibility of hazardous reactions**

None under normal processing.

**Hazardous Polymerization**

Hazardous polymerization does not occur.

**Conditions to avoid**

Incompatible products.

**Incompatible materials**

Strong acids. Strong oxidizing agents.

**Hazardous decomposition products**

Carbon oxides. Nitrogen oxides (NOx).

**11. TOXICOLOGICAL INFORMATION****Information on likely routes of exposure****Product Information**

<b>Inhalation</b>	No known hazard by inhalation.
<b>Eye Contact</b>	Contact with eyes may cause irritation.
<b>Skin Contact</b>	No known hazard in contact with skin.
<b>Ingestion</b>	No known hazard by swallowing.

Chemical Name	LD50 Oral	LD50 Dermal	LC50 Inhalation
Pentaerythritol	= 10000 mg/kg ( Rat )	-	-
Titanium dioxide	> 10000 mg/kg ( Rat )	-	> 6820 mg/m <sup>3</sup>
Aluminum hydroxide	> 5000 mg/kg ( Rat )	-	-

**Symptoms related to the physical, chemical and toxicological characteristics**

**Symptoms** No information available.

**11. TOXICOLOGICAL INFORMATION - Continued****Delayed and immediate effects and also chronic effects from short and long term exposure****Sensitization**

Not expected to be a sensitizer.

**Mutagenic Effects**

No information available.

**Carcinogenicity**

This product contains titanium dioxide in a non-respirable form. Inhalation of titanium dioxide is unlikely to occur from exposure to this product. However, this product may become a dust nuisance when removed by abrasive blasting, sanding, or grinding.

Chemical Name	ACGIH	IARC	NTP	OSHA
Titanium dioxide		Group 2B		X
Glass, oxide		Group 3		
Silica, amorphous, precipitated and gel		Group 3	Reasonably Anticipated	X

## WATERBORNE INTERIOR PAINT MATTE FINISH 522

### Features

- Extreme hide for fewer coats
- Color Lock® Technology, no color rub-off
- Provides a mildew resistant coating
- Zero VOC, low odor
- Easy application
- Self-priming
- Stains wash off easily
- Excellent touch up
- Easy clean up

### Recommended For

New or previously painted wallboard, plaster, masonry and wood; primed or previously painted metal; new or coated acoustic ceilings. It is ideal for surfaces where maximum durability is required and lasting color is desired.

### General Description

Aura® Matte Finish is part of an innovative paint and colorant system integrating the best technologies to deliver superior durability for any color along with the promise of long lasting beauty. In addition to using 100% acrylic latex, proprietary resins have been incorporated to give the product its extraordinary performance properties.

### Limitations

- Do not apply when air and surface temperatures are below 50°F (10°C)
- Only Gennex® Waterborne Colorants can be added to Aura® Paint

### Product Information

<b>Colors: —Standard:</b> White (01)			
<b>—Tint Bases:</b> Benjamin Moore® Gennex® Bases 1X, 2X, 3X, & 4X			
<b>—Special Colors:</b> Contact your Benjamin Moore® representative.			
<b>Certification:</b> <b>VOC compliant in all regulated areas</b> Zero VOC according to EPA Method 24 Master Painters Institute MPI # 53, 53 X-Green™, 143, 143 X-Green™ Class A (0-25) over non-combustible surfaces in accordance with ASTM E-84 <b>Anti-microbial</b> - This product contains agents which inhibit the growth of microbes on the surface of this paint film. This product contains antimicrobial additives that inhibit the growth of mold and mildew on the surface of the paint film.			
 			
Benjamin Moore's Green Promise® designation is our company's assurance that this product meets – and often exceeds– rigorous environmental and performance criteria regarding VOCs, emissions, application, washability, scrubability and packaging, while also delivering the premium levels of performance you expect from Benjamin Moore.

	– Max.	90°F
<b>Volatile Organic Compounds (VOC)</b>		
0 Grams / Liter*    0 LBS / Gallon		
Zero VOC post tint (any base and any color)		

◇Reported values are for Pastel Base. Contact Benjamin Moore for values of other bases or colors.

**Surface Preparation**

Surfaces to be painted must be clean, dry, and free of dirt, dust, grease, oil, soap, wax, scaling paint, water soluble materials and mildew. Remove any peeling or scaling paint, and sand these areas to feather edges smooth with adjacent surfaces. Glossy areas should be dulled. Drywall surfaces must be free of sanding dust. Spot prime with Aura® Matte Finish Paint before and after filling nail holes, cracks, and other surface imperfections.

New plaster or masonry surfaces must be allowed to cure (30 days) before applying base coat. Cured plaster should be hard, have a slight sheen and maximum pH of 10; soft, porous or powdery plaster indicates improper cure. Never sand a plaster surface; knife off any protrusions and prime plaster before and after applying patching compound. Poured or pre-cast concrete with a very smooth surface should be etched or abraded to promote adhesion, after removing all form release agents and curing compounds. Remove any powder or loose particles.

**Difficult Substrates:** Benjamin Moore® offers a variety of specialty primers for use over difficult substrates such as plaster, bleeding woods, grease stains, crayon markings, hard glossy surfaces, galvanized metal, or other substrates where paint adhesion or stain suppression is a particular problem. Your Benjamin Moore® retailer can recommend the right problem-solving primer for your special needs.

**WARNING!** If you scrape, sand, or remove old paint, you may release lead dust. **LEAD IS TOXIC. EXPOSURE TO LEAD DUST CAN CAUSE SERIOUS ILLNESS, SUCH AS BRAIN DAMAGE, ESPECIALLY IN CHILDREN. PREGNANT WOMEN SHOULD ALSO AVOID EXPOSURE.** Wear a NIOSH approved respirator to control lead exposure. Clean up carefully with a HEPA vacuum and a wet mop. Before you start, find out how to protect yourself and your family by contacting the National Lead Informational Hotline at 1-800-424-LEAD or log on to [www.epa.gov/lead](http://www.epa.gov/lead).

**Primer/Finish Systems**

Aura® Matte Finish is self priming on most surfaces. Aura® will act as its own primer, providing the optimal foundation for the subsequent finish coat. On bare substrates two coats are required; previously painted surfaces can be finished with 1 or 2 coats. **Special Note:** For certain deep colors, Aura® Color Foundation must be used to achieve maximum hide and the desired topcoat color. Consult your retailer.

**Wood and Engineered Wood Products:**

**Primer:** Fresh Start® Multi-Purpose Latex Primer (023) or Fresh Start® High-Hiding All Purpose Primer (046)  
**Finish:** 1 or 2 coats Aura® Matte Finish (522)

**Bleeding woods such as cedar and redwood:**

**Primer:** Fresh Start® High-Hiding All Purpose Primer (046) or Fresh Start® Multi-Purpose Oil Based Primer (024)  
**Finish:** 1 or 2 coats Aura® Matte Finish (522)

**Plaster/Wallboard:**

**Primer/Finish:** 1 or 2 coats of Aura® Matte Finish (522).

**Rough or Pitted Masonry:**

**Primer:** Ultra Spec® Masonry Interior/Exterior Hi-Build Block Filler (571)  
**Finish:** 1 or 2 coats of Aura® Matte Finish (522)

**Smooth Poured or Precast Concrete:**

**Primer/Finish:** 1 or 2 coats of Aura® Matte Finish (522)

**Ferrous Metal (Steel & Iron):**

**Primer:** Ultra Spec® HP Acrylic Metal Primer (HP04) or Super Spec HP® Alkyd Metal Primer (P06)  
**Finish:** 1 or 2 coats of Aura® Matte Finish (522)

**Non-Ferrous Metal (Galvanized & Aluminum):**

All new metal surfaces must be thoroughly cleaned with an Oil & Grease Emulsifier Corotech® V600 to remove contaminants. New shiny non-ferrous metal surfaces that will be subject to abrasion should be dulled with very fine sandpaper or a synthetic steel wool pad to promote adhesion.

**Primer:** Not required on properly prepared surfaces  
**Finish:** 1 or 2 coats of Aura® Matte Finish (522).

**Repaint, All Substrates:** Prime bare areas with the product recommended for the substrate above.

**Application**

**Mixing of Paint:** Stir thoroughly before and during use. Use the same brushing techniques as you would for any low-VOC interior coating. Benjamin Moore recommends an extra firm nylon polyester brush for best results.

Aura® offers excellent flow and leveling. Do not over brush in the attempt to smooth out brush marks.

We recommend the Benjamin Moore® Aura® shed-resistant, 3/8" nap roller cover for best results. Aura® dries faster than other acrylic paints, so avoid lap marks by maintaining a wet edge. Roll out vertical sections in 3' to 4' widths.

If your edge begins to dry or you see that you missed a spot and the paint is already setting up, allow it to dry completely before touching up that area.

This product can also be sprayed; refer to the chart below for spray recommendations.

**Thinning/Clean Up**

Conditioning with Benjamin Moore® 518 Extender may be necessary under certain conditions to adjust open time or spray characteristics. The chart below is for general guidance		
	Mild conditions	Severe conditions
	Humid (RH> 50%) with no direct sunlight & with little to no wind	Dry (RH<50%), in direct sunlight, or windy conditions
<b>Brush:</b> Nylon / Polyester	No thinning necessary	Add <b>518 Extender</b> or <b>water:</b>  Max of 8 fl. oz. to a gallon of paint  <b>Never add other paints or solvents.</b>
<b>Roller:</b> 3/8" Aura® Roller Cover		
<b>Spray:</b> Airless Pressure: 1000 - 2000 psi Tip: 0.013-0.017		

**Clean up:** Wash painting tools in warm soapy water immediately after use. Spray equipment should be given a final rinse with mineral spirits to prevent rusting or follow state/local guidelines on solvent use.

**USE COMPLETELY OR DISPOSE OF PROPERLY.** Dry, empty containers may be recycled in a can recycling program. **Local disposal requirements vary; consult your sanitation department or state-designated environmental agency on disposal options.**

**Environmental Health & Safety Information**

**Use only with adequate ventilation.** Do not breathe spray mist or sanding dust. Ensure fresh air entry during application and drying. Avoid contact with eyes and prolonged or repeated contact with skin. May cause allergic skin reaction. Avoid exposure to dust and spray mist by wearing a NIOSH approved respirator during application, sanding and clean up. Follow respirator manufacturer's directions for respirator use. Close container after each use. Wash thoroughly after handling.

**WARNING:** This product contains a chemical known to the state of California to cause cancer and birth defects, or other reproductive harm.

**FIRST AID:** In case of eye contact, flush immediately with plenty of water for at least 15 minutes; for skin, wash thoroughly with soap and water. If symptoms persist, seek medical attention. If you experience difficulty breathing, leave the area to obtain fresh air. If continued difficulty is experienced, get medical attention immediately.

**IN CASE OF SPILL –** Absorb with inert material and dispose of as specified under **Thinning/Clean up.**

**KEEP OUT OF REACH OF CHILDREN  
PROTECT FROM FREEZING**

**Refer to Safety Data Sheet for additional health and safety information.**

<p><b>Technical Assistance:</b> Available through your local authorized independent Benjamin Moore® retailer. For the location of the retailer nearest you, call 1-800-826-2623, see <a href="http://www.benjaminmoore.com">www.benjaminmoore.com</a>, or consult your local Yellow Pages.</p>																																													

◊Reported values are for Pastel Base. Contact Benjamin Moore for values of other bases or colors.

**Surface Preparation**

Surfaces to be painted must be clean, dry, and free of dirt, dust, grease, oil, soap, wax, scaling paint, water soluble materials and mildew. Remove any peeling or scaling paint, and sand these areas to feather edges smooth with adjacent surfaces. Glossy areas should be dulled. Drywall surfaces must be free of sanding dust. Spot prime with Aura® Eggshell Finish Paint before and after filling nail holes, cracks, and other surface imperfections.

New plaster or masonry surfaces must be allowed to cure (30 days) before applying base coat. Cured plaster should be hard, have a slight sheen and maximum pH of 10; soft, porous or powdery plaster indicates improper cure. Never sand a plaster surface; knife off any protrusions and prime plaster before and after applying patching compound. Poured or pre-cast concrete with a very smooth surface should be etched or abraded to promote adhesion, after removing all form release agents and curing compounds. Remove any powder or loose particles.

**Difficult Substrates:** Benjamin Moore offers a variety of specialty primers for use over difficult substrates such as plaster, bleeding woods, grease stains, crayon markings, hard glossy surfaces, galvanized metal, or other substrates where paint adhesion or stain suppression is a particular problem. Your Benjamin Moore® retailer can recommend the right problem-solving primer for your special needs.

**WARNING!** If you scrape, sand, or remove old paint, you may release lead dust. **LEAD IS TOXIC. EXPOSURE TO LEAD DUST CAN CAUSE SERIOUS ILLNESS, SUCH AS BRAIN DAMAGE, ESPECIALLY IN CHILDREN. PREGNANT WOMEN SHOULD ALSO AVOID EXPOSURE.** Wear a NIOSH approved respirator to control lead exposure. Clean up carefully with a HEPA vacuum and a wet mop. Carefully clean up with a HEPA vacuum and a wet mop. Before you start, find out how to protect yourself and your family by contacting the National Lead Information Hotline at 1-800-424-LEAD or log on to [www.epa.gov/lead](http://www.epa.gov/lead)

**Primer/Finish Systems**

Aura® Eggshell Finish is self priming on most surfaces. Aura® will act as its own primer, providing the optimal foundation for the subsequent finish coat. On bare substrates two coats are required; previously painted surfaces can be finished with 1 or 2 coats. **Special Note:** For certain deep colors, Aura® Color Foundation must be used to achieve maximum hide and the desired topcoat color. Consult your retailer.

**Wood and Engineered Wood Products:**

**Primer:** Fresh Start® Multi-Purpose Latex Primer (023) or Fresh Start® High-Hiding All Purpose Primer (046)

**Finish:** 1 or 2 coats Aura® Eggshell Finish (524)

**Bleeding woods such as cedar and redwood:**

**Primer:** Fresh Start® High-Hiding All Purpose Primer (046) or Fresh Start® Multi-Purpose Oil Based Primer (024)

**Finish:** 1 or 2 coats Aura® Eggshell Finish (524)

**Plaster/Wallboard:**

**Primer/Finish:** 1 or 2 coats of Aura® Eggshell Finish (524)

**Rough or Pitted Masonry:**

**Primer:** Ultra Spec® Masonry Interior/Exterior Hi-Build Block Filler (571)

**Finish:** 1 or 2 coats of Aura® Eggshell Finish.

**Smooth Poured or Precast Concrete:**

**Primer/Finish:** 1 or 2 coats of Aura® Eggshell Finish (524)

**Ferrous Metal (Steel & Iron):**

**Primer:** Ultra Spec® HP Acrylic Metal Primer (HP04) or Super Spec HP® Alkyd Metal Primer (P06)

**Finish:** 1 or 2 coats of Aura® Eggshell Finish (524)

**Non-Ferrous Metal (Galvanized & Aluminum):**

All new metal surfaces must be thoroughly cleaned with Oil & Grease Emulsifier Corotech® V600 to remove contaminants. New shiny non-ferrous metal surfaces that will be subject to abrasion should be dulled with very fine sandpaper or a synthetic steel wool pad to promote adhesion.

**Primer:** Not required on properly prepared surfaces

**Finish:** 1 or 2 coats of Aura® Eggshell Finish (524)

**Repaint, All Substrates:** Prime bare areas with the product recommended for the substrate above.

**Application**

Mixing of Paint: Stir thoroughly before and during use. Use the same brushing techniques as you would for any low-VOC interior coating. Benjamin Moore recommends an extra firm nylon polyester brush for best results.

Aura® offers excellent flow and leveling. Do not over brush in the attempt to smooth out brush marks.

We recommend the Benjamin Moore® Aura® shed-resistant, 3/8" nap roller cover for best results. Aura® dries faster than other acrylic paints, so avoid lap marks by maintaining a wet edge. Roll out vertical sections in 3' to 4' widths.

If your edge begins to dry or you see that you missed a spot and the paint is already setting up, allow it to dry completely before touching up that area.

This product can also be sprayed; refer to the chart below for spray recommendations.

**Thinning/Clean Up**

Conditioning with Benjamin Moore® 518 Extender may be necessary under certain conditions to adjust open time or spray characteristics. The chart below is for general guidance		
	Mild conditions	Severe conditions
	Humid (RH> 50%) with no direct sunlight & with little to no wind	Dry (RH<50%), in direct sunlight, or windy conditions
<b>Brush:</b> Nylon / Polyester	No thinning necessary	Add 518 Extender or water:  Max of 8 fl. oz. to a gallon of paint  <b>Never add other paints or solvents.</b>
<b>Roller:</b> 3/8" Aura® Roller Cover		
<b>Spray:</b> Airless Pressure: 1000 - 2000 psi Tip: 0.013-0.017		

**Clean up:** Wash painting tools in warm soapy water immediately after use. Spray equipment should be given a final rinse with mineral spirits to prevent rusting or follow state/local guidelines on solvent use.

**USE COMPLETELY OR DISPOSE OF PROPERLY.** Dry, empty containers may be recycled in a can recycling program. **Local disposal requirements vary; consult your sanitation department or state-designated environmental agency on disposal options.**

**Environmental Health & Safety Information**

**Use only with adequate ventilation.** Do not breathe spray mist or sanding dust. Ensure fresh air entry during application and drying. Avoid contact with eyes and prolonged or repeated contact with skin. May cause allergic skin reaction. Avoid exposure to dust and spray mist by wearing a NIOSH approved respirator during application, sanding and clean up. Follow respirator manufacturer's directions for respirator use. Close container after each use. Wash thoroughly after handling.

**WARNING:** This product contains a chemical known to the state of California to cause cancer and birth defects, or other reproductive harm.

**FIRST AID:** In case of eye contact, flush immediately with plenty of water for at least 15 minutes; for skin, wash thoroughly with soap and water. If symptoms persist, seek medical attention. If you experience difficulty breathing, leave the area to obtain fresh air. If continued difficulty is experienced, get medical attention immediately.

**IN CASE OF SPILL –** Absorb with inert material and dispose of as specified under **Thinning/Clean up.**

**KEEP OUT OF REACH OF CHILDREN  
PROTECT FROM FREEZING**

**Refer to Safety Data Sheet for additional health and safety information.**

## FINISH DATA SHEET

### FINISH DESCRIPTION

#### Brushable, Rollable, Beautiful.

Refined and radiant or bold and energetic - it's your vision and this brush or roller applied metallic finish gives you the flexibility to achieve it.

### FEATURES

### BENEFITS

#### Metallic Finish

Effect Elegant and sophisticated and flexible design

#### Environmentally Responsible

LEED compliant, low-odor application and low-VOC content make Scuffmaster water-base paints compliant with national and international Environmental standards – including the US Green Building Council, Green Seal, California South Coast Air Quality Management District and the European Union

#### Easy Application

Extremely versatile – applied by hand, either brushed or rolled. NOT TO BE SPRAYED. For sprayed metallic paint, see Scuffmaster's Solid Metal Finish.

#### Exceptionally Durable

Cleanable, scrub-able and easy to maintain.

#### Contractor Friendly

No heavy equipment is required (hand applied)

#### Textured Finish

Easy repairs

#### Quick Order Shipment

Most orders (even customs) ship within 24 hours

#### Warranty

5 – Year manufacturer's warranty against adhesion failure if product is correctly applied

#### Class A fire rated

Like all Scuffmaster paints, EnviroMetal is Class A fire rated.

#### Scrub Rating:

2,000 scrubs

ASTM-D2486

### WHERE TO SPECIFY ENVIROMETAL

#### Corporate Spaces

Corridors  
Lobby areas  
Offices  
Columns  
Rooms

#### Retail Spaces

Interior Walls  
Columns  
Facades

#### Entertainment Facilities

Interior Walls  
Accent Areas  
Feature Walls

#### Health Facilities

Interior Spaces  
Offices  
Columns  
Rooms

Remember that Scuffmaster Paints are designed for wall surfaces yet can be applied to display fixtures, elevator doors, stairway frames, columns and other architectural elements besides conventional walls.

<b>Suitable Substrates:</b>	Very smooth surfaces for best results. MCT suggests that new sheetrock be prepared to a Level 5 smoothness in accordance with the Gypsum Association's GA214 standard.
<b>Application:</b>	Commercial painting contractors. Must be brushed or rolled, depending upon specified finish. Call your Scuffmaster distributor or MCT for details (800) 898-0219. Natural variation (lighter or darker areas) in installed finish is a characteristic of the product.
<b>Custom Colors:</b>	Yes. No upcharge. Contact your Scuffmaster distributor.

## TECHNICAL INFORMATION

<b>System Components</b>	Tinted undercoat (primer/sealer or bonding), base coat (brushed or rolled)
<b>Finish Appearance</b>	Textured finish. Colors may exhibit natural darker/lighter color shades across wall surface.
<b>Colors Available</b>	Thousands of colors. Ability to customize
<b>Application</b>	Commercial painting contractors. Must be brushed or rolled, depending upon specified finish. Call your Scuffmaster distributor or MCT for details (800) 898-0219.
<b>Coverage Rates</b>	Tinted Undercoat - approximately 450 sq. ft. per gallon Base Coat - approximately 250 sq. ft. per gallon depending on app technique
<b>Maximum VOC</b>	<150 g/L
<b>Fire Rating</b>	Under Coat - Class A or 1 (ASTM E-84-91a) Base Coat - Class A or 1 (ASTM E-84-91a)

## FIVE YEAR LIMITED WARRANTY

Master Coating Technologies warrants the Scuffmaster components of this finish system against manufacturing defect for a period of five years from the date of application when applied to a wall surface according to manufacturer's printed instructions. Manufacturing defect is defined to be a failure of the coating system to adhere to a wall surface when applied according to manufacturer's printed instructions, and does not include subsequent failure or damage caused by exogenous factors such as substrate failure or defect, sharp objects, persons, or acts of God. In the event of a failure resulting from manufacturing defect, the product will be replaced. Master Coating Technologies shall have no obligation to or otherwise participate in labor or other costs associated with replacing the product. This warranty supersedes all previous warranties.

## SAFETY INFORMATION

First Aid: Ingestion – induce vomiting, consult a physician. Skin contact – wash with soap and water. Eye contact – immediately flush eyes for 15 minutes occasionally lifting eyelids. If contact lenses are worn, remove lenses and continue rinsing. Clean lenses before reusing - may not be possible to reuse. Obtain medical attention. Refer to product MSDS and crosslinker MSDS. In case of emergency, call 800-535-5053.

## HOW TO SPECIFY ENVIROMETAL

Specifying a Scuffmaster EnviroMetal finish is easy.

1. Call out the Scuffmaster finish color number in your finish schedule or on drawings. Scuffmaster color numbers are printed below each color chip in standard sample cards and on the reverse of every custom sample.
2. Call out the Scuffmaster system components required for the substrate being painted in the "products" section of your specification. The EnviroMetal finish systems for common substrates are listed below.

IMPORTANT: EnviroMetal is a highly reflective finish that, upon application, may exhibit normal color variation that is beyond the control of MCT. Specifically, colors may exhibit slight variation in darkness/lightness upon installation. The degree of surface smoothness prior to product application, applicator technique, and the effects of artificial and natural light sources will also impact the uniformity of finish appearance. New gypsum wallboard may be prepared to a Level 5 finish in accordance with the Gypsum Association's GA214 standard. MCT strongly recommends that specifiers require applicators to prepare a benchmark sample in accordance with PDCA P5-94 "Benchmark Sample Procedure for Paint and Other Decorative Coating Systems." Please refer to the guide specifications for this language.

## ENVIROMETAL PAINT SYSTEMS FOR PROPERLY PREPARED SURFACES

### 1. New Sheetrock:

Prepare to Level 5 finish for best results

Primer - 1 coat Scuffmaster Tinted Undercoat [Primer/Sealer]. Ensure very uniform color across surface.

Base Coat - Scuffmaster EnviroMetal [brushed] [rolled] (applied in two coats)

### 2. Previously-Painted Surfaces:

Primer – 1 coat of Scuffmaster Tinted Undercoat [Bonding Primer; Primer/Sealer] Call MCT at 800.898.0219.

Base Coat - Scuffmaster EnviroMetal [brushed] [rolled] (applied in two coats)

### 3. Ceramic Tile:

Primer - 1 coat of Scuffmaster Tinted Undercoat [Bonding Primer]

Base Coat - Scuffmaster EnviroMetal [brushed] [rolled] (applied in two coats)

### 4. Primed Metal:

Primer – 1 coat of Scuffmaster Tinted Undercoat [Bonding Primer]

Base Coat - Scuffmaster EnviroMetal [brushed] [rolled] (applied in two coats)

### 5. Un-Primed Metal:

Primer - Call MCT at (800) 898-0219

Base Coat - Scuffmaster EnviroMetal [brushed] [rolled] (applied in two coats)

# SCRUBTOUGH

**Pretty. Tough. Paint.™**

## MATERIAL SAFETY DATA SHEET

### PRODUCT INFORMATION

Master Coating Technologies  
2777 Eagandale Boulevard  
Eagan, MN 55121  
800.898.0219

Trade Name: **ScrubTough**  
Chemical Family: Acrylic/Urethane Dispersion

### Medical & Transport Emergency Contact

INFOTRAC: 1.800.535.5053

MSDS Date: 11.24.2009

DOT Classification: Not Regulated

CAS Number: Mixture

Supersedes: All Previous

### PHYSICAL DATA

Boiling Range (F): 212 (water)  
Freezing Point (F): 32 (water)  
Vapor Density (Air=1): <1  
Vapor Pressure (mmHg @ 68° F): 17  
Evaporation Rate (Butyl Acetate = 1): 1 (water)  
VOC: 49

Solubility in Water: Dilutable  
Specific Gravity: 1.2 - 1.3  
% Volatile by Weight: 50.9  
pH Information: 9.0 - 10.0  
Appearance & Odor: Liquid, colors, latex odor

### HAZARDOUS INGREDIENTS

#### Ingredient

None

This paint mixture contains titanium dioxide and/or other pigments classified by ACGIH as "nuisance dusts." Exposures to spray mist or sanding dust should be controlled to below 10mg/m<sup>3</sup> through usage of NIOSH/MSHA TC23C or equivalent approved dust lter respirators. Follow respirator manufacturer's directions for use.

**SECTION 313 SUPPLIER NOTIFICATION:** This product contains the following toxic chemicals subject to the reporting requirements of section 313 of the Emergency Planning and Community Right-To-Know Act of 1986 and of 40 CFR 372. NONE above the minimum concentrations.

**HMIS Rating: Health = 1 Flammability = 0 Reactivity = 0 Personal Protection = B\***

\*User should determine appropriate personal protective equipment based on use conditions

### HEALTH HAZARD DATA

**Entry Routes:** Inhalation, Ingestion, Skin Contact, Eye Contact. **Effects of Overexposure:** N/A **Effects of Inhalation:** Trace component, residual monomer and other organics may be irritating to the eyes, skin, mucous membranes, respiratory tract and may produce symptoms of headache and nausea in poorly ventilated areas. **Effects of Ingestion:** DO NOT INGEST. While aluminum content is non-toxic and the solvents are only slightly toxic by oral ingestion, minute amounts of certain portions of solvents, if aspirated into the lungs during ingestion, may cause severe pulmonary injury or death. **Effects of Skin Contact:** Prolonged contact can cause transient reddening of the skin. **Effect of Eye Contact:** Direct contact may be irritating to eyes. **Effects of Repeated Overexposure:** This paint mixture as provided shows no evidence of chronic effects from available information.

## EMERGENCY FIRST AID PROCEDURES

**Eye Contact:** Immediately flush eyes for 15 minutes occasionally lifting eyelids. If victim wears contact lenses, remove lenses and continue rinsing. Clean lenses before reusing. If irritation continues, consult a physician. **Skin Contact:** Wash effected area thoroughly with mild soap and water. If irritation develops and persists, consult a physician. **Inhalation:** Move to fresh air if necessary. If irritation persists, consult a physician. If victim is not breathing, artificial respiration should be administered by qualified personnel. Seek immediate medical attention. **Ingestion:** Give lots of water to dilute, and induce vomiting. If necessary consult a physician.

## FIRE &amp; EXPLOSION HAZARD DATA

Flash Point: Not determined (aqueous system)

LEL: Not determined (aqueous system)

UEL: Not determined (aqueous system)

**Special Fire Fighting Procedures:** Use breathing apparatus when fighting enclosed fires.

**Fire Extinguishing Media:**

Non-Flammable (aqueous emulsion)  
If water evaporates, remaining material can burn.  
Use all-purpose foam for large fires, and CO<sub>2</sub> or dry chemical media for small fires.

**Unusual Fire and Explosion Hazard:**

Products will not burn but may spatter if temperature exceeds boiling point of water. Dried solids can burn, giving off oxides and carbon.

## REACTIVITY DATA

This product is stable under normal (ambient) conditions and hazardous polymerization will not occur. **Hazardous Decomposition Products:** Combustion of dried film may produce carbon dioxide and carbon monoxide. **Conditions or Materials to Avoid:** None.

## SPILL OR LEAK PROCEDURES

**Spill:** Major spills should be collected for disposal. Minor spills may be flushed to sewer if permitted by local, state, and federal regulations. **Waste Disposal:** Incinerate or bury in suitable landfills where permitted by appropriate government regulations.

## SPECIAL PROTECTION INFORMATION

**Respiratory Protection:** Use appropriate MAHA/NIOSH approved respirator in areas with poor ventilation and when exposed to spray mists or sanding dusts. **Ventilation:** General room ventilation is expected to be satisfactory. Use local exhaust if needed for mist or vapor. **Protective Gloves:** Wear gloves impervious to water and soap. **Eye Protection:** Wear goggles if spraying and available eye bath.

**Disclaimer:** The information in this MSDS was obtained from sources we believe are reliable. However, the information is provided without any representation or warranty, expressed or implied, regarding its accuracy or completeness. **The conditions or handling, storage, use and disposal of the product** are beyond our control and may be beyond our knowledge. For this and other reasons, we do not assume responsibility and expressly disclaim liability for loss, damage or expense arising out of or in any way connected with the handling, storage, use or disposal of this product. **Disposal of containers** should be in accordance with applicable federal, state and local laws and regulations.

### HAZARDOUS INGREDIENTS

Ingredient	% Concentration by weight	CAS Number
Polyfunctional aziridine	99.7	064265-57-2
N,n-Dimethyl ethanolamine	.03	000108-01-0
Propyleneimine	<0.5 ppm	000075-55-8

Ingredients not precisely identified are either proprietary or non-hazardous. Values are not product specifications.

### HEALTH HAZARD DATA

\* As defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200. See Sections 8 and 11 for exposure guidelines and toxicology information.

**IMPORTANT:** While the following effects are associated with this product and are required to be included on the MSDS by the US OSHA Hazard Communications Standard, they are not expected effects during the foreseeable use of this product in 2% concentration as used in Scuffmaster coatings. As used in Scuffmaster coatings, this product shows GREATLY REDUCED hazards, including reduced potential for eye and skin irritation. However, it is still prudent to minimize contact with eyes and skin, as well as to avoid inhalation of coating mist containing this product.

**EMERGENCY OVERVIEW: PALE YELLOW LIQUID. MILD AMINE ODOR. RESPIRATORY IRRITANT. EYE CORROSIVE. CORROSIVE TO THE GASTROINTESTINAL TRACT. MODERATE SKIN IRRITANT. RESPIRATORY SENSITIZER. SKIN SENSITIZER.**

**POTENTIAL HEALTH HAZARDS: Eye:** This product contains a component(s) that is eye corrosive based on animal studies: This product contains a component(s) that is a moderate skin irritant based on animal studies. This product is likely to induce skin sensitization in humans. A component in this product is a known animal skin sensitizer. **Inhalation:** Vapors and/or aerosols of this material will probably irritate mucous membranes, eyes, nose and respiratory passages. This material may induce respiratory allergy/sensitization. Symptoms include: Cough, tightness in chest, and/or asthmatic wheezing. **Ingestion:** In humans, irritation or chemical burns of the mouth, pharynx, esophagus, and stomach can develop following ingestion of this material. Injury may be severe and cause death. The acute oral toxicity of this material is between 500 and 5000 mg/kg. Relative to other materials, this material is classed as slightly toxic by ingestion.

## EMERGENCY FIRST AID PROCEDURES

**EYE CONTACT:** Immediately flush eyes with large quantities of running water for a minimum of 15 minutes. Hold the eyelids apart during the flushing to ensure rinsing of the entire surface of the eye and lids with water. Do not attempt to neutralize with chemical agents. Obtain medical attention as soon as possible. Oils and ointments should not be used at this time. Continue the flushing for an additional 15 minutes if a physician is not immediately available. **SKIN CONTACT:** Wash off of skin with plenty of soap and water. If redness, itching or burning sensation develops, get medical attention. Wash contaminated clothing and footwear before reuse. **INGESTION: DO NOT INDUCE VOMITING!** Give one-two glasses of water and refer to medical personnel or take direction from either a physician or poison control center. Never give anything by mouth to an unconscious person. **INHALATION:** Remove victim to fresh air. If not breathing, give artificial respiration, preferably mouth-to-mouth. If breathing is labored, give oxygen. Consult medical personnel. Note to Physician: Mucosal injury following ingestion of this potentially corrosive material contraindicates the induction of vomiting. Medical personnel should evaluate persons with chronic pulmonary disease before those workers handle this product.

## FIRE &amp; EXPLOSION HAZARD DATA

**Flammable Properties:**

Flash Point: > 200°F, 93°C Method: Penske-Martin Closed Tester  
Autoignition Temperature: No Data

Upper Flammability Limit (UFL): No Data  
Lower Flammability Limit (LFL): No Data

**Products of Combustion:** Combustion products: Oxides of carbon and nitrogen. **Extinguishing Media:** Water fog, foam, carbon dioxide, dry chemical, halogenated agents. **Fire Fighting Instructions:** Wear self-contained breathing apparatus with full face piece and protective clothing. **Unusual Fire and Explosion Hazard:** Heat/impurities may cause temperature/build pressure/rupture closed containers, spread fire, increase risk of burns/injuries.

## ACCIDENTAL RELEASE MEASURES

**Spill Procedures:** Wear skin, eye, and respiratory protection during cleanup. Contain spill. Soak up material with absorbent and shovel into a chemical waste container. Decontaminate with 1% acetic acid solution or one part vinegar to four parts water.

## HANDLING &amp; STORAGE

**Handling:** Open large containers in well-ventilated areas to avoid exposure to residual propyleneimine that may have collected in the headspace. Avoid breathing vapors or aerosols. Prevent skin and eye contact. A sensitized individual should not be exposed to the product that caused the sensitization. **Storage:** Keep container tightly sealed. Store in a cool, well ventilated area away from heat, sources of ignition, direct sunlight, acidic materials, anhydrides and strong oxidizers. Avoid contamination with acidic materials, heat, direct sunlight, ultraviolet radiation, strong oxidizing conditions or freezing conditions.

## EXPOSURE CONTROLS / PERSONAL PROTECTION

**Exposure Guidelines:** No ACGIH TLV or OSHA PEL assigned to this product Minimize exposure in accordance with good hygiene practices. **Engineering Controls:** Use permitted ventilation adequate to maintain safe levels. Provide general dilution of local exhaust ventilation to remove solid airborne particles of overspray during spray application and to remove decomposition products during welding or flame cutting on surfaces coated with this product.

We assign NFPA and HMIS ratings to this product based on the hazards of its ingredient(s). Because the customer is most aware of the application of the product, he or she must ensure that the proper personal protective equipment (PPE) is provided consistent with information contained in the product MSDS.\*

**NFPA Rating: Health = 3 Flammability = 1 Reactivity = 1 Special = No Data**

**\*\*HMIS Rating: Health = 1 Flammability = 0 Reactivity = 0 Personal Protection = B**

\* This information is intended solely for the use of individuals trained in the particular hazard rating system.

\*\* See appropriate MSDS section.

## PROTECTIVE EQUIPMENT

**IMPORTANT: While the following effects are associated with this product and are required to be included on the MSDS by the US OSHA Hazard Communications Standard, they are not expected effects during the foreseeable use of this product in 2% concentration as used in Scuffmaster coatings. As used in Scuffmaster coatings, this product shows GREATLY REDUCED hazards, including reduced potential for eye and skin irritation. However, it is still prudent to avoid inhalation of coating mist containing this product, as well as to minimize contact with eyes and skin.**

**RESPIRATORY PROTECTION:** If needed, use NIOSH certified respirator for organic vapors, mists and fumes. Any person who may be exposed to this material in the form of an aerosol or mist from spray operations shall, at a minimum, wear a National Institute for Occupational Safety and Health-approved, category 21c respirator, excluding single use or disposable types, in accordance with 30 CFR 11.130 Subpart K. The respirator shall be equipped with high efficiency particulate filters for maximum protection, unless an air-supplied respirator is selected. Use of this respirator shall be according to Occupational Safety and Health Administration and Mine Safety and Health Administration Regulations at 29 CFR 1910.134 and 30 CFR 11, respectively. If a full-face type respirator is selected and worn, the chemical safety goggles requirement is waived during spray operations. **PROTECTIVE CLOTHING:** Take all precautions to prevent skin contact. Use gloves, arm covers and apron determined to be impervious under the conditions of use. Additional protection, such as full body suit and boots, may be required depending on conditions. Remove contaminated clothing and wash before re-wearing. Wash separately from other laundry. **EYE PROTECTION:** Chemical tight goggles and full face shield.

## PHYSICAL AND CHEMICAL PROPERTIES

<b>Physical State:</b> Liquid	<b>Melting Point:</b> No Data	<b>pH:</b> No Data Basic
<b>Appearance:</b> Pale Yellow	<b>Vapor Pressure (mm Hg at 20°C):</b> No Data	<b>Specific Gravity:</b> 1.07
<b>Odor:</b> Mild amine	<b>Vapor Density (air = 1):</b> > 1.0	<b>Bulk Density:</b> No Data
<b>Odor Threshold:</b> No Data	<b>Solubility in Water:</b> Dispersible	<b>% Volatile by Volume:</b> 1
<b>Boiling Range:</b> No Data	<b>Solubility in Other:</b> No Data	<b>VOC (%):</b> 0.50
<b>Decomposition Temperature:</b> No Data	<b>Octanol/Water Partition Coefficient:</b> No Data	<b>Viscosity:</b> No Data

## STABILITY AND REACTIVITY

**Chemical Stability:** Stable under normal conditions. Unstable at elevated temperatures and pressures, or may react with water or acids with some release of energy, but not violently. **Conditions to Avoid:** Avoid contamination with acidic materials, heat, direct sunlight, ultraviolet radiation, strong oxidizing conditions and freezing conditions. Incompatibility: Acidic materials, anhydrides and strong oxidizers. Hazardous polymerization: May occur if mixed with acidic material. Hazardous decomposition products: Oxides of carbon and nitrogen.

## TOXICOLOGICAL INFORMATION

**Regulated Carcinogen(s):** This product contains no components present at concentrations equal to or greater than 0.1% listed by IARC, OSHA, NTP or ACGIH as a carcinogen. **Mutagenicity:** Polyfunctional aziridine: Positive mutagenicity activity has been reported on the aziridine compounds. ( However, mutagenicity is negative at 2% concentration used in Scuffmaster coating applications. )

## ECOLOGICAL INFORMATION

**ECOTOXICITY:** No Data.

**Environmental Fate:** No Data

**Other:** No Data

**DISPOSAL METHOD**

Disposal Method: Discarded product is not a hazardous waste under RCRA, but may be regulated by other jurisdictions. Incinerate in approved facility. Do not incinerate in closed containers. Dilute with clean, low viscosity fuel. Untreated material should not be released to the environment. Container Disposal: Empty container retains potentially hazardous residue. Observe all hazard precautions. May contain corrosive material. Do not distribute, make available, furnish or reuse empty container except for storage and shipment of original product. Remove all product residue from container and puncture or otherwise destroy empty container before disposal.

**REGULATION**

Not regulated by the US DOT.

**RUGULATION 2**

**TSCA ( Toxic Substances Control Act ):** All ingredients are on the TSCA Chemical Substances Inventory. **SARA Title III ( Emergency Planning and Community Right-To-Know Act ):** 313 Reportable ingredients: This product does not contain any chemical subject to the reporting requirements of SARA Section 313. **California Proposition 65 WARNING.** This product contains a chemical known to the State of California to cause cancer. **Product Use:** Resins for coatings applications. This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations (CPR) and the MSDS contains all of the information required by the CPR. **WHMIS Classifications:** Class D – Division 2A – Very Toxic & Class D – Division 2B – Toxic. **California Proposition 65:** NONE.

---

**Disclaimer:** The information in this MSDS was obtained from sources we believe are reliable. However, the information is provided without any representation or warranty, expressed or implied, regarding its accuracy or completeness. **The conditions or handling, storage, use and disposal of the product** are beyond our control and may be beyond our knowledge. For this and other reasons, we do not assume responsibility and expressly disclaim liability for loss, damage or expense arising out of or in any way connected with the handling, storage, use or disposal of this product. **Disposal of containers** should be in accordance with applicable federal, state and local laws and regulations.

---

Resilient Base

Issue Date: 28 JUL 2017

Revision Date: 14 FEB 2019

Item Name: Wall Base

Description: Resilient rubber wall base; Straight / Toeless profile

Manufacturer: Johnsonite

Product #: DCT4"

Color: 179 Steel

Dimensions: 4" H / 0.125" thickness

Lengths: 4' straight lengths and 100' coiled lengths

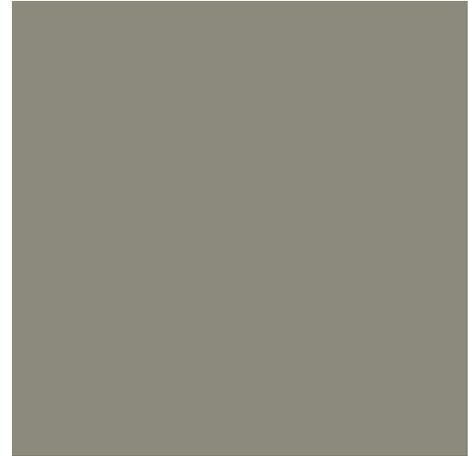

Corners: Will not crack, break or show any signs of fatigue when bent around a 1/4" (6.4 mm) diameter cylinder.

Quality Standards: ASTM D 2240: Rubber-85 Shore A; Vinyl-90 Shore A  
ASTM E 648 / NFPA 253 (Critical Radiant Flux) - Class 1

Lead Time: Standard lead times are 2-3 weeks from receipt of Purchase Order and Deposit. Lead time is typical and should be verified by the manufacturer.

Warranty: Limited 1 year warranty

Note: Please reference National Pricing Number 04/21/2014 - 10541 as well as the Property Number and Location when ordering this product to obtain the program price.

## Resilient Flooring

Item Name	Fitness Flooring
Description:	Woven vinyl flooring
Manufacturer:	BOLON
Product:	<b>Bolon Botanic</b>
Color:	<b>Kale</b>
Content:	Vinyl with 2% polyester and fiberglass mesh
Backing:	Vinyl backing with polyester and fiberglass mesh (recycled content varies)
Roll Size:	<b>19.65"x19.65" tile</b>
Thickness:	<b>2.4 mm overall</b>
Layout:	<b>See Plan</b>
Cushion:	Underlayment optional. Refer to specification RF-003.
Weight:	0.78-0.80 LB
Slip Resistance:	<b>&gt;0.3</b>
Quality Standards:	ASTM E648 Class I ASTM E662 Pass
Lead Time:	Standard lead time is 4 weeks upon receipt of Purchase Order and Deposit. Lead time is typical and should be verified by the manufacturer.
Warranty:	15 years
Eco-Feature(s) *as per manufacturer:	LEED Certified, 100% Recycled Content

Tectum® Direct-Attach ceiling and wall panels provide durable, sustainable, acoustical options for a wide variety of applications.

**KEY SELECTION ATTRIBUTES**

- Now, long edges beveled, short edges beveled available as a standard option
- Durable for heavy-use interiors
- Great retrofit solution for noise reduction
- Excellent noise absorption – NRC up to 0.85
- Tectum® 1" panels are part of the Sustain™ portfolio and meet the most stringent sustainability standards today
- Can be field painted up to six times without impacting acoustic or fire performance
- Wide variety of color options available, including made-to-order Colorations® colors and Sherwin-Williams® colors
- Can be mechanically fastened to a wide variety of surfaces including masonry, drywall, wood, and more

**TYPICAL APPLICATIONS**

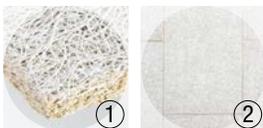

- Gymnasiums
- Auditoriums
- Multi-purpose Spaces
- Exposed Structures
- Acoustical Retrofits
- Education Spaces

**COLORS** Due to printing limitations, shade may vary from actual product.

Note: Colorations® colors and panels greater than 1" thick are not included in Sustain™ portfolio.

**DETAILS**

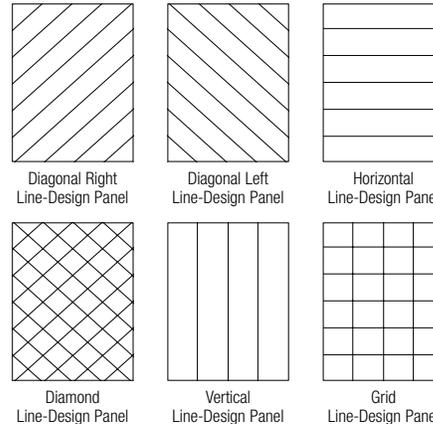

1. Tectum® Direct-Attach Panel in White
2. Tectum® Direct-Attach Panels in White

Note: Panel edges are unfinished.

**LINE DESIGN CAPABILITIES**

Available through special order.

## ACCESSORIES

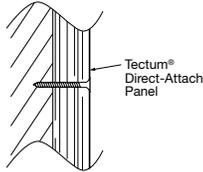

Item No. ◆	Description	Quantity
<b>8187L16</b> ___	#6 x 1-5/8" Painted Head – Sharp point Screws	1000/ctn
<b>8188L16</b> ___	#6 x 1-5/8" Painted Head – Drill point Screws	1000/ctn
<b>8189L22</b> ___	2-1/4" Painted Head – CMU Screws	500/ctn

◆ When specifying or ordering, include the appropriate 3-digit color suffix TNA = Natural; TWH = White (e.g. 8187L16 IWH)  
Consult installation instructions for fastener guidance.

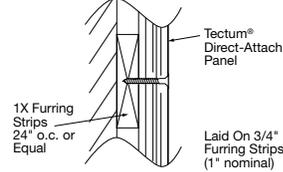

NOTE: Projects may require alternative screw lengths and types depending on site conditions. Please consult installation instructions for guidance.

## ACOUSTICAL MOUNTING METHODS

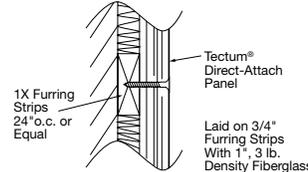

### Mounting A

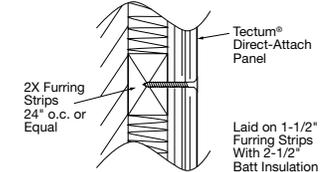

### Mounting D-20

### Mounting C-20

### Mounting C-40

## PHYSICAL DATA

### Material

Cementitious Wood Fiber; FSC®-certified (COC-003601). For more information about FSC®-certified fire-retardant products, or to view our FSC®-certification letter, contact TechLine at 1 877 276 7876.

### Surface Finish

Factory-applied latex paint with Silicate surface coating for abuse resistance. Natural is unpainted.

### Fire Performance

Class A per IBC. Flame Spread Index 25 or less and Smoke Developed Index 50 or less when tested in accordance with ASTM E84.

CAN/ULC S102 surface burning characteristics. Flame Spread Index of 25 or less and Smoke Developed Index of 50 or less (painted, face only).

### VOC Emissions

Third-party certified compliant with California Department of Public Health CDPH/EHLB/Standard Method Version 1.1, 2010. This standard is the guideline for low emissions in LEED®, CalGreen Title 24, ANSI/ASHRAE/USGBC/IES Standard 189; ANSI/GBI Green Building Assessment Protocol.

Tectum® panels meet CDPH guidelines in enclosed office at 50% wall coverage. View certificate details at armstrongceilings.com/tecum.

### Humidity/Sag Resistance

HumiGuard® Plus performance panels are recommended for areas subject to high humidity, up to, but not including, standing water and outdoor applications.

### Mold/Mildew Protection

Ceiling panels with BioBlock® performance resist the growth of mold and mildew.

### Installation Considerations

Panels must be mechanically attached to approved substrate per installation instructions. To achieve proper finished visual panels should be installed in an ashlar pattern. Four-sided beveled edge panels are recommended in adjoining panel installations.

Use caution and wear appropriate hand, eye, and dust mask protection when cutting and installing Tectum® panels. Refer to installation instructions for complete details and cutting recommendations.

### Primary (Embodied) Energy

See all LCA information on our EPDs.

LEED® is a registered trademark of the U.S. Green Building Council

Printed in the United States of America

### Application Considerations

Color variation among panels is common due to the natural characteristics of the wood on White and Natural panels.

Wood fibers may appear orange on Natural colored panels due to the characteristics of the wood.

### Design Considerations

For walls that may experience condensation or moisture, such as uninsulated exterior walls, D- or C- mounting is required to create a gap between the structure and the panel.

### Design Support

Project management assistance is available by calling TechLine at 1 877 276 7876.

### Seismic Restraint

Tectum Direct Attach panels are approved for application in all seismic areas when installed per Armstrong Ceilings Installation Instructions.

### Warranty

30-Year Warranty. Details at armstrongceilings.com

Cirrus® Beveled Tegular panels with Suprafine® 9/16" suspension system (Pgs. 287-288)

See more photos at:  
[armstrongceilings.com/photogallery](http://armstrongceilings.com/photogallery)  
 SEARCH: cirrus

Cirrus offers a medium-textured ceiling panel with excellent noise reduction and sound blocking for Total Acoustics™ performance in one product.

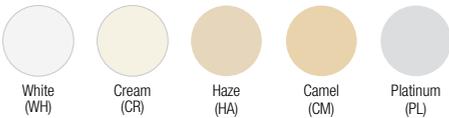

**KEY SELECTION ATTRIBUTES**

- Get total noise control and design flexibility with Total Acoustics™ ceiling panels: NRC + CAC = Total Acoustics™ performance
- Refined visual
- Excellent combination of acoustical performance: NRC (up to 0.75) and CAC (35)
- High NRC items feature Articulation Class (170) helpful to control sound over wall partitions
- Ceiling-2-Ceiling™ post-consumer recycled content options. Items 589HRC, 539HRC, 584HRC, 535HRC. 71% pre-consumer; 15% post-consumer
- USDA Certified Biobased Product – 94%

**TYPICAL APPLICATIONS**

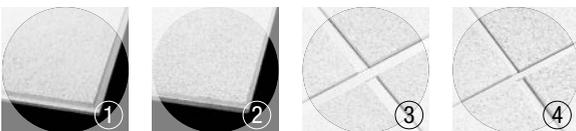

- Offices – closed spaces for privacy and confidentiality; open spaces for focus, collaboration, and teaming
- Healthcare – assists in addressing HIPAA, HCAHPS, and FGI acoustical requirements
- Conference rooms
- Lobbies
- Libraries/media centers
- Computer rooms

**COLORS** Due to printing limitations, shade may vary from actual product.

Items 584, 589 are available in colors. All other items are available in White only. Colored ceilings are dye-lotted and should be segregated by dye lot. Do not mix.

**DETAILS** (Other Suspension Systems compatible. Refer to listing on page 162.)

Armatuff® panels with Prelude® 15/16" suspension system (Pgs. 279-280)

A coarse-textured visual strong enough to withstand impact from non-deliberate contact

**KEY SELECTION ATTRIBUTES**

- Durable
  - Impact-resistant
  - Scratch-resistant
- Can be installed before building is enclosed
- 30-Year Limited System Warranty against visible sag, mold, and mildew

**TYPICAL APPLICATIONS**

- Corridors
- Locker rooms
- Auditoriums
- Gymnasiums
- Cafeteriums/multipurpose rooms

Armatuff damage-resistant panels will withstand impact from non-deliberate contact with volleyballs and basketballs normally found in gymnasium activities. The Retention Clips allow the panels to deflect slightly, absorbing the force of the impact, while still providing a mechanism to prevent the panels from being dislodged from the suspension system.

Tile Floor

Item Name	Floor Tile
Description:	Floor tile at Women's and Men's public restrooms, pool water closet, pool shower, guest laundry room, and employee bathroom
Manufacturer:	Iris Ceramics (Division of GranitiFiandre)
Product/Color:	Product: Urban Style Color: Cenere
Dimensions:	24" x 24"
Material:	Porcelain (through body)
Finish:	Honed
Recommended Grout:	Refer to Specification GR-003
Coefficient of Friction:	Dry 0.76 / Wet 0.61
Lead Time:	8 weeks
Warranty:	Warranty to cover products purchased for up to 12 months from the date of shipment.
Eco-Feature(s) *as per manufacturer:	Recycled Content = 40%

# SEQUENTIA®

Translucent Corrugated Panels

## SUPER 600®

Clear | 700

White | 920

Green | 1307

## WEATHERGLAZE®

Clear | 711

White | 912

Green | 933

## APPLICATIONS

- Patios
- Pool Enclosures
- Privacy Fences
- Carports
- Deck Covers

## PRODUCT INFO

**SUPER 600:**  
Enhanced Weathering FRP Panel  
UV Resistant Properties  
Smooth Finish  
Twenty Year Limited Warranty

**WEATHERGLAZE:**  
Standard FRP Panel  
Textured Look  
Ten Year Limited Warranty

**add coverage**

Sequentia Translucent Corrugated Panels are ideal for patios, pool enclosures, privacy fences, carports, greenhouses, decks and more. We offer a variety of products to meet the needs of residential applications.

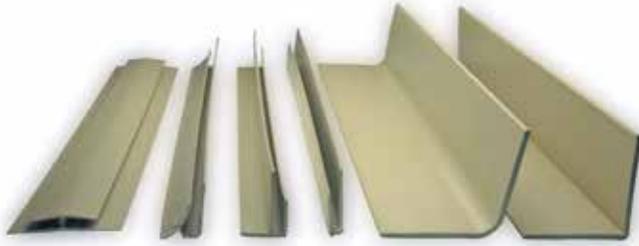

SEQUENTIA SUPER 600  
WHITE (920)

# ACCESSORIES

For Panel Installation

## VINYL/PVC MOLDINGS

Standard for SEQUENTIA Flat and Wide for SEQUENTIA Laminated

## SILHOUETTE TRIMS®

For VARIETEX Textures

## BEADED PANEL MOLDING

For VARIETEX Beaded Wall Panels

## CORRUGATED MOLDINGS

For SEQUENTIA Corrugated

## INSTALLATION TOOLS

Crane Composites wall panels are easy to install with our stocked accessories and tools.

Installation accessories include our Crane Fast Grab or Crane Advanced Polymer Adhesive, rollers and trowels along with detailed installation guides and videos. Visit [cranecomposites.com/resources.html](http://cranecomposites.com/resources.html) for detailed installation information.

Patterns and colors are a representation and may not accurately reflect the final product. Please obtain a sample of the product before making a final selection at [www.fpsamples.com](http://www.fpsamples.com)

## ABOUT CRANE COMPOSITES

Crane Composites Inc., a subsidiary of Crane Co. (NYSE:CR), is the world's leading provider of fiber-reinforced composite materials.

Since 1954, we have continued to pioneer numerous patented technologies for industrial and commercial product applications. We've built a proven reputation for industry leadership by partnering with customers and suppliers to deliver advanced, industry-leading solutions.

Our products and our team reflect our mission statement: We are a performance driven organization committed to global leadership and the production of high quality composite materials. And we are committed to profitable growth that benefits our employees and stakeholders by adhering to our high standards of Operational Excellence and our Crane Values.

Customers benefit not only from the outstanding performance characteristics of our products; they also realize value from our extensive product support program. Our expert product teams are focused on the needs of customers to provide unparalleled service and expertise.

SCALE: 4" = 1'-0"  
STANDOFF TYPE 1

SCALE: N.T.S.  
PANEL ELEVATION

SECTION

Please note: Since the substrate of each location that these panels may be attached to widely varies; Arktura cannot specify the hardware to be used to attach the standoffs into that substrate. The base building engineer should be contacted to obtain that information.

Note: As this is an expandable system - the closure panel can end at any panel. In other words, an A, B, C, and D set of panels could be ordered and the closure panel would attach to the right side of panel A and the left side of panel D or if it were just an A, B, C set of panels - it could attach to the left side of panel C.

Countertops

Item Name	Vanity Top Surface
Description:	Solid surface material at Men's Public Restroom vanity
Manufacturer:	3form
Material:	Optical grade engineered resin
Color:	Black Out E03
Finish:	Front: Renewable Matte Back: Matte
Thickness:	1/2"
Panel Size:	48" x 96"
Maintenance:	3form Chroma, like all thermoplastic materials should be cleaned periodically. A regular cleaning program will help to maintain the aesthetics and life of the material. 3form recommends the use of Countertop Magic, Novus® No. 1 and Brillianize® plastic cleaners. Rinse or wipe the sheet with lukewarm water. Remove dust and dirt from 3form Chroma with a damp, soft cloth or sponge and a solution of mild soap and/or liquid detergent in water. Rinse or wipe the 3form Chroma again thoroughly with lukewarm water. For more stubborn stains, dirty spots or grease, surface cleaners like Fantastik® or Formula 409® also work well. A scotch brite sponge can also help remove tough grease stains. After all cleaning steps, be sure to rinse thoroughly with lukewarm water. Always use a soft, damp cloth to blot dry. Rubbing with a dry cloth can scratch the material and create a static charge. Never use scrapers or squeegees on 3form Chroma. Also avoid scouring compounds, gasoline, benzene, acetone, carbon tetrachloride, certain deicing fluids, lacquer thinner or other strong solvents.
Lead Time:	Flat Sheets - 2 weeks Lead Time + Shipping Custom Made to Order - 6 weeks Lead time + Shipping
Warranty:	For a period of 1 year from the date of shipment, 3form warrants that the product will conform to the supplied specification and will be free of defined defects in materials and workmanship.
Eco-Feature(s) *as per manufacturer:	Chroma incorporates 38% recycled content* (29% pre-consumer, 9% post-consumer)

**SPECIAL INSTRUCTIONS**

1. Slabs shall contain a minimum of 93% quartz

2. Label of the manufacturer's name shall be permanently stamped on the underside of all countertops (engineered quartz, granite, milk glass, etc.) at least approximately every foot or so in run (or one direction) and at least every 2'-0" apart in the opposite direction. The intent is to guarantee that the label will appear on every top no matter how large or small in an accessible/readable location. As long as that is accomplished the guideline for measurements above is flexible.

3. Label to include percentage of quartz on engineered quartz tops.

Custom Net Shelving

No. RF-G-0531

Date 12/13/18

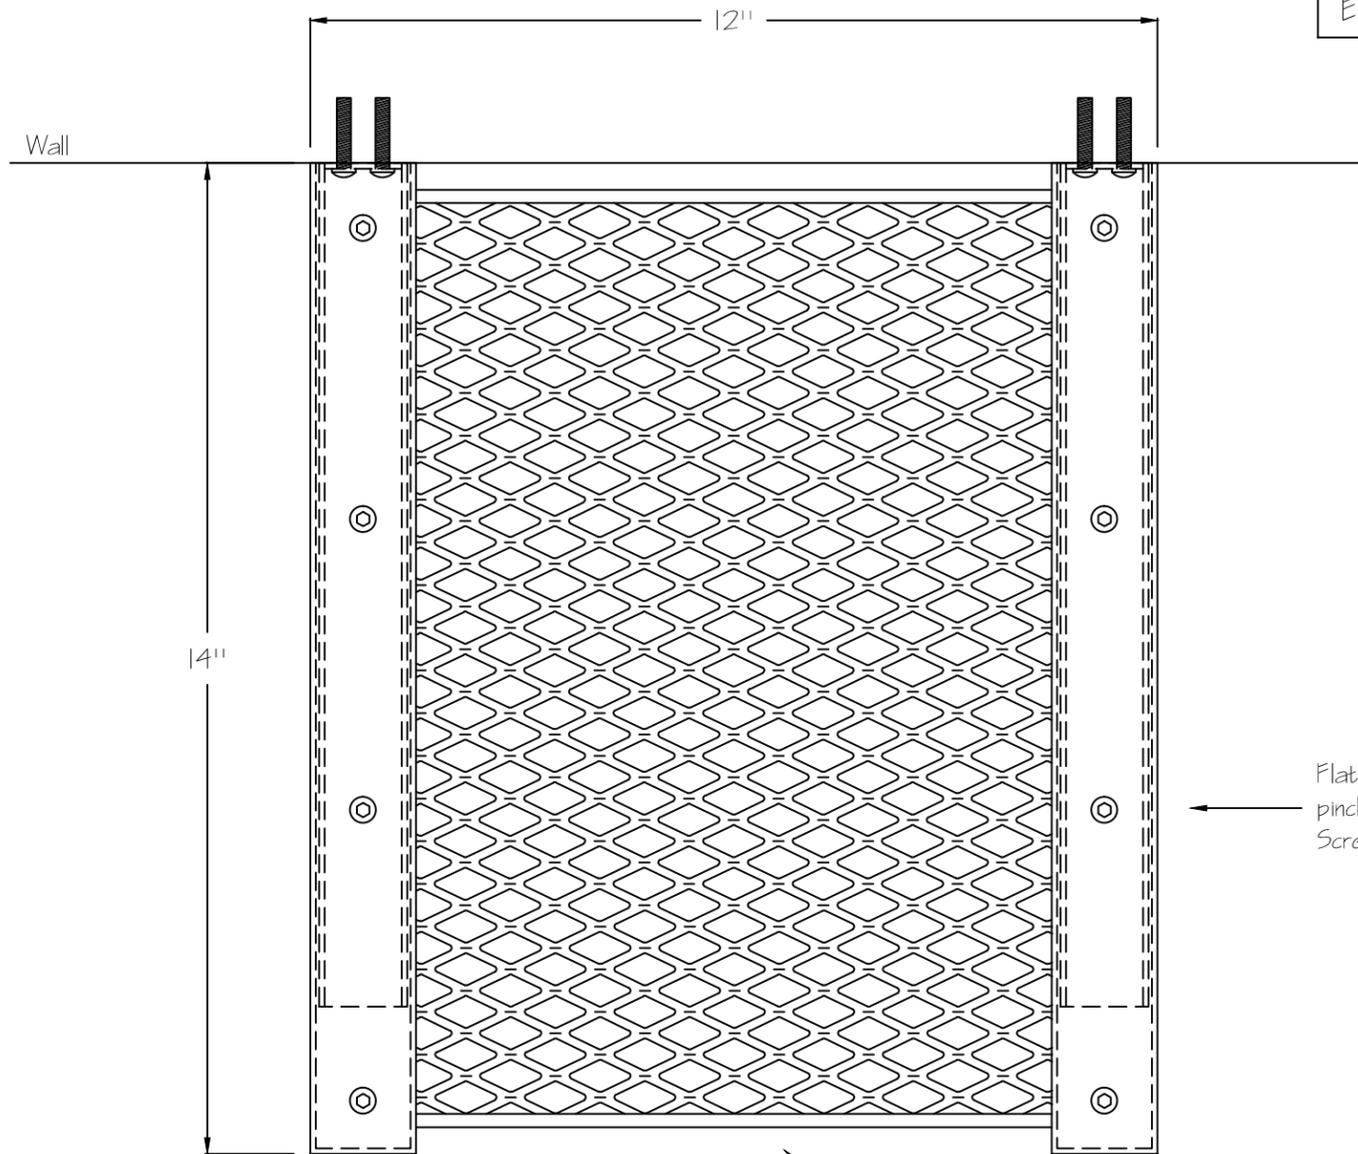

By MBC

Scale 3/8"=1"

PHONE: 540.342.1548 FAX: 540.342.1417 WEB: RCLFINC.COM

Renaissance reserves the right to make adjustments during fabrication to ensure product integrity, performance, and meet applicable UL standards.

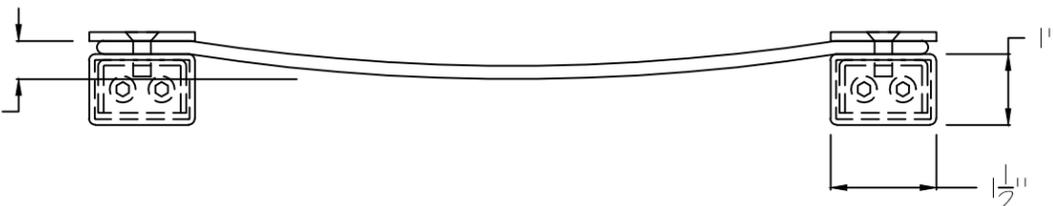

\* added notes to Powder Coat and Mounting Hardware \_MBC - 12.28.18

Shelf Arms are capped at ends, welds sanded smooth

Bungee Netting (12" Tan Diamond, # OBR-NET-12TAN) supported in front and rear with Bungee Cord (3/16" dia Tan, # OBR-BUNG316TAN)

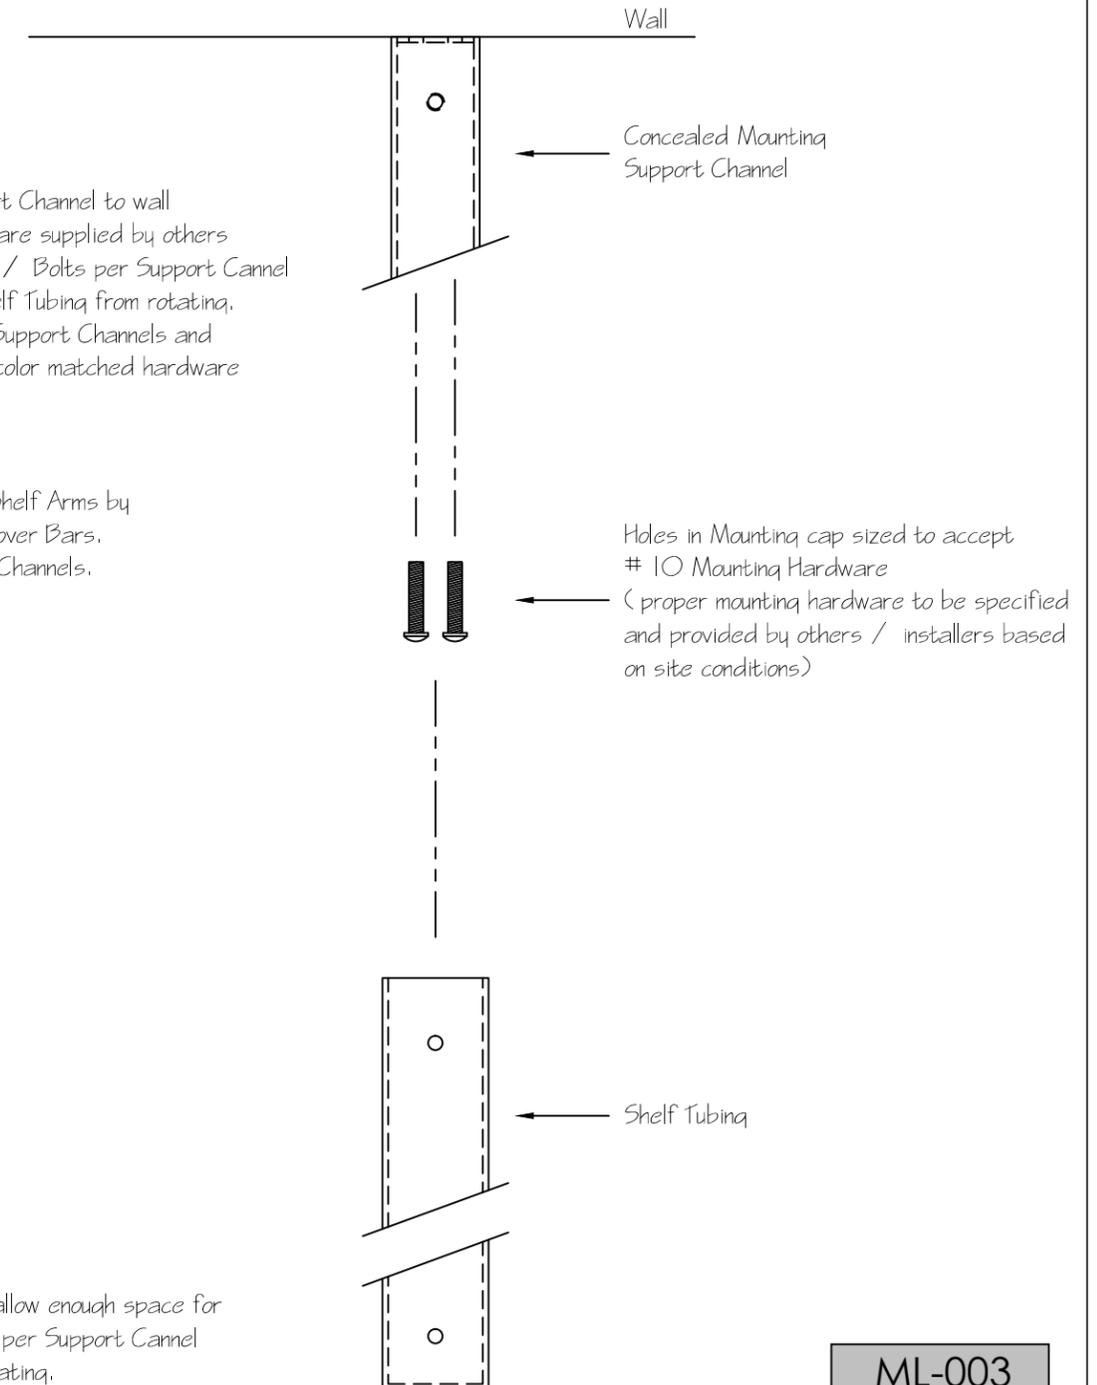

Approx 1/2" slack when Arms are spaced and mounted as shown.

### Installation

- Mount Concealed Support Channel to wall using appropriate hardware supplied by others
- \* (2) Mounting Screws / Bolts per Support Channel required to prevent Shelf Tubing from rotating.
- Slide Shelf Tubing over Support Channels and secure using provided, color matched hardware

Flathead Screws secure Netting to Shelf Arms by pinching netting between Arms and Cover Bars. Screws also secure Arms to Support Channels.

Rectangular Tubing required to allow enough space for (2) Mounting Screws / Bolts per Support Channel to prevent Shelf Tubing from rotating.

### Technical Information

All product dimensions are nominal.

- Bowl configuration: Single
- Installation: Wall-mount
- Bowl area (Only)
  - Length: 18" (457 mm)
  - Width: 13" (330 mm)
  - With overflow: Yes
  - Water depth: 4-7/8" (124 mm)
- Bowl area
  - With overflow: Yes
- Number of deck holes: 1
- Faucet hole(s): 1-3/8" (35 mm)
- Drain hole: 1-3/4" (44 mm)

### Notes

- Install this product according to the installation instructions.
- ADA, OBC, CSA B651 compliant when installed to the specific requirements of these regulations.

# MOLDED-STONE® MOP SERVICE BASIN

PL-105

Revision Date:

## MSB 2424 MSB 3624

### Molded-Stone® Mop Service Basin

## FEATURES

- **MSB 2424**

The MSB 2424 shall have overall outside dimensions of 24" x 24" x 10". The molding shall be done in matched metal dies under heat and pressure resulting in a one-piece homogeneous product. The unit shall have 10" high walls with not less than 1" wide.

The stainless steel drain body is designed to provide for a caulk connection or QDC-3 joint to a 3" drain pipe. A combination dome strainer and lint basket made from stainless steel shall be included with factory installed stainless steel drain body for caulked joint to accept a 3" pipe.

- **MSB 3624**

The MSB 3624 shall have overall outside dimensions of 36" x 24" x 10". The molding shall be done in matched metal dies under heat and pressure resulting in a one-piece homogeneous product. The unit shall have 10" high walls with not less than 1" wide shoulders and an integrally molded shelf 10 5/16" wide where indicated.

The stainless steel drain body is designed to provide for a caulk connection or QDC-3 joint to a 3" drain pipe. A combination dome strainer and lint basket made from stainless steel shall be included with factory installed stainless steel drain body for caulked joint to accept a 3" pipe.

## NOTES

## OPTIONS

- *Service Faucet (830-AA):* Chrome plated with vacuum breaker, integral stops, adjustable wall brace, pail hook and 3/4" hose thread on spout.
- *Hose and Hose Bracket (832-AA)*
- *Mop Hanger (889-CC)*
- *Alternate Strainer (1453-BB) - For residential use (EFS-3624 and EFS-2424)*
- *3" Quick Drain Connector (QDC-3XH):* Neoprene connecting gasket suitable for attaching extra heavy cast iron soil pipe and Schedule 40 steel pipe to the drain body. Neoprene connecting gasket (QDC-3SN) suitable for attaching hubless cast iron pipe (no hub, nominal O.D. of 3.31") and service weight cast iron soil pipe (nominal O.D. of 3.38") to the drain body.
- *Silicone Sealant (833-AA)*
- *Vinyl Bumperguard (E-77-AA)*
- *Stainless Steel Bumperguard (E-88-AA)*
- *Stainless Steel Wall Guard (MSG2424, MSG2828, MG3232, MSG3636, and MSG3624)*

**Design features:**

- High strength, one piece molded construction
- Produced with Mustee's proprietary structural thermoplastic resins and innovative cellular molding process creating extreme strength & durability
- Includes Twin-Drain Waste connector which joins drain assemblies to assure rapid and uniform waste water discharge...includes washers, slip nuts and stoppers.
- Divider wall between tubs is recessed one inch, permitting water to overflow from one tub to other, prevents water spilling onto floor.
- Large, self-draining back shelf with retainer curb that prohibits water run-off except into tub.
- 19 Gallon capacity per tub, extra deep 13" tubs with smooth surfaces
- Connects to standard 1½" P or S trap
- Accommodates single or dual-handle faucets. 4" or 8" centers
- Floor model includes heavy gauge steel legs with adjustable levelers
- Wall model includes wall mounting bracket, side supports and mounting hardware for securing tub to concrete or stud wall
- Mold and mildew-resistant components
- Easy to assemble and install
- Color-fast white finish

**Code Accepted:**

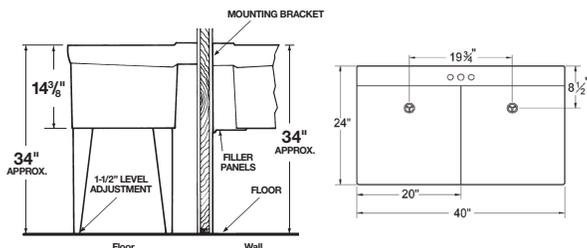

UTILATUB® and UTILATWIN® Laundry/Utility Tubs meet or exceed performance requirements as listed:

- International Association of Plumbing and Mechanical Officials (IAPMO)® Listed
- Warnock Hersey® (Canada) Listed—CSA test standards: Laundry Tray - #B45.0 and #B45.5; Drain - #B125
- American National Standards Institute (ANSI)—Specification Z 124-2011

**General:** Furnish and install as shown on plans, UTILATWIN® Twin Laundry/Utility Tub model \_\_\_\_ (27F, 27W), as manufactured by E.L. Mustee & Sons, Inc. Tub shall be one-piece molded construction using structural thermoplastics with matched metal molds under extreme heat and pressure. Tub to include integrally molded drains, twin drain waste coupling, recessed divider wall between tubs and twin drain assembly for connection to standard 1-1/2" P or S-trap, stoppers and wall mounting hardware or heavy gauge steel legs with built-in levelers. 19 gallon capacity per tub, each tub 13" deep. Shall meet ANSI Z 124-2011. Color: White. Weight: 27F 40 lbs.; 27W 40 lbs.

► **Faucet**

**Model No.**

93.600

**UPC**

6 71031 00232 7

Chrome finish, 4" center set brass faucet. 7" swing spout with aerator, level handles, replaceable seats and stems. Aerator or hose end.

► **Faucet Block**

**Model No.**

20.600

**UPC**

6 71031 00031 6

Used when water supply lines are above the tub. Mounts to tub shelf when using a clamp-on faucet.

► **HandiFlo™ Fitting**

**Model No.**

94.700

**UPC**

6 71031 00287 7

Dispenses water from washing machine discharge hose into laundry tub. Eliminates draping washer machine hose over back/side wall of laundry tub and conceals discharge hose. Mounts to back or side wall of laundry tub, includes mounting hardware.

## Features

- Solid brass construction ensures durability and reliability.
- KOHLER finishes resist corrosion and tarnishing, exceeding industry durability standards over two times.
- Without overflow.
- For use in non-overflow applications.

**LAV GUARD<sup>2</sup>**  
FAST FIT UNDERSINK PIPING COVERS

PL-110  
Revision Date:

ADA-compliant undersink protection

# Submittal Sheet

## General Description:

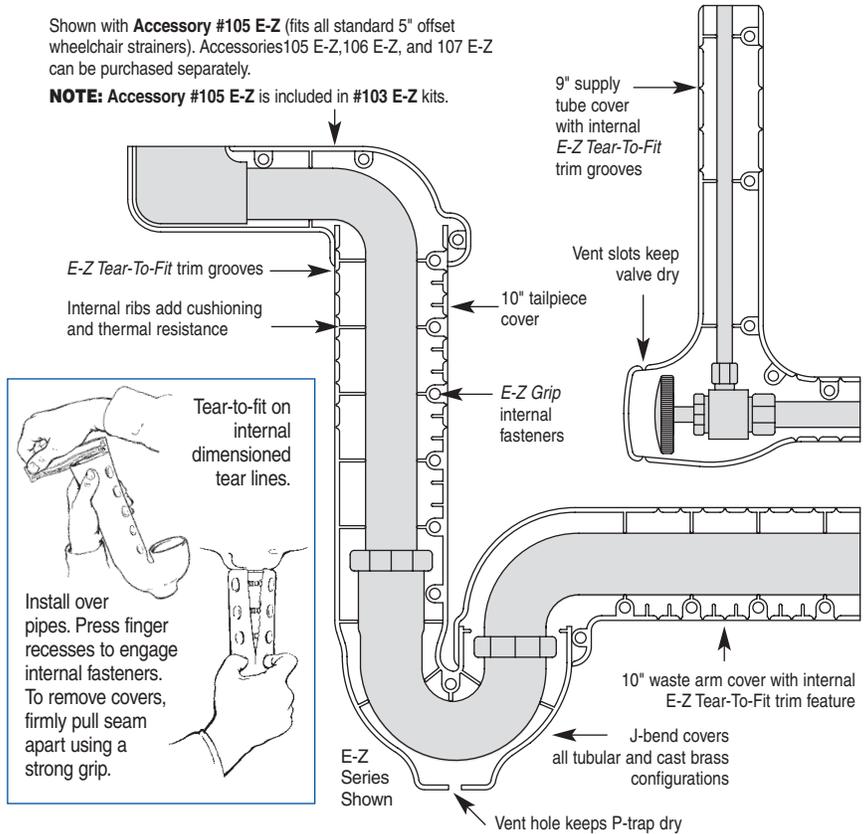

LAV GUARD<sup>2</sup> E-Z Series waste and supply piping covers satisfy ADA compliance requirements. Built-in *E-Z Grip* internal fasteners and internal, *E-Z Tear-To-Fit* trimming feature allow for fast installation without tools. *Series #100 E-Z* kits are designed to fit on all tubular and cast brass P-trap assemblies. *Series #400* kits are the "original" LAV GUARD design and fit schedule 40 ABS and PVC P-trap assemblies — regardless of their geometry or rotational offset. Valve cover completely encloses angle valve and supply tube for both handled and keyed type water stops.

Material	Molded vinyl
Nominal Wall	1/8" constant
Durometer	70 - 80 - Shore A
UV Protection	Will not fade or discolor
Durability	Virtually indestructible
Trimming (E-Z Series)	Internal, <i>E-Z Tear-To-Fit</i> trim feature
Fasteners (E-Z Series)	Internal <i>E-Z Grip</i> fasteners (reusable)
Color	China white
Paintability	Apply Latex paint
Burning Characteristics ASTM D-635	Self extinguished 0 sec (ATB) 0 mm (AEB)
Bacteria/Fungus Resistance	ASTM G21 and G22/ Result: 0 growth
Maintenance	Use common detergents

Revision Date:

Bathroom Sink Bracket Kit  
K-9583

**Technical Information**

All product dimensions are nominal.

### Features

- 0.5 gal/min (1.9 l/min) flow rate.
- Factory set 30 second max. continual run cycle.
- Vandal-resistant aerator.
- 24" (610 mm) flexible supply hoses for easy installation.
- 6-3/16" (157 mm) spout reach.
- Less temperature mixer.
- Less drain.

### Material

- Brass construction.

### Technology

- Includes 30-year Hybrid Energy Cell.
- Electronic Insight™ Sensor Technology for accurate and consistent activation.

### Installation

- Single-hole mounting.
- Above-counter valve for easy installation and maintenance.

----	-----------------

### Technical Information

All product dimensions are nominal.

Valve body: Machined Brass

### Faucet:

Flow rate: 0.5 gal/min (1.9 l/min)

Power source: 3.6V Size C (Hybrid Energy Cell), included

### Notes

Install this product according to the installation guide.

A 1-1/4" (32 mm) minimum to 1-1/2" (38 mm) maximum diameter mounting hole is required.

The minimum distance between the back of the faucet spout and the wall must be 1-3/4" (44 mm). This will allow proper clearance for setscrew access.

The maximum distance between the bathroom sink basin edge to the base of the faucet spout must be 1-3/4" (44 mm).

The maximum height of the lip basin should be 3/4" (19 mm).

Product includes rosebud spray aerator. Other aerator styles are available.

ADA, OBC, CSA B651 compliant when installed to the specific requirements of these regulations.

# Service-Sink Faucet

## Model: 830-AA

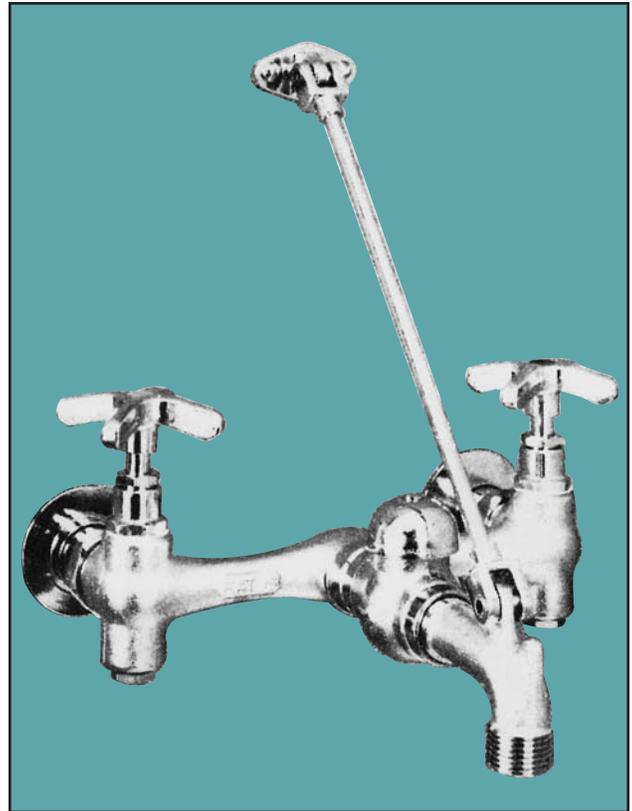

FRONT VIEW

SIDE VIEW

**NOTE:** These roughing measurements may vary 1/4" (plus or minus).

**General:**

830-AA Service Faucet - Chrome plated with vacuum breaker, integral stops, adjustable wall brace, pail hook and 3/4" hose thread on spout. Body inlets 8" center to center, four arm handles. Valves contain renewable hub, renewable seats, swivel discs, encased washers and brass washer screws.

**Material:  
Finish:**

Commercial red brass alloy casting-rough finish.

Chrome plating exceeding requirements of ANSI/ASTM B-456-71. Indicators cold (blue) and hot (red) are included.

**Specifications  
and  
Codes:**

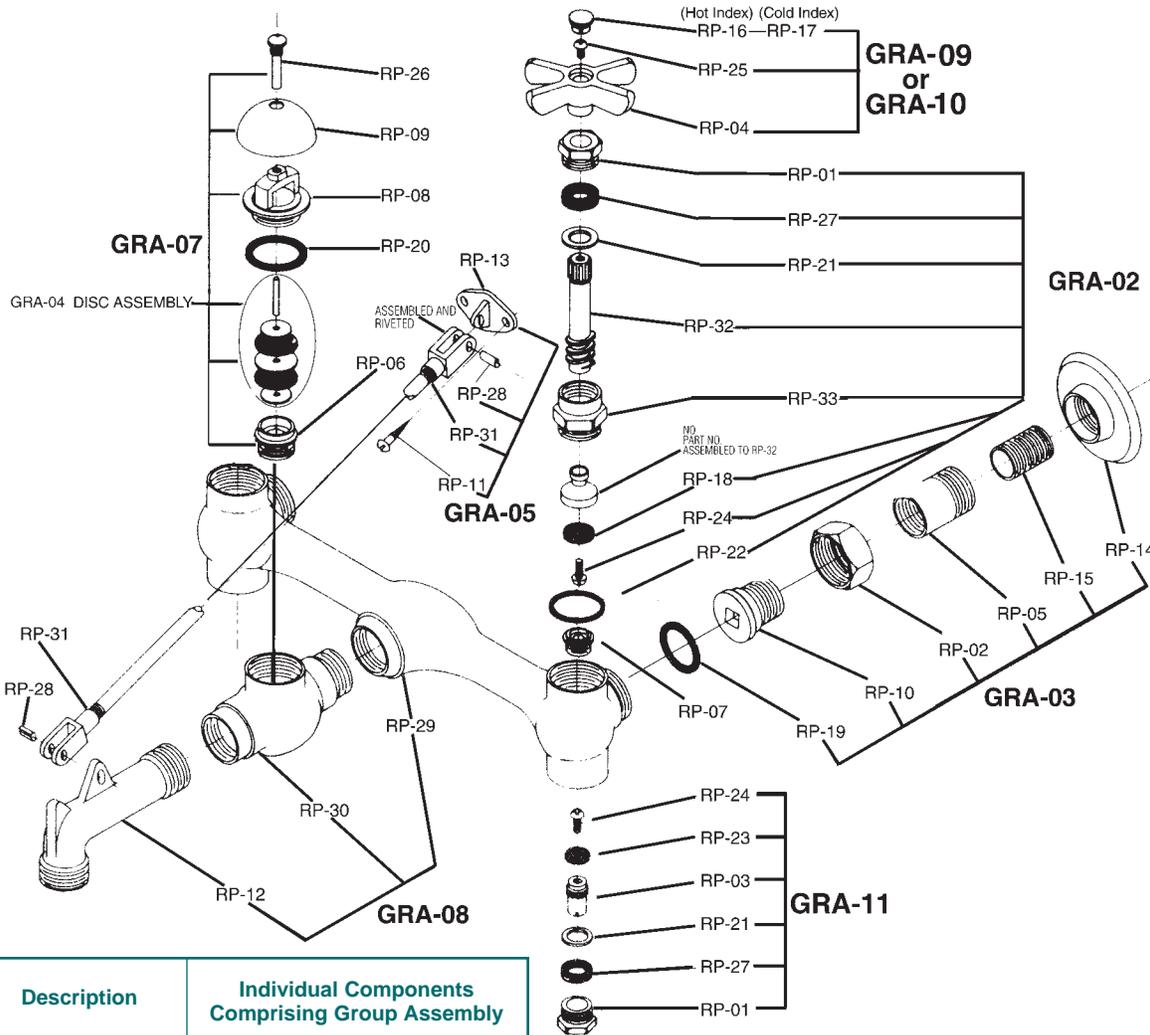

In the U.S.A., meets or exceeds requirements of ANSI-A112.18.1M-1979 for "Finished and Rough Brass Plumbing Fixture Fittings." In Canada, meets or exceeds the requirements of CSA standards B125 - "Plumbing Fittings," B64.1.1 - "Vacuum Breakers - Atmosphere Type" and B64.0 - "General Requirements for Backflow Preventers and Vacuum Breakers," and is approved under Product Class No. 6811 01 under Report #LM57412-1. Conforms to ASSE 1001.

## FAUCET DESCRIPTION

- Brass construction, rough chrome finish
- Integral vacuum-breaker
- 3/4" Garden hose threaded spout
- 1/2" IPS eccentric connections
- "Service stops"
- "Wall mounting bracket"
- Vandal resistant torx head screws

## OPERATION

- Lever style handles with hot and cold color indicators

## FLOW

- Unrestricted

## CARTRIDGE

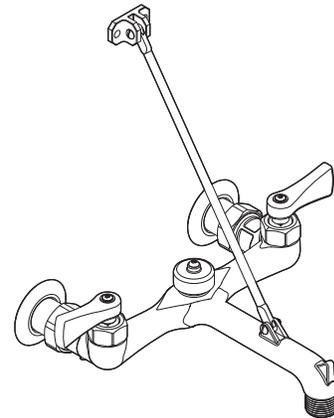

- Brass shell ceramic disc cartridge
- 1/4 turn operation

## STANDARDS

- Third party certified by IAPMO and CSA to meet ASME A112.18.1M and all applicable specifications referenced therein
- ADA for lever handles

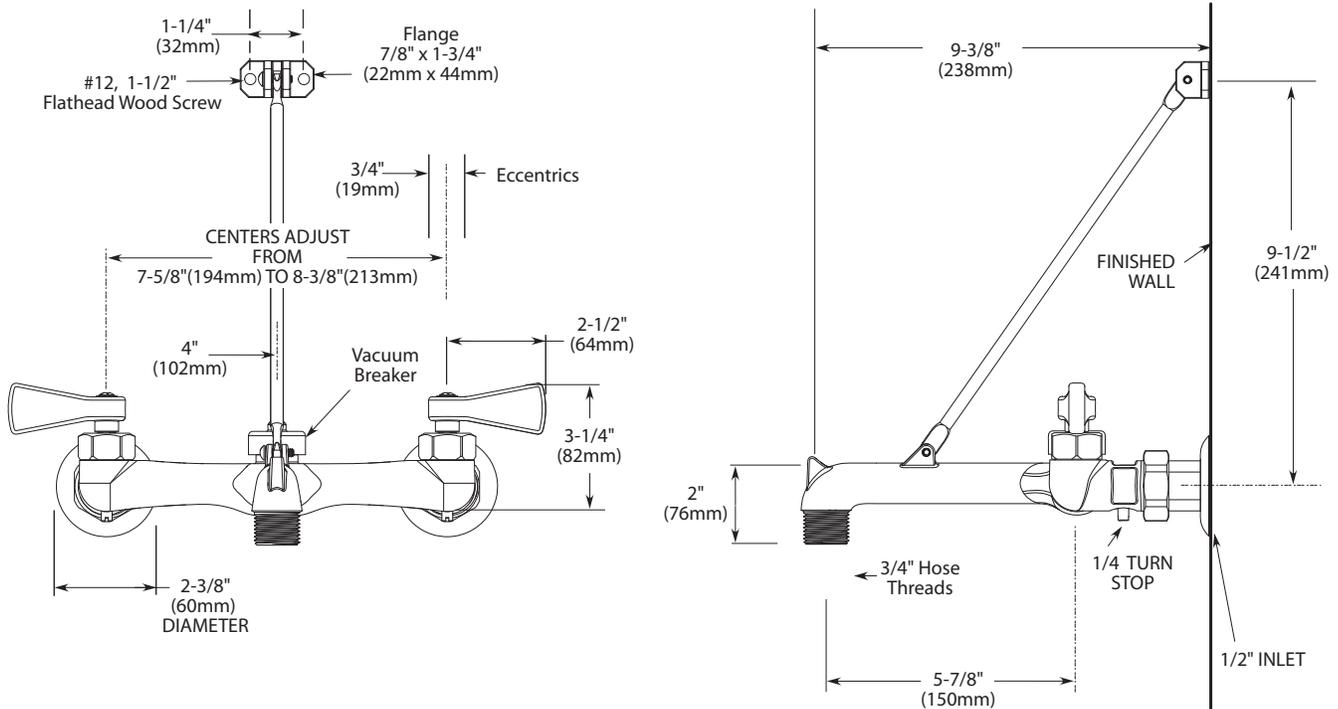

## WARRANTY

- Warranted for 5 years against material or manufacturing defects

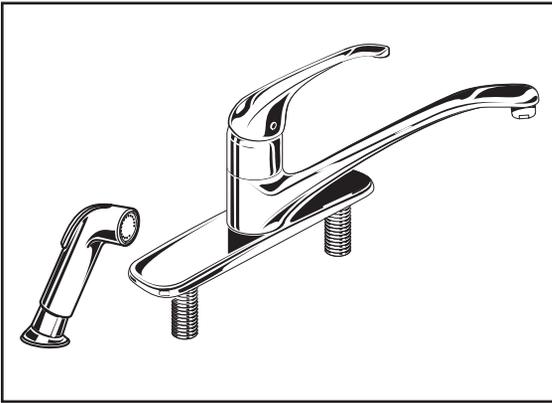

**Two-Handle Service Sink Faucet**

**Model: 8230 (Chrome)**

## CRITICAL DIMENSIONS

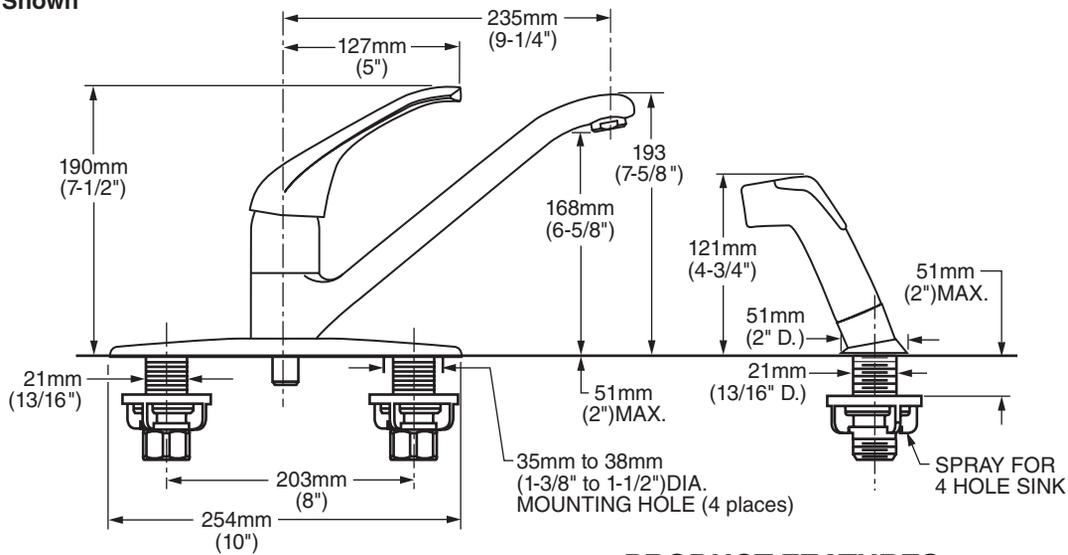

(DO NOT SCALE)

4205.001 Shown

**MODEL NUMBER:**

- 4205.001 Kitchen Faucet**  
Metal Lever Handle. Separate color-matched handspray.
- 4205.001.F15 Kitchen Faucet**  
Same as above. 1.5gpm flow rate.
- 4205.000 Kitchen Faucet**  
Metal Lever Handle. Less handspray.
- 4205.000.F15 Kitchen Faucet**  
Same as above. 1.5gpm flow rate.

**GENERAL DESCRIPTION:**

Washerless 47mm ceramic disc valve cartridge with integral hot limit safety stop. Cast brass waterway with 1/2" male inlet shanks. Cast brass 9-1/4" (235mm) swivel spout, metal escutcheon plate (escutcheon size 10" L x 2-5/16" W), and metal handle. 2.2gpm/8.3L/min. maximum flow rate, 1.5gpm/5.7 L/min. maximum flow rate for F15 models.

**PRODUCT FEATURES:**

- Ceramic Disc Valve Cartridge:** Assures a lifetime of drip-free performance.
- Cast Brass Waterway, Cast Brass Spout:** Highest quality faucet materials for durability and long life.
- Higher and Longer Spout:** Spout designed to allow more room under spout and extended reach into the sink.
- Memory Position Valving:** Allows user to turn valve on and off at preferred temperature setting without readjusting handle position each time.
- Adjustable Hot Limit Safety Stop:** Limits the amount of hot water allowed to mix with cold. Reduces the risk of accidental scalding.
- Lead Free:** Faucet contains ≤ 0.25% total lead content by weighted average.
- Simple Installation:** Fast and easy one person installation. Faucet drops in from top. Quick-spin nuts secure faucet in place.

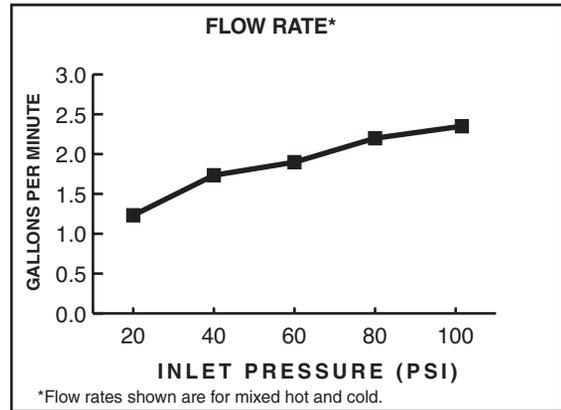

**SUGGESTED SPECIFICATION:**

Single control kitchen faucet shall feature a cast brass body and swivel spout, and all metal handle. Shall also feature washerless 47mm ceramic disc valve cartridge with integral hot limit safety stop. Fitting shall be American Standard Model # 4205.00\_\_\_\_.

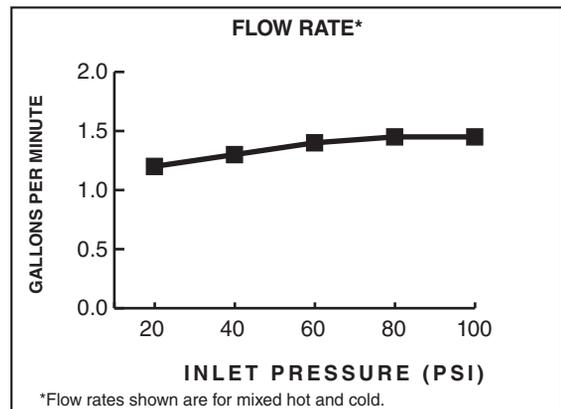

**CODES AND STANDARDS**

4205.001	Kitchen faucet. Cast brass waterway with 1/2" male inlet shanks. Separate handspray.	
4205.001.F15	Same as above. 1.5gpm/5.7 L/min. flow rate.	
4205.000	Kitchen faucet. Cast brass waterway with 1/2" male inlet shanks. Less handspray.	
4205.000.F15	Same as above. 1.5gpm/5.7 L/min. flow rate.	

 Meets the American Disabilities Act Guidelines and **ANSI A117.1** Requirements for the physically challenged.

► **Faucet**

Model No.	UPC
93.600	6 71031 00232 7
Chrome finish, 4" center set brass faucet. 7" swing spout with aerator, level handles, replaceable seats and stems. Aerator or hose end.	

► **Faucet Block**

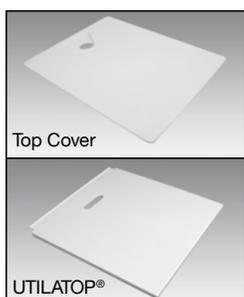

Model No.	UPC
20.600	6 71031 00031 6
Used when water supply lines are above the tub. Mounts to tub shelf when using a clamp-on faucet.	

► **HandiFlo™ Fitting**

Model No.	UPC
94.700	6 71031 00287 7
Dispenses water from washing machine discharge hose into laundry tub. Eliminates draping washer machine hose over back/side wall of laundry tub and conceals discharge hose. Mounts to back or side wall of laundry tub, includes mounting hardware.	

► **Top Cover / UTILATOP®**

Model No.	UPC	Fits
92.200 Top Cover (White)	6 71031 00292 1	91 & 94 DURATUB®
92.206 Top Cover (Almond)	6 71031 00401 7	91AL
92.201 Top Cover (Biscuit)	6 71031 00402 4	91BT
19.204A UTILATOP® (White)	6 71031 00380 5	19F, 19W, 18F, 18W

Completely covers tub to create additional counter space. UTILATOP® supports up to 40 lbs.

## EC-3101

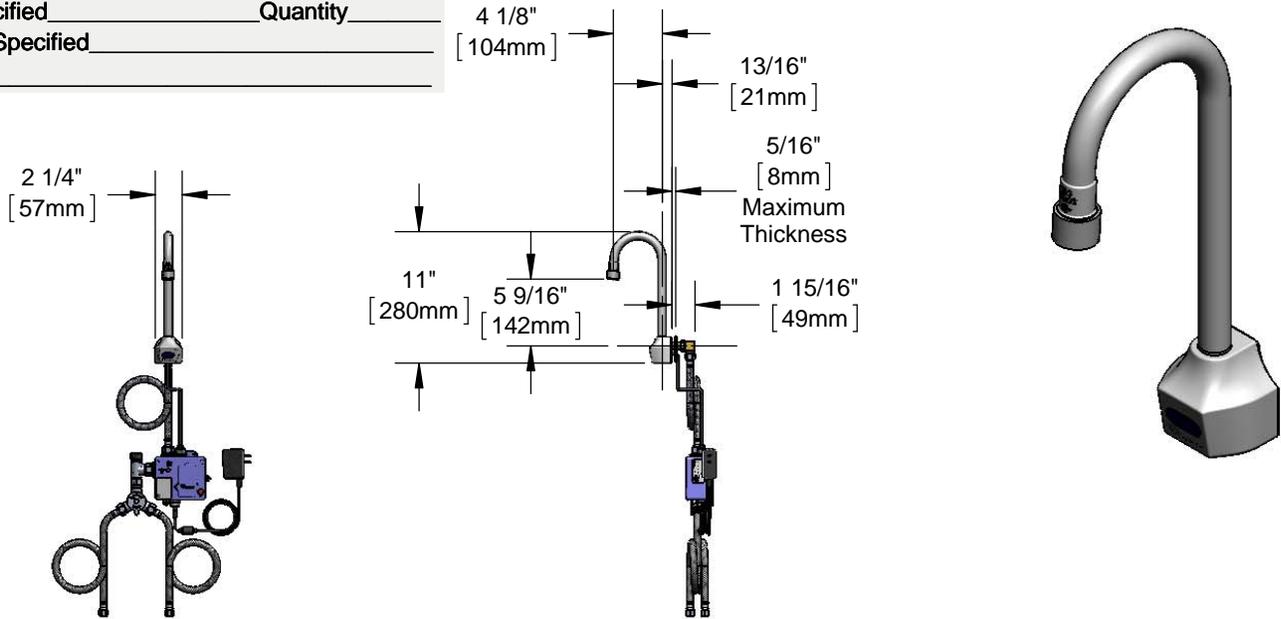

**TAG:** PL-207  
Revision Date:

### Architect/Engineering Specifications:

Single hole wall mount electronic sensor faucet with polished chrome plated brass body and 4 1/8" rigid gooseneck, 2.2 GPM vandal resistant aerator, AC/DC control module with internal flow control setting switches, temperature control mixing valve with check valves and 18" flexible stainless steel supply hoses with 3/8" compression connections. Certified to ASME A112.18.1/CSA B125.1, NSF 61-Section 9, NSF 372 and UL 1951. Meets ADA ANSI/ICC A117.1 requirements.

Job Name \_\_\_\_\_  
 Model Specified \_\_\_\_\_ Quantity \_\_\_\_\_  
 Variations Specified \_\_\_\_\_  
 Date \_\_\_\_\_

### Features & Benefits:

- Single hole wall mount faucet w/ polished chrome plated brass body
- 4 1/16" rigid gooseneck
- 2.2 GPM vandal resistant aerator, Series 6 (B-0199-06)
- Water resistant control module w/ internal flow control switches for adjusting auto time out & shut off delay settings
- Optional auto flush feature flows water for 30 seconds after every 12 inactive hours
- Plug in AC transformer or (4) AA battery (DC) power options
- Mechanical temperature mixing valve w/ check valves
- Two flexible stainless steel supply hoses w/ 3/8" compression connections
- Low battery LED indicator light
- Material: Polished chrome plated brass body and tubular spout

### Product Compliance:

- ASME A112.18.1 / CSA B125.1
- NSF 61 - Section 9
- NSF 372 (Low Lead Content)
- ANSI A117.1 (ADA)
- UL 1951

**Warranty:** Three Year (Limited)

### Performance Data:

- Pressure: 20 - 125 psi
- Temperature: 40°F - 140°F
- Flow Rate: 2.2 GPM @ 60 psi
- Water Consumption: @ 10 sec = .37 gal  
@ 15 sec = .55 gal

ADA Compliant

## Features

- 0.5 gal/min (1.9 l/min) flow rate.
- This is trim set only. It requires valve kit to complete the faucet.
- Vandal-resistant aerator.
- 9" (229 mm) spout reach.
- Less drain.
- Safe Drinking Water Act (SDWA- Low Lead) compliant.
- On demand on and off. Valve kit is factory set to 30 second max. continual run cycle if it turned on continuously.

## Material

- Brass construction.

## Technology

- Valve kit has electronic Insight™ Sensor Technology for accurate and consistent activation.
- This trim set can be used with 11830-NA (Hybrid power) wall mount valve or 11843-NA (AC Power) wall mount valve.

## Installation

- Single-hole spout mounting. Please consider appropriate distance between spout and sensor.
- Below the counter valve for easy installation and maintenance.

## Wall-Mount Bathroom Faucet Trim K-T11839

### Technical Information

All product dimensions are nominal.

#### Faucet:

Flow rate: 0.5 gal/min (1.9 l/min)

Pressure: 60 psi (4.1 bar)

### Notes

Install this product according to the installation guide.

The sensor roughing-in allows for installation to a back splash or thicker finished wall than the spout roughing-in.

ADA, OBC, CSA B651 compliant when installed to the specific requirements of these regulations.

► **Code Number**  
2102029

► **Description**  
Vitreous china floor mounted ADA compliant water closet

► **Flush Cycle**

- Flush volume is determined by the flushometer used with fixture
- 1.1 to 1.6 gpf/4.2 to 6.0 Lpf

► **Fixture Specification**

- Floor mounted, Floor outlet
- Siphon jet flushing action achieves 1000g Map score when used with any Sloan flushometer
- 2 1/8" fully glazed trapway diameter
- Integral flushing rim
- Elongated bowl
- Water spot area 10" x 7-1/2"
- Closet bolts and caps included
- Toilet seat not included
- 1-1/2" I.P.S. top spud inlet
- White Vitreous china

► **Recommended Seats**

- Bemis - 1955CT/1955SSCT & 2155CT/2155SSCT
- Church - 295CT/295SSCT & 2155CT/2155SSCT

► **Plumbing System Requirements**

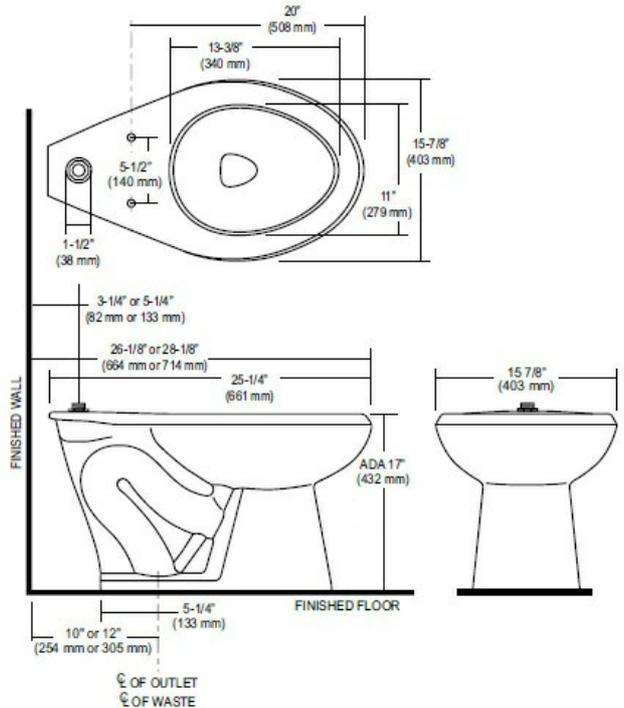

- Maximum Static Pressure: 80 PSI
- Minimum Flowing Pressure: 25 PSI
- Minimum Flow Rate: 25 GPM

► **Product Specification**

- Elongated water closet shall be made of vitreous china with a 1-1/2" top spud. Bowl shall be ADA Compliant when installed at required height of 17" from floor to top of fixture. Water Closet shall be Sloan Model ST-2029.

► **Notes**

- All information contained in this document subject to change without written notice
- This model meets the requirements for a High Efficiency Toilet when used with a high efficiency flushometer (1.28 gpf/4.8 Lpf or 1.1/1.6 gpf-4.2/6.0 Lpf dual-flush).
- All vitreous china dimensions shown in these drawings are nominal and not to scale. Dimensions can vary within the tolerances established in the governing ASME A112.19/CSA B45.1 standard. It is important to consider this when planning rough-in and plumbing layouts.

► **Compliance & Certifications**

### COMMERCIAL TOILET SEAT K-4731

ADA
-----

#### Features

- Solid polypropylene plastic
- Elongated open-front
- Ergonomic contour adds additional comfort
- Integrated handle allows user to easily raise and lower the ring
- Stainless steel hinge arms and hardware
- Less cover
- ADA compliant when installed with an ADA compliant toilet
- Anti-microbial agent inhibits growth of odor-causing bacteria, mold, and mildew [-CA, -GA, -SA]
- Check hinge stops seat from leaning back and applying pressure on tank/flushometer [-C, -CA]
- Self-sustaining check hinge prevents slamming with check hinge functionality [-SC, -SA]
- Quiet-Close™ check hinge will slowly close with check hinge functionality [-GC, -GA]

#### Codes/Standards Applicable

Specified model meets or exceeds the following:

- ADA
- ANSI Z124.5

#### Colors/Finishes

- 0: White
- 7: Black Black™
- Other: Refer to Price Book for additional colors/finishes

#### Product Specification

The elongated open-front toilet seat shall be made of solid polypropylene plastic. Product shall be less cover. Product shall have stainless steel hinge arms and hardware. Product shall feature an ergonomic contour which adds additional comfort. Product shall feature an integrated handle which allows the user to easily raise and lower the ring. Product shall feature an anti-microbial agent which inhibits growth of odor-causing bacteria, mold, and mildew [-CA, -GA, -SA]. Product shall feature a check hinge which stops the seat from leaning back and applying pressure on the tank/flushometer [-C, -CA]. Product shall feature a self-sustaining check hinge which prevents slamming with check hinge functionality [-SC, -SA]. Product shall feature a Quiet-Close™ check hinge which will slowly close with check hinge functionality [-GC, -GA]. Product shall be ADA compliant when installed with an ADA compliant toilet. Toilet seat shall be Kohler Model K-4731-\_\_\_\_-\_\_\_\_.

## Exposed, Battery Powered, Sensor Activated Closet Flush Valve

**Models:** 8310,  
8310DF16, 8311

### PRODUCT DESCRIPTION

- Brass construction w/chrome plated finish
- 1" IPS supply
- 1-1/2" top spud

### OPERATION

- Adjustable sensor eyes
- Battery powered (4) standard AA (included)
- Average battery life 250,000 cycles
- Self-diagnostic electronics
- Piston flushing mechanism
- Self cleaning filter system
- Low battery indicator light

### FLOW RATE

- 8310 (1.6gpf/6.0Lpf)
- 8310DF16 (1.0/1.6gpf 3.8/6.0Lpf) – 1.0gpf up to 60 seconds/1.6gpf after 60 seconds
- 8311 (1.28gpf/4.8Lpf) ◊
- Operating pressures 10 to 125 psi
- 24 hour sentinel flush
- Manual override button

### STOP VALVE

- 1" IPS angle stop (vandal resistant)
- Adjustable installation (left or right connection)

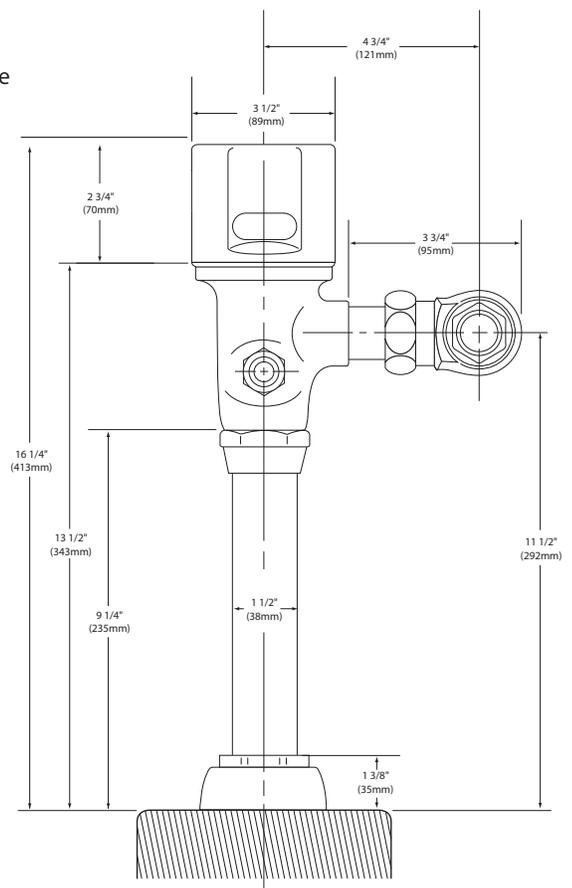

### STANDARDS

- Third party certified by IAPMO and CSA to meet ASME A112.19.2M and all applicable requirements referenced therein and complies with requirements of ASSE 1037
- ADA 

### WARRANTY

- Warranted for 5 years against material or manufacturing defects

◊ Intended for use with matching flow rates as specified by the fixture manufacturer

## CRITICAL DIMENSIONS

(DO NOT SCALE)

### ► Description

Exposed, Battery Powered, Sensor Activated Sloan ECOS® Electronic Dual Flush Model Water Closet Flushometer for floor mounted or wall hung top spud bowls.

### ► Flush Cycle

Full Flush (Large Button) / 1.6 gpf/6.0 Lpf Reduced Flush (Small Button) / 1.1 gpf/4.2 Lpf

### ► Specifications

Quiet, Exposed, Diaphragm Type, Closet Flushometer for either left or right hand supply with the following features:

- Trap Primer
- Handle Packing, Main Seat, Stop Seat and Vacuum Breaker Molded from PERMEX® Rubber Compound for Chloramine resistance
- Initial Set-up Range Indicator Light (first 10 minutes)
- User friendly three (3) second Flush Delay
- "Low Battery" Flashing LED
- Reduces water volume by up to 30% when a reduced flush occurs
- Sweat solder adapter with cover tube and cast wall flange with set screw
- Latching Solenoid Operator
- Fixed Metering Bypass and No External Volume Adjustment to Ensure Water Conservation
- If the user is present for less than one minute and leaves the sensing zone or chooses the small override button, a reduced flush initiates (1.1 gpf/4.2 Lpf) eliminating liquid and paper waste, saving 1/2 gallon of water
- If the user is present for greater than one minute and leaves the zone or chooses the large override button, the full flush initiates (1.6 gpf/ 6.0 Lpf) eliminating solid waste and paper
- Engineered Metal Cover with replaceable Lens Window
- PERMEX® Synthetic Rubber Flex Tube Diaphragm with Dual filtered bypass designed for improved life and reduced maintenance
- ADA Compliant Sloan ECOS® Electronic Battery Powered Infrared Sensor for automatic "No Hands" operation
- Infrared Sensor with Multiple-focused, Lobular Sensing Fields for high and low target detection with range adjustment screw
- Four (4) Size AA alkaline Batteries included: Duracell® with DURALOCK Power Preserve Technology™-guaranteed for up to 10 years in storage

Valve Body, Tailpiece and Control Stop shall be in conformance with ASTM Alloy Classification for Semi-Red Brass. Valve shall be in compliance with the applicable sections of ASSE 1037. Installation conforms to ADA requirements.

- Courtesy Flush® Override Button
- Flush accuracy controlled by CID® technology
- Spud Coupling and Flange for 1 1/2" Top Spud
- 1" I.P.S. Screwdriver Bak-Chek® Angle Stop with Free Spinning Vandal Resistant Stop Cap

### ► Special Finishes

- Brushed Stainless (PVD finish)
- Brushed Nickel (PVD Finish)

### ► Code Number

3370403

### ► Manual Operation

Sloan ECOS® Electronic Flushometers incorporate intuitive button design for easy manual activation. Straightforward graphics alert user to proper activation. The reduced flush for liquid waste or full flush for solid waste. To further educate the user, two (2) instructional wall plates are included with each Sloan ECOS® Flushometer.

### ► Automatic Operation

Sloan ECOS® Flushometers can also be activated via multi-lobular infrared sensor. By detecting user presence and duration, the Sloan ECOS® Smart Sense Technology™ will determine the proper flush volume for unequalled water efficiency.

### ► Functional & Hygienic

Touchless, sensor operation eliminates the need for user contact to help control the spread of infectious diseases. The Sloan ECOS® Electronic Flushometers are provided with Override Buttons to allow a "courtesy flush" for individual user comfort.

### ► Patented

D598,976

### ► Compliance & Certifications

This space for Architect/Engineer Approval

### ► OPERATION

- Polished Brass (PVD Finish)

### ► Accessories (Sold Separately)

See Accessories Section and Sloan ECOS® accessories section of the Sloan catalog for details on these and other Sloan ECOS® flushometer variations.

### ► Fixtures

Consult factory for matching Sloan brand fixture options.

### ► ELECTRICAL SPECIFICATIONS

#### Battery Type

- (4) AA Lithium

#### Battery Life

- 3 Years @ 4,000 flushes/month

#### Control Circuit

- Solid State
- 6 VDC Input
- 8 Second Arming Delay
- 3 Second Flush Delay

#### Sensor Type

- Active Infrared

#### Sensor Range

- Nominal 22" - 42" (559 mm - 1067 mm) Self-adaptive Window: ± 10" (254 mm)

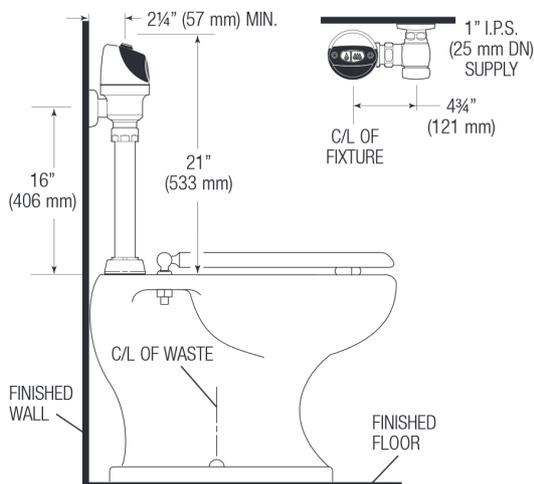

#### Indicator Lights

- Range Adjustment

#### Operating Pressure

- 15 - 100 psi (104 - 689 kPa)

### ► ROUGH-IN

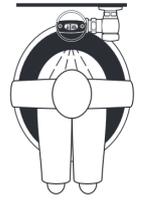

Model 8113

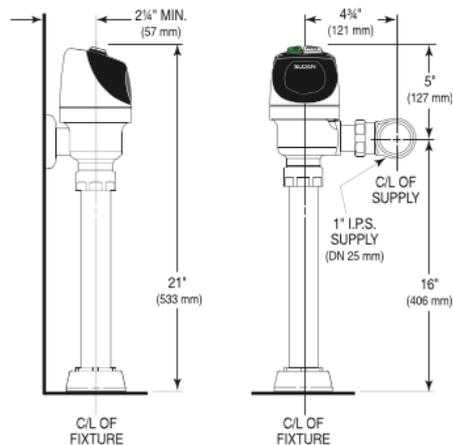

1. A continuous, invisible light beam is emitted from the Sloan ECOS® Flush Sensor.

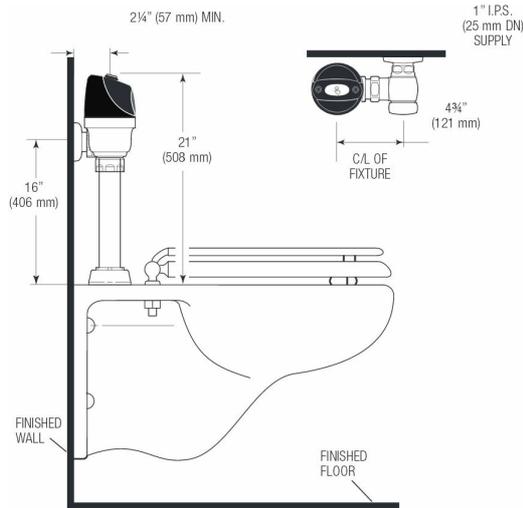

2. As the user enters the beam's effective range, 22" to 42" (559 mm to 1067 mm), the beam is reflected into the Scanner Window to activate the Output Circuit. Once activated, the Output Circuit continues in a "hold" mode for as long as the user remains within the effective range of the sensor. If the user stays longer than 65 seconds, a full flush will automatically initiate when the user leaves.

3. Once a user is detected, if the user leaves in 65 seconds or less, a reduced flush will automatically initiate. The circuit automatically resets and is ready for the next user.

The Model 8113 valve is designed for installations where toilet seat with covers are being used.

When installing the Sloan ECOS® Electronic Dual Flush in a handicap stall: Per the ADA Guidelines (section 604.9.4) it is recommended that the grab bars be split or shifted to the wide side of the stall.

# Specifications

## DESCRIPTION

- Various finishes identified by suffix
- Handheld shower
- 69" double interlock spiral hose (metal)
- Double check valve in handle
- 30" slide bar with push button height selection

## OPERATION

- Single function
- Handshower holder rotates to adjust angle of handshower

## FLOW

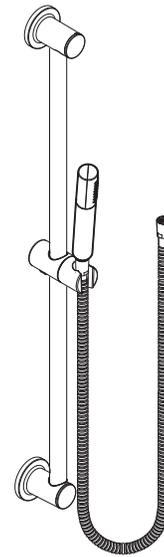

- Designed to deliver 2.5 gpm (9.5 L/min) at 80 psi
- EP suffix models are limited to 2.0 gpm (7.6 L/min) at 80 psi
- EP17 suffix models are limited to 1.75 gpm (6.7 L/min) at 80 psi

## STANDARDS

- Designed and manufactured to comply with the applicable requirements of ASME A112.18.1/CSA B-125.1, ASSE 1014 and all applicable specifications referenced therein

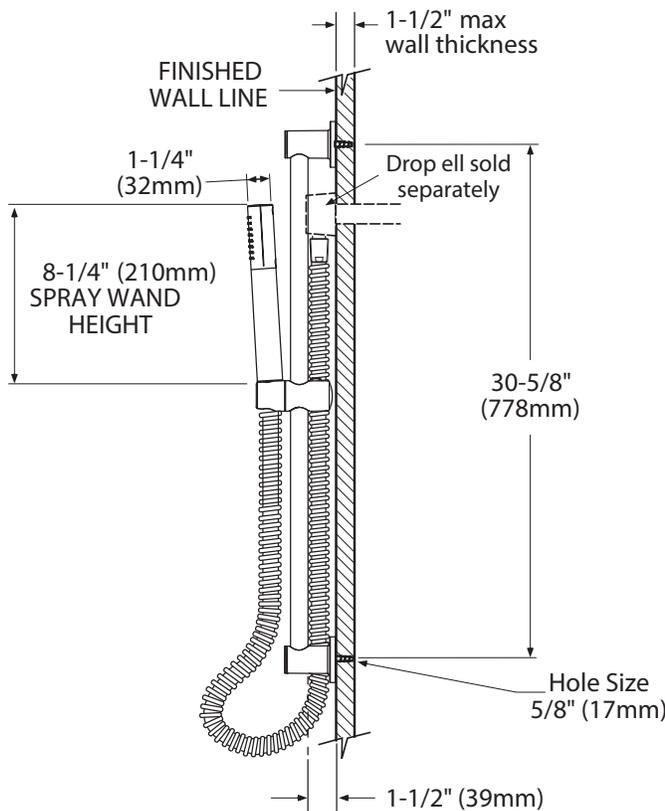

## WARRANTY

- Limited lifetime warranty against material or manufacturing defects

## LEVEL™ Single Function Handshower w/Slide Bar

Model: 3887 series

### CRITICAL DIMENSIONS

(DO NOT SCALE)

### Features

- Handshower features transitional design
- Three spray modes and ADA non-positive shut off.
- Thumb tab allows for a smooth transition between sprays.
- MasterClean™ sprayface is easy to clean.
- 36-inch slidebar features adjustable mounting brackets for installation flexibility.
- Includes 60-inch metal hose.
- ADA compliant.

### Water Conservation & Rebates

- WaterSense®-labeled 1.75-gpm handshowers use up to 30 percent less water than standard 2.5-gpm handshowers, while still meeting strict performance guidelines.
- This product can help a building earn Water Efficiency points in the LEED® Green Building Rating System.

### Optional Accessories

- K-98350 Wall-mount Supply Elbow
- K-98351 Wall-mount Supply Elbow with Check Valve

ADA OBC

# Specifications

## FAUCET DESCRIPTION

- Metal construction with various finishes identified by suffix
- Includes showerhead, arm, flange and diverter spout
- Includes red and blue temperature markings

## OPERATION

- Handle operates counterclockwise through a 270° arc with off at 6 o'clock and maximum hot at the 9 o'clock position. Shut off in clockwise direction
- Adjustable temperature limit stop to control maximum hot water temperature
- Pressure balancing mechanism maintains selected discharge temperature to ± 3°

## FLOW

- Showerhead is limited to 2.5 gpm (9.5 L/min) at 80 psi
- EP suffix models are limited to 1.75 gpm (6.6 L/min) at 80 psi
- NH suffix models contain no showerhead

## CARTRIDGE

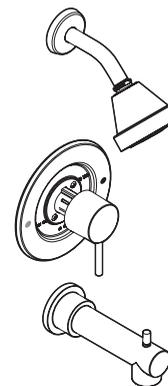

- 1222 cartridge design
- Nonmetallic/nonferrous and stainless steel materials
- Accommodates back to back installations

## STANDARDS

- Third party certified to meet ASME A112.18.1/CSA B125.1 and all applicable requirements referenced therein
- EP suffix models are third party certified to WaterSense®
- **ADA**  for lever handle

## WARRANTY

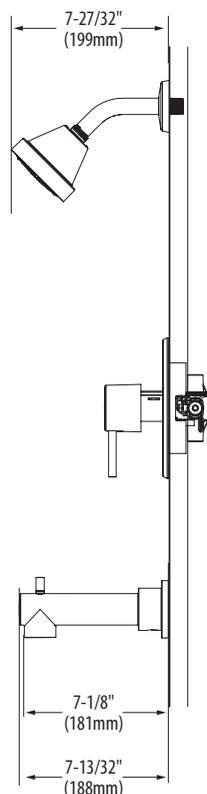

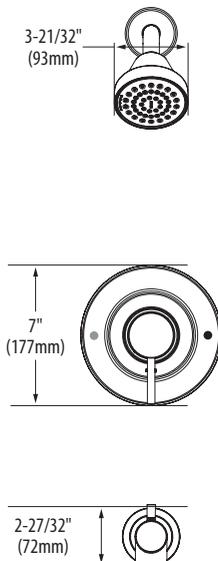

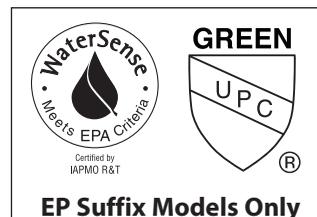

- Lifetime limited warranty against leaks, drips and finish defects to the original homeowner
  - 10 year limited warranty when used in a multifamily installation
  - 5 year limited warranty when used in a commercial installation
- Visit [www.moen.com/support](http://www.moen.com/support) for complete details and limitations

### Features

- Includes valve body, pressure balance cartridge, rough-in guide and mud guard
- 1/2" Universal NPT & direct sweat inlets & outlets, with stops
- Service stops include integral check valves
- 5.0 gpm (18.9 l/min) maximum flow rate at 45 psi
- Single lever design cycles from off through cold to hot
- Provides temperature regulation and automatic anti-scald protection
- One piece cartridge design simplifies installation and maintenance
- Adjustable high temperature limit stop to control maximum water temperature
- Requires valve trim to complete installation (sold separately).

### Material

- Forged De-zincification Resistant Brass body provides long term reliability and resistance to aggressive water conditions

### Technology

- Pressure-balancing diaphragm technology maintains outlet temperature within +/- 3 degrees Fahrenheit during water pressure fluctuations

### Installation

- Designed for use in standard, back to back and thin wall installations
- Valve body features integral mounting locations and symmetrical valve inlets to simplify installation
- Cartridge is reversible for installations where hot and cold supplies are reversed.
- Rough-in guide designed for both standard and thin wall installations
- Installed valve rough-in can be flushed and pressure tested to 150psi max (air or water) without cartridge, using K-10351 Test Cap

### Optional Accessories

- K-10350 Deep Rough-In Kit For K-8305 Cartridges
- K-10351 Test Cap For K-8300 Series Valve Bodies

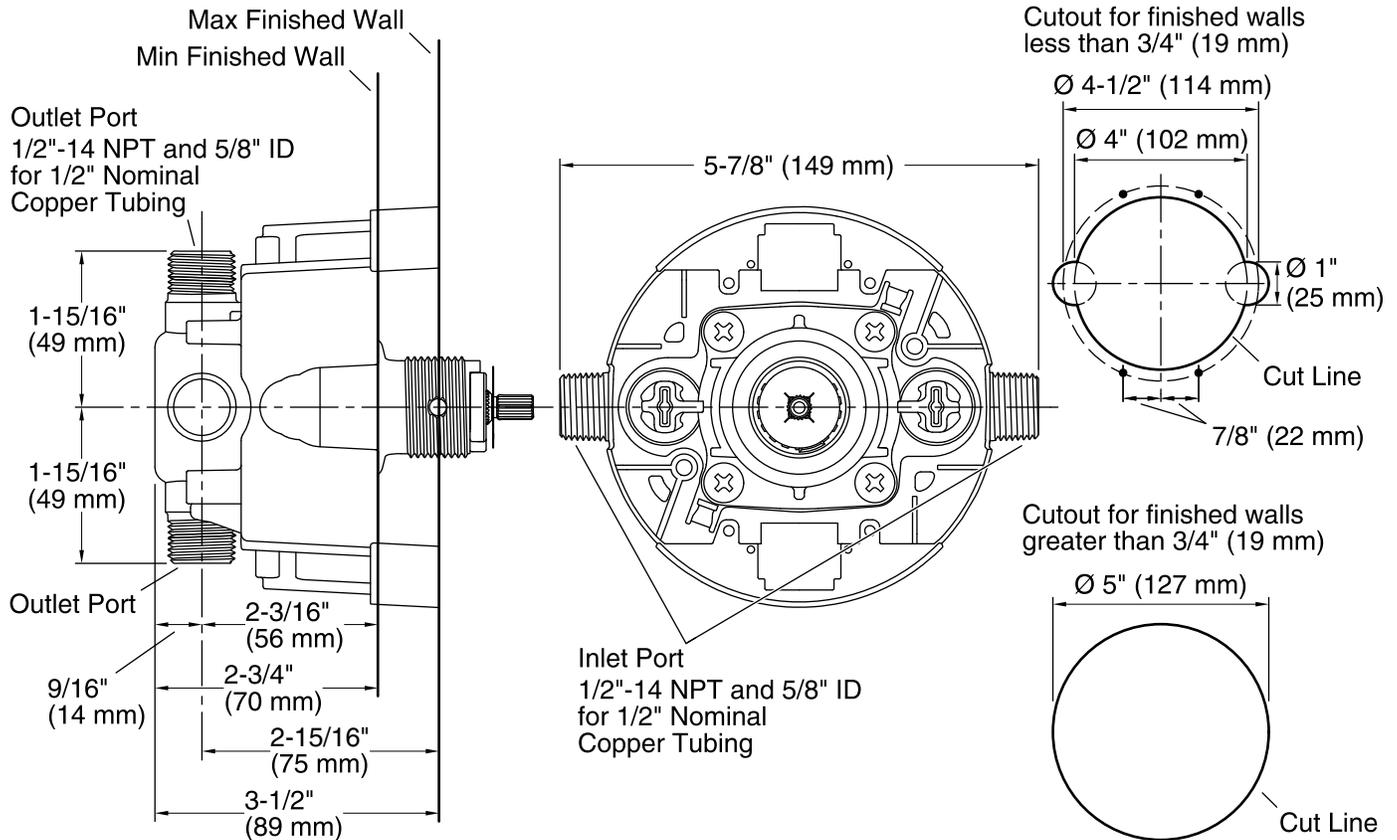

### Codes/Standards

ASME A112.18.1/CSA B125.1  
ASSE 1016/ASME A112.1016/CSA B125.16

### KOHLER® Faucet Lifetime Limited Warranty

See website for detailed warranty information.

### Technical Information

All product dimensions are nominal.

#### Shower Valve:

Min. pressure IN: 20 psi (1.4 bar)  
Valve body: Machined-brass

### Notes

- Install this product according to the installation guide.
- Avoid cross-flow conditions. Do not install shut-off device on either valve outlet.
- Cap the shower outlet if deck-mount spout, diverter, or handshower is connected to the spout outlet.
- Install straight pipe or tube drop of 7" (178 mm) to 18" (457 mm) with single elbow between the valve and wall-mount spout.
- For finished walls greater than 3/4" (19 mm) and less than 1-1/2" (38 mm), install support(s) 2" (51 mm) from the stud face.
- For finished walls greater than 1-1/2" (38 mm), install support(s) 3" (76 mm) from the face of the finished wall.

## DESCRIPTION

- Brass construction
- 1/2" CC, IPS, or PEX connections with 1/4 turn stops
- Pressure balancing, four port, cycle valve

## OPERATION

- Adjustable temperature limit stop to control maximum hot water temperature
- Pressure balancing mechanism maintain selected discharge temperature to  $\pm 3^{\circ}\text{F}$

## CARTRIDGE

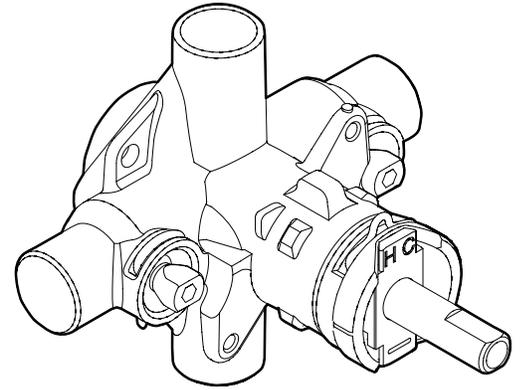

- 1222 cartridge design
- Nonmetallic/nonferrous and stainless steel materials
- Accommodates back to back installations

## STANDARDS

- Third party certified to meet CSA B125.1, ASME A112.18.1, ASSE 1016, and all applicable requirements referenced therein
- Moen's Posi-Temp® and Moentrol® valves with graphite composite spools combined with Moen's Eco-performance showerheads meet the performance requirements of pressure and temperature variation of ASSE1016 when tested as low as 1.5 gpm

## WARRANTY

- Lifetime limited warranty against leaks, drips and finish defects to the original consumer purchaser
- 5 year warranty if used in commercial installations

## Wall-mount Valve for Touchless Faucets K-11830

### Features

- Powered by the 30-year hybrid energy system.
- Required for Purist® and Falling Water® wall-mount Touchless faucets.
- 0.5 gal/min (1.9 l/min) flow rate.
- 30 second maximum cycle time.
- Ideal for use with KOHLER Vessels.
- Low-lead (SDWA) compliant

### Material

- Brass construction.

### Technology

- Insight™ adaptive infrared technology.
- Includes one 3.6V size C Hybrid energy cell.

### Installation

- Adjustable sensor/spout distance.
- Easy installation. Hybrid battery powered. It does not require AC connection.

NOTE: THESE ROUGH-IN DIMENSIONS  
MAY VARY 1/2" (13 mm) PLUS OR MINUS

## A) Pull-Type Beverage Cup

These Pull-Type Beverage Cup dispensers combine stainless steel quality with universal dispensing of any type of disposable cup. The patented adjustable dispensing collar adjusts to any cup size or material.

- Available in 3 sizes to accommodate 6–46oz (180-1360ml) cups, with rim diameters from 2<sup>7</sup>/<sub>32</sub>" to 4<sup>7</sup>/<sub>8</sub>" (58-123mm).
- Included brackets allow for either wall or dispenser stand mounting.
- Dispenser is top-loaded and gravity fed.

ITEM NUMBER	CUP SIZE	RIM DIAMETER	TUBE LENGTH	CASE PACK/WEIGHT
C3200P	6–10oz (180–300ml)	2 <sup>7</sup> / <sub>32</sub> "–3 <sup>3</sup> / <sub>16</sub> " (58–80mm)	23 <sup>1</sup> / <sub>2</sub> " (597mm)	1 2.5lbs(1.1kgs)
C3400P	12–24oz (350–710ml)	2 <sup>3</sup> / <sub>4</sub> "–3 <sup>7</sup> / <sub>8</sub> " (70–98mm)	23 <sup>1</sup> / <sub>2</sub> " (597mm)	1 2.8lbs(1.3kgs)
C3500P	32–46oz (950–1360ml)	4"–4 <sup>7</sup> / <sub>8</sub> " (101–123mm)	23 <sup>1</sup> / <sub>2</sub> " (597mm)	1 3lbs(1.4kgs)

Construction: 26-gauge 304 stainless

## B) Dispenser Kit & Stand

Dispenser stands are a perfect countertop alternative to organize a variety of wall mount cup and lid dispensers. Dispenser stands are available individually or as a kit with dispensers. Each stand will hold up to four San Jamar cup or lid dispensers in any configuration.

- Allows for high volume dispensing in a small footprint.

ITEM NUMBER	DISPENSER INCLUDES	DIMENSIONS	CASE PACK/WEIGHT
C3620	Kit: C3604, L3402, C3200P, C3400P	36"h x 12"w x 12"d (914h x 305w x 305d mm)	1 17.4lbs(7.9kgs)
C3604	Stand only	Base: 10" dia (254mm dia)	1 7.7lbs(3.5kgs)

Construction: C3604: Chrome-plated steel  
C3200P, C3400P: 26-gauge 304 stainless  
L3402: 22-gauge 304 stainless

Use C3604 stand with lid dispensers below to hold 4 sleeves of lids in just 10" of space.

## C) Wall Mount Lid Dispensers

Wall Mount Lid Dispensers are ideal for any environment where disposable lids are used. Designed for fast loading, these dispensers will keep your cup lids clean and organized.

- Available in 3 sizes for cup lids ranging from 6–46oz (180-1360ml).
- Available in single and double lid designs, front-loading provides easy and smooth access to lids.
- Brackets allow for either wall or dispenser stand mounting.

ITEM NUMBER	CAPACITY	LID SIZE	TUBE LENGTH	CASE PACK/WEIGHT
L3200	1 sleeve	6-10oz (180-300ml)	23 <sup>1</sup> / <sub>2</sub> " (597mm)	1 2.7lbs(1.2kgs)
L3400	1 sleeve	12-24oz (350-710ml)	23 <sup>1</sup> / <sub>2</sub> " (597mm)	1 3.5lbs(1.6kgs)
L3500	1 sleeve	32-46oz (950-1360ml)	23 <sup>1</sup> / <sub>2</sub> " (597mm)	1 4lbs(1.8kgs)
L3402	1 sleeve (double lid)	6-24oz (180-710ml)	23 <sup>1</sup> / <sub>2</sub> " (597mm)	1 2.8lbs(1.3kgs)
L3502	1 sleeve (double lid)	24-46oz (710-1360ml)	23 <sup>1</sup> / <sub>2</sub> " (597mm)	1 3.5lbs(1.6kgs)

Construction: 22-gauge 304 stainless

# STAINLESS STEEL TOILET ENCLOSURES

***THE LUXOR TYPE: FT-700E Floor Mounted Privacy Style***

**MATERIALS:** Stainless Steel #301/304 series in #4 finish

**THICKNESS:** Doors..... 22 Gauge, Finished to 1" (25.4mm) at 64" (1625.6) high  
Panels..... 20 Gauge, Finished to 1" (25.4mm) at 64" (1625.6) high  
Pilasters..... 18 Gauge, Finished to 1 1/4" (31.75mm) at 70" (1778) high

## CONSTRUCTION:

### Doors:

Finished to 1" (25.4) thick, constructed of two sheets of 22-gauge stainless steel formed and cemented under pressure to a honeycomb core. Door face sheets are welded at intervals around the entire perimeter. All edges to be finished with a 20-gauge stainless steel interlocking molding. Corners are finished with pre-formed stainless steel reinforcements. Doors shall have internal steel reinforcements to secure hardware items.

### Panels:

Finished to 1" (25.4) thick, constructed of 2 sheets of 20-gauge stainless steel, formed and cemented under pressure to a honeycomb core. All partition edges are finished with a 20-gauge stainless steel interlocking molding. Corners will be finished with pre-formed stainless steel reinforcements.

### Pilasters:

Finished to 1 1/4" (31.75) thick, constructed of two sheets of 18-gauge stainless steel, formed and assembled with a honeycomb core. Face sheets are electrically welded at intervals around the entire perimeter. All pilasters will have a 4" (101.6) high #4 finish stainless steel plinth and have straight, flat sides profile with rounded edges to match the pilaster profile. Mounting channels are 12-gauge steel electrically welded to the pilaster face sheets. Zinc plated 3/8" (9.525) diameter studs, lock washers, nuts and lead expansion shields are provided.

## BRACKETS:

Attachment brackets are die cast chrome plated stirrup brackets. Minimum of three (3) fittings at each connection.

## DOOR HARDWARE:

Each compartment will be complete with two door hinges, latch, stop and keeper, coat hook, as well as all necessary fittings and fastenings for a complete installation. Hinges are fastened by means of tamper-proof Torx Pin Head through bolts, which are polished chrome plated. All other screws to be tamper-proof Torx Pin Head chrome plated. Doors are to be hung on a concealed, "stay-set", fully adjustable, non-rising door mechanism. Upper hinge pin shall be 3/8" (9.525) diameter steel. All hinges will have wrap-around flanges with a minimum of 5/8" (15.875) wrap onto pilaster. All doors will have a concealed ADA approved slide latch with external "in-use" indicator. A continuous anodized aluminum extrusion, is provided for both strike & hinge sides to eliminate gaps between door & pilaster.

## FINISH:

All stainless steel partitions are supplied with high strength 300 series alloys in a #4 finish. Optional 2B leathergrain and SSM diamond pattern textured finishes are also available.

## OPTIONS:

Full height 63" bright dip anodized aluminum brackets or stainless steel angles & U-Channels, 63" stainless steel MutliCam® hinges, Cast S/S wraparound hinges, surface latch, S&K. Other special heights or special elevations AFF.

Item Name	Baby Changing Station
Description:	Horizontal recessed mounted baby changing station
Manufacturer:	Koala Kare Products
Product:	KB110-SSRE
Dimensions:	37" W x 4" D (when closed) x 23" H overall
Content:	Exterior: Stainless Steel Interior: High density polyethylene with Microban Antimicrobial additive
Finish:	Stainless Steel: Satin Polyethylene: Grey
Quality Standards:	Complies with ASTM static load performance requirements when properly installed. Unit shall conform to ICC A117.1-2009 Accessible and Usable Buildings and Facilities. ASTM F 2285-04 Standard Consumer Safety Performance Specification for Diaper Changing Tables for Commercial Use. ANSI Z535.4 Product Safety Signs and Labels. ASTM G21 Antifungal Standards or local code if more stringent installation requirements are applicable for barrier-free accessibility.
Lead Time:	To be verified
Warranty:	5-Year Limited Warranty on materials and workmanship and include a provision for replacement caused by vandalism
Note:	Baby changing station is required in all public space bathrooms

**MATERIALS:**

**Grab Bar** — 18-8 S, type-304, 18-gauge (1.2mm) stainless steel tubing with satin-finish. 1-1/2" (38mm) outside diameter. Ends are heliarc welded to flanges. Clearance between the grab bar and wall is 1-1/2" (38mm).

**Concealed Mounting Flanges** — 18-8 S, type-304, 11-gauge (3.2mm) thick, stainless steel plate; end flanges 2" x 3-1/8" (50 x 80mm) with holes for attachment to wall. Intermediate flanges 2-5/8" x 3-1/8" (65 x 80mm) wide x 3-1/8" (80mm) diameter.

**Snap Flange Covers** — 18-8 S, type-304, 22-gauge (0.8mm) drawn stainless steel with satin-finish. 3-1/4" (85mm) diameter x 1/2" (13mm) deep. Each cover snaps over mounting flange to conceal mounting screws.

**STRENGTH:**

Bobrick grab bars that provide 1-1/2" (38mm) clearance from wall can support loads in excess of 900 pounds (408kg) if properly installed. Other grab bar configurations can support loads in excess of 250 pounds (113kg) if properly installed, complying with accessible design (including ADAAG in the U.S.A.) for structural strength

**Safety Warning: Grab bars are no stronger than the anchors and walls to which they are attached and, therefore, must be firmly secured in order to support the loads for which they are intended. To avoid potential injury, the building owner or maintenance personnel should remove the grab bar from service if the grab bar is not adequately secured to wall or if there is any observed damage to the welds.**

**INSTALLATION:**

Provide concealed anchor device or backing as specified or required in accordance with local building codes before wall is finished. Fasten concealed mounting flanges to anchor device or backing with at least two screws opposing each other in each flange. Snap flange covers over each mounting flange to conceal mounting screws. Concealed anchor devices and mounting screws are not included with Bobrick grab bars and must be specified as an accessory.

For Grab Bars with an Intermediate Flange(s), Pull Snap-Flange Covers away from mounting flanges. Place grab bar in desired mounting location. Use intermediate flange as a template to mark location of mounting screws at intermediate flange only. Mark screw locations at the center of the slot in the middle of the double-keyhole shaped mounting holes (2) in the intermediate flange. Remove grab bar from wall. Drive the intermediate flange mounting screws into wall at marked locations. **Note:** Make sure to leave a space of just over 1/8" (3.17mm) between the underside of the screw head and the wall. Install grab bar on the wall by placing the round ends of the intermediate flange double-keyhole shaped mounting holes over the mounting screws (2) are located in the middle of the flange slots. Install the mounting screws into the wall at the end flanges and secure tightly. Tighten the mounting screws at the intermediate flange. Press all snap-flange covers into place to conceal mounting flanges.

**Note:** Recommend use of 1/4" or #14 sheet metal or wood screws to install Intermediate Flange. #12 screws may also be used.

**Important Notes:**

- Mounting Kits** — Bobrick offers a mounting kit for installing grab bars; **one Bobrick mounting kit is required for each flange.**

Mounting Kit No.	Description
252-30	Consists of # (3) 14 x 2½" type-304 stainless steel, Phillips round-head, sheet-metal screws.

- Grab Bar Fastener** — Bobrick offers a grab bar fastening system that secures all Bobrick grab bar series; **one Bobrick fastener is required for each flange.** Install grab bar without backing in wall requires minimum 5/8" (16mm) thick painted or tiled drywall.

WingIt™ Fastener No.	Description
251-4	Consists of 10–32 x 5/16" round-head, Phillips 18/8 stainless steel screws. (1) WingIt grab bar fastener.

- Optional Anchor Device** — Bobrick grab bar anchor device includes stainless steel machine screws to be used for attaching grab bars to anchors. **one Bobrick concealed anchor device is required for each flange.**

Optional Anchor No.	Description
2583	Anchor for 3/4" to 1" (19-25mm) panel 1 anchor required for each flange.
2586	Anchor for 1/2" to 1" (13mm) panel 1 anchor required for each flange.

**SPECIFICATION:**

Grab bar shall be type-304 stainless steel with satin-finish. Grab bar shall have 18-gauge (1.2mm) wall thickness and 1-1/2" (38mm) outside diameter. Clearance between the grab bar and wall shall be 1-1/2" (38mm). Concealed mounting flanges shall be 11-gauge (3.2mm) thick stainless steel plate, 2" x 3-1/8" (50 x 80mm), and equipped with at least two screw holes for attachment to wall. Flange covers shall be 22 gauge (0.8mm), 3-1/4" (85mm) diameter x 1/2" (13mm) deep, and shall snap over mounting flange to conceal mounting screws and/or WingIt fasteners. Ends of grab bar shall pass through concealed mounting flanges and be heliarc welded to form one structural unit. Grab bar shall comply with accessible design (including ADAAG in the U.S.A.) for structural strength.

Grab Bar shall be Model \_\_\_\_\_ (insert model number) of Bobrick Washroom Equipment, Inc., Clifton Park, New York; Jackson, Tennessee; Los Angeles, California; Bobrick Washroom Equipment Company, Scarborough, Ontario; Bobrick Washroom Equipment Pty. Ltd., Australia; and Bobrick Washroom Equipment Limited, United Kingdom.

## Technical Data

# SURFACE-MOUNTED MULTI-ROLL TOILET TISSUE DISPENSER

# B-2888

### MATERIALS:

**Cabinet** — 18-8, type-304, 22-gauge (0.8mm) stainless steel. All-welded construction. Exposed surfaces have satin finish.

**Door** — 18-8, type-304, 22-gauge (0.8mm) stainless steel with 18-gauge (1.2mm) stainless steel door frame. Exposed surfaces have satin finish. Front of door is drawn, one-piece, seamless construction. Secured to cabinet with two rivets. Equipped with a tumbler lock keyed like other Bobrick washroom accessories.

**Dispensing Mechanism, Inner Housing and Cam** — 18-8, type-304, 18-gauge (1.2mm) stainless steel.

**Spindles (2)** — Heavy-duty, one-piece, molded ABS. Theft-resistant. Retained in dispensing mechanism when door is locked.

### OPERATION:

Unit holds two standard-core toilet tissue rolls up to 5-1/4" (133mm) diameter (1800 sheets). Tissue rolls are loaded and locked into dispensing mechanism. Extra roll automatically drops in place when bottom roll is depleted. Depleted rolls can only be removed after unlocking door.

### INSTALLATION:

For partitions with particleboard or other solid core, secure with four #10 x 5/8" (4.8 x 16mm) sheet-metal screws (not furnished) at points indicated by an S, or provide through-bolts, nuts, and washers.

For hollow-core metal partitions, provide solid backing into which sheet-metal screws can be secured. If two units are installed back-to-back, then provide threaded sleeves and machine screws for the full thickness of partition.

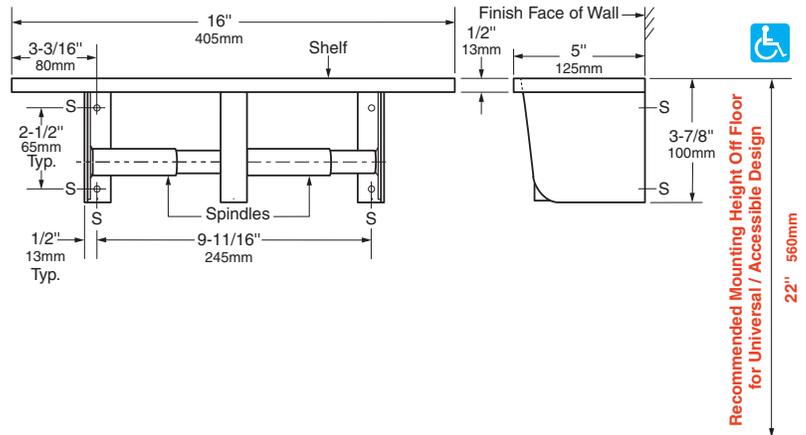

For plaster or dry wall construction, provide concealed backing to comply with local building codes, then secure unit with sheet-metal screws.

For other wall surfaces, provide fiber plugs or expansion shields for use with sheet-metal screws or provide 3/16" (5mm) toggle bolts or expansion bolts.

### SPECIFICATION:

Surface-mounted multi-roll toilet tissue dispenser shall be type-304 stainless steel with all-welded construction, including dispensing mechanism, inner housing and cam; exposed surfaces shall have satin finish. Front of toilet tissue dispenser door shall be drawn, one-piece, seamless construction. Door shall be secured to cabinet with two rivets and equipped with a tumbler lock keyed like other Bobrick washroom accessories. Unit shall dispense two standard-core toilet tissue rolls up to 5-1/4" (133mm) diameter (1800 sheets). Extra roll shall automatically drop in place when bottom roll is depleted. Unit shall be equipped with two theft-resistant, heavy-duty, one-piece, molded ABS spindles.

**Surface-Mounted Multi-Roll Toilet Tissue Dispenser shall be Model B-2888 of Bobrick Washroom Equipment, Inc., Clifton Park, New York; Jackson, Tennessee; Los Angeles, California; Bobrick Washroom Equipment Company, Scarborough, Ontario; Bobrick Washroom Equipment Pty. Ltd., Australia; and Bobrick Washroom Equipment Limited, United Kingdom.**

**MATERIALS:**

**Shelf** — 18-8, type-304, 20-gauge (1.0mm) stainless steel with satin finish. 1/2" (13mm) return edges for maximum rigidity. Front edge is hemmed for safety.

**Mounting Brackets** — 18-8, type-304, 18-gauge (1.2mm) stainless steel with satin finish. Welded to shelf.

**Toilet Tissue Dispensers (2)** — Support brackets are 18-8, type-304, 18-gauge (1.2mm) stainless steel with satin finish. Equipped with two chrome-plated plastic spindles, each with a heavy-duty internal spring.

**OPERATION:**

Close clearance of support brackets deters removal of toilet tissue rolls until they are depleted. Unit holds two standard-core toilet tissue rolls up to 5-1/2" (140mm) diameter (1800 sheets).

*Designer's Note:* It is recommended that one full toilet tissue roll remain wrapped or taped until the other roll has been depleted to avoid wasting the ends of both rolls.

**INSTALLATION:**

Mount unit on wall or partition with four #7 x 1-1/2" (3.8 x 38mm) sheet-metal screws (not furnished) at points indicated by an S.

For partitions with particle-board or other solid core, provide sheet-metal screws or through-bolts, nuts, and washers.

For hollow-core metal partitions, provide solid backing into which sheet-metal screws can be secured. If two units are installed back-to-back, then provide threaded sleeves and machine screws for the full thickness of partition.

For plaster or dry wall construction, provide concealed backing to comply with local building codes, then secure unit with #7 x 1-1/2" (3.8 x 38mm) or longer sheet-metal screws.

For other wall surfaces, provide #7 x 1-1/2" (3.8 x 38mm) sheet-metal screws and fiber plugs or expansion shields, or provide 1/8" (3mm) toggle bolts or expansion bolts.

**SPECIFICATION:**

Surface-mounted toilet tissue dispenser and utility shelf shall be type-304 stainless steel with satin finish. Shelf shall have 1/2" (13mm) return edges with front edge hemmed for safe handling. \*Spindles shall be chrome-plated plastic with heavy-duty internal spring and shall hold standard-core toilet tissue rolls up to 5-1/2" (140mm) diameter (1800 sheets).

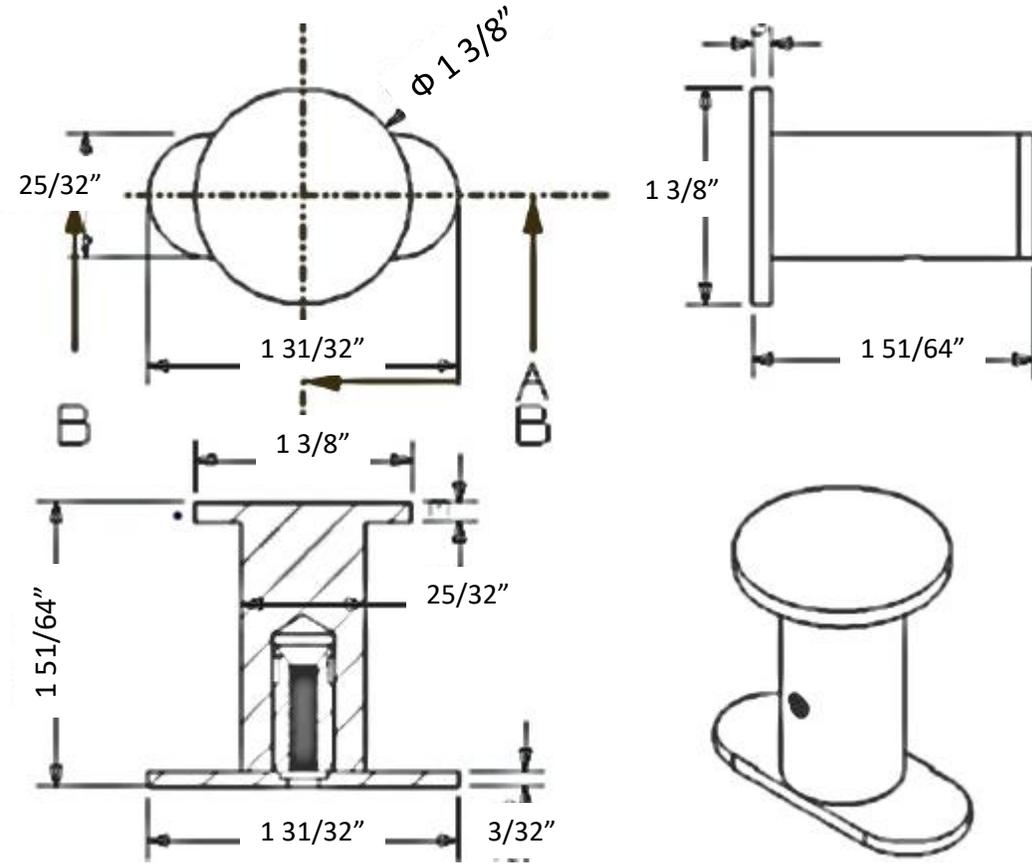

*\*Theft-resistant spindle (part No. 283-604) available as a replacement part.*

**Surface-Mounted Toilet Tissue Dispenser And Utility Shelf shall be Model B-2840 of Bobrick Washroom Equipment, Inc., Clifton Park, New York; Jackson, Tennessee; Los Angeles, California; Bobrick Washroom Equipment Company, Scarborough, Ontario; Bobrick Washroom Equipment Pty. Ltd., Australia; and Bobrick Washroom Equipment Limited, United Kingdom.**

## Robe Hook

YB0403

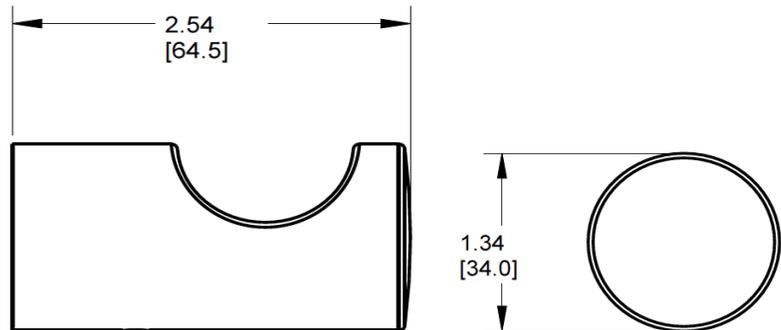

### Stock Numbers:

- ❑ YB0403CH – Robe Hook  
Chrome Finish
- ❑ YB0403BN – Robe Hook  
Brushed Nickel Finish

### Materials:

Robe Hook is constructed of zinc.

### Dimensions:

### Installation Instructions:

- 1) Position the mounting template on the wall in the desired location.
- 2) Using a level, align the template and tape it to the wall.
- 3) Drill two 1/4" holes at each mounting post location that corresponds to your product. [We recommend using the horizontal holes for drywall installation].
- 4) Remove the template from the wall.
- 5) Lightly tap anchors until flush with the wall.
- 6) Remove mounting posts from the product assemblies by loosening each setscrew.
- 7) One at a time, place each mounting post over anchors [notch facing downward] and insert screws through post into anchors.
- 8) Tighten screws.

### Cleaning Instructions:

To preserve the fine finish of this product, clean only with a soft damp cloth. Dry well. Do not use commercial or abrasive cleaners.

# SOLID PHENOLIC FOLDING SHOWER/DRESSING AREA SEAT

TA-702  
Revision Date:

# B-5191

Universal/Accessible Design  
Recommended  
Mounting Height  
\*17" to 19"  
430 to 485mm

\*Consult local building codes

### MATERIALS:

**Seat** — One-piece, 5/16" (8mm) thick, solidly fused plastic laminate with matte-finish melamine surfaces, ivory-colored face sheets, and black phenolic-resin core that are integrally bonded — cannot delaminate. Integral slots for water drainage. Secured to frame with stainless steel carriage bolts and acorn nuts.

**Frame** — 18-8, type-304, stainless steel with satin finish. 16-gauge (1.6mm), 1-1/4" (30mm) square tubing and 18-gauge (1.2mm), 1" (25mm) diameter seamless tubing.

**Mounting Flanges (2)** — 18-8, type-304, 3/16" (5mm) thick stainless steel with satin finish. 3" (75mm) diameter with three mounting screw holes.

**Baseplate** — 18-8, type-304, heavy-gauge stainless steel.

**Spring** — 17-7, type-301, 24-gauge (0.6mm) stainless steel. Spot-welded to baseplate.

**Guide Bracket** — 18-8, type-304, 16-gauge (1.6mm) stainless steel with satin finish.

continued . . .

**OPERATION:**

Shower seat can be folded up against the wall when not in use. The spring at the top of baseplate locks seat into upright position until released by pulling the top of seat away from wall. Support system with guide bracket allows varying mounting heights and leaves floor clear for easier cleaning. Nonporous solid phenolic seat has slots to permit water to drain, does not splinter or require oiling, and will not support growth of bacteria. Slotless round-head carriage bolts and acorn nuts provide additional safety to user. Bobrick shower seats, when properly installed, have sufficient strength to support 500 lbs., (227 kg) complying with accessible design guidelines (including ADAAG in the U.S.A.).

**INSTALLATION:**

Secure unit to wall at points indicated by an S, with the two mounting flanges located at top and the baseplate and guide bracket below. The bottom of support bracket must be positioned between the baseplate and guide bracket before they are secured to wall or partition. Mounting height of shower seat must comply with local building codes.

For stud walls, provide concealed backing to comply with local building codes and secure with #14 x 2-1/2" (6.3 x 65mm) stainless steel sheet-metal screws furnished by manufacturer.

For prefabricated shower stalls, provided adequate backing by the shower stall manufacturer. Secure with #14 x 2-1/2" (6.3 x 65mm) stainless steel mounting screws furnished by manufacturer. Bobrick offers a mounting kit for installing shower seats. For additional mounting kits please order 252-30. One mounting kit is required for each flange.

For masonry walls, provide fiber plugs or expansion shields for use with furnished sheet-metal screws, or provide 1/4" (6mm) toggle bolts or expansion bolts.

**INSTALL SAFETY PLATE TO WALL:**

Safety Plate is to be mounted on wall near Shower Seat in order to properly advise users of the Seat's weight restrictions. Correct installation of the Safety Plate will ensure that the Shower Seat meets A.N.S.I. Standards.

Permanently affix Safety Plate to wall on either side of the Shower Seat at a minimum height of 30" (760mm). If mounted above Seat, the Plate must be high enough so that it is not covered when Seat is on the up position. Mounting screws (4) are recommended, but double-sided tape on rear of Plate may be used for very smooth, non-porous surfaces.

**SAFETY WARNING: Shower seats are no stronger than the anchors and walls to which they are attached and must be firmly secured in order to support the loads for which they are intended. Consult and comply with local building codes. To avoid potential injury, the building owner or maintenance personnel should remove the shower seat from service if the shower seat is not adequately secured to the wall. Unit shall support static loads of up to 500 lbs (227 kg) when properly installed and used. To avoid potential seat malfunction, DO NOT use seat if weight exceeds 500 lbs (227 kg).**

**SPECIFICATION:**

Folding shower seat shall have a frame constructed of type-304, satin-finish stainless steel that consists of 16-gauge (1.6mm), 1-1/4" (30mm) square tubing and 18-gauge (1.2mm), 1" (25mm) diameter seamless tubing. Seat shall be one-piece, 5/16" (8mm) thick, solidly fused plastic laminate with matte-finish melamine surfaces, ivory-colored face sheets, and black phenolic-resin core; secured to frame with stainless steel carriage bolts and acorn nuts. Shower seat shall be equipped with two 3" (75mm) diameter mounting flanges constructed of type-304, 3/16" (5mm) thick, satin-finish stainless steel; a guide bracket constructed of type-304, 16-gauge (1.6mm), satin-finish stainless steel; and a spring constructed of type-301, 24-gauge (0.6mm) stainless steel that is spot-welded to a baseplate of type-304, heavy-gauge stainless steel. Seat shall be able to lock in upright position when not in use. Shower seat shall comply with accessible design guidelines (including ADAAG in the U.S.A.).

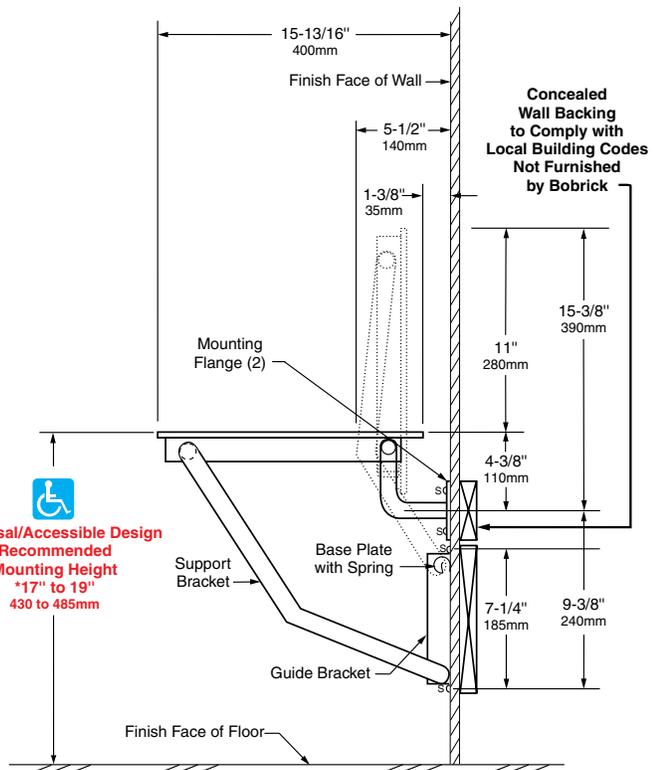

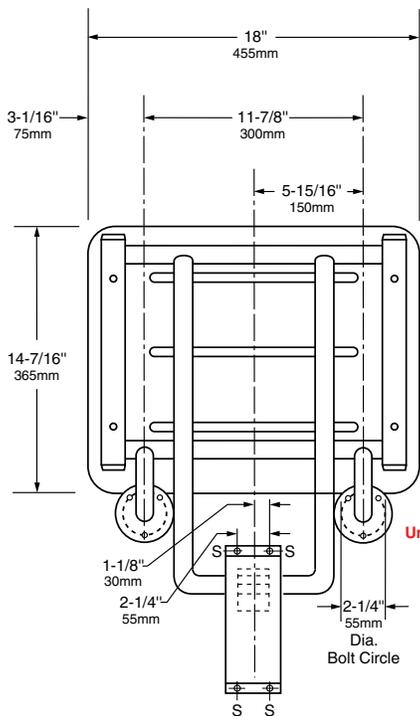

**Folding Shower Seat shall be Model B-5191 of Bobrick Washroom Equipment, Inc., Clifton Park, New York; Jackson, Tennessee; Los Angeles, California; Bobrick Washroom Equipment Company, Scarborough, Ontario; Bobrick Washroom Equipment Pty. Ltd., Australia; and Bobrick Washroom Equipment Limited, United Kingdom.**

## OPERATION:

Shower seat can be folded up against the wall when not in use. The spring at the top of baseplate holds seat into upright position until released by pulling the top of seat away from wall. Bobrick Folding Shower Seats are not spring-loaded. The seats do not return automatically to the upright position after use. Support system with guide bracket allows varying mounting heights and leaves floor clear for easier cleaning. Nonporous solid phenolic seat has slots to permit water to drain, does not splinter or require oiling, and will not support growth of bacteria. Slotless round-head carriage bolts and acorn nuts provide additional safety to user. Bobrick shower seats, when properly installed, have sufficient strength to support 500 lbs., (227 kg) complying with accessible design guidelines (including ADAAG in the U.S.A.).

## INSTALLATION:

Secure unit to wall at points indicated by an *S*, with the two mounting flanges located at top and the baseplate and guide bracket below. The bottom of support bracket must be positioned between the baseplate and guide bracket before they are secured to wall or partition. Mounting height of shower seat must comply with local building codes.

For stud walls, provide concealed backing to comply with local building codes and secure with #14 x 2-1/2" (6.3 x 65mm) stainless steel sheet-metal screws furnished by manufacturer.

For prefabricated shower stalls, provide adequate backing by the shower stall manufacturer. Secure with #14 x 2-1/2" (6.3 x 65mm) stainless steel mounting screws furnished by manufacturer. Bobrick offers a mounting kit for installing shower seats. For additional mounting kits please order 252-30. One mounting kit is required for each flange.

For masonry walls, provide fiber plugs or expansion shields for use with furnished sheet-metal screws, or provide 1/4" (6mm) toggle bolts or expansion bolts.

## INSTALL SAFETY PLATE TO WALL:

Safety Plate is to be mounted on wall near Shower Seat in order to properly advise users of the Seat's weight restrictions. Correct installation of the Safety Plate will ensure that the Shower Seat meets A.N.S.I. Standards.

Permanently affix Safety Plate to wall on either side of the Shower Seat at a minimum height of 30" (760mm). If mounted above Seat, the Plate must be high enough so that it is not covered when Seat is on the up position. Mounting screws (4) are recommended, but double-sided tape on rear of Plate may be used for very smooth, non-porous surfaces.

**SAFETY WARNING: Shower seats are no stronger than the anchors and walls to which they are attached and must be firmly secured in order to support the loads for which they are intended. Consult and comply with local building codes. To avoid potential injury, the building owner or maintenance personnel should remove the shower seat from service if the shower seat is not adequately secured to the wall. Unit shall support static loads of up to 500 lbs (227 kg) when properly installed and used. To avoid potential seat malfunction, DO NOT use seat if weight exceeds 500 lbs (227 kg).**

## SPECIFICATION:

Folding shower seat shall have a frame constructed of Type-304, satin-finish stainless steel that consists of 16-gauge (1.6mm), 1-1/4" (30mm) square tubing and 18-gauge (1.2mm), 1" (25mm) diameter seamless tubing. Seat shall be one-piece, 5/16" (8mm) thick, solidly fused plastic laminate with matte-finish melamine surfaces, ivory-colored face sheets, and black phenolic-resin core; secured to frame with stainless steel carriage bolts and acorn nuts. Shower seat shall be equipped with two 3" (75mm) diameter mounting flanges constructed of Type-304, 3/16" (5mm) thick, satin-finish stainless steel; a guide bracket constructed of Type-304, 16-gauge (1.6mm), satin-finish stainless steel; and a spring constructed of Type-301, 24-gauge (0.6mm) stainless steel that is spot-welded to a baseplate of Type-304, heavy-gauge stainless steel. Seat shall be able to lock in upright position when not in use. Shower seat shall comply with accessible design guidelines (including ADAAG in the U.S.A.).

**Folding Shower Seat shall be Model B-5191 of Bobrick Washroom Equipment, Inc., Clifton Park, New York; Jackson, Tennessee; Los Angeles, California; Bobrick Washroom Equipment Company, Scarborough, Ontario; Bobrick Washroom Equipment Pty. Ltd., Australia; and Bobrick Washroom Equipment Limited, United Kingdom.**

## LOW VOLTAGE AND HIGH VOLTAGE TECHNICAL SPECIFICATION

### Electrical

Input voltage: Low Voltage = 110-127 V, High Voltage = 208-240 V

Frequency: Low Voltage = 50 or 60 Hz, subject to voltage (85-115 V at 50 Hz; 85-130 V at 60 Hz); High Voltage = 50 & 60 Hz

Rated power: 1400 W

Motor type: Dyson digital motor – V4 brushless DC Motor

Motor switching rate: 6,100 per second

Motor speed: 92,000 rpm

Amp: Recommended dedicated 15 amp circuit, Low voltage = 11.7 amps at 120V, High voltage = 7.3 amps

Operating temperature range: 32°– 104°F

Heater type: None

Standby power consumption: Less than 0.5 W

### Construction

Casing construction: Polycarbonate ABS casing

Antimicrobial coating type: AB12 (Sprayed Nickel) Antimicrobial additive in paint. AB12 (White) Antimicrobial molded additive

Color finish: AB12 Sprayed Nickel molded plastic or AB12 White molded plastic.

Back plate/mounting bracket construction: ABS/PBT Plastic

Exterior screw type: Anti-tamper M4 Pin-Hex

Water ingress protection to IP24

### Filter

Double-life HEPA filter (glass fiber and fleece prelayer)

Removes 99.97% of bacteria as small as 0.3 microns

### Operation

Touch-free proximity capacitive sensor.

Hand dry time measurement: 12 seconds\*

Operation lock-out period: 30 seconds

Airspeed at apertures: 420 mph

Maximum Altitude: 2,000m/6,561 ft.

Operating airflow: Up to 7.39 gal/sec and up to 59.3 CFM

Rated operating noise power: 85 db(A)

### Logistics

Net weight: 6.17 lbs.

Packaged weight: 8.81 lbs.

Packaged dimensions: (H) 5<sup>3</sup>/<sub>4</sub>" × (W) 17<sup>7</sup>/<sub>8</sub>" × (D) 10<sup>3</sup>/<sub>4</sub>"

Unit barcodes:

Sprayed Nickel – Low Voltage: 885609001463, High Voltage: 885609006178;

White – Low Voltage: 879957009073, High Voltage: 885609006161

### Standard warranty

5 year parts and 5 year limited labor warranty

### Accreditations

Carbon Trust

NSF International

ADA compliant

Contributes to LEED certification

### Product range (Select one)

UL Environment published the first global Product Category Rules (PCR) for Hand Dryers and Excel is proud to have initiated and chaired the project. The PCR created evaluation methods through industry consensus that compare products' environmental impact and performance. Third Party testing results then enable specifiers and buyers to make a true apples-to-apples comparison of products and make more informed decisions.

\* Dry time and energy use testing performed by SGS International on standard XLERATOR Hand Dryer with 0.8" nozzle to 0.25g or less of residual moisture, pursuant to the UL Environment Global Product Category Rules (PCR) for Hand Dryers.  
\*\* Special Paint powder-coated covers are available in many colors and textures.  
\*\*\* Exclusive digital image technology allows for the addition of company, school or team logos with any color, design or a 'green message'.

Wattage: 1490 Watts (Heat On), 425 Watts (Heat Off)

Certifications:

## CONSTRUCTION

A. All covers will be fastened to a base plate by two chrome plated tamper-proof bolts. Cover shall be one of the following:

**Die-cast zinc alloy** - One-piece, heavy-duty, rib-reinforced, lightweight, unbreakable, rustproof and all exposed surfaces shall be bright chrome plated or finished with chip-proof, electrostatically applied epoxy paint.

**Bulk Molding Compound (BMC)** - White reinforced thermoset resin.

**Stainless Steel** - with a brushed finish.

**Special Image** - Digital image applied to die-cast or stainless steel covers using patented Kolorfusion Sublimation Decoration process.

B. Base plate shall be equipped with (3) 7/8" (22 mm) diameter holes, the bottom one is suitable for use with surface conduit.

C. All internal parts shall be coated according to Underwriters' Laboratories, Inc. requirements.

D. Entire mechanism shall be internally grounded.

E. Options

**HEPA Filtration System:** Filters 99.97% of bacteria at 0.3 microns from the air stream.

**1.1 Noise Reduction Nozzle:** Lowers decibel level 9 dB by reducing air deflection noise but increases dry time by approximately 3 seconds.

F. Accessories (optional)

**Microban® Antimicrobial Wall Guards:** 89W (White), 89B (Black), 89S (Stainless)

**XChanger Paper Towel Retrofit Kit:** 40550, 40551 (ADA Height)

**ADA Recess Kit:** 40502

## MECHANISM

A. Motor shall be a thermally protected, series commutated, through-flow discharge vacuum motor/blower (5/8 hp / 20,000 rpm) which provides air velocity of up to 19,000 LFM (linear feet per minute) at the air outlet and 16,000 LFM at the hands (4 inches [102 mm] below air outlet). Includes a washable metal mesh filter for more reliable performance.

B. Heating element (970 w) is constructed of Nichrome wire and mounted inside the blower housing, thereby being vandal resistant. It shall be protected by an automatic resetting thermostat, which shall open whenever air flow is cut off and shall close when flow of air is resumed. It shall produce an air temperature of up to 135°F (57°C) at a 72°F (22°C) ambient room temperature at the hands (4 inches [102 mm] below air outlet).

C. Control assembly is activated by an infrared optical sensor located next to the air outlet. The dryer shall operate as long as hands are under the air outlet. Control includes a speed and sound control mechanism, adjustable heat control with High, Medium, Low and Off settings and a filter sensor which is activated should the filter become clogged. There is a 35-second lockout feature if hands are not removed. Sensor equipped with externally visible Red LED light that flashes error codes to assist in troubleshooting.

## LIMITED WARRANTY

The dryer shall be guaranteed to be free from defects for a period of five (5) years. Warranty shall include labor performed at factory as well as the repair or exchange of defective parts, at manufacturer's option.

## QUANTITY RECOMMENDATIONS

One dryer for every two washbasins is sufficient for most applications. If restroom traffic is unusually heavy, we suggest one dryer per washbasin in small installations and two dryers for every three washbasins in larger installations. When a 54" washfountain is used, we suggest four to five dryers.

- Specify Model Required:**
- B-2706 25 Surface-Mounted 25¢ single-coin operation
  - B-2706 50 Surface-Mounted 50¢ double-coin operation
  - B-2706C Surface-Mounted Free no-coin operation

**MATERIALS:**

**Cabinet** — 18-8, type-304, 18-gauge (1.2mm) stainless steel. All-welded construction.

**Door** — 18-8, type-304, 18-gauge (1.2mm) stainless steel with satin finish. Door has three 90° return edges and hemmed bottom edge. Secured to cabinet with a concealed full-length stainless steel piano-hinge. Equipped with two tumbler locks keyed like other Bobrick washroom accessories. Door has no brand-name advertising for products dispensed. Graphic symbols identify products dispensed and coin denomination.

**Coin Mechanisms (2)** — Impact-Resistant PC-ABS Push Buttons. Coin mechanisms can be converted in the field to any standard coin denomination (Free, 25¢ or 50¢) order Part No. 3706-250 for Free vend Conversion Kit. Accepts one or two quarters (U. S. or Canadian) as designated by factory setting. Coin Box is equipped with tumbler lock that opens with different key than furnished for door locks.

**Coin Return Push-Button (2)** — Impact-Resistant PC-ABS Push-Button cancels selection and returns coin into product tray.

**Product Tray** — Impact-Resistant PC-ABS, provides convenient access to dispensed product.

**OPERATION:**

After coin is inserted in dispensing mechanism of patron's choice, pushing button dispenses boxed sanitary napkin or tampon tube. Mechanical operations; no batteries or electricity required. Coin slot of each dispensing mechanism is identified by a graphic symbol. Capacity: 20 sanitary napkins and 30 tampons. Coin slots are automatically blocked with a red indicator when supply is depleted. Coin Return Push-Button cancels the selection and returns coin into product tray. Wrong coins (penny, nickel, dime) by-pass mechanisms and drop into product tray. Vendor dispenses sanitary napkin packages measuring 2-7/8" x 3/4" x 4-1/8" to 3-1/8" x 1-1/8" x 4-3/8" (73 x 19 x 105mm to 80 x 29 x 111mm) and tampon tubes measuring 4-5/8" long x 9/16" diameter minimum to 5-1/8" long x 3/4" diameter maximum (118 x 14 to 130 x 19mm).

**INSTALLATION:**

Mount unit on wall with four sheet-metal screws (not furnished) at points indicated by an S. For plaster or dry wall construction, provide concealed backing to comply with local building codes, then secure unit with sheet-metal screws (not furnished). For other wall construction, provide fiber plugs or expansion shields for use with sheet-metal screws, or provide 1/8" (3mm) toggle bolts or expansion bolts. If unit projects above top of wainscot, provide aluminum channel or other filler to eliminate gap between unit and finish face of wall.

**SPECIFICATION:**

Surface-Mounted napkin/tampon vendor shall combine two dispensing mechanisms in one cabinet to provide sanitary napkins and tampons at user's option. Mechanical operations; no batteries or electricity required. Dispensing mechanisms shall be pre-set at factory for \_\_\_\_\_ (insert one: Free, 25¢ or 50¢) operation, but shall be convertible in the field to allow the change of coin denomination without removing unit from wall. Door shall be furnished with graphics indicating specified coin denomination. Unit shall be type-304 stainless steel with all-welded construction; exposed surfaces shall have #4 satin finish. Door shall be 18 gauge (1.2mm); have three 90° return edges and bottom edge hemmed; be secured to cabinet with a concealed, full-length stainless steel piano hinge; and equipped with two tumbler locks keyed like other Bobrick washroom accessories. Vendor product selection and coin return pushbutton-operation shall be certified ADA-ABA, ICC/ANSI A117.1 complaint by third party (certification available on request) for operation with one hand with less than 5 pounds of force (22.2 N) without tight grasping, pinching or twisting of the wrist. Push-Button coin return shall cancel selection and return coin into product tray. Wrong coins (penny, nickel, dime) shall by-pass mechanisms and drop into product tray. Product tray shall be impact-resistant PC-ABS plastic and provide easy access to dispensed product. Coin Box shall be equipped with a tumbler lock that is keyed differently than door locks. Unit shall not carry brand-name advertising.

**Surface-Mounted Napkin/Tampon Vendor shall be Model \_\_\_\_\_ (insert model number) of Bobrick Washroom Equipment, Inc., Clifton Park, New York; Jackson, Tennessee; Los Angeles, California; Bobrick Washroom Equipment Company, Scarborough Ontario; Bobrick Washroom Equipment Pty. Ltd., Australia; and Bobrick Washroom Equipment Limited, United Kingdom.**

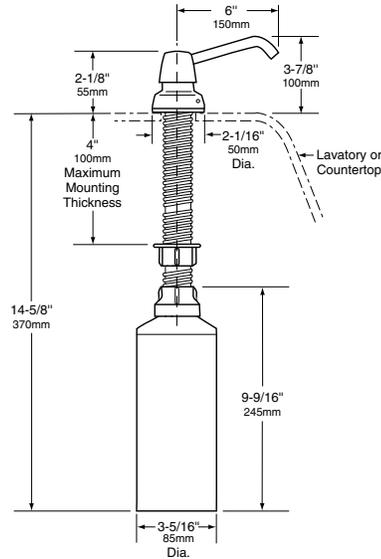

**Technical Data**

# LAVATORY-MOUNTED SOAP DISPENSER

TA-802

Revision Date:

# B-8226

**MATERIALS:**

**Piston, Spout, and Top Cover** — Type-304 stainless steel with bright polished finish.

**Cover Spacer** — Rigid, impact-resistant polyester.

**Escutcheon** — Chrome-plated, high-impact-resistant ABS with bright polished finish. Concealed locking mechanism.

**Body and Shank** — High-impact-resistant plastic.

**Valve** — ABS cylinder. Stainless steel spring. U-packing seal and duckbills.

**Container** — Translucent, shatter-resistant polyethylene. Capacity: 34-fl oz (1.0-L).

**OPERATION:**

Press piston down to dispense commercially marketed all purpose hand soaps. Vandal-resistant spout can rotate 360° without damage to unit. Escutcheon locks to body with concealed locking mechanism that is opened with special key provided. To fill from top, unlock cover and remove piston, spout, and supply-tube assembly. Unit may also be filled by removing container from below lavatory.

*Designer's Note:* Bobrick liquid soap dispensers are designed to dispense commercially marketed all purpose hand soaps including liquid and lotion soaps and synthetic detergents.

**INSTALLATION:**

Unit is designed for installation in 1" (25mm) diameter hole in porcelain-enameled steel, cast-iron or vitreous-china lavatories, as well as in countertops adjacent to lavatories. Unit may be mounted in unused faucet hole or through special hole requisitioned when lavatory is ordered from manufacturer (specify punching location). Shank accommodates maximum 4" (100mm) mounting thickness and can be cut in the field. Clearance required for container diameter is 3-3/8" (85mm).

**SPECIFICATION:**

Lavatory-mounted soap dispenser shall dispense commercially marketed all purpose hand soaps, non-iodine based soaps and do not use alcohol based sensitizers. Piston and spout assembly shall be Type-304 stainless steel with bright polished finish. Spout shall rotate 360° without damage to valve mechanism. Escutcheon shall lock to body with concealed locking mechanism that is opened with special key provided. Piston, spout, and supply-tube assembly shall be removable from top for filling and maintenance. Valve shall be equipped with plastic cylinder, stainless steel spring, U-packing seal, and duckbills. Shank shall accommodate mounting thicknesses up to 4" (100mm). Translucent, shatter-resistant polyethylene container shall have a capacity of 34-fl oz (1.0-L).

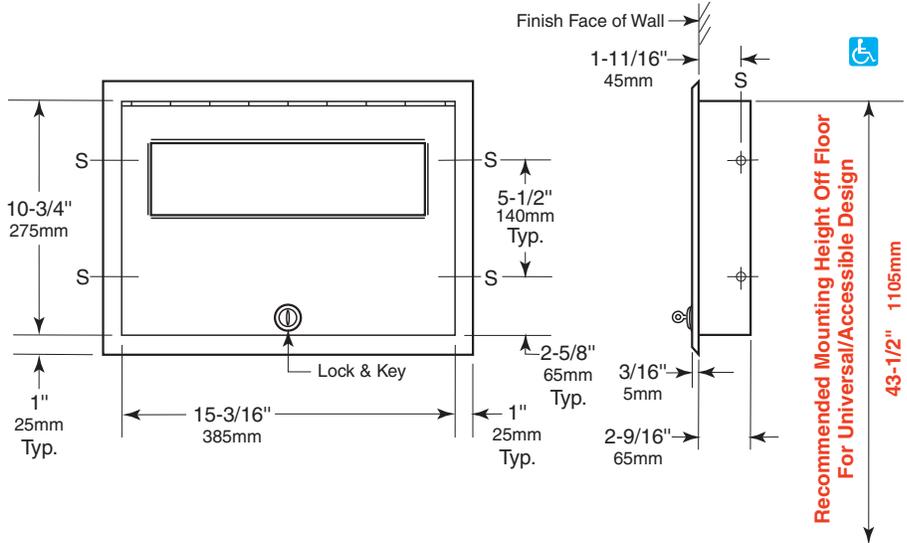

**Lavatory-Mounted Soap Dispenser shall be Model B-8226 of Bobrick Washroom Equipment, Inc., Clifton Park, New York; Jackson, Tennessee; Los Angeles, California; Bobrick Washroom Equipment Company, Scarborough, Ontario; Bobrick Washroom Equipment Pty. Ltd., Australia; and Bobrick Washroom Equipment Limited, United Kingdom.**

# RECESSED TOILET-SEAT-COVER DISPENSER

TA-803  
Revision Date:

## B-301

**Rough Wall Opening**  
15-5/8" (395mm) wide  
11-1/4" (285mm) high  
2-5/8" (67mm) minimum  
recessed depth

### MATERIALS:

**Cabinet** — 18-8, type-304, heavy-gauge stainless steel. All-welded construction.

**Flange** — 18-8, type-304, 22-gauge (0.8mm) stainless steel with satin finish. Drawn and beveled, one-piece, seamless construction.

**Door** — 18-8, type-304, 22-gauge (0.8mm) stainless steel with satin finish. Secured to cabinet with a full-length, stainless steel piano-hinge. Beveled opening. Equipped with a tumbler lock keyed like other Bobrick washroom accessories.

### OPERATION:

Dispenses single- or half-fold paper toilet seat covers. To fill dispenser, door unlocks with key provided. Capacity: 500 toilet seat covers.

### INSTALLATION:

Provide framed rough wall opening 15-5/8" wide x 11-1/4" high (395 x 285mm). Minimum recessed depth required from finish face of wall is 2-5/8" (67mm). Allow clearance for construction features that may protrude into rough wall opening from opposite wall. Coordinate with mechanical engineer to avoid pipes, vents, and conduits in wall. Mount cabinet with shims between framing and cabinet at all points indicated by an S, then secure unit with four #8 x 1-1/4" (4.2 x 32mm) sheet-metal screws (not furnished).

### SPECIFICATION:

Recessed toilet-seat-cover dispenser shall be type-304 stainless steel with all-welded construction; exposed surfaces shall have satin finish. Flange shall be drawn and beveled, one-piece, seamless construction. Door shall be secured to cabinet with a full-length, stainless steel piano-hinge and equipped with a tumbler lock keyed like other Bobrick washroom accessories. Dispenser shall have a capacity of 500 paper toilet seat covers.

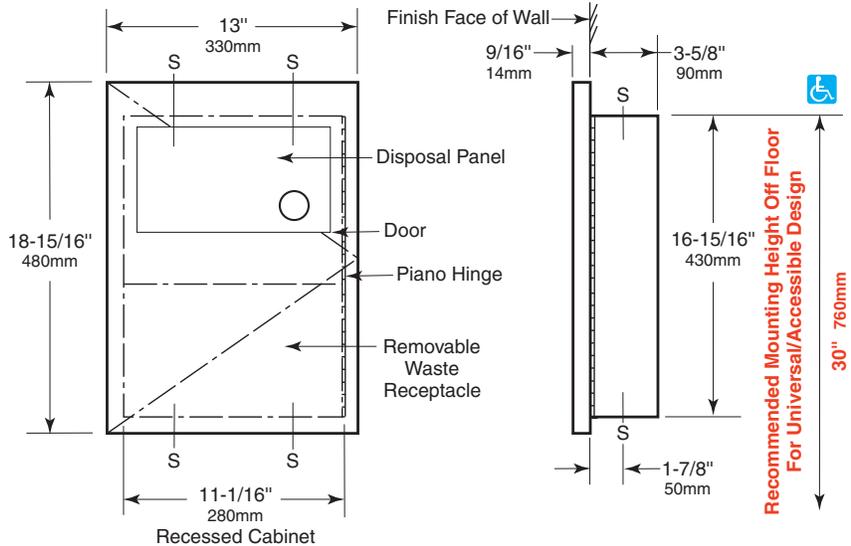

**Recessed Toilet-Seat-Cover Dispenser shall be Model B-301 of Bobrick Washroom Equipment, Inc., Clifton Park, New York; Jackson, Tennessee; Los Angeles, California; Bobrick Washroom Equipment Company, Scarborough, Ontario; Bobrick Washroom Equipment Pty. Ltd., Australia; and Bobrick Washroom Equipment Limited, United Kingdom.**

# RECESSED SANITARY NAPKIN DISPOSAL

TA-804

Revision Date:

**B-35303**

**Rough Wall Opening**  
11-1/2" (290mm) wide  
17-1/4" (440mm) high  
3-3/4" (95mm) minimum  
recessed depth

## MATERIALS:

**Cabinet** — 18-8, type-304, stainless steel. All-welded construction.

**Door** — 18-8, type-304, 18-gauge (1.2mm) stainless steel with satin finish. 9/16" (14mm) 90° return for maximum rigidity. Secured to cabinet with a concealed, full-length stainless steel piano-hinge.

**Disposal Panel** — 18-8, type-304, 22-gauge (0.8mm) stainless steel with satin finish. Secured to door with a concealed, full-length stainless steel piano-hinge. Self-closing panel has international graphic symbol identifying napkin disposal.

**Waste Receptacle** — Leak-proof rigid molded polyethylene. Removable for servicing. Capacity: 1.2-gal. (4.6-L).

## OPERATION:

Unit is equipped with self-closing panel covering disposal opening. Napkin disposal is emptied by opening door and removing waste receptacle. Disposable paper liners for napkin receptacle are available as optional accessory: order Bobrick Part No. 353-12.

## INSTALLATION:

Provide framed rough wall opening 11-1/2" wide x 17-1/4" high (290 x 440mm). Minimum recessed depth required to finish face of wall is 3-3/4" (95mm). Allow for construction features that may protrude into rough wall opening from opposite wall. Coordinate with mechanical engineer to avoid pipes, vents, and conduits. If unit projects above top of wainscot, provide aluminum channel or other filler to eliminate gap between flange and finish face of wall. Mount unit in wall opening with shims between framing and cabinet at all points indicated by an S, then secure unit with #8 x 1-1/4" (4.2 x 32mm) sheet-metal screws (not furnished).

## SPECIFICATION:

Recessed sanitary napkin disposal shall be type-304 stainless steel with all-welded construction; exposed surfaces shall have satin finish. Door shall have 9/16" (14mm) 90° return and be equipped with a concealed, full-length stainless steel piano-hinge. Napkin disposal shall have self-closing stainless steel panel covering receptacle opening. Panel shall be equipped with full-length stainless steel piano-hinge and international graphic symbol identifying napkin disposal. Unit shall be furnished with a removable, leakproof, molded polyethylene receptacle. Receptacle shall have a capacity of 1.2-gal. (4.6-L).

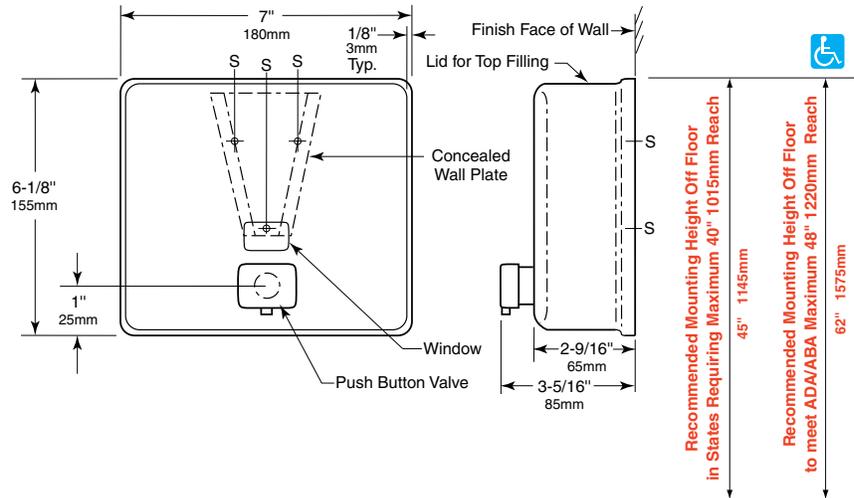

**Recessed Sanitary Napkin Disposal shall be Model B-35303 of Bobrick Washroom Equipment, Inc., Clifton Park, New York; Jackson, Tennessee; Los Angeles, California; Bobrick Washroom Equipment Company, Scarborough, Ontario; Bobrick Washroom Equipment Pty. Ltd., Australia; and Bobrick Washroom Equipment Limited, United Kingdom.**

# ConturaSeries® SURFACE-MOUNTED SOAP DISPENSER

TA-801

Revision Date:

**B-4112**

## MATERIALS:

**Container** — Body is 18-8, Type-304, 20-gauge (1.0mm) stainless steel with satin-finish. Drawn, one-piece, seamless construction. Front has same degree of arc as other Bobrick ConturaSeries washroom accessories. Radius on corners and edges complement other ConturaSeries accessories. Back plate is 22-gauge (0.8mm) stainless steel with 20-gauge (1.0mm) stainless steel mounting bracket attached. Container body and back plate are epoxy-sealed to prevent warping and leakage. Concealed wall plate is 20-gauge (1.0mm) stainless steel. Equipped with a plastic soap refill-indicator window and a locked, hinged stainless steel lid for top filling. Capacity: 40-fl oz (1.2-L).

**Valve** — Black molded plastic push button. Soap head-holding mushroom valve. Stainless steel spring. U-packing seal and duckbill. Antibacterial-soap-resistant plastic cylinder.

## OPERATION:

Corrosion-resistant valve dispenses commercially marketed all-purpose hand soaps. To prevent corrosion, use only chloride-free pH-neutral liquid soaps, non-iodine based soaps and do not use alcohol based sensitizers. Valve operates with one hand, without tight grasping, pinching, or twisting of the wrist, and with less than 5 pounds of force (22.2 N) to comply with accessible design guidelines (including ADAAG in U.S.A.). Window indicates when refill is required. The locked, hinged lid opens for top filling with special key provided. Concealed, vandal-resistant mounting.

## INSTALLATION:

Secure wall plate to the wall with screws furnished at points indicated by an S. Slide mounting bracket of container down onto wall plate and secure unit with furnished locking-screw. For plaster or dry wall construction, provide concealed backing to comply with local building codes, then secure unit with screws furnished. For other wall surfaces, provide fiber plugs or expansion shields for use with screws furnished, or provide 1/8" (3mm) toggle bolts or expansion bolts.

**Note:** Surface-mount the dispenser plumb and true with valve 6" (152mm) to right or left of lavatory center. Provide 4" (102mm) minimum clearance from the lid to the underside of any horizontal projection. Push buttons should be located 44" (1120mm) maximum above the finish floor. Where a high reach is over an obstruction (countertop), the high forward reach shall be 48" (1220mm) maximum where the reach depth is 20" (510mm) maximum. Where the reach depth exceeds 20" (510mm) the high forward reach shall be 44" (1120mm) maximum and the reach depth shall be 25" (635mm) maximum.

## SPECIFICATION:

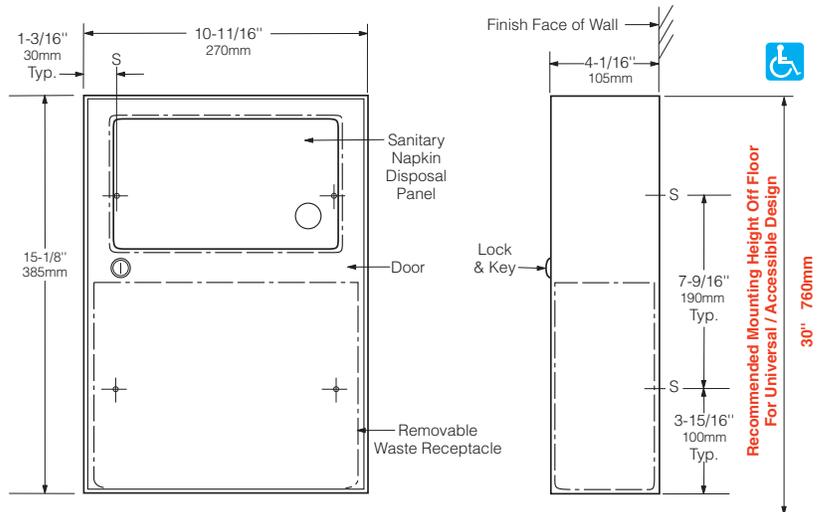

Surface-mounted soap dispenser shall be Type-304 stainless steel with satin-finish. Corrosion-resistant valve shall dispense commercially marketed all-purpose hand soaps. To prevent corrosion, use only chloride-free pH-neutral liquid soaps. Valve shall be operable with one hand and with less than 5 pounds of force (22.2 N) to comply with accessible design guidelines (including ADAAG in U.S.A.). Front of soap dispenser shall have same degree of arc and match other Bobrick ConturaSeries accessories in the washroom. Radius on corners and edges of soap dispenser shall complement other Bobrick ConturaSeries washroom accessories. Container body and back plate shall be epoxy-sealed to prevent warping and leakage. Soap dispenser shall have concealed, vandal-resistant mounting. Locked, hinged stainless steel lid for top filling shall require special key to open. Capacity shall be 40-fl oz (1.2-L).

**Surface-Mounted Stainless Steel Soap Dispenser shall be Model B-4112 of Bobrick Washroom Equipment, Inc., Clifton Park, New York; Jackson, Tennessee; Los Angeles, California; Bobrick Washroom Equipment Company, Scarborough, Ontario; Bobrick Washroom Equipment Pty. Ltd., Australia; and Bobrick Washroom Equipment Limited, United Kingdom.**

# SURFACE-MOUNTED SANITARY NAPKIN DISPOSAL

# B-254

## MATERIALS:

**Cabinet** — 18-8, type-304, heavy-gauge stainless steel. All-welded construction. Exposed surfaces have satin finish.

**Door** — 18-8, type-304, 22-gauge (0.8mm) stainless steel with satin finish. Secured to cabinet with a full-length stainless steel piano-hinge. Equipped with a tumbler lock keyed like other Bobrick washroom accessories.

**Disposal Panels (2)** — 18-8, type-304, 22-gauge (0.8mm) stainless steel with satin finish. Bottom edges hemmed for safety. Secured to door and permanent panel with spring-loaded, full-length stainless steel piano-hinge. Equipped with international graphic symbol identifying sanitary napkin disposal.

**Waste Receptacle** — Leak-proof, rigid molded polyethylene. Removable for servicing. Capacity: 1.2-gal. (4.6-L).

## OPERATION:

Unit is equipped with a self-closing panel covering each disposal opening. Napkin disposal is emptied by opening door with furnished key and removing waste receptacle.

## INSTALLATION:

For partitions with particle-board or other solid core, secure with four #8 x 1-1/4" (4.2 x 32mm) sheet-metal screws (not furnished), or provide through-bolts, nuts, and washers.

For hollow-core metal partitions, provide solid backing into which sheet-metal screws can be secured. If two units are installed back-to-back, then provide threaded sleeves and machine screws for the full thickness of partition.

For plaster or dry wall construction, provide concealed backing to comply with local building coeds, then secure unit with #8 x 1-1/4" (4.2 x 32mm) sheet-metal screws.

For other wall surfaces, provide fiber plugs or expansion shields for use with #8 x 1-1/4" (4.2 x 32mm) sheet-metal screws, or provide 3/16" (5mm) toggle bolts or expansion bolts.

## SPECIFICATION:

Surface-mounted sanitary napkin disposal shall be type-304 stainless steel with all-welded construction; exposed surfaces shall have satin finish. Door shall be secured to cabinet with a full-length stainless steel piano-hinge and equipped with a tumbler lock keyed like other Bobrick washroom accessories. Unit shall have a self-closing panel covering each disposal opening. Panel shall have bottom edge hemmed for safety, be secured to door with spring-loaded, full-length stainless steel piano-hinge, and equipped with international graphic symbols identifying sanitary napkin disposal. Unit shall be furnished with a removable, leak-proof molded polyethylene receptacle. Receptacle shall have a capacity of 1.2-gal. (4.6-L).

**Surface-Mounted Sanitary Napkin Disposal shall be Model B-254 of Bobrick Washroom Equipment, Inc., Clifton Park, New York; Jackson, Tennessee; Los Angeles, California; Bobrick Washroom Equipment Company, Scarborough, Ontario; Bobrick Washroom Equipment Pty. Ltd., Australia; and Bobrick Washroom Equipment Limited, United Kingdom.**

# Technical Data

# InstaDry™ SURFACE-MOUNTED AUTOMATIC HAND DRYER

TA-808  
Revision Date:

# B-7125

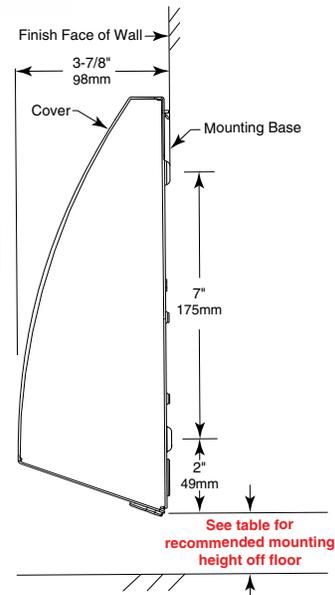

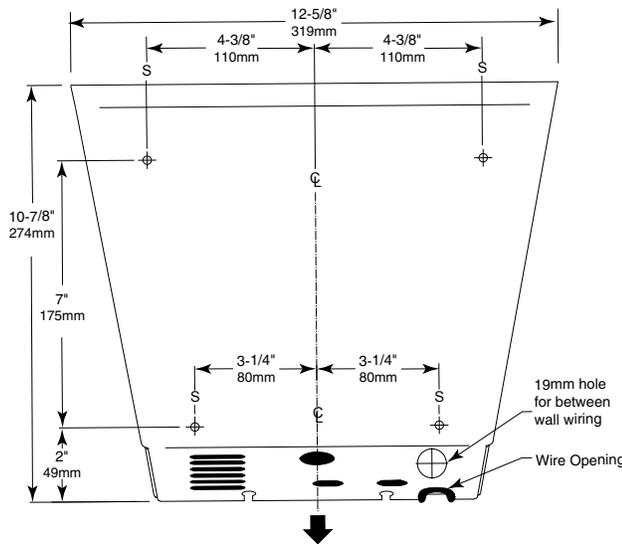

### Universal Voltage:

- 110V-240V, 0.8-1.9 AMP, 50/60 Hz, 202-213 Watts, cULus Listed and CE marked.

### \*RECOMMENDED MOUNTING HEIGHTS

Children's Washrooms, ages 3-4	36"	(915mm)
Children's Washrooms, ages 5-8	40"	(1015mm)
Children's Washrooms, ages 9-12	44"	(1120mm)
Universal Design	40" - 48"	(1015 x 1219mm)

\*Bottom screw hole of mounting base to face floor

### MATERIALS:

**Cover** — 18-8, Type-304 stainless steel 1.2mm thick with #4 satin-finish vertical grain. Air-inlet is vandal-resistant. Cover projects no more than 4" (100mm) from wall and is secured to mounting base with two recessed socket button head cap screws.

**Mounting Base** — 1.5mm SECC punched and formed.

**Motor** — Brushless 24Vdc with built in thermal protection. Ball bearings. Operates at 40,000 RPM.

**Blower** — Backward curved radial bladed impeller in polycarbonate housing.

**Electronic Control** — Infrared sensor automatically turns dryer on when hands are held under air-outlet opening and across path of sensor. Remove hands from path of sensor and dryer stops. Electronic sensor has automatic shutoff approximately 85 seconds after dryer turns on if an inanimate object is placed across air-outlet opening. After inanimate object is removed, electronic sensor automatically resets itself and dryer operates normally.

continued . . .

**OPERATION:**

Infrared sensor automatically turns dryer on when hands are held under air-outlet opening and across path of sensor. Remove hands from path of sensor and dryer stops. Electronic sensor has automatic shutoff approximately 85 seconds after dryer turns on if an inanimate object is placed across air-outlet opening. After inanimate object is removed, electronic sensor automatically resets itself and dryer operates normally.

**5-Year Limited Warranty** — In addition to Bobrick's one-year guarantee, Bobrick extends a limited 5-year warranty from the date of purchase on all parts for model B-7125. This warranty is limited to the repair or exchange of defective parts at the option of Bobrick and is only extended to the original owner of the installed unit against defects in factory workmanship or material under normal use and service.

**INSTALLATION:**

**Wall preparation** — Locate mounting base on wall using template provided. For brick, stone, and concrete walls drill four 0.315" (8mm) holes to suit provided wall plugs 0.315" x 1-1/4" (8 x 45mm) and screws # 10 x 2" (4.8 x 50mm) long. See template for wall plug and screw installation details. For plaster or dry wall construction, provide concealed backing to comply with local building codes and secure with four #10 (4.8) round-head sheet-metal screws or 3/16" (5mm) toggle bolts (not furnished). Provide electrical service from nearest distribution panel to dryer mounting base in conformance with local electrical codes.

**Dryer Wiring Instructions:**

- 1. For 115-Volt Dryers** — Connect ground wire to ground terminal marked  $\equiv$ , the black or hot wire to terminal marked L1, and neutral or white wire to terminal marked N.
- 2. For 208-240-Volt Dryers** — Connect ground wire to ground terminal marked  $\equiv$  and the 208- or 240-volt wires to terminal marked L1 and L2.
- 3.** This is a class 1 product and requires grounding.

**Notes:** Electronic sensor in Automatic dryers will pick up movement within 6" (150mm) of the air-outlet opening. Use caution when choosing location for Automatic dryers in confined areas. Consider proximity to doorways and other traffic areas. Bobrick automatic hand dryers should be installed at least 19-3/4" (500mm) above any projection or horizontal surface which may interfere with the operation of the automatic sensor.

**Replacement Parts:**

Cover	7125-150
Controller	7125-25
Controller Loom (Wiring)	7125-30

**SAFETY WARNING:**

**Installation and wiring must conform to current local regulations and building codes. Unit must be installed by a qualified electrician. Turn off electrical power supply before making electrical connections. If the unit fails or malfunctions, it should be disconnected from the power supply and a qualified electrician should be called. To avoid potential injury, the building owner or maintenance personnel should remove the unit from service if the grille is missing or damaged.**

**SPECIFICATION:**

Surface-mounted high-speed hand dryer shall have an energy consumption of only 200 watts. Unit shall have 18-gauge (1.2mm) thick Type-304 stainless steel cover with #4 satin finish vertical grain. The slim profile cover shall project no more than 3 7/8" (98mm) from the finished face of wall to comply with accessible design guidelines (including ADAAG in the U.S.A.) and have a dry time of less than 12 seconds. Dryer shall be universal, to accommodate voltages between 110-240V. Dryer shall be secured to concealed mounting bracket with vandal-resistant screws. Electronic sensor automatically turns dryer on when hands are held under air-outlet opening and across path of sensor. Dryer turns off automatically when hands are removed. Sensor automatically shuts dryer off approximately 85 seconds after dryer turns on if an inanimate object is placed across air-outlet opening. After object is removed, electronic sensor automatically resets itself and dryer operates normally. Unit is cULus listed and is CE marked. Dryer has a limited 5-year warranty on all parts.

**InstaDry Surface-Mounted Automatic Hand Dryer shall be Model B-7125 of Bobrick Washroom Equipment, Inc., Clifton Park, New York; Jackson, Tennessee; Los Angeles, California; Bobrick Washroom Equipment Company, Scarborough, Ontario; Bobrick Washroom Equipment Pty. Ltd., Australia; and Bobrick Washroom Equipment Limited, United Kingdom.**

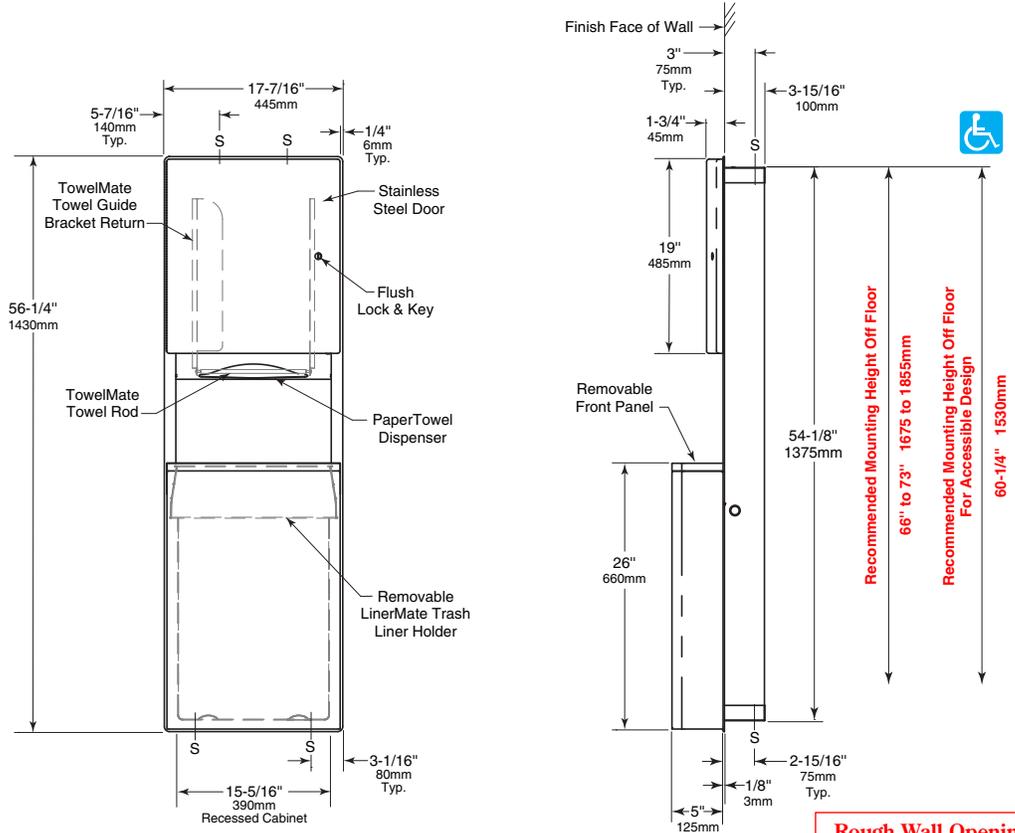

# Technical Data

# ConturaSeries® RECESSED PAPER TOWEL DISPENSER AND WASTE RECEPTACLE

TA-809

Revision Date:

# B-43944

**Rough Wall Opening**  
 16" (405mm) wide  
 54-3/4" (1390mm) high  
 4" (100mm) minimum  
 recessed depth

### MATERIALS:

**Cabinet** — 18-8, type-304, 22-gauge (0.8mm) stainless steel. All-welded construction. Exposed surfaces have satin-finish.

**Flange** — 18-8, type-304, 22-gauge (0.8mm) stainless steel with satin-finish. Drawn, one-piece, seamless construction. Radius on corners and return edges complement corners and edges of door and waste receptacle.

**Door** — 18-8, type-304, 18-gauge (1.2mm) stainless steel with satin-finish. Drawn, one-piece, seamless construction. Front of door has same degree of arc as front of waste receptacle and other Bobrick ConturaSeries washroom accessories. Radius on corners and edges of door match side edges of waste receptacle and other ConturaSeries accessories. Secured to cabinet with a full-length stainless steel piano-hinge. Equipped with a stainless steel cable door-swing limiter and flush tumbler lock keyed like other Bobrick washroom accessories.

**Paper Towel Dispenser** — 18-8, type-304, 22-gauge (0.8mm) stainless steel with satin-finish. Cabinet inside equipped with 90° return towel guide angle to prevent paper towels from falling forward out when door is opened for servicing. Rounded towel tray has hemmed opening to dispense paper towels without tearing. Unit equipped with TowelMate consisting of a 90° return towel guide angle inside cabinet to prevent paper towels from falling forward out when door is opened for servicing and a Nylon Rod across the center of the towel tray to dispense paper towels one at a time. Waste receptacle shall have a formed, 18-gauge (1.2mm), one-piece, seamless, removable front panel with top edge hemmed. Capacity: 600 C-fold or 800 multifold paper towels.

**TowelMate® Towel Rod Assembly** — Consisting of a round Nylon Rod and (2) stainless steel Rod Screws for attachment, is field replaceable. Stainless steel Stop Screws (2) lock TowelMate Towel Rod assembly in place.

To retrofit TowelMate into existing installed units manufactured prior to April 2010, order TowelMate Accessory Bobrick Part No. 3944-130

continued . . .

**Waste Receptacle** — 18-8 S, type-304, 18-gauge (1.2mm) stainless steel with satin-finish. Formed, one-piece, seamless construction. Removable front panel has same degree of arc as front of paper towel dispenser door and other Bobrick ConturaSeries washroom accessories. Top edge hemmed for safe handling. Radius on side edges of waste receptacle match corners and edges of door and other ConturaSeries accessories. Secured to cabinet with two keyholes over studs on bottom and two tamper-resistant setscrews on top. Capacity: 15.0-gal. (56.8-L).

**LinerMate® Trash Liner Holder** — Unit equipped with LinerMate trash liner holder fabricated with molded plastic trash liner holder sleeve and a 20-gauge (0.91mm), U-shaped support strap; riveted construction. Liner holder shall have an arc at front and same shape as inside of waste receptacle area. LinerMate facilitates installation and removal of disposable trash liners and retains liner inside waste receptacle.

To retrofit LinerMate into existing installed units manufactured prior to December 2009, order LinerMate Accessory Bobrick Part No. 43944-134

#### **OPERATION:**

Paper towel dispenser will dispense C-fold or multifold paper towels without adjustment or use of adapters. Cable door-swing limiter prevents damage to washroom accessories and walls. Load paper towels in towel tray, and then pull one sheet of paper towel over the TowelMate towel rod and out to conceal rod and start dispense. Front of waste receptacle panel is removable for cleaning cabinet interior. To insert disposable trash liner, lift LinerMate trash liner holder up and forward and rest over edge of waste receptacle front panel with the bottom notches of LinerMate engaged on top front edge of receptacle. Place disposable trash liner inside LinerMate and fold disposable trash liner over molded sleeve. Tie a knot in the corner of the disposable trash liner, then place LinerMate with disposable trash liner back into receptacle. To empty, gather disposable trash liner from LinerMate liner holder sleeve and lift disposable trash liner up.

#### **INSTALLATION:**

Provide framed rough wall opening 16" wide x 54-3/4" high (405 x 1390mm). Minimum recessed depth required to finish face of wall is 4" (100mm). Allow clearance for construction features that may protrude into rough wall opening from opposite wall. Coordinate with mechanical engineer to avoid pipes, vents, and conduits. If unit projects above top of wainscot, provide aluminum channel or other filler to eliminate gap between flange and finish face of wall. Mount unit in wall opening with shims between framing and cabinet at all points indicated by an S, then secure unit with #8 x 1-1/4" (4.2 x 32mm) screws (not furnished).

#### **SPECIFICATION:**

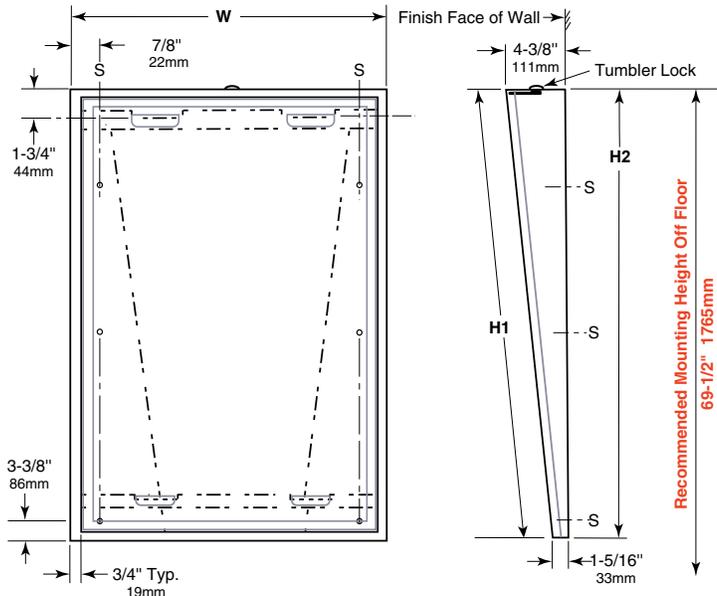

Recessed paper towel dispenser and waste receptacle shall be type-304 stainless steel with all-welded construction; exposed surfaces shall have satin-finish. Front of paper towel dispenser door and waste receptacle shall have same degree of arc and match other Bobrick ConturaSeries accessories in the washroom. Radius on corners and edges of flange, door, and waste receptacle shall complement other Bobrick ConturaSeries washroom accessories. Flange shall be drawn, one-piece, seamless construction. Paper towel dispenser door shall be drawn, 18-gauge (1.2mm), one-piece, seamless construction; secured to cabinet with a full-length stainless steel piano-hinge; and equipped with a stainless steel cable door-swing limiter and flush tumbler lock keyed like other Bobrick washroom accessories. Paper towel dispenser shall dispense 600 C-fold or 800 multifold paper towels. Unit equipped with TowelMate consisting of a 90° return towel guide angle inside cabinet to prevent paper towels from falling forward out when door is opened for servicing and a Nylon Rod across the center of the towel tray to dispense paper towels one at a time. Waste receptacle shall have a formed, 18-gauge (1.2mm), one-piece, seamless, removable front panel with top edge hemmed. Unit equipped with LinerMate trash liner holder fabricated with molded plastic trash liner holder sleeve and a 20-gauge (0.91mm), U-shaped support strap; riveted construction. Liner holder shall have an arc at front and same shape as inside of waste receptacle area. LinerMate facilitates installation and removal of disposable trash liners and retains liner inside waste receptacle. Capacity of waste receptacle shall be 15.0-gal. (56.8-L).

**Recessed Paper Towel Dispenser And Waste Receptacle shall be Model B-43944 of Bobrick Washroom Equipment, Inc., Clifton Park, New York; Jackson, Tennessee; Los Angeles, California; Bobrick Washroom Equipment Company, Scarborough, Ontario; Bobrick Washroom Equipment Pty. Ltd., Australia; and Bobrick Washroom Equipment Limited, United Kingdom.**

# TILT MIRROR WITH STAINLESS STEEL FRAME

# B-293 SERIES

## STANDARD STOCK SIZES

MODEL NO.	MIRROR SIZE		OVERALL SIZE	
	W	H1	W	H2
B-293 1830	18" (46cm)	30" (76cm)	18" (46cm)	30-3/16" (77cm)
B-293 1836	18" (46cm)	36" (91cm)	18" (46cm)	36-3/16" (92cm)
B-293 2436	24" (61cm)	36" (91cm)	24" (61cm)	36-3/16" (92cm)

Other sizes up to 40" x 40" (101 x 122cm) or 48" x 36" (122 x 91cm) are available on special order; minimum size available, 16" x 24" (41 x 61cm). Design not as shown

## MATERIALS:

**Mirror Frame** — 18-8, type 304, heavy-gauge stainless steel,  $3/4"$  x  $3/4"$  (19 x 19mm) angle with vertical-grain satin finish. One piece, roll-formed construction forms continuous integral stiffener on all sides. Bevel design on front of angle holds frame tightly against mirror. Corners of mirror frame are heliarc welded, ground and polish smooth. Galvanized steel back is fastened to frame with concealed screws and equipped with integral horizontal hanging brackets near the top and bottom of the mirror for hanging the mirror and to prevent the mirror from pulling away from the wall frame.

**Wall Frame** — 18-8, type 304, heavy-gauge stainless steel with satin finish. Tapers from  $4\text{-}3/8"$  (111mm) depth at top to  $1\text{-}5/16"$  (33mm) depth at bottom. Wall frame furnished with tumbler lock to secure mirror to wall frame.

*Designer's Note:* Type 304 stainless steel provides superior corrosion resistance, compared to 400 Series stainless steel, against environmental moisture, hose-down maintenance and strong cleaning solutions.

**Mirror** — No. 1 quality,  $1/4"$  (6mm) select float glass, selected for silvering; electrolytically copper-plated by the galvanic process, guaranteed for 15 years against silver spoilage. All edges are polished and protected by plastic filler strips; back is protected by full-size, shock-absorbing, water-resistant, nonabrasive,  $1/8"$  (3mm) thick polystyrene padding.

## OPERATION:

Mirror is designed to provide full visibility for wheelchair patients in hospitals and nursing homes.

## INSTALLATION:

For complete installation instructions please follow 293-69 installation instruction sheet.

## SPECIFICATION:

Tilt mirror assembly shall consist of a mirror and a separate wall frame with built-in wall hanger. Wall frame furnished with tumbler lock for securing mirror to wall frame. Tilt mirror frame shall be type 304 stainless steel with beveled front to hold frame tightly against mirror; corners shall be welded, ground, and polished smooth. Wall frame shall be type 304 stainless steel designed with horizontal locking bars to secure mirror to wall frame. All exposed surfaces shall have satin finish with vertical grain. Select float glass mirror shall be guaranteed for 15 years against silver spoilage. All edges shall be protected by plastic filler strips. Back shall be protected by full-size, shock-absorbing, water-resistant, nonabrasive,  $1/8"$  (3mm) thick polystyrene padding.

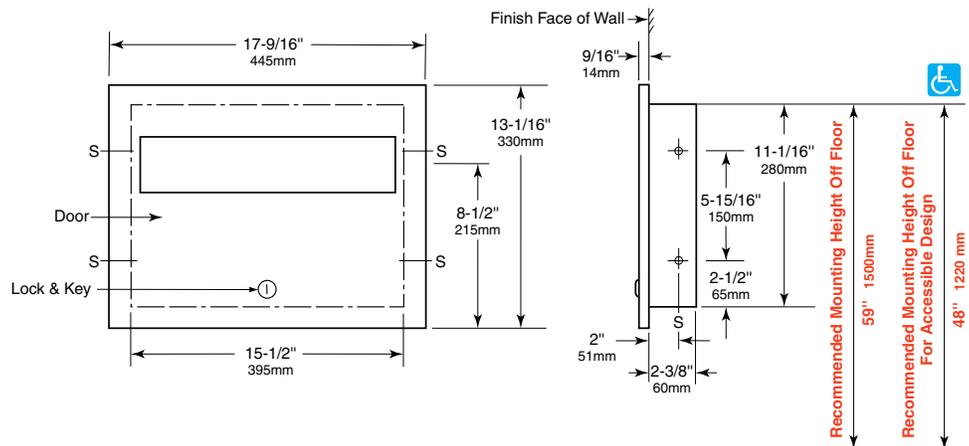

Tilt Mirror shall be Model B-293 \_\_\_\_\_ (insert width and height) of Bobrick Washroom Equipment, Inc., Clifton Park, New York; Jackson, Tennessee; Los Angeles, California; Bobrick Washroom Equipment Company, Scarborough, Ontario; Bobrick Washroom Equipment Pty. Ltd., Australia; and Bobrick Washroom Equipment Limited, United Kingdom.

# RECESSED TOILET-SEAT-COVER DISPENSER

# B-3013

**Rough Wall Opening**  
 15-7/8" (405mm) wide  
 11-7/16" (290mm) high  
 2-3/4" (70mm) minimum  
 recessed depth

### MATERIALS:

**Cabinet** — 18-8, Type-304, heavy-gauge stainless steel. All-welded construction.

**Door** — 18-8, Type-304, 18-gauge (1.2mm) stainless steel with satin finish. 9/16" (14mm) 90° return for maximum rigidity. Secured to cabinet with a concealed, full-length stainless steel piano-hinge. Equipped with a tumbler lock keyed like other Bobrick washroom accessories.

### OPERATION:

Dispenses single- or half-fold paper toilet seat covers. To fill dispenser, door unlocks with key provided. Capacity: 500 toilet seat covers.

### INSTALLATION:

Provide framed rough wall opening 15-7/8" wide x 11-7/16" high (405 x 290mm). Minimum recessed depth required from finish face of wall is 2-3/4" (70mm). Allow clearance for construction features that may protrude into rough wall opening from opposite wall. Coordinate with mechanical engineer to avoid pipes, vents, and conduits in wall. Mount cabinet with shims between framing and cabinet at all points indicated by an S, then secure unit with four #8 x 1-1/4" (4.2 x 32mm) sheet-metal screws (not furnished).

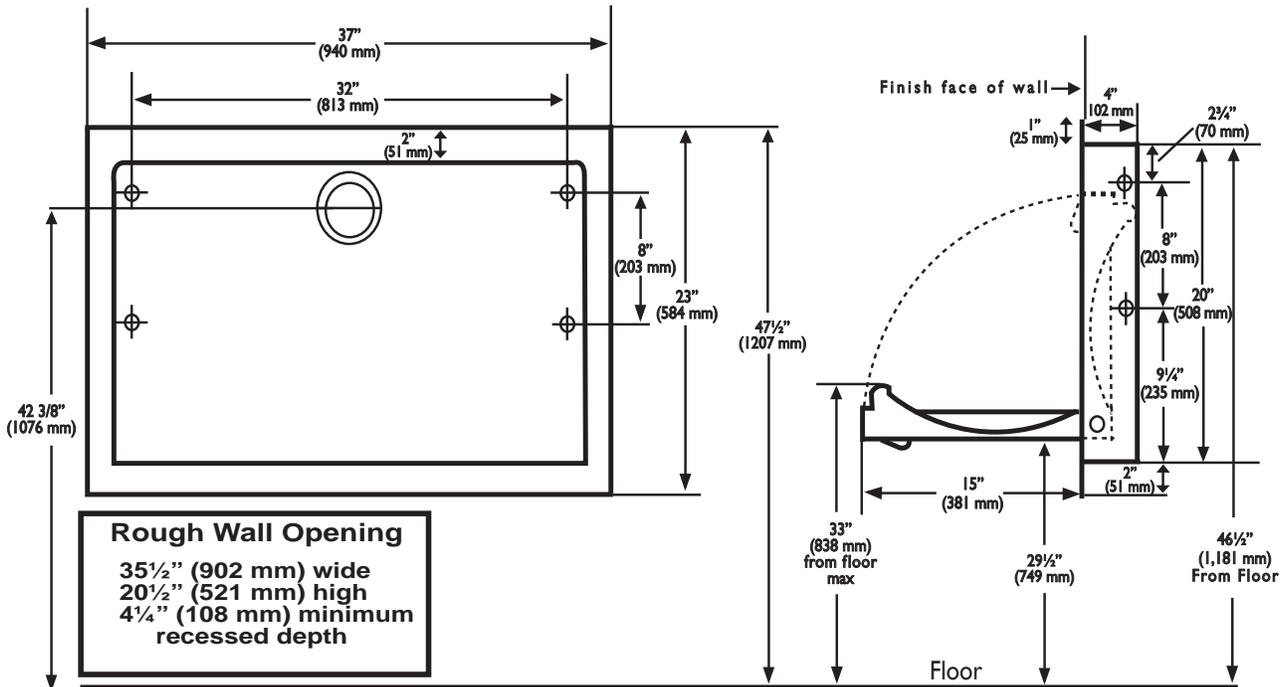

### SPECIFICATION:

Recessed toilet-seat-cover dispenser shall be Type-304 stainless steel with all-welded construction; exposed surfaces shall have satin finish. Door shall be 18 gauge (1.2mm); have 9/16" (14mm) 90° return edges; be secured to cabinet with a concealed, full-length stainless steel piano-hinge; and equipped with a tumbler lock keyed like other Bobrick washroom accessories. Dispenser shall have a minimum capacity of 500 paper toilet seat covers.

**Recessed Toilet-Seat-Cover Dispenser shall be Model B-3013 of Bobrick Washroom Equipment, Inc., Clifton Park, New York; Jackson, Tennessee; Los Angeles, California; Bobrick Washroom Equipment Company, Scarborough, Ontario; Bobrick Washroom Equipment Pty. Ltd., Australia; and Bobrick Washroom Equipment Limited, United Kingdom.**

# KOALA KARE PRODUCTS

## KB110-SSRE HORIZONTAL RECESSED MOUNTED STAINLESS STEEL FINISH BABY CHANGING STATION

**MATERIALS:**

18 gauge, type 304 satin stainless steel exterior finish with FDA approved blow molded high-density grey polyethylene with Microban® antimicrobial interior. Reinforced full-length steel-on-steel hinge mechanism, with 11-gauge steel mounting plates and mounting hardware included. Molded in graphics and safety messages in six languages. Contoured changing surface area is 442 sq. in (2851 sq. cm) and comes complete with nylon safety straps and bag hooks.

**OPERATION:**

Concealed pneumatic cylinder and hinge structure provides controlled, slow opening and closing of bed. High-density polyethylene is easy to clean and resists odors and bacterial growth. Complies with ASTM static load performance requirements when properly installed. Built-in liner dispenser holds approximately 25 KB150-99 sanitary liners.

Warning: To ensure that the unit supports the intended loads, baby changing stations must be properly installed according to the manufacturer's instructions.

**SPECIFICATION:**

Baby changing station body shall have 18 gauge, type 304 satin stainless steel exterior finish with high-density grey polyethylene interior. Design of unit shall be recess-mounted. Unit shall be equipped with a pneumatic cylinder for controlled opening and closing of bed. Bed shall be secured to back plate with a concealed, full-length steel-on-steel hinge. Unit shall have Microban® antimicrobial embedded into plastic material. No hinge structure shall be exposed on interior or exterior surfaces. Unit shall have 11-gauge steel mounting plates with mounting hardware included. Unit shall conform to ASTM F 2285-04 Standard Consumer Safety Performance Specification for Diaper Changing Tables for Commercial Use, ANSI Z535.4 Product Safety Signs and Labels, and ASTM G21 Antifungal Standards or local code if more stringent installation requirements are applicable for barrier-free accessibility. Bed shall have smooth concave changing area with a nylon safety strap and two hooks for bags or purses. Unit shall have a built-in Liner Dispenser for use with 3-ply chemical free biodegradable sanitary liners, universal instruction graphics and safety messages in 6 languages. Unit shall be backed by manufacturer's 5-year limited warranty on materials and workmanship and include a provision for replacement caused by vandalism. Unit shall be manufactured in the U.S.A.

## INSTALLATION:

To ensure proper installation and compliance to building codes, it is recommended that a qualified person or carpenter perform the installation of the unit. The unit must be properly installed onto a permanent wall that is capable of supporting significant weight, and can accommodate the supplied installation hardware.

1. Remove changing station from the shipping container and check for any freight damage. Identify the best location for installing the unit. Hold the unit in place and open the bed. Make sure you have taken the operating clearance into consideration.

2. Select the wall area where the unit will be installed. Measure from the floor  $46\frac{1}{2}$ " (1118 mm) on stud center and mark the wall. Hold the unit in place to verify the alignment. Mark rough opening  $35\frac{1}{2}$ " W x  $20\frac{1}{2}$ " H (902 mm x 521 mm) and cut a hole in the wall with a minimum depth of  $4\frac{1}{4}$ " (108 mm) as measured from the finished surface of the wall (ie: tile, drywall, etc). Construct mounting frame as indicated in the illustration. If the wall surface is masonry or tile over wood studs, use caution when cutting rough opening.

3. The unit will be mounted using four  $\frac{1}{4}$ " x 3" wood screws through side holes as shown in illustration.

4. Place the unit into the recessed area and insert the screws and flat washers to hold the unit in place. It may be necessary to adjust the level of unit by using a shim on the top right or left side of the unit before tightening securely to the studs.

*The illustrations and descriptions herein are applicable to production as of the date of this Technical Data Sheet. The manufacturer reserves the right to, and does from time to time, make changes and improvements in designs and dimensions without notice.*
